## THE COMMONWEALTH OF MASSACHUSETTS

## INFORMATION STATEMENT

January 6, 2022
This Information Statement, together with its Exhibits (included by reference as described below), is furnished by The Commonwealth of Massachusetts (the Commonwealth). It contains certain fiscal, financial and economic information concerning the Commonwealth and its ability to meet its financial obligations. This Information Statement contains information only through its date, or as otherwise provided for herein, and should be read in its entirety.

The ability of the Commonwealth to meet its obligations will be affected by future social, environmental and economic conditions, among other things, as well as by legislative policies and the financial condition of the Commonwealth. Many of these conditions are not within the control of the Commonwealth.

Exhibit A to this Information Statement is the Statement of Economic Information as of January 4, 2022. Exhibit A sets forth certain economic, demographic and statistical information concerning the Commonwealth. The information contained in Exhibit A speaks as of its date. Due to the ongoing nature of the COVID-19 pandemic, the Statement of Economic Information does not yet reflect all of the effects of the COVID-19 pandemic on the Commonwealth. See "Special Disclosure Regarding COVID-19 Matters."

Exhibits B and C, respectively, are the Commonwealth's Statutory Basis Financial Report for the year ended June 30, 2021 and the Commonwealth's Annual Comprehensive Financial Report (reported in accordance with generally accepted accounting principles (GAAP)) for the year ended June 30, 2020.

Specific reference is made to Exhibits A, B and C, copies of which are attached hereto and have also been filed with the Municipal Securities Rulemaking Board (MSRB) through its Electronic Municipal Market Access System (EMMA). The financial statements are also available at the home page of the Comptroller of the Commonwealth located at http://www.macomptroller.org by clicking on "Financial Reports" on the Comptroller's homepage.

## SPECIAL DISCLOSURE REGARDING COVID-19 MATTERS

If and when included in this Information Statement, the words "expects," "forecasts," "projects," "intends," "anticipates," "estimates," "assumes" and analogous expressions are intended to identify forward looking statements. Any such statements inherently are subject to a variety of risks and uncertainties, certain of which are beyond the control of the Commonwealth, including the impacts from the COVID-19 pandemic, as discussed below, that could cause actual results to differ materially from those that have been projected. Due to the unprecedented nature of the COVID-19 pandemic and the mitigation measures implemented, prior fiscal year, interim and year-end results may not be indicative of current or future fiscal year, interim and year-end results.

In response to the outbreak of COVID-19, a respiratory disease caused by a new strain of coronavirus, and the declaration by the World Health Organization on March 11, 2020 of a COVID-19 pandemic, in March 2020 Governor Baker declared a state of emergency in the Commonwealth due to COVID-19. Over the following eight weeks Governor Baker's administration undertook a number of mitigation measures in response to COVID-19, including emergency orders closing certain education programs and non-essential businesses, a number of social distancing mandates, travel advisories, and eviction moratoriums, as well as tax relief measures postponing the collection of certain taxes due in fiscal 2020. All of these measures resulted in widespread economic disruption throughout the Commonwealth.

As the COVID-19 pandemic continued to evolve, Governor Baker's administration curtailed certain measures while retaining the flexibility to address future waves of the pandemic. In May 2020, the Governor announced a four-phase approach to reopening the Commonwealth, indicating that decisions and timing on all
phases would be influenced by public health metrics. Between May and October 2020, as public health metrics improved, the phased reopening plan was implemented in steps, and certain mitigation measures were curtailed. By October 2020, the Commonwealth had proceeded to step 2 of Phase III of the plan. In December 2020, the Commonwealth rolled back its reopening requirements and standards to step 1 of Phase III in response to an increase in new COVID-19 infections and hospitalizations following the 2020 Thanksgiving holiday. As a result, indoor capacity across a broad range of sectors was reduced, several workplace restrictions were tightened, and certain businesses were required to close, including indoor performance venues and certain high-contact indoor recreational businesses. In December 2020, the Commonwealth also began phased vaccination efforts across Massachusetts.

As public health measures continued to trend in a positive direction, and the Commonwealth experienced significant declines in average daily COVID-19 cases and hospitalizations, and increasing rates of vaccination within the Commonwealth, the Administration continued to implement the reopening plan, and by the end of May 2021, nearly all COVID-19 restrictions were lifted and all industries were permitted to open. On June 15, 2021, the state of emergency in the Commonwealth related to COVID-19 was terminated. Based on information submitted to the Massachusetts Immunization Information System as of December 29, 2021, and using the University of Massachusetts Donahue Institute 2019 Population Estimates, more than 5.0 million people within the Commonwealth, or approximately $73.7 \%$ of the Commonwealth's population, are fully vaccinated.

The Administration is continuing to monitor public health data relating to COVID-19 and expects to take additional measures to control the spread of COVID-19 within the Commonwealth, if needed, as new variants of the virus emerge. At this time, the Commonwealth cannot predict whether additional measures will be needed to control the spread of COVID-19 or the nature or duration of any such measures.

The ultimate impact of the COVID-19 pandemic on the Commonwealth's economy remains unknown. In response to the pandemic, international, federal, state and local governments, as well as private businesses and organizations, implemented numerous measures intended to mitigate the spread and effects of COVID-19. The continued spread of COVID-19, the mitigation measures implemented, and the responses of individuals, businesses, and organizations to the disease and the mitigation measures implemented have caused and may continue to cause, severe disruptions in global, national, and local economies, as well as to global financial markets and the U.S. stock and bond markets. Many businesses have experienced and may continue to experience decreases in operations and revenues. The impacts of COVID-19 resulted in unprecedented rates of unemployment in the Commonwealth, causing, among other things, a depletion of the Commonwealth's Unemployment Trust Fund and the need for the Commonwealth to borrow federal funds to ensure a continuation of unemployment benefits, which Commonwealth employers will need to repay. See "Unemployment Insurance Claims and Trust Fund Solvency" below. The extent to which businesses that have completely or partially closed will reopen, travel and tourism activity will return to pre-pandemic levels, and businesses and organizations will allow employees to work from home is still unknown. The extent of these and other impacts on the Commonwealth's economy will depend on future developments and numerous factors, many of which are beyond the Commonwealth's control.

## Fiscal Relief Received by the Commonwealth

The U.S. Congress has enacted six economic assistance and relief packages to date related to the COVID19 pandemic. On March 18, 2020, the Families First Coronavirus Response Act (Families First Act) was enacted into law which, among other things, included an emergency $6.2 \%$ increase to the Medicaid Federal Medical Assistance Percentage (FMAP), the federal matching rate for states and territories, during the public health emergency. This FMAP increase provided the Commonwealth with $\$ 546$ million in additional revenue during fiscal 2020.

On March 27, 2020, the federal Coronavirus Aid, Relief and Economic Security Act (CARES Act) was enacted, which provided $\$ 2$ trillion of aid for a variety of programs, including approximately $\$ 150$ billion for state and local governments; the Commonwealth received $\$ 2.461$ billion and two local government units received funding. The Commonwealth has utilized the CARES Act and other available federal funds to pay for the state's emergency expenditures relating to COVID-19, including expenditures for personal protective equipment, medical equipment, and support for hospitals in managing the care of COVID-19 patients, and to provide necessary services
to vulnerable populations, such as supporting food banks and seniors who might not be able to obtain sufficient food and supplies.

On March 27, 2020, former President Trump issued a major disaster declaration for the Commonwealth, superseding an earlier emergency declaration and making federal funding available to Commonwealth and eligible local entities for emergency protective measures, including reimbursements from the Federal Emergency Management Agency's Public Assistance program (FEMA PA) for the costs of emergency protective measures. As of January 3, 2022, the Commonwealth has been awarded over $\$ 469$ million in reimbursement grants.

On December 27, 2020, federal legislation was signed into law providing $\$ 900$ billion in aid, providing for, among other things, small business assistance through additional funding for forgivable Paycheck Protection Program (PPP) loans, funding for Economic Injury Disaster Loans (EIDL) and Small Business Administration debt relief, a continuation of expanded and enhanced unemployment insurance, and funding to support education, public health, transportation, rental assistance, food security needs, and other items. While this federal legislation did not provide direct funding to state and local governments, its enactment provided the Commonwealth with additional financial flexibility by extending the deadline for spending funds available through the CARES Act Coronavirus Relief Fund to December 31, 2021.

On January 21, 2021, President Biden issued Executive Orders that increased the FEMA PA reimbursement rate from $75 \%$ to $100 \%$ for eligible costs incurred during the COVID-19 emergency and expanded the scope of eligible costs for certain items, such as school reopening costs.

On March 11, 2021, the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (ARPA) was signed into law. The Commonwealth has received $\$ 5.28$ billion under ARPA through the Coronavirus State Fiscal Recovery Fund (CSFRF) to support certain costs resulting from the public health emergency caused by COVID-19 and other eligible uses. The Commonwealth allocated approximately $\$ 394.1$ million from the CSFRF to provide additional aid to four of the Commonwealth's hardest-hit communities, create a temporary COVID-19 Emergency Paid Sick Leave program to eliminate job-related obstacles to recovering from, quarantining for, and/or being vaccinated against COVID-19 for all residents, and fund a lottery to motivate all Massachusetts residents to be vaccinated against COVID-19. Further, Massachusetts county and municipal governments have been allocated $\$ 3.4$ billion in direct support under the ARPA.

On June 28, 2021, Governor Baker signed legislation making the balance of the CSFRF - approximately $\$ 4.9$ billion - subject to legislative appropriation. At the same time, the Governor proposed certain projects to the Legislature that would use $\$ 2.9$ billion of this funding. On December 13, 2021, the Governor signed legislation appropriating $\$ 2.55$ billion from the CSFRF toward a variety of programs and projects. See "FISCAL 2022."

## Unemployment Insurance Claims and Trust Fund Solvency

As a result of the COVID-19 pandemic, the unemployment rate in Massachusetts increased significantly to its peak of $16.4 \%$ (seasonally adjusted) in April 2020, compared to 2.7\% (seasonally adjusted) in March 2020. During fiscal 2021, the unemployment rate began to decline, and in November 2021 the unemployment rate was $5.4 \%$ (seasonally adjusted). A total of approximately 1.14 million initial claims for regular Unemployment Insurance (UI) were filed from July 2020 through November 2021. In November there were approximately 230,000 continued claimants. As a result of the increase in UI claims, the Commonwealth applied to the U.S. Department of Labor for repayable advances to the Commonwealth's Unemployment Trust Fund account from the federal unemployment account, in accordance with the provisions of Section 1201 of the Social Security Act, in order to assure payment of all compensation due. As of November 30, 2021, the Commonwealth had outstanding approximately $\$ 2.3$ billion in federal UI advances. Governor Baker's administration will continue to monitor unemployment claims and request federal advances as necessary to ensure payment of all compensation due. The last federal advance made was in June 2021.

On April 1, 2021 Governor Baker signed into law legislation that provides UI rate relief to Commonwealth employers by maintaining the employer experience rate for calendar years 2021 and 2022 at rate schedule " $E$ " and thereby slowing the annual employer UI contribution growth rate, which would have occurred due in part to the decrease in the solvency of the UI trust fund caused by the COVID-19 pandemic. The legislation also authorizes the

Commonwealth to issue special obligation bonds for the purposes of repaying the federal advances made to the Commonwealth from the federal unemployment account for fiscal years 2020 to 2025 and establishing trust fund solvency. Any such special obligation bonds issued would be secured by a special assessment on employers; no such bonds have been issued to date.

On May 28, 2021, Governor Baker signed into law legislation that provides additional UI rate relief to Commonwealth employers by reducing calendar year 2021 employer UI rates further. Costs associated with this reduction will be repaid by employers over time through an employer special assessment and the regular UI ratesetting process.

The legislation appropriating the ARPA and Fiscal 2021 budget surplus funding signed by the Governor on December 13, 2021 includes $\$ 500$ million of funding for the Unemployment Insurance Trust Fund.

## Other Actions

The legislation signed by Governor Baker on April 1, 2021 also created a number of tax relief measures, such as making the first $\$ 10,200$ in unemployment compensation received in each of tax years 2020 and 2021 exempt from income tax for taxpayers below $200 \%$ of the Federal Poverty Level, excluding funding received from certain federal programs from taxable income for individual taxpayers in tax year 2020, waiving penalties for failure to timely remit taxes on UI compensation received in tax year 2020, and extending the 2020 tax filing deadline for individual taxpayers from April 15, 2021 to May 17, 2021, consistent with the extension by the federal government of the deadline for filing individual federal tax returns.

The legislation signed by the Governor on December 13, 2021 excludes federal PPP loans, EIDL advances, and certain debt relief subsidies paid by the Small Business Administration, shuttered venue operator grants, and restaurant revitalization grants from taxable income for individual taxpayers for tax years beginning on or after January 1, 2021. The legislation also excludes emergency COVID-19 small business relief, including grants and any portion of a loan that is subsequently forgiven, administered through the Massachusetts Growth Capital Corporation after March 10, 2020 from taxable income for both individual and corporate excise taxpayers for taxable years beginning on or after January 1, 2021. The measures did not have a material impact on the Commonwealth's budget for fiscal 2021 and are not expected to have a material impact on the Commonwealth's budget for fiscal 2022, as the tax benchmarks used for budgeting purposes did not assume tax revenue associated with federal or state relief programs.

## THE GOVERNMENT

The government of the Commonwealth is divided into three branches: the Executive, the bicameral Legislature, and the Judiciary.

## Executive Branch

Governor. The Governor is the chief executive officer of the Commonwealth. Other elected members of the executive branch are the Lieutenant Governor (elected with the Governor), the Treasurer and Receiver-General (State Treasurer), the Secretary of the Commonwealth (State Secretary), the Attorney General and the State Auditor. All are elected to four-year terms. The terms of the current office holders began in January 2019.

The Executive Council, also referred to as the "Governor's Council," consists of eight members who are elected to two-year terms in even-numbered years. The Executive Council is responsible for the confirmation of certain gubernatorial appointments, particularly judges, and must approve all warrants prepared by the Comptroller for payment by the State Treasurer.

Also within the Executive Branch are certain independent offices, each of which performs a defined function, such as the Board of Library Commissioners, the Office of Campaign and Political Finance, the Office of the Comptroller, the Office of the Inspector General and the State Ethics Commission.

Governor's Cabinet. The Governor's Cabinet, which assists the Governor in administration and policy making, comprises the secretaries who head the eight Executive Offices, which are the Executive Office for Administration and Finance, the Executive Office of Health and Human Services, the Executive Office of Public Safety and Security, the Executive Office of Housing and Economic Development, the Executive Office of Labor and Workforce Development, the Executive Office of Energy and Environmental Affairs, the Executive Office of Education, and the Executive Office of Technology Services and Security. In addition, the Secretary of Transportation, who is the chief executive of the Massachusetts Department of Transportation (MassDOT) and chairs MassDOT's board of directors, is a member of the Governor's Cabinet. (MassDOT has a legal existence separate from the Commonwealth but houses several departments of state government.) Cabinet secretaries and executive department chiefs, including the Secretary of Transportation, serve at the pleasure of the Governor. Most other agencies are grouped under one of the eight Executive Offices for administrative purposes.

The Governor's chief fiscal officer is the Secretary of Administration and Finance. The activities of the Executive Office for Administration and Finance fall within five broad categories: (i) administrative and fiscal supervision, including supervision of the implementation of the Commonwealth's operating budget and capital investment plan, and monitoring of all agency expenditures during the fiscal year; (ii) enforcement of the Commonwealth's tax laws and collection of tax revenues through the Department of Revenue; (iii) human resource management, including administration of the state personnel system, civil service system and employee benefit programs, and negotiation of collective bargaining agreements with certain of the Commonwealth's public employee unions; (iv) capital facilities management, including coordinating and overseeing the construction, management and leasing of all state facilities; and (v) administration of general services, including procurement management services. The Secretary of Administration and Finance serves on numerous state boards and commissions.

State Treasurer. The State Treasurer has four primary statutory responsibilities: (i) oversight of the collection of all state revenues by state agencies, including tax revenues remitted by the Department of Revenue (other than small amounts of funds held by certain agencies); (ii) the management of both short-term and long-term investment of Commonwealth funds (other than the state employee and teacher pension funds), including all cash receipts; (iii) the disbursement of Commonwealth moneys and oversight of reconciliation of the state's accounts; and (iv) the issuance of most debt obligations of the Commonwealth, including notes, commercial paper and longterm bonds.

In addition to these responsibilities, the State Treasurer chairs the Massachusetts Lottery Commission, the State Retirement Board, the Pension Reserves Investment Management Board, the Massachusetts Clean Water Trust, and the Massachusetts School Building Authority, and appoints the members of the Alcoholic Beverages Control Commission. The State Treasurer also serves as a member of numerous other state boards and commissions.

State Auditor. The State Auditor is charged with improving the efficiency of state government by auditing the administration and expenditure of public funds and reporting the findings to the public. The State Auditor reviews the activities and operations of approximately 200 state entities and potentially thousands of private contractors doing business with the Commonwealth. See "Commonwealth Budget and Financial MANAGEMENT CONTROLS."

Attorney General. The Attorney General represents the Commonwealth in all legal proceedings in both the state and federal courts, including defending the Commonwealth in actions in which a state law or executive action is challenged. The Attorney General also brings actions to enforce environmental and consumer protection statutes, among others, and represents consumer interests in public utility rate-setting proceedings and in proceedings before the Division of Insurance and other administrative bodies. The Attorney General works in conjunction with the general counsel of the various state agencies and executive departments to coordinate and monitor all pending litigation.

State Secretary. The Secretary of the Commonwealth is responsible for collection and storage of public records and archives, securities regulation, state elections, administration of state lobbying laws, and the registration of and reporting by corporations.

State Comptroller. Accounting policies and practices, publication of official financial reports, and oversight of fiscal management functions are the responsibility of the Comptroller. The Comptroller also administers the Commonwealth's annual state single audit and manages the state accounting system. The Comptroller serves as a member of the Massachusetts Lottery Commission, the Inspector General Council, the Records Conservation Board, and the State Retiree Benefits Trust. The Comptroller is appointed by the Governor for a term coterminous with the Governor's and may be removed by the Governor only for cause. The annual financial reports of the Commonwealth, single audit reports, and any rules and regulations promulgated by the Comptroller must be reviewed by an advisory board. This board is chaired by the Secretary of Administration and Finance and includes the State Treasurer, the Attorney General, the State Auditor, the Court Administrator of the Trial Court, and two persons with relevant experience appointed by the Governor for three-year terms.

The Commonwealth's annual reports include financial statements on the statutory basis of accounting (the Statutory Basis Financial Report, or SBFR) and financial statements on a GAAP basis (the Annual Comprehensive Financial Report, or ACFR). The Statutory Basis Financial Report for the year ended June 30, 2021, attached hereto as Exhibit B, was reviewed by the Commonwealth's independent external auditors, CliftonLarsonAllen (CLA). The Annual Financial Report for the year ended June 30, 2020, attached hereto as Exhibit C, was audited by the Commonwealth's independent external auditors at that time, KPMG LLP, as stated in its reports appearing therein. Neither CLA nor KPMG LLP have been engaged to perform, and have not performed, since the respective dates of their reports included herein, any procedures on the financial statements addressed in such reports, nor have they performed any procedures relating to the official statement of which this Information Statement is a part. See "COMMONWEALTH BUdGET AND FINANCIAL MANAGEMENT CONTROLS."

## Legislative Branch

The Legislature (formally called the General Court) is the bicameral legislative body of the Commonwealth, consisting of a Senate of 40 members and a House of Representatives of 160 members. Members of both the Senate and the House are elected to two-year terms in even-numbered years. The Legislature meets every year. The joint rules of the House and Senate require all formal business to be concluded by the end of July in evennumbered years and by the third Wednesday in November in odd-numbered years.

All enacted bills are presented to the Governor for approval or veto. The Legislature may override the Governor's veto of any bill by a two-thirds roll-call vote of each house. The Governor also has the power to return a bill to the chamber of the Legislature in which it originated with a recommendation that certain amendments be made; such a bill is then before the Legislature and is subject to amendment or re-enactment by each branch, at which point the Governor has no further right to return the bill a second time with a recommendation to amend but may still veto the bill. The House of Representatives must originate any bill that imposes a tax. Once a tax bill is originated by the House and forwarded to the Senate for consideration, the Senate may amend it. Any member of the House of Representatives or the Senate also may propose an amendment to the state constitution. Any such proposed amendment must receive a majority of approving votes from members of the House of Representatives and the Senate jointly assembled in a constitutional convention in two successive biennial legislative sessions before being submitted to the voters for approval.

## Judicial Branch

The judicial branch of state government is composed of the Supreme Judicial Court, the Appeals Court and the Trial Court. The Supreme Judicial Court has original jurisdiction over certain cases and hears appeals from both the Appeals Court, which is an intermediate appellate court, and in some cases, directly from the Trial Court. The Supreme Judicial Court is authorized to render advisory opinions on certain questions of law to the Governor, the Legislature and the Governor's Council. Judges of the Supreme Judicial Court, the Appeals Court and the Trial Court are appointed by the Governor, with the advice and consent of the Governor's Council, to serve until the mandatory retirement age of 70 years.

## Independent Authorities and Agencies

The Legislature has established a number of independent authorities and agencies within the Commonwealth, the budgets of which are not included in the Commonwealth's annual budget. The Governmental

Accounting Standards Board (GASB) Statements No. 14 and No. 34, as amended by Statement No. 61, The Financial Reporting Entity: Omnibus - an amendment of GASB Statements No. 14 and No. 34, articulate standards for determining significant financial or operational relationships between the primary government and its independent entities. In fiscal 2020, the Commonwealth had significant operational or financial relationships, or both, as defined by GASB Statements No. 14 and No. 34, as amended by Statement No. 61, with 41 of these authorities. A discussion of these entities and the relationship to the Commonwealth is included in footnotes 1 and 14 to the fiscal 2020 Basic Financial Statements in the Annual Comprehensive Financial Report, attached hereto as Exhibit C.

## Municipal Government

The Commonwealth has 351 incorporated cities and towns that exercise the functions of local government, which include public safety, fire protection and public construction. Cities and towns or regional school districts established by them also provide elementary and secondary education. Cities are governed by several variations of the mayor-and-council or manager-and-council form. Most towns place executive power in a board of three or five selectmen elected to one- or three-year terms and retain legislative powers in the voters themselves, who assemble in periodic open or representative town meetings. Various local and regional districts exist for schools, water and wastewater administration, and certain other governmental functions.

Municipal revenues consist of taxes on real and personal property, distributions from the Commonwealth under a variety of programs and formulas, local receipts (including motor vehicle excise taxes, local option taxes, fines, licenses and permits, charges for utility and other services, and investment income) and appropriations from other available funds (including general and dedicated reserve funds). See "Commonwealth Expenditures Local Aid."

## County Government

The cities and towns of the Commonwealth are organized into 14 counties. County government has been abolished in nine counties - Berkshire, Essex, Franklin, Hampden, Hampshire, Middlesex, First Norfolk, Suffolk and Worcester. Where county government has been abolished, the functions, duties and responsibilities of the government have been transferred to the Commonwealth, including all employees, assets, valid liabilities and debts. The remaining five county governments (Barnstable, Bristol, Dukes, Nantucket, Second Norfolk and Plymouth) are responsible principally for the operation of courthouses and registries of deeds. The Registrar of Deeds of each county continues to be elected by the residents of the respective county, although in counties where the county government has been abolished, the county budget is administered by the Commonwealth. Sheriffs continue to be elected by residents of their respective counties, although they, along with county houses of corrections, have been administratively placed under the Commonwealth's Executive Office of Public Safety.

## Initiative Petitions

Under the Massachusetts constitution, legislation may be enacted in the Commonwealth pursuant to a voter initiative process. Initiative petitions which have been certified by the Attorney General as to proper form and as to which the requisite number of voter signatures has been collected are submitted to the Legislature for consideration. If the Legislature fails to enact the measure into law as submitted, the petitioner may place the initiative on the ballot for the next statewide general election by collecting additional voter signatures. If approved by a majority of the voters at the general election, the petition becomes law 30 days after the date of the election. Initiative petitions so approved by the voters do not constitute constitutional amendments and may be subsequently amended or repealed by the Legislature. Initiative petitions may not make appropriations.

Constitutional amendments also may be initiated by citizens, but they follow a longer adoption process, which includes gaining at least $25 \%$ of the votes of the House of Representatives and Senate jointly assembled in constitutional convention in two successive biennial legislative sessions before being decided by the voters.

In 2019, an amendment to the Massachusetts constitution was proposed to the Legislature which would increase the personal income tax. See "Commonwealth Revenues - Income Tax."

## COMMONWEALTH BUDGET AND FINANCIAL MANAGEMENT CONTROLS

## Operating Fund Structure

The Commonwealth's operating fund structure satisfies the requirements of state finance law and is in accordance with GAAP, as defined by GASB. The General Fund and other funds that are appropriated in the annual state budget receive most of the non-bond and non-federal grant revenues of the Commonwealth. These funds are referred to in this Information Statement as the "budgeted operating funds" of the Commonwealth. Budgeted operating funds are created and repealed from time to time through the enactment of legislation, and existing funds may become inactive when no appropriations are made from them. Budgeted operating funds do not include the capital projects funds of the Commonwealth, into which the proceeds of Commonwealth bonds are deposited. See "Capital Investment Process and Controls" below.

Two of the budgeted operating funds account for most of the Commonwealth's appropriated spending: the General Fund and the Commonwealth Transportation Fund (formerly the Highway Fund), from which approximately $98.4 \%$ of the budgeted operating fund outflows in fiscal 2021 were made. The remaining approximately $1.6 \%$ of budgeted operating fund outflows occurred in other operating funds: the Commonwealth Stabilization Fund, the Intragovernmental Service Fund, the Inland Fisheries and Game Fund, the Marine Recreational Fisheries Development Fund, the Underground Storage Tank Petroleum Product Cleanup Fund, the Public Safety Training Fund, the Local Capital Projects Fund, the Gaming Local Aid Fund, the Education Fund, the Local Aid Stabilization Fund, the Gaming Economic Development Fund, the Marijuana Regulation Fund and the Behavioral Health Outreach, Access and Support Trust Fund. A number of budgeted funds were authorized by law but had no activity in fiscal 2021.

At the end of a fiscal year, undesignated balances in the budgeted operating funds, unless excluded by law, are used to calculate the consolidated net surplus. Under state finance law, balances in the Stabilization Fund, the Tax Reduction Fund, the Inland Fisheries and Game Fund, the Marine Recreational Fisheries Fund, the Public Safety Training Fund, the Local Aid Stabilization Fund, the Behavioral Health Outreach, Access and Support Trust Fund, the Federal COVID-19 Response Fund, and the Transitional Escrow Fund are excluded from the consolidated net surplus calculation. According to state finance law, deficits in any funds included in the consolidated net surplus calculation are eliminated by transfers from other consolidated net surplus funds that have surplus balances, and any undesignated or unreserved balances remaining in the consolidated net surplus funds are transferred to the Commonwealth Stabilization Fund.

## Overview of Operating Budget Process

Generally, funds for the Commonwealth's programs and services must be appropriated by the Legislature. The process of preparing a budget begins with the executive branch early in the fiscal year preceding the fiscal year for which the budget will take effect. The legislative budgetary process begins in late January (or, in the case of a newly elected Governor, not later than early March) with the Governor's budget submission to the Legislature for the fiscal year commencing in the ensuing July. The Massachusetts constitution requires that the Governor recommend to the Legislature a budget which contains a statement of all proposed expenditures of the Commonwealth for the upcoming fiscal year, including those already authorized by law, and of all taxes, revenues, loans and other means by which such expenditures are to be defrayed. State finance law requires the Legislature and the Governor to approve a balanced budget for each fiscal year, and the Governor may approve no supplemental appropriation bills that would result in an unbalanced budget. However, this is a statutory requirement that may be superseded by an appropriation act.

The House Committee on Ways and Means considers the Governor's budget recommendations and, with revisions, proposes a budget to the full House of Representatives. Once approved by the House, the budget is considered by the Senate Committee on Ways and Means, which in turn proposes a budget, with revisions, to be considered by the full Senate. In recent years, the legislative budget review process has included joint hearings by the Ways and Means Committees of the Senate and the House. After Senate action, a legislative conference committee develops a joint budget recommendation for consideration by both houses of the Legislature, which upon adoption is sent to the Governor. Under the Massachusetts constitution, the Governor may veto the budget in whole or disapprove or reduce specific line items (line-item veto). The Legislature may override the Governor's veto or
specific line-item vetoes by a two-thirds roll-call vote of both the House and Senate. The annual budget legislation, as finally enacted, is known as the General Appropriations Act.

In years in which the General Appropriations Act is not approved by the Legislature and the Governor before the beginning of the applicable fiscal year, the Legislature and the Governor generally approve a temporary budget under which funds for the Commonwealth's programs and services are appropriated based upon the level of appropriations from the prior fiscal year budget, adjusted for any known changes in the level of spending during the first month or months of the current fiscal year.

State finance law requires the Commonwealth to monitor revenues and expenditures during a fiscal year. For example, the Comptroller publishes a quarterly report of planned and actual revenues. See "Commonwealth Revenues - Tax Revenue Forecasting." Department heads are required to notify the Secretary of Administration and Finance and the House and Senate Committees on Ways and Means of any anticipated decrease in estimated revenues for their departments from the federal government or other sources or if it appears that any appropriation will be insufficient to meet all expenditures required in the fiscal year by any law, rule, regulation or order not subject to administrative control. The Secretary of Administration and Finance must notify the Governor and the House and Senate Committees on Ways and Means whenever the Secretary determines that revenues will be insufficient to meet authorized expenditures. The Secretary of Administration and Finance is then required to compute projected deficiencies and, under Section 9C of Chapter 29 of the General Laws, the Governor is required to reduce allotments, to the extent lawfully permitted to do so, or submit proposals to the Legislature to raise additional revenues or to make appropriations from the Stabilization Fund to cover such deficiencies. The Supreme Judicial Court has ruled that, under current law, the Governor's authority to reduce allotments of appropriated funds extends only to appropriations of funds to state agencies under the Governor's control.

## Cash and Budgetary Controls

The Commonwealth has in place controls designed to ensure that (i) sufficient cash is available to meet the Commonwealth's obligations, (ii) state expenditures are consistent with periodic allotments of annual appropriations, and (iii) moneys are expended consistently with statutory and public purposes. Two independently elected Executive Branch officials, the State Treasurer and the State Auditor, conduct the cash management and audit functions, respectively. Regarding periodic allotments, at the beginning of each fiscal year the Executive Office for Administration and Finance schedules the rate at which agencies will have access to funds included in their appropriation through a published periodic allotment calendar. Under state finance law, monthly appropriation allotments are ordinarily one-twelfth of the annual amount, but the Executive Office for Administration and Finance may provide for greater or lesser monthly allotments in appropriate cases. This calendar is reviewed regularly, and depending on the fiscal climate, the Executive Office for Administration and Finance may choose to adjust the allotment schedule in order to tighten spending controls. In some cases agencies may request an ad hoc allotment in order to gain access to funds faster than the existing periodic allotment schedule would allow (e.g., exceptional cases where unique payment concerns must be considered); such requests are carefully reviewed by the Executive Office for Administration and Finance before they are approved. The Comptroller conducts the expenditure control function.

## Capital Investment Process and Controls

Capital expenditures are primarily financed with debt proceeds and federal reimbursements. Authorization for capital spending requires approval by the Legislature, and the issuance of debt must be approved by a two-thirds roll-call vote of each house of the Legislature. The state constitution requires the Governor to recommend the terms of the authorized debt. The State Treasurer issues authorized debt at the request of the Governor, and the Governor, through the Secretary of Administration and Finance, controls the amount of capital expenditures through the allotment of funds pursuant to such authorizations. The Executive Office for Administration and Finance establishes a capital investment plan on or before July 1 each year pursuant to state law. The capital investment plan is an administrative guideline and is subject to amendment from time to time. See "Commonwealth Capital Investment Plan."

The Comptroller has established various funds to account for financial activity related to the acquisition or construction of capital assets. In addition, accounting procedures and financial controls have been instituted to limit
agency capital spending to the levels approved by the Governor. Capital spending is tracked against the capital investment plan on both a cash and encumbrance accounting basis on the state's accounting system, and federal reimbursements are budgeted and monitored against anticipated receipts.

## Cash Management Practices of State Treasurer

The State Treasurer is responsible for ensuring that all Commonwealth financial obligations are met on a timely basis. The Massachusetts constitution requires that all payments by the Commonwealth (other than debt service) be made pursuant to a warrant approved by the Governor's Council. The Comptroller prepares certificates which, with the advice and consent of the Governor's Council and approval of the Governor, become the warrant to the State Treasurer. Once the warrant is approved, the State Treasurer's office disburses the money. Debt service is specifically exempted by the state constitution from the warrant requirement, but requires an appropriation to be paid.

The Cash Management Division of the State Treasurer's office utilizes approximately 900 operating accounts to track cash collections and disbursements for the Commonwealth. The Division relies primarily upon electronic receipt and disbursement systems.

The State Treasurer, in conjunction with the Executive Office for Administration and Finance, is required to submit quarterly cash flow projections for the then current fiscal year to the House and Senate Committees on Ways and Means on or before the last day of August, November, February and May. The projections must include estimated sources and uses of cash, together with the assumptions from which such estimates were derived and identification of any cash flow gaps. See "FISCAL 2022 - Cash Flow." The State Treasurer's office, in conjunction with the Executive Office for Administration and Finance, is also required to develop quarterly and annual cash management plans to address any gap identified by the cash flow projections and variance reports. The State Treasurer's office oversees the issuance of short-term debt to meet cash flow needs, including the issuance of commercial paper and revenue anticipation notes. See "Long-Term Liabilities - General Obligation Debt."

Cash that is not needed for immediate funding is invested in the Massachusetts Municipal Depository Trust. The State Treasurer serves as trustee of the Trust and has sole authority pertaining to rules, regulations and operations of the Trust. The Trust has two investment options: a short-term liquidity vehicle or "cash portfolio" structured similarly to a money market fund and a short-term bond fund. For additional detail on the Massachusetts Municipal Depository Trust, see "FISCAL 2022 - Cash Flow."

## Fiscal Control, Accounting and Reporting Practices of the Comptroller

The Comptroller is responsible for oversight of fiscal management functions, establishment of accounting policies and practices, and publication of official financial reports. The Comptroller maintains the Massachusetts Management Accounting and Reporting System (MMARS), the centralized state accounting system that is used by all state agencies and departments for processing of all financial transactions. The University of Massachusetts, the state universities and the community colleges process only some transactions on MMARS, and the independent state authorities do not use the system. MMARS provides a ledger-based system of revenue and expenditure accounts enabling the Comptroller to control obligations and expenditures effectively and to ensure that appropriations are not exceeded during the course of the fiscal year. The Commonwealth's statewide accounting system also has various modules for receivables, payables, capital assets and other processes management.

Expenditure Controls. The Comptroller requires that the amount of all obligations under purchase orders, contracts and other commitments for the expenditures of moneys be recorded as encumbrances. Once encumbered, these amounts are not available to support additional spending commitments. As a result of these encumbrances, spending agencies can use MMARS to determine at any given time the amount of their appropriations available for future commitments.

The Comptroller is responsible for compiling expenditure requests into the certificates for approval by the Governor's Council. The Council approves an estimated warrant giving the Treasurer authority to issue payments up to the amount on the warrant, as long as those payments are otherwise determined by the Comptroller to comply
with state finance law. In preparing these certificates, which become the warrant, the Comptroller's office has systems in place to ensure that the necessary moneys for payment have been both appropriated by the Legislature and allotted by the Governor in each account and sub-account. By law, certain obligations may be placed upon the warrant even if the supporting appropriation or allotment is insufficient. These obligations include Medicaid payments, which are mandated by federal law.

Although state finance law generally does not create priorities among types of payments to be made by the Commonwealth in the event of a cash shortfall, the Comptroller has developed procedures, in consultation with the State Treasurer and the Executive Office for Administration and Finance, for prioritizing payments based upon state finance law and sound fiscal management practices.

Internal Controls. The Comptroller establishes internal control policies and procedures in accordance with state finance law. Agencies are required to adhere to such policies and procedures. All unaccounted-for variances, losses, shortages or thefts of funds or property must be reported to the State Auditor, who is authorized to investigate and recommend corrective action.

Statutory Basis of Accounting. In accordance with state law, the Commonwealth adopts its budget and maintains financial information on a statutory basis of accounting. Under the statutory basis, tax and departmental revenues are accounted for on a modified cash basis by reconciling revenue to actual cash receipts confirmed by the State Treasurer. Certain limited revenue accruals are also recognized, including receivables from federal reimbursements with respect to paid expenditures. Expenditures are measured on a modified cash basis, including actual cash disbursements and encumbrances for goods or services received prior to the end of a fiscal year.

For certain programs, such as Medicaid, expenditures are recognized under the statutory basis of accounting only to the extent of disbursements supported by current-year appropriations. Some prior year services billed after the start of a fiscal year have been paid from the new fiscal year's appropriation, in an amount determined by the specific timing of billings and the amount of prior year funds that remained after June 30 to pay the prior year's accrued billings, though this practice may vary from year to year.

GAAP Basis of Accounting. The Comptroller also prepares Commonwealth financial statements on a GAAP basis. In addition to the primary government, certain independent authorities and agencies of the Commonwealth are included as component units within the Commonwealth's reporting entity.

GAAP employs an economic resources management focus and a current financial resources management focus as two bases for accounting and reporting. Under the economic resources management focus (also called the "government-wide perspective") revenues and expenses (different from expenditures) are presented similarly to private-sector entities. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met. Capital assets, including infrastructure assets net of depreciation, and the long-term portion of all liabilities are reported on the statement of net position.

Under the current financial resources management focus of GAAP (also called the "fund perspective" or "modified accrual" basis), the primary emphasis is to demonstrate inter-period equity. Revenues are reported in the period in which they become both measurable and available. Revenues are considered available when they are expected to be collected within the current period or soon enough thereafter to be used to pay liabilities of the current period.

Significant revenues susceptible to accrual include income, sales and use, corporation and other taxes, federal revenues (including both grants and reimbursements) and reimbursements for the use of materials and services. Tax accruals, which include the estimated amounts due to the Commonwealth on previous filings, overand under-withholdings, estimated payments on income earned and tax refunds and abatements payable, are all recorded as adjustments to statutory basis tax revenues.

Major expenditure accruals are recorded for the cost of Medicaid claims that have been incurred but not paid, claims and judgments and workers' compensation claims incurred but not reported and contract assistance and
amounts due to municipalities and state authorities. See Exhibit C - Annual Comprehensive Financial Report for the year ended June 30, 2020; Page 3 and Notes to the Basic Financial Statements.

## Audit Practices of State Auditor

The State Auditor is mandated under state law to conduct an audit at least once every three years of the accounts of all departments, offices, commissions, institutions and activities of the Commonwealth. This audit encompasses hundreds of state entities, including the court system and independent authorities. The State Auditor also has the authority to audit federally aided programs and vendors and their subcontractors under contract with the Commonwealth as well as to conduct special audit projects. Further, the State Auditor upon a ratified majority vote by the board of selectmen or school committee, may, in the Auditor's discretion, audit the accounts, programs, activities and other public functions of a town, district, regional school district, city or county. The State Auditor conducts both compliance and performance audits in accordance with generally accepted government auditing standards issued by the Comptroller General of the United States.

Within the State Auditor's office is the Division of Local Mandates, which evaluates proposed and actual legislation to determine the financial impact on the Commonwealth's cities and towns. In accordance with state law, the Commonwealth is required to reimburse cities and towns for any costs incurred through mandated programs established after the passage of Proposition $21 / 2$, the statewide tax limitation enacted by the voters in 1980, unless expressly exempted from those provisions, and the State Auditor's financial analysis is used to establish the amount of reimbursement due to the Commonwealth's cities and towns. See "Commonwealth Expenditures - Local Aid; Property Tax Limits."

Also within the State Auditor's office is the Bureau of Special Investigations, which is charged with the responsibility of investigating fraud within public assistance programs.

## COMMONWEALTH REVENUES

This section contains a description of the major categories of Commonwealth revenues. See "COMMONWEALTH EXPENDITURES" for a description of the major categories of Commonwealth expenditures. All amounts and percentages for fiscal 2021 are unaudited and for fiscal 2022 are projected.

In order to fund its programs and services, the Commonwealth collects a variety of taxes and receives revenues from other non-tax sources, including the federal government and various fees, fines, court revenues, assessments, reimbursements, interest earnings and transfers from its non-budgeted funds, which are deposited in the General Fund, the Commonwealth Transportation Fund and other budgeted operating funds. Revenues deposited in such funds are referred to as budgeted operating revenues in this Information Statement. In fiscal 2021, on a statutory basis, approximately $53.0 \%$ of the Commonwealth's budgeted operating revenues and other financing sources were derived from state taxes. In addition, the federal government provided approximately $30.6 \%$ of such revenues, with the remaining $16.5 \%$ provided from departmental revenues and transfers from non-budgeted funds.

The Commonwealth's executive and legislative branches establish the Commonwealth's budget using the statutory basis of accounting, which differs from a GAAP basis. See "Selected Financial Data - Statutory Basis Distribution of Budgetary Revenues and Expenditures" and "- GAAP Basis."

## State Taxes

The major components of state taxes are the income tax, which accounted for approximately $56.6 \%$ of total budgeted tax revenues in fiscal 2021, the sales and use tax, which accounted for approximately $22.7 \%$ of total budgeted tax revenues in fiscal 2021, and the corporations and other business and excise taxes (including taxes on insurance companies and financial institutions), which accounted for approximately $12.2 \%$ of total budgeted tax revenues in fiscal 2021. Other tax and excise sources accounted for the remaining $8.5 \%$ of total budgeted tax revenues in fiscal 2021.

The Governor annually files a "tax expenditure budget" that provides a list, description and revenue estimates of various tax credits, deductions and exemptions that represent departures from the basic provisions of the state tax code. See "Tax Credits and Other Incentives" below.

Major changes to the federal Internal Revenue Code became effective in the 2018 tax year, including extensive changes to federal personal income taxes, corporate income taxes, and estate taxes, and the deductibility of various taxes and interest costs. Because the Commonwealth's tax system interacts with the federal system, the changes to the federal Internal Revenue Code had a flow-through effect on the Commonwealth's tax system and revenues. Legislation adjusting the Commonwealth's income tax laws and corporation tax laws in response to the changes to the federal Internal Revenue Code was enacted on October 23, 2018 and March 29, 2019.

Income Tax. The Commonwealth assesses personal income taxes at flat rates, according to classes of income, after specified deductions and exemptions. Commencing January 1, 2020, the current state personal income tax rate applied to most classes of taxable income is $5.0 \%$. The state personal income tax rate on most classes of taxable income was gradually reduced from $5.3 \%$ effective January 1, 2002 to $5.0 \%$ effective January 1, 2020 in increments of $0.05 \%$ as set forth in the following table as result of statutory "baseline" state tax revenue growth triggers (i.e., revenue growth after factoring out the impact of tax law and administrative processing changes), as required by law. Once reduced to $5.0 \%$, current law does not provide for any further decreases or increases without further legislative action.

## [Remainder of this page intentionally left blank.]

## State Personal Income Tax Rate

| Effective Date <br> (January 1) | Tax Rate |
| :---: | :---: |
| 2002 | $5.30 \%$ |
| 2012 | 5.25 |
| 2014 | 5.20 |
| 2015 | 5.15 |
| 2016 | 5.10 |
| 2019 | 5.05 |
| 2020 | 5.00 |

Current law requires that in the tax year following that in which the personal income tax rate is reduced to $5.0 \%$, the state charitable deduction, which was in effect for tax year 2001 but subsequently suspended, will be restored. With the personal income tax rate reduced to $5.0 \%$ effective January 1, 2020, the state charitable deduction was to be reinstated effective January 1, 2021. However, the fiscal 2021 budget included a one-year delay in the reinstatement of this deduction. The fiscal 2022 budget further delayed the charitable deduction for an additional year. See "FISCAL 2022." The Department of Revenue estimates that the revenue loss impact due to the reinstatement of the state charitable deduction is approximately $\$ 64$ million for fiscal 2023 and approximately $\$ 300$ million annually in fiscal 2024 and thereafter.

In 2019, an amendment to the Massachusetts constitution was proposed in the Legislature which would increase the personal income tax rate by $4.0 \%$ on income above $\$ 1$ million, effective fiscal 2023, to be adjusted annually to reflect cost of living adjustments. In order for a proposed legislative amendment to the Massachusetts constitution to become effective, it must be approved by a majority of the members of a constitutional convention in each of two successive conventions and then approved by a majority of the voters at the general election. The amendment (H. 86) was approved by a majority of the members during the 2019-2020 constitutional convention and the 2021-2022 constitutional convention and will be included on the November 2022 ballot for voter approval.

Capital Gains Component of the Income Tax. The tax rate on gains from the sale of capital assets held for one year or less and from the sale of collectibles is $12 \%$. The tax rate on gains from the sale of capital assets owned more than one year is currently $5.00 \%$, and is equal to the state personal income tax rate. Current state finance law provides for tax revenues collected from capital gains income during a fiscal year that exceed a specified threshold to be transferred as follows: $90 \%$ of such amount to the Commonwealth's Stabilization Fund, $5 \%$ of such amount to the State Retiree Benefits Trust Fund and 5\% of such amount to the Commonwealth's Pension Liability Fund. The specified threshold is certified annually by the Department of Revenue each December for the ensuing fiscal year as part of the consensus revenue process. However, the requirement to transfer capital gains tax collections may be modified or superseded by individual appropriation acts. For a discussion of the specified threshold and the capital gains taxes deposited to the Stabilization Fund, see "Selected Financial Data - Stabilization Fund."

Sales and Use Tax. The sales tax rate imposed on retail sales of certain tangible property (including retail sales of meals) transacted in the Commonwealth and a corresponding use tax rate on the storage, use, or other consumption of like tangible properties brought into the Commonwealth is $6.25 \%$. Food, clothing, prescribed medicine, materials and produce used in food production, machinery, materials, tools and fuel used in certain industries and property subject to other excises (except for cigarettes and recreational marijuana) are exempt from sales taxation. The sales and use tax is also applied to sales of electricity, gas, and steam for certain nonresidential use and to nonresidential and a portion of residential use of telecommunications services.

Certain sales tax receipts are required to be credited to the Convention Center Fund. The Convention Center Fund is not included in the calculation of revenues for budgeted operating funds. See "LONG-TERM Liabilities - Special Obligation Debt; Convention Center Fund."

A portion of the Commonwealth's receipts from the sales tax (other than the tax on meals) is dedicated through non-budgeted special revenue funds to the Massachusetts Bay Transportation Authority (MBTA) and the Massachusetts School Building Authority (MSBA). The amount dedicated to the MSBA is the amount raised by a $1 \%$ sales tax (not including meals). The amount dedicated to the MBTA is the greater of (i) the amount raised by a
$1 \%$ sales tax (not including meals), plus $\$ 160$ million and (ii) an annually adjusted floor. The floor grows each year by the allowable base revenue growth (the lesser of sales tax growth or inflation, but not greater than $3 \%$ and not less than $0 \%$ ), and was certified as $\$ 1.1$ billion for fiscal 2022.

The Commonwealth's receipts from the sales tax on account of motor vehicle sales (net of amounts required to be credited to the Convention Center Fund or dedicated to the MBTA or MSBA) are dedicated to the Commonwealth Transportation Fund.

Commencing August 2019, legislation approved by the Governor established an annual two-day sales tax holiday in August of each year.

In June 2018, the Supreme Court of the United States issued a ruling in South Dakota v. Wayfair that effectively removes earlier constraints on states seeking to require out-of-state sellers to collect and remit sales tax. However, because the Commonwealth had previously established collect-and-remit agreements covering the majority of sales by out-of-state sellers to Massachusetts residents, and has proactively asserted the obligation to collect sales taxes from out-of-state sellers with economic scale in Massachusetts, the incremental impact of South Dakota v. Wayfair on Commonwealth tax revenues has been limited. The revenue projections for budgeting purposes, as described under the heading "Tax Revenue Forecasting" below, include both existing and incremental collections on internet sales as a component of overall sales tax revenue.

Provisions included in the fiscal 2020 budget required online marketplace facilitators to collect and remit Massachusetts sales and use tax on behalf of vendors who sell their goods on the marketplace, provided the marketplace's sales within the Commonwealth exceed the threshold of $\$ 100,000$. These provisions also subject remote sellers to the registration, collection, and remittance requirements of the sales and use tax if the remote seller's sales within the Commonwealth exceed the threshold of $\$ 100,000$.

Since the outbreak of COVID-19, returns and payments for regular sales tax, meals tax, and room occupancy excises for eligible small businesses have been deferred several times. Businesses that collected in the 12-month period ending February 29, 2020, less than $\$ 150,000$ in regular sales, plus meals taxes or less than $\$ 150,000$ in room occupancy excises could defer until October 30, 2021, the returns for and payments of such taxes and excises otherwise due from March 20, 2020, through June 1, 2021. For these eligible businesses, no penalties or interest accrued during this extension period.

The fiscal 2021 budget included provisions requiring certain vendors and operators of lodging accommodations to remit an advance payment of room occupancy excise, sales tax, including sales tax on meals, use tax, and local sales tax on meals. Effective for tax periods ending after April 1, 2021, certain vendors, including marketplace facilitators and marijuana retailers, and operators of lodging accommodations, including intermediaries, must remit on or before the 25th day of the monthly filing period any tax or excise collected on or before the 21st day of such filing period. Payment of the remaining amount for the filing period is due with the applicable return on the 30th day after the end of the filing period. The advance payment requirement does not apply to vendors or operators whose cumulative Massachusetts sales and use tax liability or room occupancy excise liability in the immediately preceding calendar year is equal to or less than $\$ 150,000$. For these vendors and operators, full payment for the monthly filing period is due with the return on the 30th day after the end of such filing period.

Business Corporations Tax. Business corporations doing business in the Commonwealth, other than banks and other financial institutions, insurance companies, railroads, and safe deposit companies, are subject to an excise that has a property measure and an income measure. The value of Massachusetts tangible property (not taxed locally) or net worth allocated to the Commonwealth is taxed at $\$ 2.60$ per $\$ 1,000$ of value. The net income assigned to Massachusetts, which is based on net income for federal taxes, is taxed at $8.0 \%$. The minimum tax is $\$ 456$.

In general, corporations apportion their income to Massachusetts based on the proportion of payroll, property, and sales within the Commonwealth, with sales being double-weighted. This general rule does not apply to manufacturing companies or to mutual fund service corporations. The net income of such entities is apportioned only by the percentage of their Massachusetts sales.

Financial Institutions Tax. Financial institutions (which include commercial and savings banks) are subject to an excise tax. The net income assigned to Massachusetts is taxed at $9.0 \%$. In general, financial institutions apportion their income to Massachusetts based on the proportion of receipts, payroll and property within the Commonwealth.

Insurance Taxes. Life insurance companies are subject to a $2 \%$ tax on gross premiums. Property and casualty insurance companies are subject to a $2.28 \%$ tax on gross premiums. Domestic property and casualty insurance companies also pay a $1 \%$ tax on gross investment income.

Other Taxes. Other tax revenues are derived by the Commonwealth from excise taxes on motor fuels, cigarettes and other tobacco products, alcoholic beverages, deeds, and hotel/motel room occupancy, as well as taxes on estates, among other tax sources. Commencing July 1, 2018, current law imposes an excise tax, in addition to the regular sales tax, on retail sales of recreational marijuana and marijuana products, providing for the maximum combined state and local tax rate on recreational marijuana of $20 \%$.

On December 28, 2018, the Governor approved legislation imposing state and local excise taxes on the short-term rentals of property for more than 14 days in a calendar year. The legislation became effective July 1 , 2019, and applies to rental contracts entered into on or after January 1, 2019.

On November 27, 2019, the Governor approved legislation imposing an excise of $75 \%$ on the wholesale price of all electronic nicotine delivery systems and restricting the sale of all flavored tobacco products and flavored tobaccos product enhancers, including flavored vaping products, to licensed smoking bars for on-site consumption. The legislation also restricts the sale of vaping products with nicotine content greater than 35 grams per milliliter to retail tobacco stores and licensed smoking bars. The restriction on the sale of flavored vaping products became effective immediately. Other provisions of the legislation, including the prohibition on flavored tobacco products and flavored tobacco product enhancers, took effect on June 1, 2020. The Department of Revenue estimates the net revenue loss impact of this legislation was approximately $\$ 109.5$ million in fiscal 2021 and will be approximately $\$ 105$ million in fiscal 2022.

On September 30, 2021, the Massachusetts legislature passed legislation overriding the Governor's veto of the pass-through entity excise, which was originally included in the fiscal 2022 budget. The pass-through entity excise provides a work-around for the federal limitation on the amount of state and local taxes individuals may deduct on their federal income tax returns. The pass-through entity excise allows pass-through entities, including Scorporations, partnerships, and certain trusts, to pay an optional 5\% excise on the income that flows through to shareholders, partners, or beneficiaries subject to the personal income tax. The qualified member may claim a nontransferable, refundable credit equal to $90 \%$ of his or her allocable share of the entity's excise due. The legislation became effective for taxable years beginning on or after January 1, 2021.

Tax Credits and Other Incentives. Massachusetts law provides for a variety of tax credits that may be applied against corporate excise or personal income taxes due, as applicable under relevant law. These credits are designed as benefits for specified economic activities as a means to encourage such business in the state. Certain of these credits, to the extent not used to reduce a current tax liability, may be carried forward, transferred, or refunded, as specified in the applicable statute. In addition, certain statutory provisions may also provide an exemption from sales and use taxes for qualifying expenditures, or other specified tax benefits.
[Remainder of this page intentionally left blank.]

The Governor annually publishes a "tax expenditure budget" that provides a list, description, and revenue estimate of various tax credits, deductions, and exemptions that represent departures from the basic provisions of the state tax code.

## Tax Expenditure Budget Summary (in millions)

| Tax Type | Fiscal 2018 | Fiscal 2019 | Fiscal 2020 | Fiscal 2021 | Fiscal 2022 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Personal Income Tax | \$8,079.5 | \$8,700.8 | \$9,074.7 | \$9,428.5 | \$10,157.4 |
| Corporate and Other Business Excise | 1,911.0 | 2,051.0 | 2,090.0 | 2,194.6 | 2,299.3 |
| Sales and Use Tax | 5,008.3 | 5,210.7 | 5,230.6 | 5,248.6 | 5,364.1 |
| Total | \$14,998.8 | \$15,962.5 | \$16,395.3 | \$16,871.7 | \$17,820.8 |

## SOURCE: Department of Revenue.

Under legislation approved June 15, 2018, in support of the life sciences industry, up to $\$ 30$ million per year in tax incentives, up from an annual cap of $\$ 25$ million, is available to certified life sciences companies over a 10-year period, commencing January 1, 2019 and ending on December 31, 2028, for an aggregate amount of \$300 million. The Department of Revenue estimates that this program resulted in revenue reductions of $\$ 12.0$ million in fiscal 2018, $\$ 16.1$ million in fiscal 2019, $\$ 16.5$ million in fiscal 2020, and $\$ 18.0$ million in fiscal 2021. The Massachusetts Life Sciences Center board has approved $\$ 19.5$ million in tax incentives that are expected to be utilized in fiscal 2022.

## Tax Revenue Forecasting

Under state law, on or before October 15 of each year, the Secretary of Administration and Finance is required to submit to the Governor and to the House and Senate Committees on Ways and Means estimates of revenues available to meet appropriations and other needs in the current fiscal year and the following fiscal year.

On or before January 15 of each year (January 31 in the first year of a new Governor), the Secretary is required to develop jointly with the House and Senate Committees on Ways and Means a consensus tax revenue forecast for the following fiscal year. State finance law requires that the consensus tax revenue forecasts be net of the amounts necessary to fully fund the pension system according to the applicable funding schedule, and to fulfill statutory commitments to the MBTA and the MSBA. These amounts are to be transferred without further appropriation from the General Fund. See "Sales and Use Tax" above and "PENSION AND OPEB Funding."

An additional component of the consensus revenue process is the requirement that the consensus tax revenue forecast joint resolution include a benchmark for the estimated growth rate of Massachusetts potential gross state product (PGSP). Health care cost control legislation requires that the Secretary and the House and Senate Committees on Ways and Means include a PGSP growth benchmark for the ensuing calendar year. PGSP is a measure of the "full employment" output of the Commonwealth's economy. The PGSP growth benchmark is used by the Massachusetts Health Policy Commission to establish the Commonwealth's health care cost growth benchmark. See "COMMONWEALTH Expenditures - Medicaid and the Health Connector; Health Care Cost Containment."
[Remainder of this page intentionally left blank.]

The following table compares actual budgeted tax revenues to consensus tax revenue forecasts for fiscal years 2017 to 2021 and provides forecasts for fiscal 2022. The figures include sales tax receipts dedicated to the MBTA and the MSBA and amounts transferred to the state pension system. Commencing with fiscal 2015, taxrelated settlements or judgments exceeding $\$ 10$ million are counted separately from the consensus revenue estimate in the General Appropriations Act.

SOURCE: Executive Office for Administration and Finance; actual budgeted operating tax revenues, Office of the Comptroller.
(1) The amounts for fiscal 2021 are unaudited and for fiscal 2022 are projected.
(2) Excluding tax-related settlements exceeding $\$ 10$ million each.
(3) Including tax-related settlements exceeding $\$ 10$ million each.
(4) Including an estimated $\$ 63$ million from marijuana sales and excise taxes.
(5) Does not include any revenue from marijuana sales or excise taxes.
(6) Including $\$ 593.5$ million of upward adjustments assumed in the final fiscal 2020 budget due to actual fiscal 2019 results, plus $\$ 206.7$ million of additional adjustments, including an estimated $\$ 132.5$ million from marijuana sales and excise taxes, $\$ 41.7$ million of sales and use marketplace taxes, $\$ 27.5$ million of taxes on short-term property rentals and $\$ 5.0$ million due to a reduction in life sciences tax incentives.
(7) Including an estimated $\$ 132.5$ million from marijuana sales and excise taxes.

On January 13, 2020, a fiscal 2021 consensus tax revenue estimate of $\$ 31.151$ billion was agreed upon by the Secretary and the chairs of the House and Senate Committees on Ways and Means. The fiscal 2021 consensus tax revenue estimate represented revenue growth of $2.8 \%$ from the revised fiscal 2020 estimate of \$30.289 billion. On October 14, 2020, the Secretary of Administration and Finance revised the fiscal 2021 revenue estimate downward to $\$ 27.592$ billion, or $11.4 \%$ lower than the original consensus revenue estimate. The revised $\$ 27.592$ billion figure for fiscal 2021 includes transfers of $\$ 3.115$ billion for pension funding, $\$ 1.102$ billion in dedicated sales tax receipts for the MBTA, $\$ 942$ million in dedicated sales tax receipts for the MSBA, and $\$ 25$ million for the Workforce Training Fund. The total amount of off-budget transfers is $\$ 5.252$ billion.

On January 15, 2021, the Secretary of Administration and Finance certified a revised fiscal 2021 tax revenue estimate of $\$ 29.090$ billion.

On January 15, 2021, a fiscal 2022 consensus tax revenue estimate of $\$ 30.120$ billion was agreed upon by the Secretary and the chairs of the House and Senate Committees on Ways and Means. The fiscal 2022 consensus tax revenue estimate represented revenue growth of $3.5 \%$ from the revised fiscal 2021 estimate of $\$ 29.090$ billion. The $\$ 30.120$ billion amount for fiscal 2022 includes transfers of $\$ 3.415$ billion for pension funding, $\$ 1.174$ billion in dedicated sales tax receipts for the MBTA, $\$ 1.014$ billion in dedicated sales tax receipts for the MSBA, and $\$ 25$ million for the Workforce Training Fund. The total amount of off-budget transfers is $\$ 5.628$ billion. The actual fiscal 2022 budget assumes tax revenues in an amount higher than the fiscal 2022 consensus tax revenue estimate announced in January 2021. See "FISCAL 2021 AND FISCAL 2022 - Fiscal 2022."

The Secretary of Administration and Finance and the chairs of the House and Senate Committees on Ways and Means also agreed in January 2021 upon a PGSP estimate of $3.6 \%$ for calendar year 2021, which is identical to the PGSP figure that was adopted for calendar years 2016 through 2020. The PGSP growth benchmark is to be used
by the Health Policy Commission to establish the Commonwealth's health care cost growth benchmark for calendar year 2020. See "Commonwealth Expenditures - Medicaid and the Health Connector; Health Care Cost Containment."

## Fiscal 2021 and Fiscal 2022 Tax Revenues

Fiscal 2021. The following table shows the actual tax collections for fiscal 2021 and the change from tax collections in the same period in the prior year, both in dollars and as a percentage. The table also notes the amounts of tax collections during the fiscal year that are dedicated to the MBTA and the MSBA. Tax collections shown exclude income tax payments originally due in fiscal 2020 but which were received in fiscal 2021. Such payments have been recorded as fiscal 2020 revenues. See "Special Disclosure Regarding COVID-19 Matters."

Fiscal 2021 Tax Collections (in millions)

| Month | Tax Collections | Change from Prior Year | Percentage Change | MBTA Portion | MSBA <br> Portion | Tax Collections Net of MBTA and MSBA |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| July (1) | \$2,142.3 | \$116.3 | 5.7\% | \$101.4 | \$88.1 | \$1,952.7 |
| August (1) | 1,964.2 | (21.7) | (1.1) | 98.0 | 84.7 | 1,781.4 |
| September | 3,158.6 | (43.7) | (1.4) | 95.2 | 81.9 | 2,981.6 |

| November | 2,127.1 | 34.1 | 1.6 | 95.3 | 82.0 | 1,949.8 |
| December | 2,857.0 | 245.1 | 9.4 | 95.4 | 82.0 | 2,679.6 |
| January | 3,347.6 | 381.0 | 12.8 | 113.9 | 100.6 | 3,133.2 |
| February | 1,874.9 | 359.9 | 23.8 | 93.3 | 80.0 | 1,701.6 |
| March | 3,056.0 | 396.3 | 14.9 | 91.8 | 78.4 | 2,885.8 |
| April | 3,864.7 | 1,883.8 | 95.1 | 148.0 | 134.7 | 3,581.9 |
| May | 4,001.2 | 2,263.4 | 130.2 | 109.9 | 96.6 | 3,794.8 |
| June (2) | 3,673.3 | $(1,153.5)$ | (23.9) | 120.5 | 107.2 | 3,445.7 |
| Total (3) | \$34,156.1 | \$4,523.0 | 15.3\% | \$1,261.4 | \$1,101.4 | \$31,793.3 |

SOURCE: Executive Office for Administration and Finance.
(1) Excluding income tax payments originally due in fiscal 2020 but received in fiscal 2021, which are estimated to be $\$ 2.334$ billion.
(2) Preliminary and subject to change.
(3) Totals may not add due to rounding.

The fiscal 2021 tax revenue increase of approximately $\$ 4.523$ billion from fiscal 2020 is attributable to an increase of approximately $\$ 592.0$ million, or $25.2 \%$, in income tax estimated payments, an increase of approximately $\$ 983.2$ million, or $7.2 \%$, in withholding collections, an increase of approximately $\$ 632.5$ million, or $20.7 \%$, in income tax payments with returns or bills, a decrease of approximately $\$ 49.9$ million, or $2.8 \%$, in income tax cash refunds, an increase of approximately $\$ 1.206$ billion, or $40.9 \%$, in corporate and business tax collections, an increase of approximately $\$ 1.020$ billion, or $15.0 \%$, in sales and use tax collections, and a net increase of approximately $\$ 39.8$ million, or $1.6 \%$, in all other taxes. Excluding one-time tax related settlements and judgments exceeding $\$ 10$ million each, which totaled $\$ 32.9$ million, fiscal 2021 tax collections were approximately $\$ 34.123$ billion, $\$ 4.514$ billion more than the collections in the same period in fiscal 2020, and $\$ 5.033$ billion above the year-to-date benchmark associated with the revised fiscal 2021 tax revenue estimate of $\$ 29.090$ billion.

Fiscal 2022. The following table shows the actual tax collections for the first six months of fiscal 2022 and the change from tax collections in the same period in the prior year, both in dollars and as a percentage. The table also notes the amounts of tax collections during the first six months of the fiscal year that are dedicated to the MBTA and the MSBA.

# Fiscal 2022 Tax Collections (in millions) 

| Month | Tax <br> Collections | Change from Prior Year | Percentage Change | MBTA <br> Portion | MSBA <br> Portion | Tax Collections: Net of MBTA and MSBA |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| July | \$2,279.7 | \$137.4 | 6.4\% | \$113.6 | \$100.3 | \$2,065.8 |
| August | 2,492.4 | 528.2 | 26.9 | 107.8 | 94.5 | 2,290.1 |
| September | 3,993.0 | 834.4 | 26.4 | 105.6 | 92.3 | 3,795.1 |
| October | 2,444.0 | 354.8 | 17.0 | 105.7 | 92.4 | 2,245.9 |
| November | 2.415 .9 | 288.8 | 13.6 | 115.4 | 102.1 | 2,198.5 |
| December (1) | 4,234.5 | 1,377.5 | 48.2 | 119.3 | 106.0 | 4,009.2 |
| Total (2) | \$17,859.6 | \$3,521.2 | 24.6\% | \$667.5 | \$587.5 | \$16,604.6 |
| SOURCE: Executive Office for Administration and Finance. <br> (1) Preliminary and subject to change. <br> (2) Totals may not add due to rounding. |  |  |  |  |  |  |

The year-to-date fiscal 2022 tax revenue increase of approximately $\$ 3.5$ billion through December 31, 2021 from the same period in fiscal 2021 is, in part, due to an increase of approximately $\$ 433$ million, or $27.4 \%$, in corporate and business tax collections, an increase of approximately $\$ 692$ million, or $9.9 \%$, in withholding collections, an increase of approximately $\$ 1.1$ million, or $135.3 \%$, in income tax estimated payments, an increase of approximately $\$ 234$ million, or $65.5 \%$, in income tax return and bill payments, an increase of approximately $\$ 770$ million, or $21.4 \%$, in sales and use tax collections, and an increase of approximately $\$ 363$ million, or $30.4 \%$, in all other taxes. Excluding one-time tax related settlements and judgments exceeding $\$ 10$ million each, which totaled $\$ 13.6$ million, fiscal 2022 year-to-date tax collections through December 31, 2021 were approximately $\$ 17.846$ billion, $\$ 3.549$ billion more than the collections in the same period in fiscal 2021, and $\$ 2.142$ billion above the year-to-date benchmark associated with the fiscal 2022 tax revenue estimate of $\$ 34.401$ billion. Approximately $\$ 876$ million of the total increase in collections (mostly in income estimated payments and income return payments) is due in part to the recently enacted elective pass-through entity (PTE) excise, which allows members of a PTE to avoid the federal limit on the deduction for state and local taxes by electing to pay tax on the PTE's income at the entity-level, and then claim a credit equal to $90 \%$ of the PTE excise paid. Many PTEs paid their 2021 excise taxes in December 2021 in order to claim a deduction on their 2021 federal income tax return. In the coming months, PTE members who also paid estimated taxes themselves on PTE income will receive refunds due to the credits offsetting $90 \%$ of the PTE excise payments. As a result, most of the increase in collections associated with the PTE excise is temporary.

After adjusting for PTE excise payments, fiscal 2022 year-to-date collections are $\$ 2.674$ billion, or $18.7 \%$, more than collections in the same period of fiscal 2021 and $\$ 1.549$ billion, or $10.0 \%$, more than the fiscal 2022 year-to-date benchmark.

## Federal and Other Non-Tax Revenues

Federal revenues are collected through reimbursements for the federal share of entitlement programs such as Medicaid and through block grants for programs such as Transitional Assistance to Needy Families (TANF). The amount of federal reimbursements to be received is determined by state expenditures for these programs. The Commonwealth receives reimbursement for approximately $50 \%$ of its spending for Medicaid programs. Block grant funding for TANF is received quarterly and is contingent upon a maintenance-of-effort spending level determined annually by the federal government. Budgeted fund federal reimbursements were $\$ 13.303$ billion in fiscal 2021, and are projected to be $\$ 14.722$ billion in fiscal 2022. See "Selected Financial Data - Statutory Basis Distribution of Budgetary Revenues and Expenditures."

Departmental and other non-tax revenues are derived from a large number of sources, including but not limited to fees and assessments for services, licenses, and reimbursements. For fiscal 2021, budgeted fund departmental and other non-tax revenues were $\$ 5.362$ billion. The largest budgeted departmental revenues, assessments and miscellaneous revenues in fiscal 2021 included $\$ 1.219$ billion in drug rebates, recoveries and other fees, $\$ 827$ million in reimbursements from cities, towns and non-state entities for retiree benefits, $\$ 623$ million for Registry of Motor Vehicles fees, fines and assessments, and $\$ 258$ million from filing, registration and other fees paid to the Secretary of State's office. Budgeted fund departmental and other non-tax revenues are projected to be
$\$ 5.074$ billion in fiscal 2022. See "Selected Financial Data - Statutory Basis Distribution of Budgetary Revenues and Expenditures."

Lottery Revenues. For the budgeted operating funds, inter-fund transfers include transfers of net operating revenues from the State Lottery and Gaming Fund and the Arts Lottery Fund and reimbursements for the budgeted costs of the State Lottery Commission, which accounted for transfers from the Lottery of $\$ 1.136$ billion, $\$ 1.097$ billion, $\$ 1.206$ billion, $\$ 1.090$ billion, and $\$ 1.212$ billion in fiscal 2017 through 2021, respectively.

The following table shows Lottery revenues and profits for the first five months of fiscal 2022.

## Fiscal 2022 Monthly Lottery Revenues and Profits (in thousands) (1)

| Month | $\underline{\text { Revenues }}$ | $\underline{y y y y}$ Prizes | Subtotal <br> Operating <br> Expenses | Operating | Revenues | Administrative <br> Expenses |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | | Net Profit before <br> Distributions |

(1) Preliminary and unaudited.

A five-year history of Lottery revenues and profits and a projection for fiscal 2022 are shown in the following table.

## Lottery Revenues and Profits

(in thousands)

| Fiscal Year | Revenues | Net Operating <br> Revenues | $\underline{\text { Net Profits }}$ |
| :--- | ---: | ---: | ---: |
| $2022(1)$ | $\$ 5,688,913$ | $\$ 1,118,099$ | $\$ 995,766$ |
| 2021 | $5,828,527$ | $1,212,023$ | $1,112,576$ |
| $2020(2)$ | $5,257,627$ | $1,090,894$ | 986,851 |
| 2019 | $5,508,564$ | $1,206,850$ | $1,104,220$ |
| 2018 | $5,291,951$ | $1,097,398$ | 997,057 |
| 2017 | $5,097,765$ | $1,136,203$ | $1,039,697$ |

SOURCE: State Lottery Commission
(1) Fiscal 2022 figures are projected. Minor adjustments to Lottery revenues are reported several times a year based upon trends.
(2) The lottery net profits for fiscal 2020 represent a $\$ 117.4$ million decrease from fiscal 2019 in large part due to the impact of the COVID-19 pandemic. See "Special Disclosure Regarding COVID-19 MATTERS."

Tobacco Settlement. In November, 1998, the Commonwealth joined with other states in a master settlement agreement that resolved the Commonwealth's and other states' litigation against the cigarette industry. Under the agreement, cigarette companies have agreed to make both annual payments (in perpetuity) and five initial payments (for calendar 1999 to 2003, inclusive) to the settling states. Each payment amount is subject to applicable adjustments, reductions and offsets, including upward adjustments for inflation and downward adjustments for decreased domestic cigarette sales volume.

The Commonwealth's allocable share of the base amounts payable under the master settlement agreement is approximately $4.04 \%$, which equals more than $\$ 8.962$ billion through fiscal 2024 , subject to adjustments, reductions and offsets. However, since fiscal 2006 certain amounts have been withheld from each year's payments by tobacco manufacturers who claim that because of certain developments they are entitled to reduce such payments under the master settlement agreement. Those withheld amounts ranged from $\$ 21$ million to $\$ 35$ million to the Commonwealth in the period from 2006 through 2012, inclusive. A smaller amount has been withheld for 2013 through 2016, inclusive. The Commonwealth believes it is due the full amount and is pursuing its claim to unreduced payments. See "LEGAL MATTERS - Other Revenues." The Commonwealth was also awarded $\$ 414.3$ million from a separate Strategic Contribution Fund established under the master settlement agreement to reward certain states' particular contributions to the national tobacco litigation effort. This additional amount, also subject to a number of adjustments, reductions and offsets, was payable in equal annual installments during the years 2008 through 2017, inclusive. Massachusetts received its final Strategic Contribution Fund payment in April 2017.

From fiscal 2003 through fiscal 2012, all payments received by the Commonwealth pursuant to the master settlement agreement were deposited in the General Fund. Since fiscal 2012, state law has stipulated that a portion of annual tobacco settlement revenues be deposited into the State Retiree Benefits Trust Fund. See "PENSION AND OPEB Funding - Other Post-Employment Benefit Obligations (OPEB)."

The following table sets forth the tobacco settlement amounts received by the Commonwealth to date.

## Payments Received Pursuant to the Tobacco Master Settlement Agreement (in millions) (1)

| Fiscal Year | Initial Payments | Annual Payments | Total Payments |
| :---: | :---: | :---: | :---: |
| 2000 | \$186.6 (2) | \$139.6 | \$326.2(2) |

SOURCE: Office of the Comptroller.
(1) Amounts are approximate. Totals may not add due to rounding.
(2) Payments received for both 1999 and 2000.

Settlements and Judgments. State finance law provides that any one-time settlement or judgment exceeding $\$ 10$ million is to be deposited in the Stabilization Fund to the extent that the total of all such one-time settlements and judgments in a fiscal year exceeds the average of such totals for the five preceding fiscal years. The amount of such one-time settlements and judgments totaled approximately $\$ 111.6$ million in fiscal 2017, $\$ 36.6$ million in fiscal 2018, $\$ 48.8$ million in fiscal 2019, $\$ 42.0$ million in fiscal 2020, and $\$ 43.9$ million in fiscal 2021. The threshold applicable in fiscal 2022 is $\$ 56.6$ million (average of fiscal 2017 through fiscal 2021).

On November 9, 2022, the Commissioner of Revenue and the Attorney General certified that the Commonwealth had received $\$ 13.6$ million in one-time settlement and judgment payments exceeding $\$ 10$ million each during the first five months of fiscal 2022.

Gaming. On November 22, 2011, the Governor approved legislation that authorized the licensing of up to three regional resort casinos (one per region) and one slot facility (up to 1,250 slots) in the Commonwealth. The legislation established an appointed, independent state Gaming Commission to oversee the implementation of the law and the regulation of the resultant gaming facilities. The legislation also provided that licensing fees collected by the Gaming Commission are to be applied to a variety of one-time state and local purposes, and gaming tax revenues received by the Commonwealth are to be applied to various funds as set forth in the legislation. The legislation stipulates that initial licensing fees, which are set by the Gaming Commission, must be at least $\$ 85$ million per casino (Category 1 license) and $\$ 25$ million for the slot facility (Category 2 license).

The Gaming Commission has awarded Category 1 gaming licenses in two of the three regions and one Category 2 slots facility license. The facility in Springfield (Region B) opened on August 24, 2018 and the facility in Everett (Region A) opened on June 23, 2019. The Category 2 slot facility opened in Plainville on June 24, 2015.

The following table shows gaming collections revenues for the first five months of fiscal 2022.

Source: Massachusetts Gaming Commission.
(1) Fiscal 2021 is unaudited.
(2) Operations at both Category 1 facilities and the Category 2 facility were temporarily suspended, effective on or about March 15, 2020, as a result of the COVID-19 pandemic. The Commission authorized the reopening of the gaming establishments in accordance with its adopted health and safety guidelines as of July 6, 2020. See "Special Disclosure Regarding COVID-19 Matters."
(3) The first Category 1 gaming facility in Massachusetts opened on August 24, 2018 and second the facility opened on June 23, 2019. Each Category 1 licensee pays a tax of $25 \%$ of gross gaming revenues.
(4) The Category 2 licensee pays a tax of $40 \%$ of gross gaming revenues.
(5) The Category 2 licensee pays an assessment of $9 \%$ of gross gaming revenue.

On April 28, 2016, the Gaming Commission voted to deny an application for a Category 1 license in Region C. On June 6, 2018, the unsuccessful applicant in Region C sent a letter to the Gaming Commission requesting that the Gaming Commission reconsider its unsuccessful application. Upon formal reconsideration in September 2019, the Gaming Commission voted to deny the request for reconsideration. Later in 2019, the Gaming Commission issued an RFI to elicit public input. The Gaming Commission is considering next steps related to Region C.

In March 2016, the Mashpee Wampanoag tribe announced that it would commence construction of a tribal resort casino in the third region (Region C), based upon the assumed power of the U.S. Secretary of the Interior to take land into trust for the tribe. On July 28, 2016, in the case of Littlefield v. U.S. Department of the Interior, the U.S. District Court for the District of Massachusetts held that the Secretary of the Interior lacked the authority to take land into trust for the Mashpee Wampanoag tribe and remanded the matter back to the Secretary of the Interior for further proceedings consistent with the opinion as well as the declaratory judgment entered. The Mashpee Wampanoag filed a motion to intervene, which was granted. In December 2016, the Mashpee Wampanoag filed a notice of appeal to the U.S. Court of Appeals for the First Circuit. On September 7, 2018, the Department of the Interior issued a revised land-in-trust decision concluding that the Mashpee Wampanoag did not meet the statutory requirements to have land taken into trust. The Mashpee Wampanoag filed an appeal of the September 2018 decision in the U.S. District Court for the District of Columbia. On February 27, 2020, the U.S. Court of Appeals for the First Circuit issued a decision affirming the District Court decision that the Secretary lacked the authority to take land into trust for the benefit of the tribe. On March 27, 2020, the Secretary issued a directive to the Director of the Bureau of Indian Affairs to rescind the decision accepting land into trust on behalf of the Tribe, to revoke the reservation proclamation, and to issue a clarification that such actions annul the previous determination that such lands are eligible for gaming under the Indian Gaming Regulatory Act. On June 5, 2020, the U.S. District Court for the District of Columbia issued a decision finding the Secretary of the Interior's September 2018 decision to be arbitrary, capricious and an abuse of discretion and remanded the matter to the Secretary to determine whether certain standards governing the determination of tribal and land status were properly applied. On the same day, the U.S. District Court for the District of Columbia issued an order prohibiting the Department of the Interior from taking any steps to alter the status quo ante with respect to the land in Mashpee and Taunton that was taken into trust for the benefit of the tribe. In August 2020, the Department of the Interior and intervenor-defendants filed notices of appeal to the U.S. Court of Appeals for the District of Columbia Circuit. On February 19, 2021 the Department of the Interior and intervenor-defendants moved to voluntarily dismiss their appeals, the motions were granted, and the appeals were dismissed. On December 22, 2021, the Department of the Interior issued a new decision finding that: statutory authority for acquiring the land in question exists under Section 5 of the Indian Reorganization Act; the 2015 decision to acquire such land in trust should be affirmed (with modifications); the land
is eligible for gaming under the Indian Gaming Regulatory Act; and the Department of the Interior will retain the land in trust as the Tribe's reservation.

Various municipalities, three registered voters, and Mohegan Sun filed suit contesting certain aspects of the Gaming Commission's issuance of the Region A Category 1 license. All but one of the claims have been dismissed, either voluntarily or by order of the Massachusetts Superior Court. The Gaming Commission is currently defending the remaining intervenor claim filed by Mohegan Sun. That claim was argued before the Massachusetts Supreme Judicial Court in November 2016. On March 10, 2017, the Supreme Judicial Court issued a decision affirming that Mohegan Sun had standing to seek review of the license award and remanded the case to the Superior Court for further proceedings. Briefing on Mohegan Sun's intervenor claim was completed in January 2018 and the case was scheduled for hearing in April 2018. In January 2018, the case was stayed pending the Commission's decision regarding whether the Region A licensee remained suitable to hold the license. The Commission rendered its decision in April 2020 and thereafter Mohegan Sun amended its complaint to add a challenge to that determination. Argument on Mohegan Sun's motion for judgment was heard on September 21, 2021. The matter remains ongoing.

On November 14, 2016, the Gaming Commission was sued for tortious interference with respect to the plaintiff's agreement to sell property to the licensee for the Region A Category 1 facility. The plaintiff requested damages as determined at trial. On May 14, 2018, the Superior Court granted the Gaming Commission's motion to dismiss two of three claims then remaining. On July 5, 2018, the Gaming Commission filed a third-party complaint against the Region A Category 1 licensee for unjust enrichment and indemnification relating to the remaining claim against the Gaming Commission. On February 12, 2021, the Commission filed a motion for summary judgment. On June 16, 2021, the Court granted the Gaming Commission's motion for summary judgment and dismissed the case. The Court also dismissed the Gaming Commission's third-party claims against the Region A Category 1 licensee. The plaintiff has appealed the Court's decisions.

## Limitations on Tax Revenues

Chapter 62F of the General Laws establishes a state tax revenue growth limit for each fiscal year equal to the average positive rate of growth in total wages and salaries in the Commonwealth, as reported by the federal government, during the three calendar years immediately preceding the end of such fiscal year. The growth limit is used to calculate "allowable state tax revenue" for each fiscal year. Chapter 62 F also requires that allowable state tax revenues be reduced by the aggregate amount received by local governmental units from any newly authorized or increased local option taxes or excises. Any excess in state tax revenue collections for a given fiscal year over the prescribed limit, as determined by the State Auditor, is to be applied as a credit against the then-current personal income tax liability of all taxpayers in the Commonwealth in proportion to the personal income tax liability of all taxpayers in the Commonwealth for the immediately preceding tax year. The law does not exclude principal and interest payments on Commonwealth debt obligations from the scope of its tax limit. However, the preamble contained in Chapter 62F provides that "although not specifically required by anything contained in this chapter, it is assumed that from allowable state tax revenues as defined herein the Commonwealth will give priority attention to the funding of state financial assistance to local governmental units, obligations under the state governmental pension systems and payment of principal and interest on debt and other obligations of the Commonwealth."

The following table sets forth the Commonwealth's net state tax revenues and allowable state tax revenues, as defined in Chapter 62F, for fiscal 2017 through fiscal 2021.

| Net State Tax Revenues | Allowable State Tax Revenues | Net State Tax Revenues (under) <br> Allowable State Tax Revenues |  |  |
| :--- | :---: | :---: | :---: | :---: |
| 2021 | $\$ 34,655,837,068$ | $\$ 36,789,926,416$ | $(52,134,089,348)$ |  |
| 2020 | $30,164,388,908$ | $35,514,892,070$ | $(5,350,503,162)$ |  |
| 2019 | $30,202,588,989$ | $33,977,241,799$ | $(4,774,652,810)$ |  |
| 2018 | $28,178,560,547$ | $32,531,393,763$ |  | $(5,050,933,216)$ |
| 2017 | $26,044,206,400$ | $31,095,184,910$ |  |  |

[^1]
## COMMONWEALTH EXPENDITURES

This section contains a description of the major categories of Commonwealth expenditures. All amounts and percentages for fiscal 2021 are unaudited and for fiscal 2022 are projected.

## Local Aid

Commonwealth Financial Support for Local Governments. The Commonwealth makes substantial payments to its cities, towns and regional school districts (local aid) to mitigate the impact of local property tax limits on local programs and services. See "Property Tax Limits" below. Local aid payments to cities, towns and regional school districts take the form of both direct and indirect assistance. Direct local aid consists of general revenue sharing funds and specific program funds sent directly to local governments and regional school districts. The fiscal 2022 budget provides $\$ 7.092$ billion of state-funded direct and indirect local aid to municipalities.

A large portion of general revenue sharing funds is earmarked for public education and is distributed through a formula designed to ensure that each district reaches at least a minimum level of "foundation" spending per public education pupil. The fiscal 2022 budget includes state funding for so-called "Chapter 70" public education aid of $\$ 5.503$ billion. The fiscal 2022 budget also includes a transfer of $\$ 350$ million into a trust for the purposes of implementing the provisions of the Student Opportunity Act in future years.

The other major component of direct local aid is unrestricted general governmental aid, which provides unrestricted funds for municipal use. The fiscal 2022 budget provides for $\$ 1.168$ billion in unrestricted general government aid.

Property Tax Limits. In November 1980, voters in the Commonwealth approved a statewide tax limitation initiative petition, commonly known as Proposition $21 / 2$, to constrain levels of property taxation and to limit the charges and fees imposed on cities and towns by certain governmental entities, including county governments. Proposition $21 / 2$ is not a provision of the state constitution and accordingly is subject to amendment or repeal by the Legislature. Proposition $21 / 2$, as amended to date, limits the property taxes that may be levied by any city or town in any fiscal year to the lesser of (i) $2.5 \%$ of the full and fair cash valuation of the real estate and personal property therein or (ii) $2.5 \%$ over the previous year's levy limit plus any growth in the tax base from certain new construction and parcel subdivisions. The law contains certain voter override provisions and, in addition, permits debt service on specific bonds and notes and expenditures for identified capital projects to be excluded from the limits by a majority vote at a general or special municipal election. Between fiscal 1981 and fiscal 2022, the aggregate property tax levy across all cities and towns grew from $\$ 3.347$ billion to $\$ 19.746$ billion, a compound annual growth rate of $4.42 \%$.

## Medicaid and the Health Connector

Many of the Commonwealth's healthcare programs and expenditures are governed by the federal Affordable Care Act (ACA), which has been and continues to be the subject of certain legal challenges. In December 2017, Congress eliminated the financial penalty under the ACA's individual shared responsibility provision, otherwise known as the individual mandate. In December 2019, Congress enacted legislation that both deferred the commencement and accelerated the full implementation of reductions in federal reimbursement for hospitals that treat a disproportionate number of Medicaid recipients. To date, such actions have not had or are not expected to have a material adverse impact on the Commonwealth and its health care programs. While it is not possible to predict with any certainty whether or when any other provisions of the ACA may be, in whole or in part, modified, repealed, or withdrawn, any such actions could have a material adverse effect on the Commonwealth's healthcare programs and expenditures. Accordingly, the following discussion should be read with the understanding that significant additional changes could occur in the near future and beyond with respect to many of the programs discussed.

MassHealth. The Commonwealth's Medicaid program, called MassHealth, provides health care to 2.1 million low-income children and families, low-income adults, disabled individuals and low-income elders. The program, administered by the Office of Medicaid within the Executive Office of Health and Human Services, receives federal reimbursement on most of its expenditures. On February 9, 2018, the Children's Health Insurance

Program (CHIP) was reauthorized through federal fiscal 2027. For Massachusetts, the CHIP matching rate of $88 \%$ for federal fiscal 2019, was reduced to $76.5 \%$ for federal fiscal 2020, and was further reduced to $65 \%$ for federal fiscal 2021 and beyond. Under the ACA, beginning January 1, 2014, MassHealth began receiving enhanced federal reimbursement for spending on the new adult group (generally, childless adults with incomes under $133 \%$ of the federal poverty limit). The federal reimbursement rate for this group was $93 \%$ in calendar year 2019, decreasing to $90 \%$ for calendar 2020 and beyond. In response to the COVID-19 pandemic, the Families First Act established a $6.2 \%$ increase to the matching rate effective January 1, 2020, through the end of the quarter in which the declaration of the national public health emergency (including any extensions thereof) ends. This increase does not apply to expenditures for the ACA expansion population. The increase is contingent on several factors, including, but not limited to, a maintenance-of-effort requirement on eligibility standards and elimination of member cost-sharing for all COVID-19 related testing and treatment.

The fiscal 2022 budget includes $\$ 19.6$ billion in funding for non-administrative spending for the MassHealth program. The $\$ 19.6$ billion includes $\$ 19.0$ billion in programmatic spending. The $\$ 19.6$ billion also includes approximately $\$ 470$ million to support supplemental payments to providers. Fiscal 2022 estimated programmatic spending is $\$ 19.2$ billion, which will require a supplemental appropriation, but programmatic spending is projected to be below the budgeted amount on a net basis. The reported spending levels do not include $\$ 415$ million in estimated spending from the American Rescue Plan Home and Community-Based Services (HCBS) reserve.

During the COVID-19 pandemic, MassHealth implemented a number of measures to provide flexibility for members and providers. MassHealth submitted a number of Section 1135 waiver requests, all of which have been approved, withdrawn, or approved through other mechanisms such as blanket waivers. MassHealth also submitted an emergency Section 1115 waiver request, which was approved by CMS on December 30, 2020, and six Appendix K requests to grant the Commonwealth certain flexibilities for the operation of HCBS waivers, which have been approved. In addition, MassHealth submitted numerous Disaster State Plan Amendment requests, many of which have been approved, but a number of which remain pending. On July 15, 2021, MassHealth submitted a second emergency Section 1115 waiver request, which is pending approval. MassHealth has submitted requests to CMS for authority to permit MassHealth to direct its managed care entities to increase rates for certain services and implement other payment initiatives in response to the COVID-19 pandemic, all but two of which have been approved. MassHealth may submit additional requests for federal flexibility and additional managed care directed payment requests prior to the expiration of the national public health emergency.

## Budgeted Operating Funds Medicaid Expenditures and Enrollment (in millions)

SOURCE: Fiscal 2017-2021 (excluding Medicaid administrative expense and enrollment), Office of the Comptroller; fiscal 2017-2021 (Medicaid administrative expense and enrollment only) and fiscal 2022, Executive Office of Health and Human Services.
(1) Account restructuring in fiscal 2018 budget shifted spending for the Choices program ( $\$ 214$ million in fiscal 2017) from MassHealth to Elder Affairs.
(2) Total expenditures exclude supplemental payments to providers.
(3) Enrollment in prior fiscal years changes due to the effects of redeterminations, retroactive eligibility, application verification, and eligibility appeals.
(4) Amounts for fiscal 2021 are unaudited and for fiscal 2022 are projected.

Commonwealth Health Insurance Connector Authority. State health care reform legislation enacted in 2006 created the Commonwealth Health Insurance Connector Authority (Health Connector). The Health Connector is governed by a board, of which the Secretary of Health and Human Services is the chairperson and the Secretary of Administration and Finance is also a member, each ex officio. The Health Connector and its programs are supported by the Commonwealth Care Trust Fund (CCTF), which is supported by dedicated revenue sources, as well as carrier administrative fees. The Health Connector is also responsible for policy development relative to the Affordability Schedule and Minimum Credible Coverage rules and public education and outreach, including the ACA-required Navigator program.

The Health Connector administers the Commonwealth's Health Insurance Marketplace under the ACA. As the Commonwealth's Marketplace, the Health Connector offers qualified health plans to individuals and small businesses. Qualifying individuals can be eligible for federal tax credits to lower their health insurance premiums, and certain small businesses shopping through the Marketplace can access federal small business health care tax credits for up to two years. Individuals with incomes between $133 \%$ and $300 \%$ FPL, as well as certain lawfully present immigrants with incomes between $0 \%$ and $300 \%$ FPL, have access to additional state and federal subsidies through a program called ConnectorCare. The state provides additional state subsidies via ConnectorCare to ensure that the premiums and point-of-service cost sharing for certain low-income members, after factoring in federal subsidies, are similar to what was available through the state's pre-ACA Commonwealth Care program.

The fiscal 2022 budget for the Health Connector reflects $\$ 123.3$ million in gross spending from the CCTF. Net of federal revenue, fiscal 2022 expenditures are estimated to be $\$ 84.5$ million, a decrease of $\$ 94.5$ million compared to fiscal 2021. These estimates reflect the extension of the national public health emergency, as well as other changes to eligibility and benefit levels resulting from the passage of the ARPA.

Federal 1115 MassHealth Demonstration Waiver. Section 1115 of the Social Security Act gives the U. S. Secretary of Health and Human Services authority to waive provisions of major health and welfare programs, including certain Medicaid requirements, and to allow a state to use federal Medicaid funds in ways that are not otherwise allowed under federal rules. The Commonwealth's 1115 waiver was renewed on November 4, 2016. The renewal consisted of an amendment to the current 1115 waiver, which was effective through June 30, 2017, as well as a five-year waiver extension. This waiver extension is authorized from July 1, 2017 through June 30, 2022. The waiver extension is a $\$ 52.4$ billion agreement that supports a restructuring of the MassHealth program and is expected to bring in significant federal investment to support health care delivery system reforms. The agreement
also extends eligibility and benefit provisions authorized under the waiver, such as coverage for diversionary behavioral health benefits and for individuals with HIV. The waiver extension includes more than $\$ 29$ billion in revenue to the Commonwealth through federal financial participation. Additionally, the waiver extension expands services for substance use disorder treatment.

The 1115 waiver extension also preserves and maintains the stability of the Safety Net Care Pool (SNCP) for the full five years of the waiver period with an $\$ 8$ billion authorization. This authorization includes a $\$ 1.8$ billion investment of new Delivery System Reform Incentive Program (DSRIP) funding that will support MassHealth's payment reform objectives. The SNCP renews authority for the Health Safety Net program, which makes payments to hospitals and community health centers for providing certain health care services to their low-income patients who are not eligible for health insurance or cannot afford it. Under the new SNCP, supplemental payments for safety net hospitals have been restructured and linked to delivery system reform participation. The number of hospitals eligible for these payments increased from seven in the previous waiver to 14 in the waiver extension. In addition, the SNCP expands authority for federal match to include cost-sharing affordability subsidies and enrollment gap coverage for Health Connector enrollees up to $300 \%$ FPL. Lastly, the SNCP establishes non-state public hospital payments and incentive programs for Cambridge Health Alliance, tied to delivery system reform performance. EOHHS has submitted a request to CMS to further extend the 1115 waiver from July 1, 2022 to June 30, 2027.

As noted above, two emergency Section 1115 waivers were also requested in response to the COVID-19 pandemic. For additional details see "MassHealth" above.

Health Care Cost Containment. The Center for Health Information and Analysis (CHIA) is an independent state agency, funded through an industry assessment, to monitor the Massachusetts health care system through data collection and research and to release reliable information and meaningful analysis to a wide variety of audiences.

The Health Policy Commission (HPC) is an independent agency within, but not subject to the control of, the Executive Office for Administration and Finance. The HPC's mission is to advance a more transparent, accountable, and innovative health care system through independent policy leadership and investment programs, to achieve better health and better care at a lower cost across the Commonwealth. Beginning in fiscal 2017, the HPC is funded through an annual assessment on the health care industry, similar to CHIA's assessment.

Each year, the HPC, in collaboration with CHIA, releases a report on the Commonwealth's performance under the benchmark. The 2021 Cost Trends Report provides that total health care expenditures per capita in the Commonwealth grew from 2018 to 2019 by $4.3 \%$, compared to $3.6 \%$ growth from 2017 to 2018.

As required by statute, the health care cost growth benchmark was equal to PGSP, or $3.6 \%$, for calendar 2013 to 2017. By statute, the health care cost growth benchmark for calendar 2018 through 2022 is equal to the growth rate of PGSP minus $0.5 \%$, and for calendar 2023 and thereafter, will be equal to the growth rate of PGSP. However, the HPC and the Legislature have some ability to change those growth targets.

SOURCES: Fiscal 2017-2021 Office of the Comptroller; fiscal 2022, Executive Office for Administration and Finance.
(1) Includes Massachusetts Rehabilitation Commission, Massachusetts Commission for the Blind, Massachusetts Commission for the Deaf and Hard of Hearing.
(2) Account restructuring in fiscal 2018 budget shifted spending for the Choices program from MassHealth to Elder Affairs.
(3) Includes Medicaid program administration.
(4) Amounts for fiscal 2021 are unaudited and for fiscal 2022 are projected.

Office of Health Services. The Office of Health Services encompasses programs and services from the Department of Public Health and the Department of Mental Health. Its goal is to promote healthy people, families, communities and environments through coordinated care. The departments work in unison to determine that individuals and families can live and work in their communities self-sufficiently and safely. The following are a few examples of programs and services provided by this office: substance abuse programs, immunization services, early intervention programs, environmental health services, youth violence programs, supportive housing and residential services for the mentally ill of all ages, and emergency and acute hospital services.

Office of Children, Youth and Family Services. The Office of Children, Youth and Family Services works to provide services to children and their families through a variety of programs and services. The programs and services are offered through the Department of Children and Families, the Department of Youth Services, the Department of Transitional Assistance and the Office of Refugees and Immigrants. The collaborative goal of this office is to work to ensure that individuals, children and families are provided with public assistance needed as well as access to programs that will allow for them to be safe and self-sufficient.

The Department of Children and Families (DCF) is charged with protecting children from abuse and neglect, and in partnership with families and communities, ensuring that children are able to grow and thrive in a safe and nurturing environment. DCF serves approximately 46,000 children at any given time, primarily children through age 18 , and youth ages 18-22 who are transitioning from DCF custody to independent living. DCF is currently undergoing an agency improvement initiative to implement new programmatic policies, review agency management structure, and strengthen workforce capacity.

Through the Department of Transitional Assistance (DTA), the Commonwealth funds three major programs of public assistance for eligible state residents: Transitional Aid to Families with Dependent Children; Emergency Aid to the Elderly, Disabled and Children; and the State Supplemental Program for individuals enrolled in the federal Supplemental Security Income program. In addition, DTA is responsible for administering the entirely federally funded Supplemental Nutrition Assistance Program and the Pandemic EBT program, as well as the state funded Healthy Incentives Program and other smaller programs that assist DTA clients with completing their education, gaining career skills and finding employment.

Disabilities and Community Services. Programs and services provided by the Massachusetts Rehabilitation Commission, the Massachusetts Commission for the Deaf and Hard of Hearing, the Massachusetts Commission for the Blind and the Department of Developmental Services assist some of the most disadvantaged residents of the Commonwealth. These agencies provide assistance to this population and create public awareness in the citizens of the Commonwealth, as well as promote inter-agency collaboration which attend to the needs of the community, disabled and multi-disabled population. This holistic approach is designed to ensure that those of all ages with disabilities are able to lead functionally equivalent lives despite limitations that they may face.

Executive Office of Elder Affairs. The Executive Office of Elder Affairs provides a variety of services and programs to eligible seniors and their families. The office administers supportive and congregate housing programs, regulates assisted living residences, and provides home care and caregiver support services and nutrition programs. Eligibility for services is based largely on age, income, and disability status. The Executive Office of Elder Affairs also administers a state-supported prescription drug program for seniors.

Department of Veterans' Services. The Department of Veterans' Services provides a variety of services, programs and benefits to eligible veterans and their families. The Department of Veterans' Services provides outreach services to help eligible veterans enroll in a variety of programs, administers supportive housing and homeless services, and provides approximately 26,000 veterans, veterans' spouses and parents with annuity and benefit payments. The Department also oversees the Chelsea Soldiers' Home and the Holyoke Soldiers' Home, state-owned facilities providing long-term health care and domiciliary services to veterans.

## Education

Executive Office of Education. The Executive Office of Education includes the Department of Early Education and Care, the Department of Elementary and Secondary Education (previously the Department of Education), and the Department of Higher Education (previously the Board of Higher Education). The Secretary of Education serves on the board of each department as well as the board of the University of Massachusetts. The office is committed to advancing actions and initiatives that will improve achievement for all students, close persistent achievement gaps, and creating a $21^{\text {st }}$ century public education system that prepares students for higher education, work, and life in a world economy and global society.

Department of Early Education and Care. The Department of Early Education and Care (EEC) is the agency responsible for all early education and care services and funding in the Commonwealth, including licensing and oversight of and technical assistance to programs for infants, toddlers, preschoolers, and school age children during out-of-school time; group homes; foster care and adoption placement agencies; and residential schools for children with special needs. EEC also oversees community-based family engagement networks that provide literacy and other developmental activities for children and parents in libraries and adult education centers. Historically, EEC licenses approximately 9,000 child care programs, residential facilities, and foster care/adoption placement agencies that have the capacity to serve an estimated 230,000 children. EEC also historically has supported an average of approximately 55,000 children from low-income or at-risk families to attend family or group child care programs, including referrals from the Commonwealth's Department of Children and Families and Department of Transitional Assistance. As a result of the COVID-19 pandemic, the number of licensed programs and children served have decreased, although overall program expenditures have not decreased.

Department of Elementary and Secondary Education. The Department of Elementary and Secondary Education (DESE) serves the student population from kindergarten through $12^{\text {th }}$ grade by providing support for students, educators, schools and districts and by providing state leadership for elementary, secondary, vocationaltechnical, and adult basic education. There are approximately 400 operating school districts in the Commonwealth,
historically serving approximately 950,000 students. DESE is governed by the Board of Elementary and Secondary Education, which includes 11 members. The Board of Elementary and Secondary Education nominates, and the Secretary of Education appoints, a Commissioner of Elementary and Secondary Education, who is responsible for carrying out the policies established by the Board.

Department of Higher Education. The Commonwealth's system of higher education includes the fivecampus University of Massachusetts, nine state universities and 15 community colleges. The higher education system is coordinated by the Department of Higher Education, which is governed by the Board of Higher Education. Each institution of higher education is governed by a separate board of trustees; the University of Massachusetts has one board that governs its five campuses. The Board of Higher Education appoints, subject to the approval of the Secretary of Education, a Commissioner of Higher Education, who is responsible for carrying out the policies established by the board at the Department of Higher Education.

The operating revenues of each institution consist primarily of state appropriations and of student fees that are set by the board of trustees of each institution. Tuition levels are set by the Board of Higher Education for the state universities and community colleges, while the University of Massachusetts board of trustees has the authority to set and retain tuition for its campuses. The Massachusetts College of Art and Design and the Massachusetts Maritime Academy also have authority to retain tuition from all students. The other institutions have authority to retain tuition received from out-of-state students and tuitions from self-supporting programs, such as colleges of continuing education and evening schools. Otherwise, each institution is required to remit tuition revenue to the State Treasurer.

The board of trustees of each institution submits annually audited financial statements to the Comptroller and the Board of Higher Education. The Department of Higher Education prepares annual operating budget requests on behalf of all institutions, which are submitted to the Executive Office of Education and subsequently to the Executive Office for Administration and Finance and to the House and Senate Committees on Ways and Means. The Legislature appropriates funds for the higher education system in the Commonwealth's annual operating budget in various line items for each institution.

## Public Safety

Eleven state agencies fall under the umbrella of the Executive Office of Public Safety and Security. The largest is the Department of Correction, which operates 16 correctional facilities and centers across the Commonwealth. Other public safety agencies include the State Police, the Parole Board, the Department of Fire Services, the Military Division, the Office of the Chief Medical Examiner, and five other public safety related agencies.

## Energy and Environmental Affairs

The Executive Office of Energy and Environmental Affairs is responsible for policy development, environmental law enforcement services, and oversight of agencies and programs. Six state agencies and numerous boards fall under the umbrella of the Executive Office of Energy and Environmental Affairs. The largest is the Department of Conservation and Recreation, which operates public parkland, recreational facilities, watersheds and forests across the Commonwealth. Other environmental agencies include the Department of Agricultural Resources, responsible for the state's agricultural and food safety programs, the Department of Environmental Protection, responsible for clean air, water, recycling and environmental remediation programs, and the Department of Fish and Game, responsible for the management and protection of endangered species, fisheries and habitat. Additional agencies include the Department of Public Utilities, responsible for oversight of electric, gas, water and transportation utilities, and the Department of Energy Resources, responsible for energy planning, management and oversight.

## Debt Service

Debt service expenditures relate to general obligation bonds and notes, special obligation bonds and federal grant anticipation notes issued by the Commonwealth. See "LONG-TERM LIABILITIES."

## Employee Benefits

Group Insurance. The Group Insurance Commission (GIC) provides health insurance benefits to more than 425,000 people, including state and participating municipalities' employees, retirees, their spouses and dependents, and certain retired municipal teachers, their spouses and dependents. State employee contributions are currently based on date of hire; employees hired on or before June 30, 2003 contribute $20 \%$ of total premium costs, and employees hired after June 30, 2003 contribute $25 \%$ of premium costs. Similarly, state retirees contribute either $10 \%, 15 \%$ or $20 \%$, depending on their retirement date. The GIC also provides health insurance benefits for the employees and retirees of participating municipalities; the municipalities reimburse the state for their enrollees' premium costs. The contribution ratio(s) for municipal enrollees is set through a collective bargaining process within each community. As of July 1, 2021, the GIC provides health insurance to employees and retirees of 54 municipal entities: 11 cities, 27 towns, and 16 other governmental entities, including regional school districts, union and nonunion educational collaboratives, charter schools, and regional planning councils.

Fiscal 2022 GIC appropriations total $\$ 1.827$ billion, approximately $\$ 629$ million of which is offset by municipal revenue and $\$ 229$ million of which is offset by non-state agency revenue to reimburse the state for providing health insurance benefits to the participating governmental units, including municipalities. In addition, the fiscal 2022 budget authorizes transfers of up to $\$ 500$ million to the State Retiree Benefits Trust Fund for the purpose of making expenditures for current state retirees and their dependents.

There are no significant changes to benefits in fiscal 2022. The aggregate fiscal 2022 premium rates for GIC state and municipal members increased $5.52 \%$ over the aggregate premium rates in effect in fiscal 2021.

Pensions. The Commonwealth is responsible for the payment of pension benefits for Commonwealth employees and for teachers of the cities, towns and regional school districts throughout the state. See "PENSION AND OPEB Funding."

Other Post-Employment Benefit Obligations (OPEB). The Commonwealth is required under state law to provide certain health care and life insurance benefits for retired employees of the Commonwealth and certain other governmental agencies. See "PENSION AND OPEB Funding - Other Post-Employment Benefit Obligations (OPEB)."

The fiscal 2022 budget is consistent with the requirements of Government Accounting Standards Board (GASB) Statements No. 45 and No. 75, that spending for current retirees be accounted for separately, and that deposits towards the Commonwealth's non-pension retiree liability be made into an irrevocable trust.

## Other Program Expenditures

The remaining expenditures on other programs and services for state government include constitutional officers, the judiciary and district attorneys, sheriffs, the Executive Office for Administration and Finance, the Executive Office of Housing and Economic Development, the Executive Office of Labor and Workforce Development, the Executive Office of Technology Services and Security, and various other programs.

## SELECTED FINANCIAL DATA

The table below in this section presents combined revenues and expenditures in the budgeted operating funds. The measurement of revenues for the budgeted operating funds is on a statutory basis and differs from governmental revenues on a GAAP basis. See "Statutory Basis Distribution of Budgetary Revenues and Expenditures" and "GAAP Basis" below.

## Statutory Basis Distribution of Budgetary Revenues and Expenditures

The revenues and expenditures of the budgeted operating funds presented in the following table are derived from the Commonwealth's Statutory Basis Financial Reports (SBFR) for fiscal 2017 through 2021. Projections for fiscal 2022 have been prepared by the Executive Office for Administration and Finance.

The following table sets forth the Commonwealth's budgeted operating funds revenues and expenditures for fiscal 2017 through fiscal 2021, and projected revenues and expenditures for fiscal 2022. See "SPECIAL Disclosure Regarding COVID-19 Matters," "Commonwealth Revenues - Tax Revenue Forecasting," and "FISCAL 2022."

SOURCES: Fiscal 2017-2021, Office of the Comptroller; fiscal 2022, Executive Office for Administration and Finance.
(1) Totals may not add due to rounding.
(2) For fiscal 2017 through fiscal 2020, tax and non-tax revenue from judgments and settlements in excess of $\$ 10$ million is included in specific tax and non-tax revenue categories. See "Commonwealth Revenues - Federal and Other Non-Tax Revenues; Settlements and Judgments."
(3) The Workforce Training Fund is not subject to annual appropriation, and employer contributions are deposited directly in the Workforce Training Fund after their collection.
(4) Includes $\$ 4.9$ billion transferred from the Coronavirus State and Local Fiscal Recovery Fund.
(5) Inter-fund Transfers from Non-budgeted Funds and Other Sources include profits from the State Lottery, abandoned property proceeds and other inter-fund transfers.
(6) Post-Employment Benefits include all budgeted pension transfers and transfers to the State Retiree Benefits Trust Fund (SRBTF). See "Pension and OPEB Funding - Other Post-Employment Benefit Obligations (OPEB)." Fiscal 2022 also includes a $\$ 250$ million supplemental transfer to the Pension Liability Fund.
(7) Includes appropriations authorized to be expended in the following year.
(8) Includes appropriations authorized in fiscal 2020 that were funded by federal funds in fiscal 2021.
(9) Includes appropriations authorized in fiscal 2021 that are expected to be funded by federal funds in fiscal 2022. Also includes $\$ 252$ million for a collective bargaining reserve to fund the retroactive and fiscal 2022 costs of certain agreements. See "Fiscal 2022."

## Stabilization Fund

The Stabilization Fund is established by state finance law as a reserve of surplus revenues to be used for the purposes of covering revenue shortfalls, covering state or local losses of federal funds or for any event which threatens the health, safety or welfare of the people or the fiscal stability of the Commonwealth or any of its political subdivisions. The fund is referred to as the state's "rainy day fund," serving as a source of financial support for the state budget in times of slow revenue growth or revenue declines and as the primary source of protection against having to make drastic cuts in state services in periods of economic downturns.

Required Deposits and Allowable Stabilization Fund Balance. From fiscal 2005 through fiscal 2013, state finance law provided that (i) $0.5 \%$ of current year net tax revenues be deposited into the Stabilization Fund at fiscal year-end, (ii) $0.5 \%$ of current-year net tax revenues be made available for the next fiscal year and (iii) any remaining amount of the year-end statutorily defined surplus be transferred to the Stabilization Fund. Since fiscal 2014, state finance law has required that the entire year-end statutorily defined surplus be transferred to the Stabilization Fund. Since fiscal 2011, state finance law has required that tax revenue from capital gains exceeding $\$ 1$ billion in a fiscal year (adjusted annually, beginning in fiscal 2014, to reflect the average annual rate of growth in U. S. gross domestic product over the preceding five years) be deposited as follows: $90 \%$ of such amount into the Stabilization Fund, 5\% of such amount to the State Retiree Benefits Trust Fund and, beginning in fiscal 2013, 5\% of such amount to the Commonwealth's Pension Liability Fund. However, all of these requirements may be modified or superseded by individual appropriation acts. In fiscal years 2016 and 2020, the Commonwealth temporarily suspended the requirement to transfer capital gains tax collections above the threshold to the Stabilization Fund, with all capital gains tax collections remaining in the General Fund.

Each quarter, the Department of Revenue certifies the amount of tax revenues estimated to have been collected during the preceding quarter from capital gains income and, once the threshold has been exceeded, the excess is transferred to the Commonwealth Stabilization Fund. The final certification of capital gains tax revenues is done in November following the end of the fiscal year, but no adjustment is made to the Stabilization Fund transfers if the final amount of capital gains taxes certified differs from the amount certified in the preceding July.

State finance law requires the Comptroller to transfer $75 \%$ of the growth in unclaimed property net revenue relative to the prior year to the Stabilization Fund.

Gaming legislation enacted in 2011 also requires $10 \%$ of gaming tax revenues from Category 1 licensees to be transferred from the Gaming Revenue Fund to the Stabilization Fund, provided that such amount may be reduced by half to fund certain deficiencies in funds distributed to cities and towns. See "Commonwealth Revenues Gaming."

The allowable Stabilization Fund balance at fiscal year-end is $15 \%$ of total budgeted revenues for that year. If the Stabilization Fund balance exceeds the allowable limit, the excess amounts are to be transferred to the Tax Reduction Fund.

The following table shows the sources and uses of the Stabilization Fund during fiscal 2017 through fiscal 2021.

Stabilization Fund Sources and Uses (in thousands)

|  | $\begin{gathered} \text { Fiscal } \\ \underline{\mathbf{2 0 1 7}} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Fiscal } \\ \underline{\mathbf{2 0 1 8}} \end{gathered}$ | $\begin{gathered} \text { Fiscal } \\ \underline{\mathbf{2 0 1 9}} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Fiscal } \\ \underline{\mathbf{2 0 2 0}} \\ \hline \end{gathered}$ | $\begin{gathered} \text { Fiscal } \\ \underline{2021(5)} \\ \hline \end{gathered}$ |

## SOURCE: Office of the Comptroller.

(1) Represents transfer equal to $75 \%$ of the growth in abandoned property receipts from the prior fiscal year.
(2) Represents transfers of gaming tax revenue $(\$ 6,231)$ and gaming fines $(\$ 3,550)$.
(3) Threshold adjusted annually for U.S. gross domestic product growth. The fiscal 2017 specified threshold was $\$ 1.278$ billion; however, capital gains tax collections for fiscal 2017 did not exceed this amount. A Legislative enactment in 2020 retained all fiscal 2020 capital gains tax revenue in the General Fund.
(4) Represents transfers of 5\% capital gains tax revenue to the State Pension Fund and OPEB Trust Fund per statute.
(5) Unaudited.

The following chart shows the Stabilization Fund balance from fiscal 1986 through fiscal 2021 (actual), and fiscal 2022 (projected). See "FISCAL 2022."

## GAAP Basis

The Commonwealth's GAAP financial statements for the year ended June 30, 2020, attached as Exhibit C, are prepared in accordance with reporting standards first established by GASB Statements 34 and 35, as amended. See "Commonwealth Budget and Financial Management Controls - Fiscal Control, Accounting and Reporting Practices of the Comptroller." The GAAP financial statements are presented on both a "fund perspective" (or short-term accrual) basis and a "government-wide perspective" basis, which includes debt, capital assets and accrual activity on a comprehensive statement of net position, similar to a balance sheet. All capital assets, including road and bridge infrastructure and all long-term liabilities, including outstanding debt and commitments of longterm assistance to municipalities and authorities, are part of the government-wide statements. The Commonwealth's statement of revenues, expenditures and changes in fund balances are presented as a statement of activities, similar to an income statement.

The table below presents the transition from the Commonwealth's statutory basis budgetary fund balance to the "fund perspective" balance, as depicted in the fund financial statements, and then to the Commonwealth's "government-wide" financial position. Differences between statutory and the "fund perspective" GAAP basis can be summarized in five major adjustments. Those adjustments are for Medicaid (as well as the somewhat related liability for uncompensated care), taxes, projected amounts due to the Commonwealth in the next fiscal year under the master tobacco settlement agreement, claims and judgments, and amounts due to authorities. As evidenced in the trend line of fund balance (deficit) over time, however, these adjustments connect the GAAP basis measurement when viewed using a fund perspective under GAAP and the statutory basis measurement. While the difference in fund balances may vary in a given fiscal year, both balances generally trend in the same direction. To convert to a full accrual basis, further major adjustments are made for the net book value of the Commonwealth's capital assets, inclusive of infrastructure, the realizable value of long-term deferred revenues (largely from tax payment plans) and the amount of the Commonwealth's outstanding long-term debt, the Commonwealth's unfunded pension and OPEB liabilities, and other liabilities.

## Governmental Funds-Statutory to GAAP-Fund Perspective and to Governmental Net Position

## (in millions)

| Governmental Funds-Statutory Basis, June 30, 2020 |  |
| :---: | :---: |
| Budgeted Fund Balance | \$4,295.2 |
| Non-budgeted special revenue fund balance | 4,506.5 |
| Capital Projects Fund Balance | (762.1) |
| Governmental Fund Balance-Statutory Basis, June 30, 2020 | \$8,039.6 |
| Plus: Expendable Trust and similar fund statutory balances that are considered governmental funds for GAAP reporting purposes | 628.1 |
| Less: Massachusetts Department of Transportation Funds | $(1,501.1)$ |
| Adjusted Statutory Governmental Fund Balance | \$7,166.6 |
| Reclassification of funds due to implementation of GASB Statement No. 84 | 61.7 |
| Short term accruals, net of allowances and deferrals for increases/(decreases): |  |
| Taxes, net of refunds and abatements | 2,265.5 |
| Tobacco settlement agreement receivable | 125.7 |
| Medicaid | (232.2) |
| Other short term accruals: |  |
| Assessments and other receivables | 452.6 |
| Amounts due to authorities and municipalities, net | (532.2) |
| Claims, judgments and other risks | (14.1) |
| Amounts due to healthcare providers and insurers | (23.1) |
| Workers' compensation and group insurance | (180.2) |
| Other accruals, net | $(1,750.1)$ |
| Net increase to governmental funds balances | \$173.6 |
| Massachusetts School Building Authority fund balance | 1,717.3 |
| Total changes to governmental funds | \$1,890.9 |
| Governmental fund balance (fund perspective) | 9,057.5 |
| Plus: Capital assets including infrastructure, net of accumulated depreciation | 4,922.8 |
| Deferred revenue, net of other eliminations | 820.6 |
| Long-term receivables | 28.0 |
| Long term accruals: |  |
| Net pension liability | $(40,836.7)$ |
| Net deferred (inflows)/outflows related to pensions | 5,779.3 |
| Net OPEB liability | $(15,972.2)$ |
| Net deferred (inflows)/outflows of resources related to OPEB | $(1,370.0)$ |
| Environmental remediation liability | (560.4) |
| Massachusetts School Building Authority debt and school construction payables | $(6,753.4)$ |
| Long term debt, unamortized premiums and deferred losses on debt refundings | $(31,359.2)$ |
| Compensated absences | (688.3) |
| Capital leases | (17.1) |
| Accrued interest on bonds | (447.3) |
| Other long-term liabilities | (281.0) |
| Total governmental net position/(deficit) (government-wide perspective) | (\$77,677.4) |

SOURCE: Office of the Comptroller

The deficit of $\$ 77.677$ billion in governmental activities net position can be largely attributed to three factors. First, the Commonwealth's net (or unfunded) pension liability, which, starting in fiscal 2015, has been placed on the Commonwealth's books in accordance with GASB Statement No. 68, Accounting and Financial Reporting for Pensions. This Statement required, among other things, the Commonwealth to include the long-term net pension liability on the Government-wide Statement of Net Position. As of June 30, 2020, the Commonwealth reported a net pension liability of approximately $\$ 40.837$ billion. Second, in accordance with GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, the Commonwealth is required to include its net other postemployment (OPEB) liability on the Government-wide Statement of Net Position. As of June 30, 2020, the Commonwealth reported a net OPEB liability of approximately $\$ 15.972$ billion. Third, also contributing to the deficit was the Commonwealth's policy decision to finance the construction of assets owned by other governmental entities, particularly Commonwealth roads and bridges, which as a result of transportation reform completed during fiscal 2010 shifted these assets from the books of the Commonwealth to MassDOT, a component unit of the Commonwealth. At the end of fiscal 2020, MassDOT held $\$ 25.629$ billion in road, bridge and other transportation-related assets (excluding assets of the MBTA), net of related depreciation, the vast majority of which were formerly held by the Commonwealth. Those assets were financed by the Commonwealth, and the debt remains a long-term obligation of the Commonwealth. In addition, the Commonwealth has a net liability of $\$ 6.753$ billion in debt and grant obligations for the former school building assistance program that financed construction of schools for the Commonwealth's cities and towns.

## Change in Statement of Net Position

|  | (in thousands) |  |  |
| :---: | :---: | :---: | :---: |
|  | Governmental Activities | Business Type Activities | Government Wide |
| Total net position/(deficit): |  |  |  |
| Fiscal 2019, restated | (\$74,577,199) | \$5,596,284 | (\$68,980,915) |
| Fiscal 2020 | (77,677,365) | 4,677,151 | (73,000,214) |
| Change in net position/(deficit) | (\$3,100,166) | (\$919,133) | (\$4,019,299) |

SOURCE: Office of the Comptroller
As of June 30, 2020, approximately $\$ 202$ million in restricted net position was set aside for unemployment benefits, approximately $\$ 830$ million is restricted for Paid Family and Medical Leave benefits and approximately $\$ 987$ million was restricted for debt retirement.

Revenues - GAAP Basis. The measurement of revenues for the budgeted operating funds on a statutory basis differs from governmental revenues on a GAAP basis in that certain revenues that are not included on a statutory basis are included on a GAAP basis, including revenue accruals for Medicaid and taxes. In addition, internal transfers are eliminated under GAAP on a government-wide perspective. The following table shows the distribution of major sources of revenue in fiscal 2020.
[Remainder of this page intentionally left blank.]

## Comparison of Fiscal 2020 Governmental Revenues (in millions)

|  | Governmental Funds |  |  |
| :--- | :---: | :---: | :---: |
|  | $\underline{\text { GAAP Basis - Governmental }}$ |  |  |
|  | $\underline{\text { Statutory Basis }}$ | $\underline{\text { Fund Perspective }}$ | Government-wide |
| Taxes | $\$ 30,156$ |  | $\underline{\text { Perspective }}$ |
| Federal Revenue <br> Departmental and <br> Miscellaneous Revenue | 19,103 | $\underline{21,643}$ | 18,475 |
| Total | $\underline{\mathbf{\$ 7 0 , 9 0 2}}$ | $\underline{23,766}$ | $\$ 30,482$ |

SOURCE: Office of the Comptroller
The following table provides financial results on a GAAP fund perspective basis for all governmental funds of the Commonwealth for fiscal 2016 through fiscal 2020.

Governmental Fund Operations - GAAP Basis - Fund Perspective (in millions)

|  | Fiscal 2016 | Fiscal 2017 | Fiscal 2018 | Fiscal 2019 | Fiscal 2020 (1) |

(1) Beginning fund balance was restated due to the early implementation of GASB Statement No. 84, Fiduciary Activities during fiscal 2020.

Financial Reports. The Commonwealth issues annual financial reports, including a report on the statutory basis of accounting (which is reviewed, but not audited) and GAAP basis audited financial statements. These financial statements are issued as two separate reports, the Statutory Basis Financial Report (SBFR) and the Annual Comprehensive Financial Report (ACFR). The SBFR is usually published by the Comptroller on or before October 31 and the ACFR is usually published by the Comptroller by the second Wednesday in January. As a result of the COVID-19 pandemic, the fiscal 2021 SBFR was issued on November 19, 2021, and the ACFR will be delayed.

The SBFR for the year ended June 30, 2021 and the ACFR for the year ended June 30, 2020 are attached hereto as Exhibits B and C, respectively. Copies of these financial reports are also available at the address provided under "Continuing Disclosure." The SBFR for fiscal 1997 through fiscal 2021 and the ACFR for fiscal 1995 through fiscal 2020 are also available on the web site of the Comptroller of the Commonwealth at https://www.macomptroller.org/financial-reports.

For each year beginning in fiscal 1990, the Commonwealth's ACFRs, from which certain information contained in this Information Statement has been derived, have been awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers Association of the United States and Canada (GFOA). The Certificate of Achievement is the highest form of recognition for excellence in state and local government financial reporting. Fiscal 2019 marked the 30th consecutive year that the Commonwealth has received this award. The ACFR for fiscal 2020 has been submitted to the GFOA for review.

The Comptroller retains an independent certified public accounting firm to audit the Commonwealth's financial statements and issue certain other reports required by the Uniform Guidance. As part of the Uniform Guidance, the independent auditors render a report on all programs involving federal funding for compliance with federal and state laws and regulations and assess the adequacy of internal control systems. For fiscal 1990 through 2020 the independent auditors' opinions on the ACFR were unqualified or unmodified, indicating that the Commonwealth's financial statements presented fairly, in all material respects, the financial position of the Commonwealth, in accordance with generally accepted accounting principles.

## Discussion of Financial Condition

As the annual operating budget of the Commonwealth is adopted in accordance with the statutory basis of accounting, public and governmental discourse on the financial affairs of the Commonwealth has traditionally followed the statutory basis. Consequently, the financial information set forth in this document follows the statutory basis, except where otherwise noted. Since fiscal 1990, the Commonwealth has prepared separate financial reports on the statutory basis (reviewed) and on a GAAP basis (audited). See "Commonwealth Budget and Financial Management Controls - Fiscal Control, Accounting and Reporting Practices of the Comptroller; Financial Reports." Without limiting the generality of the references to the SBFR for the year ended June 30, 2021 and the ACFR for the year ended June 30, 2020, attention is called in particular to the portion of the ACFR under the heading "Management's Discussion and Analysis."

## Auditors' Report on Annual Comprehensive Financial Report for Fiscal 2020

The basic financial statements included in the ACFR of the Commonwealth for the year ended June 30, 2020 were audited by KPMG LLP (KPMG). The KPMG audit report dated March 25, 2021 on the general purpose financial statements included in the ACFR for the year ended June 30, 2020 contained an unmodified opinion. A copy of the audit report of KPMG dated March 25, 2021 has been filed with EMMA and is included within Exhibit C to this Information Statement. KPMG has not been engaged to perform, and has not performed, since the respective dates of its reports included herein, any procedures on the financial statements addressed in such reports, nor has said independent auditor performed any procedures relating to any official statement of which this Information Statement may be a part.
[Remainder of this page intentionally left blank.]

## FISCAL 2022

On January 15, 2021, a fiscal 2022 consensus tax revenue estimate of $\$ 30.120$ billion was agreed upon by the Secretary of Administration and Finance and the chairs of the House and Senate Committees on Ways and Means. This estimate reflected projected 3.5\% tax revenue growth over the revised projected fiscal 2021 tax revenue amount of $\$ 29.090$ billion. The consensus revenue estimate for fiscal 2022 incorporates the reinstitution of the charitable deduction effective January 1, 2022.

After accounting for statutorily required transfers for pensions, and to the MBTA, the MSBA and the Workforce Training Fund, the Secretary and Committee chairs agreed that $\$ 24.327$ billion would be the maximum amount of tax revenue available for the fiscal 2022 budget. See "Commonwealth Revenues - Tax Revenue Forecasting."

On January 27, 2021, the Governor filed his fiscal 2022 budget recommendation, providing for a total of $\$ 45.6$ billion in state spending, excluding $\$ 456.5$ million in projected transfers to the Medical Assistance Trust Fund. The budget as filed represented a decrease of $0.7 \%$ from projected fiscal 2021 state spending. The budget as filed included a withdrawal of up to $\$ 1.6$ billion from the Stabilization Fund, which could be reduced if tax collections or new federal revenue exceed the assumptions included in the budget recommendation. Notably, the budget recommendation did not assume any resources from the ARPA. The Governor's budget recommendation also proposes a delay of the charitable deduction until the tax year following a fiscal year in which no transfer is made from the Stabilization Fund to the General Fund. See "Special Disclosure Regarding COVID-19 MAtTERS - Fiscal Relief Received by the Commonwealth."

The fiscal 2022 budget, as approved by the Governor on July 16, 2021, includes approximately $\$ 47.6$ billion in authorized spending, excluding transfers to the Medical Assistance Trust Fund, a $\$ 250$ million supplemental transfer to the Pension Liability Fund, a one-time $\$ 350$ million transfer to a new Student Opportunity Act Investment Fund, and other interfund transfers. The fiscal 2022 budget reflects approximately $3.6 \%$ growth in authorized spending over fiscal 2021. The fiscal 2022 budget as approved by the Governor incorporates an increased $\$ 34.350$ billion tax revenue forecast before various tax initiatives, which represents an increase of $\$ 4.230$ billion over the fiscal 2022 consensus tax revenue estimate of $\$ 30.120$ billion announced in January 2021, due to better-than-expected actual tax collections in recent months. The fiscal 2022 budget as enacted is in structural balance, with no planned Stabilization Fund withdrawal.

The Governor vetoed $\$ 7.9$ million in gross spending, vetoed an outside section that would have delayed the implementation of the charitable tax deduction, and returned with amendment another tax initiative. These were subsequently overridden or rejected by the Legislature.

On December 13, 2021, the Governor signed legislation appropriating approximately $\$ 4$ billion to support COVID-19 recovery needs, including $\$ 2.55$ billion from the Commonwealth's federal allocation of the American Rescue Plan Act Coronavirus State Fiscal Recovery Fund and $\$ 1.45$ billion from the state's fiscal 2021 budget surplus held in the Transitional Escrow Fund. The legislation includes approximately $\$ 1.1$ billion in health and human services spending, $\$ 624$ million in investments to expand homeownership and other housing initiatives, a $\$ 500$ million deposit to the Unemployment Insurance Trust Fund, a $\$ 500$ million program for essential workers that performed in-person work during the pandemic, $\$ 422$ million in water, sewer, and other environmental infrastructure, and $\$ 853$ million for a range of other smaller initiatives. The funds are available through June 30, 2027.

## Cash Flow

The State Treasurer is responsible for cash management and ensuring that all Commonwealth financial obligations are met on a timely basis. See "Commonwealth Budget and Financial Management Controls Cash Management Practices of State Treasurer." The Commonwealth does not engage in inter-fund borrowing but pools its non-segregated (primarily non-Stabilization Fund) cash. Cash flow management incorporates the periodic use of short-term borrowing to meet cash flow needs for both capital and operating expenditures. All revenue anticipation notes, including those issued as commercial paper, must be repaid by the end of the fiscal year.

The state currently has the following liquidity support: a $\$ 500$ million line of credit and a Note Purchase Agreement which permits the issuance of up to $\$ 200$ million of either revenue anticipation notes or bond anticipation notes. As of November 30, 2021, there was no balance outstanding under either of these facilities. See "LONG-TERM LIABILITIES - Liquidity Facilities."

For cash flow needs, the State Treasurer has historically issued revenue anticipation notes (RANs). As of November 30, 2021, there were no RANs outstanding and the State Treasurer does not anticipate issuing RANs in fiscal 2022.

Commonwealth cash deposits are held in insured or collateralized bank accounts and with the Massachusetts Municipal Depository Trust (MMDT), the Commonwealth's investment pool for governmental entities. MMDT consists of two portfolios, professionally managed by Federated Investors Inc., the Cash Portfolio and the Short-Term Bond Fund. Cash Portfolio investments are carried at amortized cost, which approximates fair value. Short-Term Bond Fund investments are carried at fair value. General operating cash is invested in the Cash Portfolio, and moneys in the Stabilization Fund, which are not used by the Commonwealth for liquidity, are invested in both the Cash Portfolio and the Short-Term Bond Fund.

The Cash Portfolio invests in a diversified portfolio of high-quality U. S. dollar-denominated money market instruments (eligible under GASB Statement No. 79) of domestic and foreign issuers, United States government securities and repurchase agreements. As of October 31, 2021, the Cash Portfolio holdings were made up of Certificate of Deposit 32.1\%, Asset Backed Commercial Paper 22.3\%, Non-Negotiable Time Deposit 14.6\%, Financial Company Commercial Paper 13.7\%, U.S. Government Agency Repurchase Agreement 8.4\%, U.S. Treasury Debt 3.8\%, Non-Financial Company Commercial Paper 2.9\%, Tender Option Bond $1.8 \%$, Variable Rate Demand Note $0.3 \%$, Other Municipal Securities $0.1 \%$. As of November 30, 2021, the Cash Portfolio's monthly weighted average life was 65 days, and the monthly weighted average maturity was 45 days. The three objectives for the Cash Portfolio are safety, liquidity, and yield. The Cash Portfolio maintains a stable net asset value of one dollar and is marked to market daily.

The Short-Term Bond Fund invests in a diversified portfolio of investment grade debt securities. As of October 31, 2021, the Short-Term Bond Fund holdings were made up of U.S. Treasury Securities $48.1 \%$, Financial Inst. - Banking $5.3 \%$, Auto Receivables $4.6 \%$, FNMA MBS $4.3 \%$, Utility - Electric 4.0\%, Consumer Non-Cyclical Pharmaceuticals $2.4 \%$, Consumer Cyclical - Automotive 1.8\%, Financial Inst.- Insurance - Life $1.8 \%$, Consumer Non-Cyclical Food/Beverage $1.6 \%$, Equipment Lease $1.5 \%$, Other $24.6 \%$. The Short-Term Bond Fund seeks to obtain the highest possible level of current income consistent with preservation of capital and liquidity. The portfolio is required to maintain an average credit rating of A-. The duration of the portfolio is managed to within $+/-$ one-half year duration of the benchmark. The benchmark for the Short-Term Bond Fund is the Barclays Capital 1-to-5-year Government/Credit Index, which includes all medium and larger issues of United States government, investmentgrade corporate and investment-grade international dollar-denominated bonds.

In June 2021, the Governor announced the five-year capital investment plan for fiscal 2022 through fiscal 2026. The plan projects $\$ 4.97$ billion of spending in fiscal 2022 on capital projects, including $\$ 2.66$ billion of administrative bond cap spending, $\$ 1.11$ billion of spending from other sources including special obligation bonds, anticipated savings or revenues generated by the projects, and other non-Commonwealth sources such as contributions from municipalities, and $\$ 1.21$ billion of spending supported by federal reimbursements and grants. See "Commonwealth Capital Investment Plan."

The following table provides General Fund ending cash balances by month for fiscal 2018 through fiscal 2022 and the tables on the following pages provide cash flow detail for fiscal 2022. The balance for July of fiscal 2022 is actual and the remainder of fiscal 2022 is projected.
[Remainder of this page intentionally left blank.]

## Month-End General Fund Cash Balances (in millions)

|  | Fiscal 2018 | Fiscal 2019 | Fiscal 2020 | Fiscal 2021 | Fiscal 2022 (1) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| July | \$1,307.3 | \$2,269.5 | \$3,613.7 | \$4,659.2 | \$11,693.0 |
| August | 2,304.1 | 3,143.8 | 2,794.4 | 4,081.8 | 11,200.0 |

SOURCE: Office of the Comptroller.
(1) This table has been revised from prior presentations to conform to the presentation in the Statutory Basis Financial Reports.
(2) The Massachusetts Department of Transportation is included in Federal Grant, Trust, and Capital Funded.
(3) Other includes members of the Legislature and their staff, constitutional officers, other independently elected officials and other independent state agencies.

## Unions and Labor Negotiations

Under Massachusetts law, all employees of the Commonwealth, with the exception of managerial and confidential employees and employees of the Legislature, have the right to bargain collectively with the Commonwealth through certified employee organizations recognized as exclusive bargaining representatives for appropriate bargaining units. The Human Resources Division of the Executive Office for Administration and Finance conducts the collective bargaining negotiations with all employees of the Commonwealth (except those noted below). Such negotiations may cover wages, hours and other terms and conditions of employment, but may not include the levels of pension and group insurance benefits. All labor agreements negotiated by the Human Resources Division are subject to approval by the Secretary of Administration and Finance and, once approved, are forwarded to the Legislature for funding approval. Labor contracts are often funded by supplemental appropriations or advance-funded through reserve accounts.

MassDOT, the Trial Court, the Lottery Commission, the Alcohol Beverage Control Commission, state sheriffs, the Registries of Deeds under the control of the Secretary of the Commonwealth, state universities and community colleges through the Board of Higher Education, the Personal Care Attendant Workforce Council and the Department of Early Education and Care (EEC) (for bargaining with family child care providers) negotiate directly with their respective employee representatives, but wage increases and other economic provisions contained in such agreements are subject to the review of the Governor and to funding approval by the Legislature. Also, if the Governor does not recommend the requested appropriation to fund contractual increases, he may refer the contracts back to the parties for further negotiation.

The University of Massachusetts submits 22 of its collective bargaining agreements for approval under the process described above, but also uses some of its retained revenue to fund other collective bargaining agreements.

Approximately 35,438 executive branch full-time-equivalent state employees are organized in 13 bargaining units, the employees of the Commonwealth's colleges and universities are organized in 47 bargaining units, and the employees of the judicial branch, MassDOT, the Lottery Commission, the Registries of Deeds, the state sheriffs, Personal Care Attendants at MassHealth, and family child care providers at the Department of Early Education and Care are organized in 67 bargaining units. Public employees of the Commonwealth do not have a legal right to strike or otherwise withhold services.

The following is a description of certain terms of the most recent agreements with the collective bargaining units within the responsibility of the Human Resources Division. Due to the impacts of the COVID-19 pandemic, the process for renegotiating expired collective bargaining agreements has been delayed, but such negotiations are ongoing, as noted below.

1. The contract with the National Association of Government Employees (NAGE), representing Units 1, 3, and 6, runs from July 1, 2020 through June 30, 2023, providing salary increases of $2.5 \%$ in 2020, $2 \%$ in 2021, and $2 \%$ in 2022, effective July 1 of each year. Eligible employees received a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ was set for the one-time payment. The total estimated incremental cost of the contract is $\$ 97.5$ million.
2. The contract with the American Federation of State, County and Municipal Employees (AFSCME), representing Unit 2, runs from July 1, 2020 through June 30, 2023, providing annual salary increases of $2.5 \%$ in $2020,2 \%$ in 2021, and $2 \%$ in 2022, effective July 1 of each year. Eligible employees received a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ was set for the one-time payment. The total estimated incremental cost of the contract is $\$ 54.8$ million.
3. The contract with the Massachusetts Correction Officers Federated Union (MCOFU), representing Unit 4, ran from July 1, 2018 through June 30, 2021. Subject to legislative approval, a new contract with MCOFU will run from July 1, 2021 through June 30, 2024, providing annual salary increases of $2.5 \%$ in 2021, $2 \%$ in 2022, and $2 \%$ in 2023, effective July 1 of each year. Eligible employees will receive a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ shall be set for the one-time payment. The total estimated incremental cost of the contract is $\$ 43.5$ million.
4. The contract with the New England Police Benevolent Association (NEPBA), representing Unit 4A, ran from July 1, 2017 through June 30, 2020. Subject to legislative approval, a new contract with NEPBA will run from July 1, 2020 through June 30, 2023, providing annual salary increases of $2.5 \%$ in 2020, $2 \%$ in 2021, and $2 \%$ in 2022, effective July 1 of each year. Eligible employees will receive a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ shall be set for the one-time payment. The total estimated incremental cost of the contract is $\$ 1.2$ million.
5. The contract with the Coalition of Public Safety (COPS), representing Unit 5, ran from July 1, 2018 through June 30, 2021, and provided salary increases of $1 \%$ ( $2 \%$ if fiscal 2018 revenues exceeded $\$ 27.072$ billion) in 2018, $2 \%$ in 2019, and $2 \%$ in 2020, effective July 1 of each year. The total estimated incremental cost of the contract was $\$ 1.7$ million. This contract has expired and negotiations are ongoing.
6. The contract with the State Police Association of Massachusetts (SPAM), representing Unit 5A, ran from January 1, 2018, through December 31, 2020, and provided for salary increases of $2 \%$ in $2018,2 \%$ in 2019 , and $1.95 \%$ in 2020, effective the first full pay period in January of each year. The total estimated incremental cost of the contract was $\$ 26.3$ million. This contract has expired and negotiations are ongoing.
7. The contract with the Massachusetts Nurses Association (MNA), representing Unit 7, runs from January 1, 2021 through December 31, 2023, providing annual salary increases of $2.5 \%$ in 2021, $2 \%$ in 2022, and $2 \%$ in 2023, effective January 1 of each year. Eligible employees received a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ was set for the one-time payment. The total estimated incremental cost of the contract is $\$ 29.0$ million.
8. The contract with the Service Employees International Union (SEIU), representing Units 8 and 10, runs from January 1, 2020 through December 31, 2022, providing salary increases of $2.5 \%$ in 2020, 2\% in 2021, and
$2 \%$ in 2022, effective January 1 of each year. Eligible employees received a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ was set for the one-time payment. The total estimated incremental cost of the contract is $\$ 90$ million.
9. The contract with the Massachusetts Organization of State Engineers and Scientists (MOSES), representing Unit 9, ran from July 1, 2017, through June 30, 2020. Subject to legislative approval, a new contract with MOSES will run from July 1, 2020 through June 30, 2023, providing annual salary increases of $2.5 \%$ in 2020, $2 \%$ in 2021, and $2 \%$ in 2022, effective July 1 of each year. Eligible employees will receive a one-time payment of $1.5 \%$ of base salary. A minimum amount of $\$ 1,000$ shall be set for the one-time payment. The total estimated incremental cost of the contract is $\$ 15.7$ million.
10. The contract with the International Association of Fire Fighters (IAFF), representing Unit 11, ran from January 1, 2018, through December 31, 2020, and provided annual increases of $1 \%$ ( $2 \%$ if fiscal 2018 revenues exceed $\$ 27.072$ billion) in 2018, $2 \%$ in 2019 , and $2 \%$ in 2020, effective January 1 of each year. The total estimated incremental cost of the contract was $\$ 0.3$ million. This contract has expired and negotiations are ongoing.

The following table sets forth information regarding the 13 bargaining units that are within the responsibility of the Human Resources Division.

## Human Resources Division Bargaining Units (1)

| Contract Unit | Bargaining Union | Type of Employee | FTEs | Contract <br> Expiration Dates |
| :---: | :---: | :---: | :---: | :---: |
| 1, 3, 6 | National Association of Government Employees | Clerical, Skilled <br> Trades, Administrative <br> Professionals | 9,787 | 6/30/23 |
| 2 | Alliance/American Federation of State, County \& Municipal Employees and Service Employees International Union | Institutional services | 7,600 | 6/30/23 |
| 4 | Massachusetts Correction Officers Federated Union | Corrections | 3,398 | 6/30/21 (3) |
| 4A | New England Police Benevolent Association | Corrections | 69 | 6/30/20 (3) |
| 5 | Coalition of Public Safety | Law enforcement | 216 | 6/30/21 (2) |
| 5A | State Police Association of Massachusetts | State Police | 2,134 | 12/31/20 (2) |
| 7 | Massachusetts Nurses Association | Health professionals | 1,650 | 12/31/23 |
| 8, 10 | Alliance/Service Employees International Union | Social workers, Secondary Education | 8,576 | 12/31/22) |
| 9 | Massachusetts Organization of State Engineers and Scientists | Engineers/scientists | 1,951 | 6/30/20 (3) |
| 11 | International Association of Fire Fighters | Fire fighters | 58 | 12/31/20 (2) |
|  |  | Total | 35,438 |  |

SOURCE: Executive Office for Administration and Finance.
(1) Numbers represent full-time equivalent filled positions (FTEs) in the standard workforce as of July 3, 2021, whose positions are established in accounts funded by all sources (the annual operating budget, capital projects funds, direct federal grants, and expendable trusts and other non-appropriated funds).
(2) This contract has expired and negotiations are ongoing.
(3) This contract has expired. A new contract has been ratified and funding for the new contract will be duly submitted to the Legislature for approval.

## PENSION AND OPEB FUNDING

## Retirement Systems

Almost all non-federal public employees in the Commonwealth participate in defined-benefit pension plans administered pursuant to state law by 104 public retirement systems. The Commonwealth is responsible for the payment of pension benefits for Commonwealth employees (members of the state employees' retirement system) and for teachers of the cities, towns and regional school districts throughout the state (including members of the Massachusetts teachers' retirement system and teachers in the Boston public schools, who are members of the Boston Retirement System but whose pensions are also the responsibility of the Commonwealth). The Commonwealth is also responsible for cost-of-living adjustments (COLAs) granted by local systems from 1981 to 1996.

The members of the retirement system do not participate in the Social Security System. Employees of certain independent authorities and agencies, such as the Massachusetts Water Resources Authority, and of counties, cities and towns (other than teachers) are covered by 102 separate retirement systems and the Commonwealth is not responsible for making contributions towards the funding of these retirement systems. Pension benefits for state employees are administered by the State Retirement Board, and pension benefits for teachers are administered by the Massachusetts Teachers' Retirement Board. Investment of the assets of the state employees' and Massachusetts teachers' retirement systems is managed by the Pension Reserves Investment Management (PRIM) Board. In the case of all other retirement systems, the retirement board for the respective system administers pension benefits and manages investment of assets. Retirement board members are required to complete 18 hours of training and to file annual statements of financial interest with the Public Employee Retirement Administration Commission (PERAC). Many such retirement boards invest their assets with the PRIM Board, and the PRIM Board may take over the assets of local retirement systems that are less than $65 \%$ funded and have failed to come within $2 \%$ of the PRIM Board's performance over the previous 10-year period. With very few exceptions, the members of these state and local retirement systems do not participate in the Social Security System.

The Massachusetts State Employees' Retirement System (MSERS) and the Massachusetts Teachers' Retirement System (MTRS) are the two largest plans of the public contributory retirement systems operated in the Commonwealth. Membership in MSERS and MTRS as of January 1, 2021, the date of the most recent combined valuation, is as follows:

## Retirement Systems Membership

|  | MSERS | $\underline{\text { MTRS }}$ |
| :--- | ---: | :---: |
| Retirees and beneficiaries <br> currently receiving benefits | 66,901 | 68,780 |
| Terminated employees <br> entitled to benefits but not <br> yet receiving them | $\underline{4,570}$ | $\underline{\mathrm{~N} / \mathrm{A}}$ |
| Subtotal   <br> Current Members $\underline{87,471}$ 68,780 <br> Total 158,607 $\underline{96,527}$ <br> SOURCE: Public Employee Retirement Administration Commission   |  |  |

The MSERS is a cost sharing, multiple-employer defined-benefit public employee retirement system. The MTRS is a defined-benefit public employee retirement system managed by the Commonwealth on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a non-employer contributor and is responsible for all contributions and future benefits of the MTRS. Members become vested after 10 years of creditable service. For members who joined the system prior to April 2, 2012 superannuation retirement allowance may be received upon the completion of 20 years of service or upon reaching the age of 55 with 10 years of service. Normal retirement for those employees who were system members before April 2, 2012 occurs at age 65; for certain
hazardous duty and public safety positions, normal retirement is at age 55 . Most members who joined the system after April 1, 2012 cannot retire prior to age 60.

The Commonwealth's retirement systems' funding policies have been statutorily established. The Legislature has the authority to amend these policies. The annuity portion of the MSERS and the MTRS retirement allowance is funded by employees, who contribute a percentage of their regular compensation. Costs of administering the plan are funded out of plan assets. The policies provide for uniform benefit and contribution requirements for all contributory public employee retirement systems. These requirements generally provide for superannuation retirement allowance benefits up to a maximum of $80 \%$ of a member's highest three-year average annual rate of regular compensation. For employees hired after April 1, 2012, retirement allowances are calculated on the basis of the last five years or any five consecutive years, whichever is greater in terms of compensation. Benefit payments are based upon a member's age, length of creditable service and group creditable service, and group classification.

Boston teachers are not included in the membership data shown above for the MTRS. Legislation approved in May 2010 changed the methodology for the Commonwealth's funding of pension benefits paid to Boston teachers. Prior to this change, the Commonwealth reimbursed the City of Boston for pension benefits paid to Boston teachers as certified by the Boston Retirement System (BRS). Those costs were funded one fiscal year in arrears. The cost of pension benefits of the other participants of the BRS is the responsibility of the City of Boston. The BRS is a cost-sharing multiple-employer pension system that is not administered by the Commonwealth and is not part of the reporting entity of the Commonwealth for accounting purposes. The 2010 legislation clarified that the Commonwealth is responsible for all employer contributions and future benefit requirements for Boston teachers that are members of the BRS. The Commonwealth's actuarially determined contribution (or ADC, defined as a target or recommended contribution to a defined benefit pension plan for the reporting period, determined in conformity with Actuarial Standards of Practice) to the BRS for fiscal 2022 has been determined to be $\$ 179.4$ million.

Subject to legislative approval, annual increases in cost-of-living allowances are provided in an amount equal to the lesser of $3 \%$ or the previous year's percentage increase in the United States consumer price index on the first $\$ 13,000$ of benefits for members of the MSERS and MTRS. The Legislature approved the $3 \%$ cost-of-living adjustment for fiscal 2022 for eligible participants of the MSERS and MTRS. The Commonwealth pension funding schedule (discussed below) assumes that annual increases of $3 \%$ will be approved for its retirees.

The MSERS and the MTRS, in conjunction with the Commonwealth, have evaluated whether certain of the statutes or practices governing the systems may have been in conflict with the exclusive benefit rule of Section 401(a)(2) of the Internal Revenue Code or other federal tax law requirements relating to operation of tax-exempt pension plans. The activities reviewed include (i) the statutorily directed funding of the budget for PERAC solely from the investment income accounts of MSERS and MTRS, (ii) the statutorily directed contributions made from the MSERS account in the PRIT Fund to a separate optional retirement plan available to certain employees of the Commonwealth's higher education system, (iii) the statutorily mandated reimbursements paid by the MSERS to local retirement systems for local cost-of-living allowances for certain participants of those systems, (iv) the deposit of reimbursement revenues received from local retirement systems to the Commonwealth's General Fund rather than to the MTRS and MSERS accounts in the PRIT Fund, and (v) the deposit of federal grant fringe payments to the General Fund rather than to the MTRS and MSERS accounts in the PRIT Fund. The Commonwealth, PERAC, MSERS and the MTRS each engaged outside tax counsel to review these activities. On March 28, 2017, the Governor approved legislation to address prospectively certain aspects of the issues described above. Additional corrective legislation was approved as part of the Commonwealth's General Appropriations Act for fiscal 2018, approved on July 17, 2017. The Executive Office for Administration and Finance submitted to the Internal Revenue Service for its consideration a request for a closing agreement in which the Commonwealth describes the activities listed above, explains the corrective actions already taken by legislation, and requests an affirmation that these activities do not adversely affect the tax qualification of the MSERS and MTRS in light of the corrections already made. The Internal Revenue Service issued an initial request for additional information on April 28, 2020 and a further request for additional information on June 23, 2020. The Commonwealth, the MSERS and MTRS submitted responses to such requests on June 3, 2020 and July 31, 2020, respectively. After further discussions with the IRS, on August 20, 2020, the Commonwealth submitted to the IRS a proposal in connection with the withdrawal of its request for a closing agreement. Discussions with the IRS are ongoing.

## Employee Contributions

The MSERS and MTRS are partially funded by employee contributions of regular compensation. The following tables indicate current employee contribution rates (figures are approximate):

Employee Contribution Rates

| MTRS (1) |  |  |  |
| :---: | :---: | :---: | :---: |
| Hire Date | $\begin{gathered} \% \text { of } \\ \text { Compensation (1) } \end{gathered}$ | Active <br> Members | $\%$ of Tota Active |
| Pre-1975 | 5\% | 36 | 0.0\% |
| 1975-1983 | 7 | 190 | 0.2 |
| 1984-June 30, 1996 | 8 | 4,343 | 4.5 |
| July 1, 1996-Present | 9 | 14,020 | 14.5 |
| July 1, 2001-Present | 11 | 77,938 | 80.8 |
| Totals |  | $\underline{\mathbf{9 6 , 5 2 7}}$ | 100.0\% |

SOURCE: Public Employee Retirement Administration Commission. Membership data from Teachers' Retirement System January 1, 2021 Actuarial Valuation.
(1) Employees hired after January 1, 1979 (except those contributing 11\%) contribute an additional 2\% of any regular compensation in excess of $\$ 30,000$ annually. Legislation enacted in fiscal 2000 established an alternative superannuation retirement benefit program for teachers hired on or after July 1, 2001 (and others who opt in) with an $11 \%$ contribution requirement for a minimum of five years. The contribution rate for most employees hired after April 1, 2012 will be reduced to $8 \%$ after 30 years of creditable service.

MSERS (1)

| Hire Date | \% of <br> Compensation (1) | Active <br> Members | \% of Total <br> Active |
| :---: | :---: | :---: | :---: |
| Pre-1975 | $5 \%$ | 195 | $0.2 \%$ |
| 1975-1983 | 7 | 1,635 | 1.9 |
| July 1, 1996-Present | 8 | 11,848 | 13.6 |
| State Police 1996-Present | 9 | 72,264 | 82.9 |
| Totals | 12 | $\underline{1,194}$ | $\underline{1.4}$ |
| $\underline{\mathbf{8 7 , 1 3 6}}$ | $\underline{\mathbf{1 0 0 . 0 \%}}$ |  |  |

Actuarial Valuation.
(1) Employees hired after January 1, 1979 contribute an additional $2 \%$ of any regular compensation in excess of $\$ 30,000$ annually. The contribution rate for most employees hired after April 1, 2012 will be reduced to $6 \%$ after 30 years of creditable service.

## Funding Schedule

The retirement systems were originally established as "pay-as-you-go" systems, meaning that amounts were appropriated each year to pay current benefits, and no provision was made to fund currently the future liabilities already incurred. In fiscal 1988, the Commonwealth began to address the unfunded liabilities of the two state systems by making appropriations to pension reserves. Under current law such unfunded liability is required to be amortized to zero by June 30, 2040. The law also requires that the Secretary of Administration and Finance file a proposed funding schedule with the legislature every three years identifying the appropriations or transfers required to amortize the unfunded liability to zero, to meet the normal cost of all future benefits for which the Commonwealth is obligated and to meet any other component of the Commonwealth's pension liability. Previously designated amounts can be adjusted based on a new funding schedule so long as the adjustments represent an increase in the scheduled amounts for those years. The law requires the funding schedule submitted by the Secretary to be based on actuarial valuation reports and requires the Secretary to provide the actuarial, economic and demographic assumptions upon which the reports are based. The funding schedule is filed with the House Committee on Ways and Means and is deemed approved if no action is taken by the committee within 45 days.
[Remainder of this page intentionally left blank.]

The most recent funding schedule for payments into the Commonwealth's Pension Liability Fund was filed by the Secretary of Administration and Finance on January 15, 2021. The assumptions underlying the funding schedule include valuation of assets and liabilities as of January 1, 2020, an annual rate of return on assets of $7.25 \%$, and appropriation increases of $9.63 \%$ per year through fiscal 2035 with a final amortization payment in fiscal 2036 (four years before the statutory requirement). The funding schedule also fully amortizes by fiscal 2027 the liabilities attributable to the employee retirement incentive program approved by the Governor on May 4, 2015.

In addition to the funding schedule above, the fiscal 2022 budget includes a supplemental $\$ 250$ million transfer to the Pension Liability Fund.

## Actuarial Valuations

Pursuant to Chapter 32 of the Massachusetts General Laws, an actuarial valuation of each retirement system is required to be conducted biennially. The most recent valuation report for the Commonwealth's total pension obligation, which is dated October 21, 2021, is available at: https://www.mass.gov/doc/commonwealth-valuation-report-2021/download. In this report, the unfunded actuarial accrued liability for the Commonwealth's total pension obligation as of January 1, 2021, based on the plan provisions in effect at the time and on member data and asset information as of December 31, 2020, was approximately $\$ 45.575$ billion, including approximately $\$ 15.334$ billion for MSERS, $\$ 27.659$ billion for MTRS, $\$ 2.477$ billion for Boston teachers that are members of the BRS, and $\$ 105.0$ million for cost-of-living increases reimbursable to local systems. This valuation estimates the total actuarial accrued liability as of January 1, 2021 to be approximately $\$ 108.982$ billion (comprising $\$ 45.704$ billion for MSERS, $\$ 58.830$ billion for MTRS, $\$ 4.342$ billion for Boston teachers and $\$ 105.0$ million for cost-ofliving increases reimbursable to local systems). Total assets were valued on an actuarial basis at approximately $\$ 63.407$ billion based on a five-year average valuation method (comprising $\$ 30.370$ billion for MSERS, $\$ 31.171$ billion for MTRS and $\$ 1.866$ billion for Boston teachers), which equaled $93.1 \%$ of the December 31, 2020 total asset market value.

Differences each year between the actual experience of the plan and the experience projected by the actuarial assumptions are reflected by adjustments to the unfunded actuarial accrued liability. An experience difference which increases the unfunded actuarial accrued liability is an actuarial loss and one which decreases the unfunded actuarial accrued liability is an actuarial gain. Since the last valuation, there was an overall actuarial gain of $\$ 3.22$ billion, consisting of a non-investment related gain on actuarial liability of approximately $\$ 924$ million and a gain of approximately $\$ 2.296$ billion on the actuarial value of assets.

The January 1, 2021 valuation report used a $7.00 \%$ investment return assumption, reduced from the $7.25 \%$ assumption used in the January 1,2019 valuation. The investment return assumption had previously decreased consistently from $8.25 \%$ as of January 1,2012 to $7.25 \%$ as of January 1, 2019. The most recent change in the investment return assumption from $7.25 \%$ to $7.00 \%$ increased the total actuarial accrued liability by approximately $\$ 2.85$ billion.

For the January 1, 2015 valuation, a fully generational mortality assumption was adopted that reflected expected future mortality improvements (increasing life expectancy). This assumption was adopted based on a review of retiree mortality in 2012, 2013 and 2014. PERAC performed an updated analysis of retiree mortality in 2015 and 2017 and, based on this review, the generational mortality assumption was adjusted in the January 1, 2017
valuation. PERAC maintained this assumption in the January 1, 2018 valuation. There was a small adjustment for disability retirees of MSERS in the January 1, 2018 valuation. PERAC maintained these assumptions in the January 1, 2019 valuation. In 2020, PERAC performed an analysis of mortality for retirees of MSERS and MTRS. Based on this analysis, PERAC adopted the Pub-2010 Teachers mortality table (headcount weighted) for MTRS and made no changes to MSERS. The most recent change in the mortality assumption reduced the total actuarial accrued liability by approximately $\$ 759$ million.

PERAC issued detailed experience analyses in 2014 for MSERS and MTRS. These experience studies encompassed the years 2006-2011 and reviewed salary increases and rates of retirement, disability, turnover and mortality. As detailed above, PERAC performed an analysis of mortality for retirees of MSERS and MTRS in 2015 and 2017.

The Actuarial Cost Method which is used to determine pension liabilities in the Commonwealth's valuations is known as the Entry Age Normal Cost Method. Under this method, the Normal Cost for each active member on the valuation date is determined as the level percent of salary, which, if paid annually from the date the employee first became a retirement system member, would fully fund by retirement, death, disability or termination, the projected benefits which the member is expected to receive. The actuarial accrued liability for each member is determined as the present value as of the valuation date of all projected benefits which the member is expected to receive, minus the present value of future annual Normal Cost payments expected to be made to the fund. Since only active members have a Normal Cost, the actuarial accrued liability for inactive members, retirees and survivors is simply equal to the present value of all projected benefits. The unfunded actuarial accrued liability is the actuarial accrued liability less current assets.

The Normal Cost for a member will remain a level percent of salary for each year of membership, except for changes in provisions of the plan or the actuarial assumptions employed in projection of benefits and present value determinations. The Normal Cost for the entire system will also be changed by the addition of new members or the retirement, death, disability, or termination of members. The actuarial accrued liability for a member will increase each year to reflect the additional accrual of Normal Cost. It will also change if the plan provisions or actuarial assumptions change.

The actuarial value of assets is determined in accordance with the deferred recognition method, under which $20 \%$ of the gains or losses occurring in the prior year are recognized, $40 \%$ of those occurring two years prior are recognized, etc., so that $100 \%$ of gains and losses occurring five years ago are recognized. This has the effect of smoothing the short-term volatility of market values over a five-year period. The actuarial value of assets is adjusted, if necessary, in order to remain between $90 \%$ and $110 \%$ of market value. (In valuations prior to 1998, plan assets were determined at market value.) The actuarial value of assets as of January 1, 2021 was $93.1 \%$ of the market value. This figure was $102.8 \%$ as of January 1, 2019.

The following table shows, with respect to the Commonwealth's aggregate pension obligations, a 10-year comparison of the actuarial value of assets to the market values, the ratio of the actuarial value to market value, and the funded ratio based on actuarial value compared to the funded ratio based on the market value of assets:

Ten Year Comparison of Actuarial and Market Values of Pension Assets (in millions)

| Valuation <br> Date (Jan. 1) | Actuarial <br> Value <br> of Assets (1) | Market <br> Value of <br> Assets | \% of <br> Actuarial <br> Value to <br> Market <br> Value | Funded <br> Ratio <br> (Actuarial <br> Value) | Funded <br> Ratio <br> (Market |

## Annual Required Contributions

The following table sets forth the annual required contribution (ARC) by the Commonwealth for each of the fiscal years indicated and the actual contributions made. For fiscal 2014 and prior valuations, the ARC was developed under Governmental Accounting Standards Board (GASB) Statement No. 27 for accounting purposes. The ARC is no longer applicable with the implementation of GASB 67/68, as described below, but is shown for comparison. As noted above, the Commonwealth also develops a revised funding schedule by statute at least every three years, and the Commonwealth made the full contribution required, under the then-current funding schedule, for each year displayed in the table.

## Annual Required Contributions and Other Pension Contributions

(in thousands, except for percentages)

|  | $\underline{\mathbf{2 0 1 8}}$ | $\underline{\mathbf{2 0 1 9}}$ | $\underline{\mathbf{2 0 2 0}}$ | $\underline{\mathbf{2 0 2 1}}(3)$ | $\underline{\mathbf{2 0 2 2}}$ |
| :--- | ---: | :---: | :---: | ---: | :---: |
| Annual required contribution (ARC) (1) | $\$ 3,292,000$ | $\$ 3,500,000$ | $\$ 3,800,000$ | $\$ 4,125,000$ | $\$ 4,230,000$ |
| Contributions made (2) | $\$ 2,394,000$ | $\$ 2,608,000$ | $\$ 2,841,525$ | $\$ 3,115,164$ | $\$ 3,415,154$ |
| \% of ARC funded for the fiscal year | $73 \%$ | $75 \%$ | $75 \%$ | $76 \%$ | $80.7 \%$ |

SOURCE: Public Employee Retirement Administration Commission.
(1) The ARC is developed assuming amortization of the unfunded actuarial liability on a $4 \%$ annual increasing basis through fiscal 2040. This is the minimum allowable funding schedule for local systems under state pension law.
(2) The amounts shown for contributions include the costs associated with the 2015 ERIP.
(3) Since a full actuarial valuation was not performed as of January 1, 2020, the ARC for 2021 was based on the estimated valuation results as of January 1, 2020. These valuation results reflect the investment return and mortality assumption changes discussed above.

Assumption changes made in the 2018 and 2019 valuations affected the percentage of the ARC funded in fiscal 2019 and fiscal 2020; if there had been no assumption changes in the 2019 valuation, the percentage of the ARC funded would have been $76 \%$. Assumption changes made in the 2021 valuations affect the percentage of the ARC funded in fiscal 2022; if there had been no assumption changes in the 2021 valuation, the percentage of the ARC funded would have been $85 \%$. This percentage is generally expected to increase each fiscal year until contributions exceeds the ARC, although changes to actuarial assumptions and actuarial gains or losses could affect such results.

The standards currently applicable to the accounting and financial reporting of the Commonwealth's pension obligations are GASB Statement No. 67 and GASB Statement No. 68. GASB Statement No. 67, Financial Reporting for Pension Plans, which was effective for the Commonwealth's Annual Comprehensive Financial Report for fiscal 2014, establishes new standards for defined benefit pension plan accounting and reporting. GASB 67 also requires an analysis to determine the sensitivity of the net pension liability (NPL) to changes in the discount rate, if it were calculated one percentage point lower or higher. Such sensitivity analysis is in Note 9C to Basic Financial Statements to the ACFR for fiscal 2020. See Exhibit C - Annual Comprehensive Financial Report for the year ended June 30, 2020. GASB Statement No. 68, Accounting and Financial Reporting for Pensions, which was effective for the Commonwealth's ACFR for fiscal 2015, requires changes to governments' reporting of and inclusion of pension assets and liabilities in their annual audited financial statements. GASB 68 requires governments to report in their statements of net position (or balance sheet) a net pension liability, defined as the difference between the total pension liability (the present value of projected benefit payments to employees based on their past service) and the assets (mostly investments reported at fair value) set aside in a trust and restricted to paying benefits to current employees, retirees, and their beneficiaries. GASB 68 requires recognition in the financial statements of pension expense. The rate used to discount projected benefit payments to their present value is based on a single rate that reflects (a) the long-term expected rate of return on plan investments as long as the plan net position is projected under specified conditions to be sufficient to pay pensions of current employees and retirees and the pension plan assets are expected to be invested using a strategy to achieve that return and (b) a yield or index rate on tax-exempt 20-year AA-or-higher rated municipal bonds to the extent that the conditions for use of the longterm expected rate of return are not met.

The tables that follow show certain pension-related information for both the MTRS and the MSERS as required by GASB 67 and GASB 68 and as shown in the Commonwealth's ACFR for fiscal 2020. The MTRS and MSERS tables subtitled "Schedule of Changes in the Net Pension Liability and Related Ratios" show the beginning and ending liabilities and assets for the MTRS and MSERS, as well as both systems' unfunded pension liability, or NPL, with the NPL being the amount that the Commonwealth records on its Statement of Net Position as its unfunded pension liability. The table also shows the components of the change in the NPL between the beginning (July 1) and end (June 30) for fiscal years 2016 through 2020.

The tables subtitled "Pension Expense" shows pension expenses that, under GASB 68, are recognized in the ACFR for fiscal 2020. Additional information regarding the inflows and outflows that under GASB 68 are recognized either in the ACFR for fiscal 2020 or are deferred and projected to be recognized in the ACFRs for future fiscal years can be found in Note 9C to Basic Financial Statements to the ACFR for fiscal 2020. See Exhibit C - Annual Comprehensive Financial Report for the year ended June 30, 2020.

The methodology required by GASB 68 to calculate the Commonwealth's NPL and other pension-related measures (as reflected in the tables below) is in several respects different from the methodology used by PERAC in calculating the Commonwealth's unfunded pension liability in its annual actuarial valuation. The most important difference between the two methodologies is that GASB 68 requires the value of pension plan assets be recorded at market value as of June 30 of each fiscal year, meaning that investment gains and losses are recognized immediately, while the actuarial value of assets used by PERAC in calculating the Commonwealth's unfunded liability is measured using a five-year smoothing methodology, meaning that investment gains and losses are amortized over five years. GASB 68 also requires governments to defer certain amounts to the extent that actual experience differs from the assumptions used to calculate pension liabilities, actual investment returns differ from projected earnings, or assumption changes result in changes in pension liabilities. Therefore, the NPL information set out in the tables below based on GASB 68 requirements is not strictly comparable to the unfunded liability and other pension-related information in PERAC's annual actuarial valuations.

Under GASB 68, in order to provide adequate time for pension plans to distribute pension-related information to pension plan participants (which include state authorities, local school collaboratives and municipal governments) for use in their annual audited financial statements, governments are permitted to use the prior year's NPL and other pension-related measures in the current year's audited financial statements. In conformance with GASB 68, the Commonwealth determined that for the ACFR for fiscal 2020 it would use the pension valuation information as of June 30, 2019. The Commonwealth will use the June 30, 2020 pension information in its ACFR for fiscal 2021.

## Prospective Funded Status of the Pension System

The following tables project the funded status of the MSERS', the MTRS', the Boston teachers', and the Commonwealth's aggregate pension liabilities through fiscal 2025. Actuarial results reflect assumptions outlined in the January 1, 2019 actuarial valuation report, except as noted below. The fiscal 2021 assets are as of December 31, 2020. The 2019 actuarial valuation reflects a $7.25 \%$ investment return assumption. As discussed under "Actuarial Valuations" above, while a 2020 actuarial valuation was not conducted, it would have used a $7.15 \%$ investment return assumption and the mortality assumption for MTRS would have been revised. The 2021 actuarial valuation used a $7.0 \%$ investment return assumption. All projections are estimates and will vary based on actual investment returns and plan experience. The projections shown in the table assume that all assumptions will be realized exactly. The actuarially determined contributions reflect the funding schedule filed by the Secretary of Administration and Finance on January 15, 2020. Under the funding schedule, appropriations increase by $9.63 \%$ per year until fiscal 2035, with an increase of $9.56 \%$ in fiscal 2036. The allocations to individual retirement systems for fiscal 2020 and fiscal 2021 reflect the amounts identified in memoranda dated May 9, 2019 and May 5, 2020 respectively from the Executive Director of PERAC to the Secretary of Administration and Finance. The allocations to individual retirement systems for fiscal 2022 and beyond are estimated. Actuarial figures other than the actuarially determined contribution reflect January 1 estimates of the fiscal year shown.

The actuarial value of assets on January 1, 2020 was $94.9 \%$ of the market value of assets. The actuarial value of assets on January 1, 2021 was $93.1 \%$ of the market value of assets. The actuarial value of assets on January 1,2022 is assumed to be $95.8 \%$ of the market value of assets. The actuarial value of assets on January 1, 2023 is assumed to be $96.8 \%$ of the market value of assets. The actuarial value of assets on January 1, 2024 is assumed to be $99.2 \%$ of the market value of assets. The actuarial value of assets on January 1,2025 is assumed to be $100.0 \%$ of the market value of assets. The actuarial value of assets is projected using the history of PRIT Fund cash flows to estimate future cash flows.

The actuarial liability is projected from January 1, 2019 to January 1, 2021 using standard methodology. Projections beyond January 1, 2021 reflect the same percentage increase. Past projections used slightly decreasing percentage increases to reflect the impact of pension reform legislation enacted in 2011, as well as employee contribution increases as a percentage of pay.

The projected actuarially determined contribution (ADC) for MSERS, MTRS and Boston teachers for fiscal 2023 and beyond are estimated. The actual fiscal 2021 ADC for MSERS, MTRS and Boston teachers were provided in a memorandum dated May 5, 2020 from the Executive Director of PERAC to the Secretary of Administration and Finance. The actual fiscal 2022 ADC for MSERS, MTRS and Boston teachers were provided in a memorandum dated May 13, 2021 from the Executive Director of PERAC to the Secretary of Administration and Finance.

For the purpose of calculating the actuarially determined contribution as a percentage of total budgeted operating funds expenditures, the Executive Office for Administration and Finance used the $4.5 \%$ compound annual growth rate of budgeted revenues from fiscal 2010 to fiscal 2020. This does not represent an official forecast of the growth in Total Budgeted Expenditures and Other Uses by the Executive Office for Administration and Finance.

Prospective Funded Status of the Pension System (in millions, except for percentages) (1)

| Fiscal Year | Actuarially Determined Contribution (ADC) | Actuarial Value of Assets | Actuarial Accrued $\underline{\text { Liability }}$ | Unfunded Actuarial Liability | Funded <br> Ratio(2) | ADC as a \% of Total Budgeted Operating Funds Expenditures |

[^6]
## PRIT Fund Investments

The mission of the PRIM Board is to manage the PRIT Fund so as to ensure that pension assets are well invested so that current and future benefit obligations are adequately funded in a cost-effective manner. The PRIM Board therefore seeks to maximize the total return on investment, within acceptable levels of risk and cost for an approximately $60 \%$ funded public pension fund. Under current law and projections, by the year 2040 the PRIT Fund is expected to have grown, through annual payments in accordance with a legislatively approved funding schedule and through the total investment return of the fund, to an amount sufficient to meet the then existing pension obligations of the Commonwealth.

The PRIM Board recognizes that over the long-term, asset allocation is the single greatest contributor of return and risk to the PRIT Fund. The asset allocation plan adopted by the Board embodies its decisions about what proportions of the PRIT Fund are to be invested in global equity and fixed income securities, alternative investments such as real estate, private equity and portfolio completion strategies, and, where appropriate, the various sub-asset classes of each category. At reasonable intervals of not more than three to five years, the Board conducts a comprehensive review of its asset allocation plan and its underlying assumptions, including the Commonwealth's current and projected pension assets and liabilities, long-term capital markets rate of return assumptions, and the Board's risk tolerances. The comprehensive review identifies a reasonable time horizon and investment strategy for matching assets and liabilities, a fund-level total return target, and an optimal allocation among available asset classes and sub-asset classes. The Board examines the asset allocation plan annually and adjusts the plan as may be appropriate given the PRIT Fund's long-term nature and objectives. The target rate of return is $7.0 \%$, which matches the investment return assumption adopted by PERAC on March 10, 2021. The PRIM Board does not determine this target rate of return, but this target rate of return is a key input into the PRIM Board's asset allocation decisions.

The actual asset allocation mix invariably deviates from the PRIT Fund's allocation targets due to market movement, cash flows, and manager performance. Material deviations from the asset allocation targets can alter the expected return and risk of the PRIT Fund. The following table sets forth the actual PRIT Fund asset allocation for each of the most recent five fiscal years, as well as the current target ranges. The actual allocation figures are as of June 30 for each of the years indicated. The target ranges are those contained in the asset allocation plan, which was most recently approved on February 24, 2021.

## Other Post-Employment Benefit Obligations (OPEB)

In addition to providing pension benefits, the Commonwealth is statutorily required to provide certain health care and life insurance benefits ("other post-employment benefits" or "OPEB") for retired employees of the Commonwealth, as well as retired employees of housing authorities, redevelopment authorities and certain other governmental agencies (offline agencies). Substantially all of the Commonwealth's employees may become eligible for these benefits if they reach retirement age and eligibility while working for the Commonwealth. Eligible retirees are required to contribute a specified percentage of the health care/benefit costs. The Commonwealth is reimbursed for the cost of benefits to retirees of the eligible authorities and non-state agencies. (Although, as noted above, the Commonwealth is required to pay pensions to retired municipal teachers, the Commonwealth has no OPEB obligations with respect to retired municipal teachers.)

The GIC manages the Commonwealth's OPEB for all state and certain agency employees and retirees. The GIC has representation on the Board of Trustees of the State Retiree Benefits Trust (SRBT). The SRBT is set up to pay for former state employees' OPEB benefits and to invest state and certain municipalities funds that have been set aside to pay for OPEB benefits and the cost to administer those funds and can only be dissolved when all such health care and other non-pension benefits, current and future, have been paid or defeased.

The Commonwealth also oversees the management and administration of the Massachusetts Turnpike Authority Retiree Benefits Trust, which is restricted for OPEB benefits of the retirees of the former Massachusetts Turnpike Authority.

Employer and employee contribution rates are set by statute. The Commonwealth recognizes its share of the costs on an actuarial basis. As of June 30, 2020, Commonwealth participants contributed $10 \%$ to $25 \%$ of premium costs, depending on the date of hire and whether the participant is active, retiree or survivor status. See "COMMONWEALTH EXPENDITURES - Employee Benefits; Group Insurance." According to the most recent actuarial valuation as of June 30, 2020, the GIC had 133,322 state enrollees as of January 1, 2020. As of that date, the Commonwealth was responsible for the OPEB liability of 129,046 of those enrollees.

In June 2015, the GASB issued two new standards that change the accounting and financial reporting for the Commonwealth's OPEB obligations, GASB Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, which was effective for fiscal 2017 and GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, which was effective for fiscal 2018. Under GASB 74, OPEB plans are required to discount retiree health care liabilities, based on a blend of 30-year municipal bond rates and the expected return for assets in the trust, "blended," or weighted, by the funding level of the OPEB trust relative to OPEB liabilities. In fiscal 2019, the rate of return for assets in the OPEB trust was assumed to be $7.25 \%$, consistent with the rate used for the Commonwealth's pension trust, while the relevant municipal bond rate
was $3.51 \%$, resulting in a $3.69 \%$ blended discount rate, weighted towards the lower municipal bond rate due to the relatively low funding level of the OPEB trust in relation to the Commonwealth's OPEB liability. GASB 75 requires governments to report in their statements of net position (or balance sheet) a net OPEB liability, defined as the difference between the total OPEB liability (the present value of projected benefit payments to retirees for certain health care benefits based on past service) and the assets (mostly investments reported at fair value) set aside in a trust and restricted to paying benefits to retirees or their beneficiaries. The new standard also requires recognition in the statement of activities of net OPEB expense. The rate used to discount projected benefit payments to their present value is based on a single rate that reflects (a) the long-term expected rate of return on plan investments as long as the plan net position is projected under specified conditions to be sufficient to make projected benefit payments and the OPEB plan assets are expected to be invested using a strategy to achieve that return and (b) a yield or index rate on tax-exempt 20-year AA-or-higher rated general obligation municipal bonds to the extent that the conditions for use of the long-term expected rate of return are not met. This statement is similar to the requirements of GASB 68, Accounting and Financial Reporting for Pensions, which was first implemented in the ACFR for fiscal 2015.

The GASB 74 actuarial valuation for fiscal year ended June 30, 2020, which was issued on March 12, 2021, as revised on April 14, 2021 is available at: https://www.macomptroller.org/commonwealth-actuarialvaluations. According to the report, the Commonwealth's unfunded OPEB liability, assuming no pre-funding and using a discount rate of $2.28 \%$, was approximately $\$ 20.691$ billion as of June 30, 2020.

The independent actuarial report covers only the Commonwealth's OPEB obligations for Commonwealth employees and their survivors. Municipalities and authorities of the Commonwealth, even if their health care coverage is administered by the Group Insurance Commission, perform their own valuations, as the Commonwealth acts only as an agent for the entities that participate in the GIC with respect to providing OPEB health insurance benefits and does not assume the risk or financial burden of their health care costs.

The State Retiree Benefits Trust Fund was created to consolidate the state's retiree funding efforts and better project future liabilities, and beginning in fiscal 2008, expenses for current state retirees' healthcare were paid from the fund. Also in fiscal 2008, the fund benefited from a one-time transfer of approximately $\$ 329$ million from the Health Care Security Trust. The fiscal 2012 budget included a requirement that, beginning in fiscal 2013, 10\% of the annual tobacco settlement payments be transferred to the State Retiree Benefits Trust Fund, with the amount deposited to the State Retiree Benefits Trust Fund to increase by $10 \%$ increments annually thereafter until $100 \%$ of all payments would be transferred to that Fund, subject to such requirement being subsequently modified or waived by the Legislature. In fiscal 2017, 2018, 2019, 2020 and 2021, the required transfer was modified to $30 \%$, $10 \%$, $30 \%, 10 \%$ and $10 \%$, respectively, of annual tobacco settlement payments. The fiscal 2022 budget provides for the continued transfer of $10 \%$ of annual tobacco settlement payments. Commencing with fiscal 2014, the budget also included a provision that funded a portion of the scheduled transfer to the State Retiree Benefits Trust Fund from certain unspent appropriations, to the extent that they were available, with any balance to be made up through a transfer of tobacco settlement payments. State finance law also provides for annual deposits into the State Retiree Benefits Trust Fund in the amount of 5\% of any capital gains tax revenues transferred to the Stabilization Fund in excess of the statutory capital gains threshold; however, legislation in fiscal 2020 suspended this requirement and all capital gains tax revenue was retained in the General Fund.

(1) Amounts are as of June 30 and prepared in accordance with GASB Statement No. 74, effective as of fiscal 2017.
(2) Amounts are as of January 1 and prepared in accordance with GASB Statement No. 43, which was replaced by GASB Statement No. 74.
(3) Certain amounts were restated due to errors in calculations during subsequent audit procedures as more fully described below.

The following table shows the beginning and ending liabilities and assets for the State Retirees' Benefits Trust, as well as the unfunded OPEB liability, or net OPEB liability (NOL), with the NOL being the amount that the Commonwealth records on its Statement of Net Position as its unfunded OPEB liability, as required by GASB Statements No. 74 and No. 75, and as shown in the ACFR for each fiscal year. The table also shows the components of the change in the NOL between the beginning (July 1) and end (June 30) for fiscal years 2017 to 2020.

During the audit of the GASB 75 report as of the June 30, 2019 measurement date (which is reported in the ACFR for fiscal 2020), the Commonwealth's independent auditors, currently KPMG, noted errors in the total OPEB liability and the net OPEB liability as calculated by a third party actuarial firm. These errors included incorrect total and net OPEB liabilities dating back to the June 30, 2018 measurement date. The information in the following GASB 74 and 75 tables have been changed to reflect the restated amounts. These restated amounts are reported in the ACFR for fiscal 2020.

## GASB 74 Information for the State Retirees’ Benefit Trust Schedule of Changes in Net OPEB Liability and Related Ratios

Fiscal Years 2020 through 2017
(in thousands, except for percentages)

|  | Fiscal 2020 | Fiscal 2019 (5) | Fiscal 2018 (5) | Fiscal 2017 |

| Net OPEB liability as a percentage of covered employee payroll | 313.1\% | 287.9\% | 301.7\% | 295.0\% |

## Source: Office of the Comptroller

(1) The change in assumptions in fiscal 2017 was due to an increase in the investment rate of return (discount rate) from $2.80 \%$ to $3.63 \%$.
(2) The change in assumptions in fiscal 2018 was due to (i) a change in base OPEB rates for medical services and prescriptions, (ii) a decrease in the healthcare trend rate from $8.5 \%$ to $8.0 \%$, (iii) a change in mortality for disabled members and (iv) an increase of the discount rate from $3.63 \%$ to 3.95\%.
(3) The change in assumptions in fiscal 2019 was due to (1) a change in base OPEB rates for medical services and prescriptions, (ii) a decrease in the healthcare trend rate from $8.0 \%$ to $7.5 \%$, (iii) a change in medical plan election rates, (iv) a change in future retirees' plan participation rates and (v) a decrease in the discount rate from $3.95 \%$ to $3.69 \%$.
(4) The change in assumptions in fiscal 2020 was due to (1) removal of the excise tax, (ii) an update of the medical trend rate based on the SOAGetzen trend rate model version 2020_b, (iii) change in the salary scale to be consistent with that of SERS, (iv) a change in future retirees' plan participation rates, (v) a change in medical plan election rates and (vi) a decrease in the discount rate from $3.63 \%$ to $2.28 \%$.
(5) Certain amounts were restated due to errors in calculations during subsequent audit procedures as more fully described in the preceding paragraph.

The following tables show OPEB expenses that are recognized in the ACFR for fiscal 2020 pursuant to GASB 75, as well as the inflows and outflows that under GASB 75 are recognized either in the ACFR for fiscal 2020 or are deferred and projected to be recognized in the ACFR for future fiscal years. Under GASB 75, in order to provide adequate time for OPEB plans to distribute OPEB-related information to plan participants (which include state authorities) for use in their annual audited financial statements, governments are permitted to use the prior year's NOL and other OPEB-related measures in the audited financial statements for the current year. In conformance with GASB 75, OPEB valuation information as of June 30, 2019 is used in the ACFR for fiscal 2020. During the audit of the GASB 75 report as of the June 30, 2019 measurement date (which will be reported in the ACFR for fiscal 2020), the Commonwealth's independent auditors, currently KPMG, noted errors in the total OPEB liability and the net OPEB liability as calculated by a third party actuarial firm. These errors included incorrect total and net OPEB liabilities dating back to the June 30, 2018 measurement date. The information in the following GASB 74 and 75 tables have been changed to reflect the restated amounts. These restated amounts have been reported in the ACFR for fiscal 2020. OPEB valuation information as of June 30, 2020 will be used in the ACFR for fiscal 2021. Additional information regarding the inflows and outflows that under GASB 75 are recognized either in the ACFR for fiscal 2020 or are deferred and projected to be recognized in the ACFRs for future fiscal years is in Note 10D to Basic Financial Statements to the ACFR for fiscal 2020. See Exhibit C -Annual Comprehensive Financial Report for the year ended June 30, 2020.

## COMMONWEALTH CAPITAL INVESTMENT PLAN

The Executive Office for Administration and Finance annually updates its five-year capital investment plan on a rolling basis. The five-year plan coordinates capital expenditures by state agencies and authorities that are funded primarily by Commonwealth debt and federal reimbursements.

The Executive Office for Administration and Finance also sets an annual administrative limit on the amount of bond-funded capital expenditures. The purpose of the administrative limit, known as the "bond cap," is to keep Commonwealth debt within affordable levels. In June 2021, the Governor announced the five-year capital investment plan for fiscal years 2022 through 2026, with an administrative bond cap of $\$ 2.655$ billion for fiscal 2022. This represents a $4.9 \%$ increase over the administrative bond cap recommendation in fiscal 2021.

Actual capital spending is subject to variance from budget due to the nature of capital projects and the programs comprising the plan. In addition, the debt affordability analysis and the assumptions and methodology that inform the analysis are subject to periodic review and are updated annually. These and other factors are expected to affect the later years of the current five-year plan.

## Fiscal 2022 Capital Budget

The following table shows the allocation of administrative bond cap spending by agency and the allocation of total capital spending from all sources of funding for fiscal 2022.

| Fiscal 2022 Capital Budget (in millions) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Agency | Bond Cap | ProjectFinanced | Federal Funds | Other <br> Funds | Total |
| Administration and Finance | \$76.3 | \$5.0 | - | \$31.1 | \$112.4 |
| Capital Asset Management | 558.2 | 6.3 | \$39.9 | 97.3 | 701.7 |
| Education | 19.0 | - | - | 16.8 | 35.8 |
| Energy and Environmental Affairs | 308.9 | - | 41.3 | 33.8 | 384.0 |
| Housing and Community Development | 255.6 | - | - | - | 255.6 |
| Housing and Economic Development | 208.6 | - | 0.3 | 34.5 | 243.3 |
| Technology Services and Security | 161.5 | 20.9 | 98.2 | - | 280.6 |
| Public Safety | 26.9 | 7.7 | 0.8 | - | 35.3 |
| MassDOT | 1,040.1 | - | 1,024.9 | 856.6 | 2,921.6 |
| Total (1) | \$2,655.0 | \$39.9 | \$1,205.3 | \$1,070.0 | \$4,970.2 |

SOURCE: Executive Office for Administration and Finance as of June 14, 2021.
(1) Totals may not add due to rounding.

## Climate Change Risk Mitigation

The State Hazard Mitigation and Climate Adaptation Plan resulting from Executive Order No. 569: Establishing an Integrated Climate Change Strategy for the Commonwealth (Executive Order), issued by Governor Baker on September 16, 2016, provided a basis for the Commonwealth's efforts to prioritize climate adaptation capital projects included in the fiscal 2021 capital budget. The Executive Order directs the Executive Office of Energy and Environmental Affairs and the Executive Office of Public Safety and Security to publish a statewide climate adaptation plan that includes strategies designed to enhance climate adaptation, build resilience and mitigate climate change, and which incorporates information from vulnerability assessments undertaken by the Executive Offices and their agencies for critical assets and programs and by the cities and towns in the Commonwealth.

Pursuant to the Executive Order, the Commonwealth established the Municipal Vulnerability Preparedness (MVP) grant program in 2017 to provide support for cities and towns in Massachusetts to begin the process of planning and adapting for resiliency. Under the MVP planning program, the Commonwealth awards funding to communities to complete vulnerability assessments and develop resiliency project implementation plans. Communities that complete the MVP planning program become designated as an MVP community and are eligible for follow-up MVP Action grant funding to implement the actions identified in their resiliency plans.

In fulfillment of the Executive Order, the Commonwealth adopted the State Hazard Mitigation and Climate Adaptation Plan on September 17, 2018. The plan integrates climate change impacts and adaptation strategies with hazard mitigation planning. The plan also complies with current federal requirements for state hazard mitigation plans and maintains the Commonwealth's eligibility for federal disaster recovery and hazard mitigation funding under the Stafford Act.

## Sources of Capital Investment

The different sources of funding for the capital program, as reflected in the Fiscal 2022 Capital Budget table, include:

Administrative Bond Cap:

Project Financed:

Federal Funds:
Other Funds:

Commonwealth general obligation borrowing to support the regular capital program. The administrative bond cap is reviewed and subject to revision annually.

General obligation bonds, the debt service for which is supported by savings or revenue related to the project; for example, energy efficiency improvements to Commonwealth facilities, the capital costs for which are expected to be reimbursed through operating savings as a result of reduced energy consumption.

Federal reimbursements for capital expenditures.
Accelerated Bridge Program (ABP) - Commonwealth special obligation bonds secured by revenues credited to the Commonwealth Transportation Fund (CTF) or federal grant anticipation notes secured by federal highway reimbursements issued to fund capital improvements to structurally deficient bridges through the ABP .

Rail Enhancement Program (REP) - Commonwealth special obligation bonds to be secured by revenues credited to the CTF to finance certain transit infrastructure projects through the REP, previously referred to as Special Obligation Transit Bonds.

Pay-As-You-Go - Funding from current revenue for capital projects, including toll revenue.

Third Party Contributions - Made by third parties to capital projects being carried out by the Commonwealth, including the I-Cubed program, contributions from campuses for higher education projects, matching funds from cities and towns, and capital projects funded by assessments.

Next Generation Bridge GANs - Borrowing backed by federal highway grant anticipation notes (GANs) to support the MassDOT Highway Division's bridge program.

## Historical Capital Investment

The Commonwealth aggregates its capital expenditures into seven major categories based primarily on the agencies responsible for spending and carrying out capital projects: information technology, infrastructure and facilities, environment, housing, public safety, transportation and other. The following table sets forth capital spending in fiscal 2016 through fiscal 2020 according to these categories.

Commonwealth Historical Capital Spending (in millions) (1)

|  | Fiscal 2016 | Fiscal 2017 | Fiscal 2018 | Fiscal 2019 | Fiscal 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Investment Category: |  |  |  |  |  |
| Information technology | \$169 | \$154 | \$185 | \$174 | \$94 |
| Infrastructure/facilities | 526 | 510 | 417 | 441 | 399 |
| Environment | 238 | 202 | 217 | 210 | 222 |
| Housing | 185 | 213 | 242 | 253 | 197 |
| Public safety | 18 | 17 | 18 | 19 | 17 |
| Transportation | 2,081 | 1,895 | 1,889 | 1,869 | 2,030 |
| Other | $\underline{215}$ | $\underline{269}$ | $\underline{280}$ | $\underline{294}$ | $\underline{211}$ |
| Total | \$3,432 | \$3,260 | \$3,248 | \$3,260 | \$3,170 |

SOURCE: Office of the Comptroller.
(1) Includes all spending funded by capital appropriations, including General Obligation, Special Obligation, project financed, and federal reimbursement spending.

## Debt Affordability Policy

The Executive Office for Administration and Finance established a debt affordability policy for the Commonwealth in fiscal 2009. Pursuant to the policy, the Executive Office for Administration and Finance has set an annual borrowing limit at a level designed to keep debt service on the Commonwealth's direct debt within $8 \%$ of budgeted revenues. The policy also limits future annual growth in the administrative bond cap for the regular capital program to not more than $\$ 125$ million. For a discussion on the established statutory debt limit on direct debt, see "LONG-TERM LiABiLITIES - General Authority to Borrow; Statutory Limit on Direct Debt."

For the purposes of the debt affordability analysis, debt service includes programs expected to be funded both within and outside of the bond cap, including principal and interest payments on all general obligation debt, special obligation bonds secured by a specified portion of the motor fuels excise tax, special obligation bonds issued to fund the Accelerated Bridge Program and the Rail Enhancement Program, general obligation contract assistance payment obligations, and budgetary contract assistant payment obligations on certain capital lease financings.

Budgeted revenue includes all Commonwealth taxes and other revenues available to pay Commonwealth operating expenses, including debt service, pensions and other budgetary obligations. It does not include off-budget revenues dedicated to the MBTA, the MSBA and the Massachusetts Convention Center Authority. This inclusive definition ensures that while some programs are expected to be funded outside of the bond cap, the related debt service costs of the programs should be fully accounted for under the debt affordability policy in setting the bond cap at appropriate limits.

## Capital Debt Affordability Committee

The Capital Debt Affordability Committee was established by legislation in 2012 for the purposes of reviewing on a continuing basis the amount and condition of the Commonwealth's tax-supported debt, as well as the debt of certain state authorities. The Committee is responsible for providing an estimate of the total amount of new Commonwealth debt that can prudently be authorized for the next fiscal year, taking into account certain criteria, to the Governor and Legislature on or before December 15 of each year. The Committee develops illustrative models to evaluate certain assumptions and considerations in accordance with statutory provisions designed to inform its recommendations. The Committee's estimates are advisory and not binding on the Governor or the Legislature. The Legislature is responsible for authorizing Commonwealth debt. The Governor determines the total amount of capital spending for each fiscal year and the amount of new Commonwealth debt that he considers advisable to finance
such spending. The Committee consists of seven voting members, including the Secretary of Administration and Finance (who chairs the Committee), the State Treasurer, the Comptroller, the Secretary of Transportation, one appointee of the Governor and two appointees of the State Treasurer. The Committee also includes non-voting, legislative leaders, including the House and Senate chairs and the ranking minority members of the Committees on Bonding, Capital Expenditures and State Assets, and the Committees on Ways and Means.

On December 14, 2021, the Capital Debt Affordability Committee submitted to the Governor and the Legislature the Committee's advisory estimate of the total amount of new Commonwealth debt that prudently may be authorized for fiscal 2023. The Committee determined that $\$ 2.78$ billion of general obligation debt may prudently be issued by the Commonwealth for fiscal 2023. This amount represents an increase of $4.7 \%$ or $\$ 125$ million, over the Committee's recommended bond cap for fiscal 2022.

## Cybersecurity

The Commonwealth, like many other large public and private entities, relies on a large and complex information technology (IT) environment to conduct its operations. While the Commonwealth has made significant progress in the past few years in standardizing and centralizing policies and procedures, a number of state agencies, departments, and branches continue to maintain their own distinct IT infrastructure.

In August 2017 Governor Baker established the Executive Office of Technology Services and Security (EOTSS). EOTSS maintains much of the Executive Branch's enterprise infrastructure in the form of two datacenters that host agency and statewide business applications, the Commonwealth-wide area network, and internet service. Since its formation, EOTSS has been working to standardize the Commonwealth's IT infrastructure by adopting and implementing a standard operating environment, and strengthening the Commonwealth's cybersecurity posture. While several Executive Branch entities still operate distinct data centers and networks, EOTSS is working with these entities to transfer their enterprise infrastructure services to EOTSS. Enterprise Information Security Policies and Standards have been published for all Executive Offices and their agencies and other agencies that rely on EOTSS services, and the Executive Offices that maintain separate environments are obligated to adhere to these security policies and standards. EOTSS also has worked closely with each Executive Office to make critical improvements in the areas of IT policies, procedures, infrastructure and services. EOTSS provides annual cybersecurity awareness training for Commonwealth employees.

EOTSS also provides a set of enterprise-wide cybersecurity services, including operating a Security Incident Response Team (SIRT) at the direction of the Commonwealth Chief Information Security Officer (CISO), which is aligned within EOTSS' Security Operations Center (SOC). Incident reporting and responses are coordinated through the SOC. The SIRT monitors, alerts, responds to and mitigates security threats to all stakeholders and partners. Additional security services include vulnerability management and mitigation scanning services, threat analysis, threat management and information sharing programs. EOTSS maintains an integrated security technology framework that includes multi-factor authentication for applications and users, enhanced cloud and mail security tools, network monitoring and analytical tools, and a suite of specialized enterprise security technologies and services to protect the Commonwealth's assets.

To ensure that the Commonwealth's IT investments are guided by a strategic planning process, EOTSS created an IT Investment Advisory Board, comprising security, IT and business operation executives from across state government to review IT capital proposals and projections. Additionally, the Commonwealth Chief Information Officer (CCIO) maintains authority and oversight over all Executive Branch IT planning, procurement, and projects. Agencies are obligated to report on these matters to the CCIO on an annual basis. The fiscal 2022 capital budget includes $\$ 162$ million for EOTSS.

In addition to EOTSS, the Office of the Comptroller's (CTR) Statewide Risk Management Team maintains a Cyber Center which works to identify key cybersecurity internal control elements, to create best practices protocols and procedures for all Commonwealth agencies to include in their internal controls, and to promote cybersecurity awareness. CTR's Risk Management Team works closely with EOTSS to assist agencies with remediation and corrective measures in the event of reported security incidents

As a recipient and provider of personal, private and sensitive information, the Commonwealth is subject to multiple cyber threats, including but not limited to hacking, viruses, malware and other attacks on IT networks and systems. While the Commonwealth continues to enhance its IT infrastructure and security systems to address these issues, no assurances can be given that the Commonwealth's efforts to mitigate cyber threats will be successful or that such attacks will not materially impact the Commonwealth.
[Remainder of this page intentionally left blank.]

## LONG-TERM LIABILITIES

## General Authority to Borrow

Under its constitution, the Commonwealth may borrow money (a) for defense or in anticipation of receipts from taxes or other sources, any such loan to be paid out of the revenue of the year in which the loan is made, or (b) by a two-thirds vote of the members of each house of the Legislature present and voting thereon. The constitution further provides that borrowed money shall not be expended for any other purpose than that for which it was borrowed or for the reduction or discharge of the principal of the loan. In addition, the Commonwealth may give, loan or pledge its credit by a two-thirds vote of the members of each house of the Legislature present and voting thereon, but such credit may not in any manner be given or loaned to or in aid of any individual, or of any private association, or of any corporation which is privately owned or managed.

The Commonwealth has waived its sovereign immunity and consented to be sued on contractual obligations, which includes bonds and notes issued by it and all claims with respect thereto. However, the property of the Commonwealth is not subject to attachment or levy to pay a judgment, and the satisfaction of any judgment generally requires legislative appropriation. Enforcement of a claim for payment of principal of or interest on bonds and notes of the Commonwealth may also be subject to the provisions of federal or Commonwealth statutes, if any, hereafter enacted extending the time for payment or imposing other constraints upon enforcement, insofar as the same may be constitutionally applied. The United States Bankruptcy Code is not applicable to states.

Commonwealth Debt. The State Treasurer is statutorily responsible for the borrowing needs of the Commonwealth, including short-term cash flow needs and long-term borrowing needs for the capital budget. Borrowing is accomplished through the sale of short-term notes and long-term bonds. The Commonwealth is authorized to issue three types of direct debt - general obligation debt, special obligation debt and federal grant anticipation notes. General obligation debt is secured by a pledge of the full faith and credit of the Commonwealth. See "General Obligation Debt" below. Special obligation debt may be secured either with a pledge of receipts credited to the Commonwealth Transportation Fund (formerly the Highway Fund) or with a pledge of receipts credited to the Convention Center Fund. See "Special Obligation Debt" below. Federal grant anticipation notes are secured by a pledge of federal highway construction reimbursements. See "Federal Grant Anticipation Notes" below.

Other Long-Term Liabilities. The Commonwealth is also authorized to pledge its credit in aid of and provide contractual support for certain independent authorities and political subdivisions within the Commonwealth. These Commonwealth liabilities are classified as general obligation contract assistance liabilities or contingent liabilities. In addition, the Commonwealth is authorized to pledge its credit in support of scheduled, periodic payments to be made by the Commonwealth under interest rate swaps and other hedging agreements related to bonds or notes of the Commonwealth.

General obligation contract assistance liabilities arise from statutory requirements for (i) payments by the Commonwealth to the Massachusetts Clean Water Trust, MassDOT and the Massachusetts Development Finance Agency that are used by such entities to pay a portion of the debt service on certain of their outstanding bonds and (ii) payments from the Social Innovation Financing Trust Fund on "pay for success" contracts, as described below. Such liabilities constitute a pledge of the Commonwealth's credit for which a two-thirds vote of the Legislature is required. See "General Obligation Contract Assistance Liabilities" below.

Contingent liabilities relate to debt obligations of certain independent authorities and agencies of the Commonwealth that are expected to be paid without Commonwealth assistance, but for which the Commonwealth has some kind of liability if expected payment sources do not materialize. These liabilities consist of guaranties and similar obligations with respect to which the Commonwealth's credit has been or may be pledged, as in the case of certain debt obligations of the MBTA (pre-2000), the Woods Hole, Martha's Vineyard and Nantucket Steamship Authority, regional transit authorities, and the higher education building authorities. The Commonwealth has certain statutorily contemplated payment obligations with respect to which the Commonwealth's credit has not been pledged, as in the case of the Commonwealth's obligation to fund debt service, solely from moneys otherwise appropriated for the affected institution, owed by certain community colleges and state universities on bonds issued
by the former Massachusetts Health and Educational Facilities Authority (now the Massachusetts Development Finance Agency) and the Massachusetts State College Building Authority. See "Contingent Liabilities" below.

Statutory Limit on Direct Debt. Since December, 1989, state finance law has included a limit on the amount of outstanding "direct" bonds of the Commonwealth. For fiscal 2012, the debt limit was $\$ 18.944$ billion under the statute in place during fiscal 2012. In August 2012, state finance law was amended, effective January 1, 2013, to specify that the debt limit be calculated for fiscal years starting in fiscal 2013 using a fiscal 2012 base value of $\$ 17.070$ billion and increasing the limit for each subsequent fiscal year to $105 \%$ of the previous fiscal year's limit. Based on this calculation, the statutory limit on "direct" bonds during fiscal 2021 is $\$ 26.481$ billion. Prior to June 10, 2013, this limit was calculated using a statutory definition that differed from GAAP in that the principal amount of outstanding bonds included the amount of any premium and was measured net of any discount, costs of issuance and other financing costs ("net proceeds"). On June 10, 2013, state finance law was amended, effective January 1, 2013, to change the statutory definition of outstanding debt from net proceeds to principal outstanding, a change that brings the outstanding debt definition in conformance with GAAP.

The debt limit law provides that bonds to be refunded from the proceeds of Commonwealth refunding bonds are to be excluded from outstanding "direct" bonds upon the issuance of the refunding bonds. Pursuant to special legislation enacted over the years, certain outstanding Commonwealth debt obligations are not counted in computing the amount of bonds subject to the limit, including Commonwealth refunding/restructuring bonds issued in September and October, 1991, federal grant anticipation notes, bonds issued to pay operating notes issued by the MBTA or to reimburse the Commonwealth for advances to the MBTA, bonds payable from the Central Artery and Statewide Road and Bridge Infrastructure Fund, bonds issued to finance the MSBA and bonds issued to finance the Commonwealth's Accelerated Bridge Program. On August 10, 2016, the Governor approved legislation that exempts from the statutory debt limit bonds that are issued to finance the Commonwealth's rail enhancement program.

The outstanding Commonwealth debt, the amounts of such outstanding debt excluded from the statutory debt limit, the net amounts of such outstanding Commonwealth debt subject to the statutory debt limit and the statutory debt limit as of the end of each of the last five fiscal years are shown in the following table on a statutory basis.

## Calculation of the Debt Limit <br> (in thousands)

|  | Fiscal 2018 | Fiscal 2019 | Fiscal 2020 | Fiscal 2021 (4) | Fiscal 2022 (5) |

| Statutory Debt Limit | \$22,875,433 | \$24,019,204 | \$25,220,164 | \$26,481,173 | \$27,805,231 |

SOURCE: Office of the Comptroller.
(1) Includes federal grant anticipation notes issued as crossover refunding bonds. The refunding escrows funded by these bonds and related premiums are used to pay interest on the refunding bonds until the refunded bonds are callable and then to redeem the refunded bonds. Interest on the refunded bonds prior to redemption continues to be paid from pledged revenues as before.
(2) Exempt from the statutory debt limit, effective August 10, 2016.
(3) Includes accretion of capital appreciation bonds.
(4) As of June 30, 2021; unaudited.
(5) Amounts are as of November 30, 2021.

## General Obligation Debt

As of November 30, 2021, the Commonwealth had $\$ 24.6$ billion in general obligation bonds outstanding, of which $\$ 23.6$ billion, or $96.1 \%$ was fixed rate debt and $\$ 966.3$ million, or $3.9 \%$, was variable rate debt. As of November 30, 2021, $\$ 20.2$ billion, or $82.0 \%$, of the Commonwealth's general obligation debt was tax-exempt and $\$ 4.4$ billion, or $18.0 \%$, was taxable.

For the purpose of reporting general obligation debt outstanding and variable rate debt outstanding, future compounded interest on the Commonwealth's variable rate "U. Plan" College Opportunity Bonds (COBS), as discussed in greater detail below, is included as debt outstanding. Any outstanding commercial paper, bond anticipation notes, or revenue anticipation notes, as more fully described below, are not reported in general obligation debt outstanding calculations.
[Remainder of this page intentionally left blank.]

The Commonwealth's outstanding general obligation variable rate debt consists of several variable rate structures. These structures include floating rate notes in various interest rate modes ( $\$ 132.4$ million), direct purchase agreements in various interest rate modes ( $\$ 300$ million), multi-modal bonds currently in the Term Mode ( $\$ 377.2$ million), and college opportunity bonds ( $\$ 156.7$ million). Of all Commonwealth variable rate debt outstanding, the interest rates on $\$ 239.9$ million, or approximately $1.0 \%$ of total outstanding general obligation debt, have been synthetically fixed by means of floating-to-fixed interest rate swap agreements. Prior to 2008, the Commonwealth had periodically entered into interest rate swap agreements for the sole purpose of hedging interestrate risk on a portion of its outstanding variable rate bonds. See "Interest Rate Swaps." Under state finance law, scheduled, periodic payments to be made by the Commonwealth pursuant to swap agreements in existence on August 1, 2008 or entered into after such date constitute general obligations of the Commonwealth to which its full faith and credit are pledged. The remaining variable rate debt of $\$ 726.4$ million or approximately $3.0 \%$ of the total outstanding general obligation debt, is unhedged and, accordingly, floats with interest rates re-set on a periodic basis.

As of November 30, 2021, the Commonwealth had outstanding approximately $\$ 156.7$ million ( $\$ 81.9$ million of original principal and including a discount equal to $\$ 74.8$ million) of variable rate COBS, sold in conjunction with a college savings program administered by the Massachusetts Educational Financing Authority (MEFA), which bear deferred interest at a rate equal to the percentage change in the consumer price index plus $2 \%$, together with current interest at the rate of $0.5 \%$. This debt is held directly by MEFA and has no secondary market.

The Commonwealth is authorized to issue short-term general obligation debt as revenue anticipation notes or bond anticipation notes. Fixed-rate revenue anticipation notes (RANs) may be issued by the State Treasurer annually in anticipation of revenue receipts for the same fiscal year. Revenue anticipation notes must be repaid no later than the close of the fiscal year in which they are issued. Bond anticipation notes may be issued by the State Treasurer in anticipation of the issuance of bonds, including, in some circumstances, special obligation bonds. See "Special Obligation Debt" below. As of November 30, 2021, the Commonwealth did not have any RANs outstanding.

## Special Obligation Debt

Commonwealth Transportation Fund. Section $2 O$ of Chapter 29 of the General Laws, as amended, authorizes the Commonwealth to issue special obligation bonds secured by all or a portion of revenues accounted to the Commonwealth Transportation Fund (formerly the Highway Fund). Revenues which are accounted to the Commonwealth Transportation Fund are primarily derived from taxes and fees relating to the operation or use of motor vehicles in the Commonwealth, including the motor fuels excise tax and registry of motor vehicles fees. In addition, a portion of the Commonwealth's receipts from the sales tax is dedicated to the Commonwealth Transportation Fund (see "Commonwealth Revenues - State Taxes; Sales and Use Tax"), as is the underground storage tank petroleum cleanup fee to the extent it exceeds $\$ 30$ million, and state finance law currently provides for a series of substantial transfers from the General Fund to the Commonwealth Transportation Fund through fiscal 2020; none of the sales tax receipts or General Fund transfers has been pledged to secure Commonwealth special obligation bonds.

Between 1992 and 2005, the Commonwealth issued special obligation bonds secured by a lien on a specified portion of the motor fuels excise tax. As of November 30, 2021, the Commonwealth had outstanding approximately $\$ 28.4$ million of such special obligation bonds secured by a pledge of $6.86 \not \subset$ of the $24 ¢$ motor fuels excise tax. In December 2010, the trust agreement securing such bonds was closed to further issuance of additional debt, with the exception of refunding bonds.

In 2008, the Commonwealth was authorized to issue approximately $\$ 1.876$ billion of special obligation bonds secured by a pledge of all or a portion of revenues accounted to the Commonwealth Transportation Fund (CTF Bonds) to fund a portion of the Accelerated Bridge Program (ABP). Additionally, in April 2014, the Commonwealth was authorized to issue up to $\$ 6.7$ billion in general obligation debt, special obligation debt, or a combination of both, for the purpose of funding capital expenditures of MassDOT, for the benefit of the MBTA and for other Rail Enhancement Program (REP) projects. As of November 30, 2021, the Commonwealth had outstanding approximately $\$ 3.2$ billion of CTF Bonds, which are secured by a pledge of registry fees and a specified
portion of the motor fuels excise tax, $\$ 1.6$ billion of which have been issued in support of the ABP and $\$ 1.6$ billion of which have been issued in support of the REP.

In January 2021, Governor Baker signed a new transportation bond act, Chapter 383 of the Acts of 2020 (Transportation Bond Bill or Chapter 383), which authorizes approximately $\$ 16.2$ billion of total capital authorization to improve the Commonwealth's transportation infrastructure. The Transportation Bond Bill provides substantial flexibility for borrowing to be issued as either general obligation bonds or special obligation bonds, depending on market conditions and the most effective borrowing strategies for the Commonwealth. Included in the $\$ 16.2$ billion total authorization is $\$ 5.1$ billion to support the MBTA, which is proposed as CTF Bonds, although such authorization also is eligible to be issued as general obligation bonds. Also included is authorization for $\$ 1.25$ billion of federal highway grant anticipation notes (GANs) to fund repairs, rehabilitation or replacement of the Commonwealth's bridges. The new GANs will provide funding to increase the level of annual funding to help achieve long-term bridge condition targets. An additional $\$ 5.4$ billion is authorized for highway, rail and transit, planning and multi-modal transportation, transportation IT, and grant programs and local projects, and is eligible to be issued as either general obligation bonds or special obligation bonds. The remaining authorization includes $\$ 4.4$ billion for federally aided highway projects, with $\$ 880$ million eligible to be issued as either general obligation or special obligation bonds.

Convention Center Fund. Chapter 152 of the Acts of 1997, as amended, authorized $\$ 694.4$ million of special obligation bonds to be issued for the purposes of building a new convention center in Boston ( $\$ 609.4$ million), the Springfield Civic Center ( $\$ 66$ million), and the Worcester Convention Center ( $\$ 19$ million). As of November 30, 2021, the only bonds outstanding pursuant to such authorization are certain special obligation bonds issued in 2005 (the Series 2005 Bonds) currently outstanding in the amount of $\$ 479.6$ million. The bonds are payable from moneys credited to the Convention Center Fund created by such legislation, which include certain hotel tax receipts from hotels in Boston, Cambridge, Springfield and Worcester, a surcharge on car rentals in Boston, a parking surcharge at all three facilities, a surcharge on sightseeing tours and cruises in Boston and sales tax receipts from certain hotels and other retail establishments in Boston, Cambridge and Springfield. As of November 30, 2021, the balance of the trustee-held Convention Center Revenue Fund available for debt service was $\$ 132.1$ million and retained earnings in the Convention Center Fund was $\$ 223.0$ million. The trust agreement for the Series 2005 Bonds requires a capital reserve fund to be maintained at an amount equal to the lesser of $10 \%$ of outstanding principal amount of the bonds, $125 \%$ of average annual debt service or maximum annual debt service and provides that if the fund falls below its required balance, the $2.75 \%$ convention center financing fee in Boston is to be increased (though the overall hotel tax in Boston, including the fee, cannot exceed 14\%). As of November 30, 2021, the balance of the Capital Reserve Fund was $\$ 53.0$ million.

On July 29, 2014, the Governor approved legislation authorizing the Commonwealth to issue an additional $\$ 1.1$ billion in special obligation bonds to finance an expansion of the convention center in Boston, to finance costs of issuance and fund a debt service reserve fund. Such bonds would be secured by and payable from the Convention Center Fund, with the State Treasurer and Secretary of Administration and Finance having the authority to pledge additional state hotel/motel room occupancy excises to the new bonds.

## Federal Grant Anticipation Notes

In 2008, the Commonwealth was authorized to issue $\$ 1.1$ billion of GANs secured by future federal funds to fund a portion of the ABP. Such notes are secured by a back-up pledge of net amounts in the Commonwealth Transportation Fund after application of such amounts in accordance with the trust agreement securing the CTF Bonds and previously issued bonds secured by motor fuels excise taxes. The Commonwealth expects to pay interest on the notes supporting the ABP from state appropriations. In February 2021, the Governor signed a new transportation bond bill, which authorizes the additional issuance of $\$ 1.25$ billion of additional federal highway GANs for highway purposes. As of November 30, 2021, $\$ 582.6$ million of GANs were outstanding.

## Build America Bonds

The Commonwealth has issued bonds in the form of Build America Bonds (BABs) and as Recovery Zone Economic Development Bonds (RZEDBs). BABs and RZEDBs were authorized under the federal American Recovery and Reinvestment Act of 2009 (ARRA). Pursuant to ARRA, the Commonwealth is entitled to receive cash subsidy payments from the federal government equal to $35 \%$ of the debt service payable on the BABs and $45 \%$ of the debt service payable on the RZEDBs, provided, in both cases, that the Commonwealth makes certain required filings in accordance with applicable federal rules. Such interest subsidy payments are treated under federal law as overpayments of tax and, accordingly, are subject to offset against certain amounts that may be owed by the Commonwealth to the federal government or its agencies. In federal fiscal year 2016, such payments were subject to a sequestration reduction of $6.8 \%$, with the Bipartisan Budget Act of 2015, approved by the President on November 2, 2015, extending the sequestration provisions through federal fiscal year 2025. For federal fiscal years 2017, 2018, 2019 and 2020, such payments were subject to a reduction of $6.9 \%, 6.6 \%, 6.2 \%$ and $5.9 \%$, respectively. From October 1, 2020 through September 30, 2030, the sequestration reduction rate has been set at $5.7 \%$, unless a law is enacted that modifies or amends the rate, at which such time the sequestration reduction rate may be subject to change. Such interest subsidy payments could become subject to a much larger sequestration reduction, and potentially be eliminated altogether, under the Statutory Pay-As-You-Go (PAYGO) Act of 2010, which is designed to limit federal deficit spending. Since the enactment of the PAYGO Act, the U. S. Congress has consistently acted to prevent its implementation, but there can be no assurance that it will continue to do so.

Beginning in fiscal 2012, federal interest subsidy payments received by the Commonwealth are required to be deposited in a Build America Bonds Subsidy Trust Fund and used, without further legislative appropriation, to pay debt service on the related BABs and RZEDBs. The Commonwealth is obligated to make payments of principal and interest on the BABs and RZEDBs whether or not it receives interest subsidy payments. As of November 30, 2021, $\$ 1.9$ billion of the Commonwealth's outstanding general obligation debt was comprised of BABs, $\$ 419.8$ million of the outstanding CTF Bonds consisted of BABs, $\$ 156.4$ million of the outstanding CTF Bonds consisted of RZEDBs and $\$ 27.2$ million of the outstanding GANs consisted of BABs.

The following table shows long-term debt of the Commonwealth issued and retired from fiscal 2017 through fiscal 2021, exclusive of unamortized bond premiums.

General and Special Obligation Long-Term Debt Issuance and Repayment Analysis (in thousands) (1)

The following table sets forth the amounts of Commonwealth long-term general obligation debt, special obligation debt and federal grant anticipation notes outstanding, exclusive of unamortized bond premiums, as of the end of the last five fiscal years.

## Outstanding Long Term Commonwealth Debt (in thousands)

## Debt Service Requirements

The following tables sets forth, as of November 30, 2021, the annual fiscal year debt service requirements on outstanding Commonwealth general obligation bonds, special obligation bonds and federal GANs. For variablerate bonds with respect to which the Commonwealth is a fixed-rate payor under an associated interest rate swap agreement, the debt service schedule assumes payment of the fixed rate due under such agreement. For other variable-rate bonds, the schedule assumes a 5\% interest rate.

## Interest Rate Swaps

The Commonwealth has entered into interest rate swap agreements for the sole purpose of hedging changes in the interest rates on a portion of its outstanding variable rate bonds, predicated on the assumption that the interest on such bonds, combined with the cost of the associated interest rate swaps, would produce lower aggregate interest costs than fixed-rate bonds. As of November 30, 2021, approximately $\$ 268.3$ million of the Commonwealth's outstanding variable-rate debt was synthetically fixed via floating-to-fixed interest rate swap hedge agreements, including $\$ 28.4$ million in synthetically fixed debt associated with special obligation issues as shown in the table below.

Under the terms of these floating-to-fixed rate hedge agreements, the counterparties to the swaps are obligated to pay the Commonwealth an amount equal or approximately equal to the variable-rate payment on the related bonds or a payment based on a market index, and the Commonwealth is obligated to pay the counterparties a stipulated fixed rate. The floating rate received by the Commonwealth from swap counterparties is used to offset the variable rate paid to bondholders. Only the net difference in interest payments is actually exchanged with the counterparty. The net payments made or received on these agreements are reported as part of interest expense in the Commonwealth's basic financial statements. In all cases, the Commonwealth remains responsible for making interest payments to the variable-rate bondholders.

The intended effect of these agreements is essentially to fix the Commonwealth's interest rate obligations with respect to its variable-rate bonds in order to hedge or mitigate the Commonwealth's exposure to changes in interest rates on these bonds. For example, during a period when interest rates rise, the Commonwealth would receive higher payments from swap counterparties that would be used to offset higher payments to bondholders of the outstanding variable rate bonds. During a period when interest rates decline, the reduction in interest payments to bondholders would offset the higher payments made to swap counterparties. In both scenarios, the net obligation of the Commonwealth is essentially fixed through the life of the swap and bonds providing the Commonwealth with long term budget certainty. All of the Commonwealth's interest rate swaps were floating-to-fixed rate agreements and, as of June 30, 2021, were deemed effective hedges, as provided for in GASB Statement No. 53.

The bonds and related swap agreements have final maturities ranging from 2022 to 2033. The total notional value of approximately $\$ 268.3$ million effectively matches the par amount of the related variable-rate bonds. Under the swap agreements, the Commonwealth pays the relevant counterparties fixed rates ranging from $4.515 \%$ to $5.059 \%$ and receives variable-rate payments equal to or approximately equal to the amount of variable rate payments the Commonwealth pays on the related variable-rate refunding bonds or a payment based on a market index.

All of the Commonwealth's counterparties are required to post collateral in certain circumstances. The Commonwealth is not required to post collateral under any of its existing swap agreements.

The following table describes the interest rate swap agreements, all of which are floating-to-fixed rate hedges that the Commonwealth has entered into in connection with certain of its outstanding variable rate bond issues as of November 30, 2021.

## Liquidity Facilities

On May 11, 2020, the Commonwealth obtained a line of credit in the aggregate principal amount of \$1.75 billion from a syndicate of banks, which line of credit is available to be drawn for cash flow purposes. As of February 17,2021 , the line of credit was reduced to the principal amount of $\$ 500$ million. The line of credit was scheduled to expire on May 10, 2021, and was renegotiated with the same syndicate of banks in the amount of \$500 million for a term of three years, expiring on March 30, 2024. As of November 30, 2021, no amount was outstanding under the line of credit.

The Commonwealth has capacity under a note purchase agreement to issue revenue anticipation notes or bond anticipation notes up to $\$ 200$ million. The agreement is with RBC Capital Markets, LLC and has a termination date of February 8, 2024. As of November 30, 2021, no notes were issued or outstanding under the note purchase agreement.
[Remainder of this page intentionally left blank.]

## Direct Purchase Agreements

Certain of the Commonwealth's variable rate bonds have been directly purchased by commercial banking institutions. The following table lists those series of variable rate bonds subject to direct purchase agreements as of November 30, 2021.

| Direct Purchase Bonds | Outstanding <br> Principal Amount <br> (in thousands) | Mandatory <br> Tender Date |
| :--- | :---: | :---: |
| 2016 Series B | $\$ 100,000$ | $4 / 01 / 2026$ |
| 2016 Series C | 200,000 | $4 / 01 / 2024$ |

## General Obligation Contract Assistance Liabilities

Massachusetts Department of Transportation, as successor to the Massachusetts Turnpike Authority. On February 19, 1999, the Commonwealth and the Massachusetts Turnpike Authority entered into a contract which provides for the Commonwealth to make annual operating assistance payments to MassDOT, as successor to the Turnpike Authority, which are capped at $\$ 25$ million annually and extend until June 30, 2050, which is the end of the $40^{\text {th }}$ fiscal year following the transfer of certain facilities associated with the Commonwealth's Central Artery/Ted Williams Tunnel Project to MassDOT. On June 30, 2009, the Commonwealth and the Turnpike Authority entered into a contract for financial assistance which provides for the payment by the Commonwealth to MassDOT, as successor to the Turnpike Authority, of $\$ 100$ million per fiscal year, commencing July 1, 2009 until June 30, 2039. Payments under both contracts constitute a general obligation pledge of the Commonwealth for which the full faith and credit of the Commonwealth are pledged.

Massachusetts Clean Water Trust. The Massachusetts Clean Water Trust (the Trust) manages the Commonwealth's state revolving fund program under the federal Clean Water Act and the federal Safe Drinking Water Act. The Trust is authorized to apply for and accept federal grants and associated Commonwealth matching grants to capitalize the revolving funds and to issue debt obligations to provide low-interest loans and grants to cities, towns, and water utilities to help Massachusetts communities build or replace water quality infrastructure that enhances ground and surface water resources, ensures the safety of drinking water, protests public health, and develops resilient communities. Under state law, loans made by the Trust are required to provide for subsidies or other financial assistance to reduce the debt service expense on the loans. Most of the Trust's loans are subsidized to a $2 \%$ interest rate set by statute. Other loans made by the Trust may bear interest at lower rates, including a zero rate of interest, and a portion of the principal of certain loans has also been subsidized by the Trust. To provide for a portion of the subsidy on most of its loans, the Trust receives contract assistance payments from the Commonwealth. Under the Trust's enabling act, the aggregate annual contract assistance payment for the Trust's programs may not exceed $\$ 138$ million. The Commonwealth's agreement to provide contract assistance constitutes a general obligation of the Commonwealth for which its full faith and credit are pledged, and the Commonwealth's contract assistance payments are pledged as security for repayment of the Trust's debt obligations. As of November 30, 2021, the Trust had approximately $\$ 2.4$ billion of bonds outstanding. Approximately $4.39 \%$ of the Trust's aggregate debt service is covered by Commonwealth contract assistance. Prior to August 2014, the Trust was known as the Massachusetts Water Pollution Abatement Trust.

Massachusetts Development Finance Agency. Under the infrastructure investment incentive act (sections 5 to 12 of Chapter 293 of the Acts of 2006, as amended to date), known as "I-Cubed," up to $\$ 600$ million of public infrastructure improvements to support significant new private developments may be financed by bonds issued by the Massachusetts Development Finance Agency (MassDevelopment) that are secured by and payable from contract assistance from the Commonwealth. The obligation of the Commonwealth to pay contract assistance is a general obligation of the Commonwealth. Until a related new private development is completed and occupied, the developer's property is assessed by the municipality in which the development is located in amounts equal to the debt service cost on the bonds and is applied to reimburse the Commonwealth for such cost. After each phase of the
private development is completed and occupied, the municipality is required to reimburse the Commonwealth for any portion of the debt service cost on the bonds that is not covered by new state tax revenues generated from the related private development. The municipality's reimbursement obligation is secured by a general obligation pledge of the municipality, a local aid intercept and a reserve fund which must be funded in an amount equal to or greater than two years of debt service on the bonds. The obligation of the municipality ends when the Commonwealth has collected revenues sufficient to pay principal and interest payments to date, or in some cases to the next redemption date, plus all remaining principal payments due. Pursuant to this program, MassDevelopment has issued I-Cubed bonds to finance and refinance infrastructure projects associated with the Fan Pier development in Boston, the Assembly Row project in Somerville, the Chestnut Hill Square project in Newton, the Boston Landing project in Boston, the Van Ness project in Boston, the University Station project in Westwood, the North Point project in Cambridge and the Hub on Causeway project in Boston. As of November 30, 2021, total "I-Cubed" bonds were outstanding in the amount of approximately $\$ 179.8$ million.

Legislation approved by the Governor on August 8, 2008 included an authorization to finance up to $\$ 43$ million of the costs of a parkway at the former South Weymouth naval air base to support the development of the former base. Similar to the I-Cubed program financing model, the bonds issued by MassDevelopment to finance the parkway are secured by and payable from a general obligation pledge of contract assistance from the Commonwealth. As of November 30, 2021, approximately $\$ 22.0$ million of such bonds were outstanding.

Social Innovation Financing Trust Fund. Legislation approved in 2012 established a Social Innovation Financing Trust Fund for the purpose of funding contracts to improve outcomes and lower costs for contracted government services, referred to as "pay for success contracts." The legislation authorized the Secretary of Administration and Finance to enter into pay for success contracts in which a substantial portion of Commonwealth payments, from amounts appropriated by the Legislature to the Trust Fund, would be conditioned on the achievement of specified performance outcomes. The Commonwealth's obligation to make such payments is a general obligation for which the Commonwealth's full faith and credit are pledged. The first such contract was entered into in January 2014 (and amended in November 2016 and April 2020), to help young men leaving the juvenile justice system or on probation avoid re-offending. The contract obligated the Commonwealth to make up to $\$ 28$ million in success payments, in the aggregate, through fiscal 2024. The Commonwealth entered into a second such contract in December 2014, to address chronic individual homelessness through permanent stable, supportive housing. The contract obligates the Commonwealth to make up to $\$ 6$ million in success payments, in the aggregate, through fiscal 2021. The Commonwealth entered into a third such contract in June 2016, to assist individuals in Adult Basic Education (ABE) or English for Speakers of Other Languages (ESOL) programs transition to employment, higher wage jobs, and higher education. The contract obligates the Commonwealth to make up to $\$ 15$ million in success payments, in the aggregate, through fiscal 2023. The Commonwealth entered into a fourth such contract in July 2018 (and amended in October 2021) to support unemployed or underemployed veterans with posttraumatic stress disorder in attaining competitive and compatible employment. The contract obligates the Commonwealth to make up to $\$ 3.0$ million in success payments, in the aggregate, through fiscal 2023.

## [Remainder of this page intentionally left blank.]

The following table sets forth the Commonwealth's general obligation contract assistance requirements for all of fiscal 2022 and each fiscal year thereafter pursuant to contracts with the Massachusetts Clean Water Trust, MassDOT (as successor to the Turnpike Authority), and MassDevelopment (including the I-Cubed Program and the South Weymouth naval air base contract assistance requirements) and contracts associated with the Social Innovation Financing Trust Fund.

## General Obligation Contract Assistance Requirements (in thousands)

| Fiscal Year | Massachusetts Clean Water Trust | Massachusetts <br> Department of Transportation | Massachusetts <br> Development <br> Finance Agency | Social Innovation Financing Trust Fund (3) | Total |

(1) Current contract assistance payments end in fiscal year 2051.
(2) Represents $\$ 125$ million per year for fiscal years 2027 to 2039 , inclusive, and $\$ 25$ million per year for fiscal years 2040 to 2050 , inclusive.
(3) Projected payment schedule. The actual amount and timing of payments will be based on the achievement of specified performance outcomes. These projected payments may differ from annual appropriated amounts due to the availability of unexpended funds remaining in the Social Innovation Financing Trust Fund from prior years.
(4) Aggregate of fiscal years 2027 to 2049.
(5) Totals may not add due to rounding.

## Long-Term Operating Leases and Capital Leases

In addition to Commonwealth-owned buildings and facilities, the Commonwealth leases additional space from private parties. In certain circumstances, the Commonwealth has acquired certain types of capital assets under long-term capital leases; typically, these arrangements relate to computer and telecommunications equipment and to motor vehicles. Minimum future rental expenditure commitments of the Commonwealth under operating leases and long-term principal and interest obligations related to leases in effect as of June 30, 2020 are set forth in the table below.

Long-Term Leases (in thousands)

| Fiscal Year | Leases (1) |
| :---: | ---: |
|  | $\$ 233,301$ |
| 2022 | 170,404 |
| 2023 | 153,903 |
| 2024 | 135,385 |
| 2025 | 109,692 |
| 2026 | 78,894 |

| Total | $\underline{\mathbf{1 1 , 2 6 1 , 3 8 0}}$ |

[^8]
## Contingent Liabilities

Massachusetts Bay Transportation Authority. The MBTA issues its own bonds and notes. Prior to July 1, 2000, the Commonwealth supported MBTA bonds, notes and other obligations through guaranties of the debt service on its bonds and notes, contract assistance generally equal to $90 \%$ of the debt service on outstanding MBTA bonds and payment of the MBTA's net cost of service (current expenses, including debt service, minus current income). Beginning July 1, 2000, the Commonwealth's annual obligation to support the MBTA for operating costs and debt service is limited to a portion of the revenues raised by the Commonwealth's sales tax, but the Commonwealth remains contingently liable for the payment of MBTA bonds and notes issued prior to July 1, 2000 and for MBTA payment obligations related to leases, reimbursement obligations, interest exchange agreements and other financing obligations entered into prior to July 1, 2000. The Commonwealth's obligation to pay such prior bonds is a general obligation for which its full faith and credit have been pledged. As of November 30, 2021, the MBTA had approximately $\$ 121.2$ million of such prior bonds outstanding. Such bonds are currently scheduled to mature annually through fiscal 2030.

Massachusetts Development Finance Agency. Under legislation approved in 2010 and amended in 2011, MassDevelopment is authorized to issue bonds for the benefit of nonprofit community hospitals and nonprofit community health centers. Such bonds are to be secured by capital reserve funds funded at the time of bond issuance in an amount equal to the maximum annual debt service on the bonds. The legislation provides that MassDevelopment is to notify the Governor if any such capital reserve fund needs to be replenished, and that the Legislature is to appropriate the amount necessary to restore the fund to its required level. The legislation contains no limit on the amount of such bonds that may be issued. Any project to be financed by such bonds must be approved by the Secretary of Health and Human Services, and any loan to a community hospital or community health center (and the issuance and terms of the related bonds) must be approved by the Secretary of Administration and Finance. If any such institution defaults on a loan, any moneys in the custody of the Commonwealth that are payable to the institution may be withheld by the Commonwealth and used to pay debt service or to replenish the applicable capital reserve fund. If, following a Commonwealth transfer to replenish a capital reserve fund, the applicable institution fails to reimburse the Commonwealth within six months, the Commonwealth may withhold funds payable to the institution, and all contracts issued by the Group Insurance Commission, the Commonwealth Health Insurance Connector Authority and MassHealth to a third party for the purposes of providing health care insurance paid for by the Commonwealth are to provide that the third party is to withhold payments to the institution
and transfer the withheld amounts to the Commonwealth. No bonds have ever been issued pursuant to this legislation.

Woods Hole, Martha's Vineyard and Nantucket Steamship Authority. The Steamship Authority operates passenger and vehicle ferries to Martha's Vineyard and Nantucket. The Steamship Authority issues its own bonds and notes. Commonwealth support of the bonds and notes of the Steamship Authority includes a Commonwealth guaranty pursuant to statutory provisions requiring the Commonwealth to provide the Steamship Authority with funds sufficient to meet the principal of and interest on their bonds and notes as they mature to the extent that funds sufficient for this purpose are not otherwise available to the Steamship Authority and the Commonwealth's payment, under applicable statutory provisions, of the net cost of service of the Steamship Authority. The Steamship Authority is currently self-supporting, requiring no net cost of service or contract assistance payments. As of November 30, 2021, the Steamship Authority had approximately $\$ 73.2$ million of bonds outstanding. The Commonwealth's obligations to the Steamship Authority are general obligations for which its full faith and credit have been pledged.

Regional Transit Authorities. The Commonwealth has fifteen (15) Regional Transit Authorities (RTAs) that provide fixed route and paratransit service in communities across the state. The RTAs were established by legislation, and are funded by rider fares, advertising, assessments to the local governments served by an RTA, federal grants and state assistance. A RTA may issue revenue anticipation notes to be repaid from Federal Transit Administration operating subsidies, net cost of service payments from the Commonwealth, which are included in the Commonwealth's annual budget, and local government assessments. Commonwealth support of the revenue anticipation notes of an RTA includes a Commonwealth guaranty pursuant to statutory provisions requiring the Commonwealth to provide an RTA with funds sufficient to meet the principal of and interest on its notes as they mature to the extent that funds sufficient for this purpose are not otherwise available to such RTA and the Commonwealth's payment, under applicable statutory provisions, of the net cost of service of RTA (current expenses, including debt service, minus current income). The Commonwealth assesses each of the cities and towns within the applicable RTA service area for a portion of the net cost of service. The Commonwealth Transportation Fund has an annual required $\$ 15$ million transfer to the RTAs for operations, and in fiscal 2022, the Commonwealth's budget includes a $\$ 94.0$ million transfer to the RTAs. The Commonwealth is also obligated to pay principal and interest on any revenue anticipation notes issued by an RTA which is not paid when due.

University of Massachusetts Building Authority. This authority, created to assist the University of Massachusetts, is permitted by its enabling act to have outstanding up to $\$ 200$ million in Commonwealth-guaranteed debt. The Commonwealth's guaranty of principal and interest is a general obligation of the Commonwealth for which its full faith and credit are pledged. In addition to such guaranty, certain revenues of the Building Authority, including dormitory rental income and student fees, are pledged to pay the Building Authority's bonds. As of November 30, 2021, the Building Authority has no Commonwealth-guaranteed debt outstanding.
[Remainder of this page intentionally left blank.]

## Authorized and Unissued Debt

General obligation bonds of the Commonwealth are authorized to correspond with capital appropriations. See "Commonwealth Budget and Financial Management Controls - Capital Investment Process and Controls." Over the last decade, the Commonwealth has typically had a large amount of authorized and unissued debt. However, the Commonwealth's actual expenditures for capital projects in a given year relate more to the capital needs which the Commonwealth determines it can afford to finance in such year than to the total amount of authorized and unissued debt. The table below presents authorized and unissued debt at year end:

## Authorized and Unissued Debt (in thousands)

| Fiscal Year | 2017 |
| :---: | :---: |
| 2018 | Authorized and <br> Unissued Debt |
| 2019 | $\$ 22,716,302$ |
| $20,860,482$ |  |
| 2020 | $28,417,839$ |
| 2021 | $26,397,710$ |
| SOURCE: Office of the Comptroller | $38,964,565$ |

SOURCE: Office of the Comptroller.

Authorized and unissued debt is measured in accordance with the statutory basis of accounting, which is different from GAAP. Only the net proceeds of bonds issued (exclusive of underwriters' discount, costs of issuance and other financing costs) are deducted from the amount of authorized and unissued debt. Therefore, the change in authorized and unissued debt at the end of any fiscal year is not intended to correlate to the change in the principal amount of debt outstanding as measured and reported in conformity with GAAP.

The Legislature has enacted various bond authorizations to fund the Commonwealth's capital investment plan. See "Commonwealth Capital Investment Plan." Capital spending and subsequent debt issuance is constrained by the debt affordability policy and the statutory debt limit, and will be published annually in the fiveyear capital investment plan.

## LEGAL MATTERS

There are pending in state and federal courts within the Commonwealth and in the Supreme Court of the United States various suits in which the Commonwealth is a party. In the opinion of the Attorney General, no litigation is pending or, to her knowledge, threatened which is likely to result, either individually or in the aggregate, in final judgments against the Commonwealth that would affect materially its financial condition.

## Programs and Services

From time to time actions are brought against the Commonwealth by the recipients of governmental services, particularly recipients of human services benefits, seeking expanded levels of services and benefits and by the providers of such services challenging the Commonwealth's reimbursement rates and methodologies. To the extent that such actions result in judgments requiring the Commonwealth to provide expanded services or benefits or pay increased rates, additional operating and capital expenditures might be needed to implement such judgments.

Chanice Lee, also on behalf of similarly situated individuals v. Commissioner of the Department of Early Education and Care, et al., Suffolk Superior Court. On December 9, 2019, the Department of Early Education and Care (EEC) received notice of a putative class action lawsuit challenging the denial to plaintiff of an income-eligible child care subsidy because plaintiff owed co-payment fees to a previous child care provider. Plaintiff claims that the fee scale devised by EEC, upon which her co-payments were based, and the disqualification from receipt of the subsidy are unlawful under state and federal law governing childcare subsidies. Plaintiff seeks: (i) certification as a class action; (ii) a declaration that EEC's fee scale is unlawful, in part because it was not promulgated as a regulation, as required by law; (iii) a declaration that EEC may not deny income-eligible subsidies to families based on outstanding fees; and (iv) an order requiring EEC to promulgate a new fee scale after public notice and comment.

EEC is under a federal mandate from the Child Care Development Block Grant (CCDBG) Act of 2014 to ensure that parent fee copayments for childcare services are affordable. EEC was deemed compliant with CCDBG by the federal office of Administration of Children and Families (ACF) through approval of the EEC's State Plan in 2018. CCDBG sets a benchmark, but not a requirement, of affordability for parent fees at $7 \%$ of a parent's income. EEC's current parent fee chart establishes parent fees ranging from $0 \%$ to $16 \%$ of a parent's income, with the potential for a higher percentage if multiple children in a household are enrolled.

A state statute, M.G.L. c. 15D, § 2(e), mandates a sliding fee scale and periodic revision of the rate structure in accordance with M.G.L. c. 30A regulation-promulgation procedures. In connection with promulgating revisions to its Financial Assistance regulations, EEC had established a schedule for revising its parent fee chart, which included a requirement that EEC would revise its parent fee chart within six months of promulgation of the revised Financial Assistance regulations. The regulations were promulgated by the Secretary of State on February 22, 2019, setting the six-month deadline at August 22, 2019. EEC did not revise its fee chart in time to meet that self-imposed deadline. A reduction in the percentage of gross income parents are required to pay in fees could shift to EEC a considerable portion of the childcare costs that parents currently are required to pay. In fiscal 2019, statewide parent fees totaled approximately $\$ 71.8$ million. If parent co-pays were capped at $7 \%$ of gross income, the CCDBG benchmark, the net cost to EEC could range from $\$ 22$ to $\$ 32$ million annually, depending on policy decisions relating to factors such as sibling discounts.

EEC filed an answer to the complaint on February 3, 2020. Plaintiff's counsel served a motion for judgment on the pleadings on defendants in early August 2020, and a motion for class certification in November 2020. EEC served oppositions to both motions. On February 4, 2021, Judge Roach of Suffolk Superior Court held a hearing on both motions and took the matter under advisement. The judge requested a proposed order from the plaintiffs, and EEC served its opposition to the Plaintiff's proposed order on March 17, 2021. On April 9, 2021, the Court allowed plaintiff's motion for class certification and certified a class of plaintiffs for this action. On September 10, 2021, the Court allowed, in part, and denied, in part, plaintiff's motion for judgment on the pleadings. The Court determined in its ruling that: (1) the EEC Fee Scale in effect prior to February 2021 for parent fees for the Income Eligible Child Care Program was unlawful; (2) EEC may not deny eligibility for the Income Eligible Child Care Program to any family member of the certified class on the basis of outstanding parent fees accrued between March 2019 and February 2021 pursuant to the Pre-2021 Fee Scale; (3) EEC may not disqualify or otherwise
sanction any family member of the certified class previously deemed eligible for the Income Eligible Child Care Program, based solely on accrued and owing parent fees assessed pursuant to the Pre-2021 Fee Scale for the period of March 2019 through February 2021; (4) plaintiff's request to order the Department to promulgate a new fee scale is moot; and (5) the February 2019 Updated Regulations are lawful, and EEC may exercise its executive discretion going forward to apply the Updated Regulations to the Income Eligible Child Care Program based on the 2021 Fee Scale.

Additionally, EEC has taken significant steps to promulgate a new fee scale. In December 2020, the Legislature granted EEC emergency authorization to immediately implement a new fee scale, provided that it initiated a public hearing process for the fee scale within 30 days of implementation. On February 8, 2021, EEC did establish a new fee scale that results in $98 \%$ of families paying a fee that is $7 \%$ or less of their income, a model that was thoroughly discussed with plaintiff's counsel during monthly meetings over the past year. Hearings on the fee scale have concluded, and the board voted to approve final establishment and implementation of the new fee scale in June 2021.

As a practical matter, EEC has been paying parent fees for all parents receiving income eligible child care subsidies since March 2020, due to the COVID-19 pandemic, and will continue to do so until at least January 31, 2021. At this time the Commonwealth cannot predict the timing, outcome or, should the plaintiff prevail, the budgetary impact of this litigation.

In the Matter of the Massachusetts Department of Elementary and Secondary Education. United States Department of Education Office of Administrative Law Judges. Under the federal Individuals with Disabilities Education Act (IDEA), a state is required to maintain a minimum amount of state financial support for special education and related services. On January 6, 2021, the United States Department of Education Office of Special Education and Rehabilitative Services (OSERS) issued a proposed final determination finding that the Massachusetts Department of Elementary and Secondary Education (DESE) failed to meet these minimum financial support requirements in fiscal years 2010 and 2011, and it also denied a waiver request of those requirements submitted by DESE. OSERS reissued the proposed final determination on January 15, 2021, making only technical formatting changes. The proposed final determination seeks a penalty against the Commonwealth by reducing the allocation of IDEA federal special education funds to the Commonwealth in the amount of $\$ 114,023,641$ ( $\$ 42,835,083$ for fiscal 2010 and $\$ 71,188,558$ for fiscal 2011).

DESE timely appealed the proposed final determination on February 11, 2021. In March 2021, DESE moved to dismiss the proposed determination as time barred under the applicable five-year statute of limitations under the General Education Provisions Act ( 20 U.S.C. $1234 \mathrm{a}(\mathrm{k})$ ), as well as the federal statute of limitations applicable to penalty proceedings ( 28 U.S.C. 2462). On March 16, 2021, DESE and OSERS jointly sought to stay the proceedings pending the outcome of DESE's motion to dismiss, which stay the administrative law judge granted. On August 2, 2021, the administrative law judge denied the motion to dismiss but continued to stay the case based on an anticipated request for an interlocutory appeal of the decision. DESE timely appealed the denial to U.S. Education Secretary Cardona on August 17, 2021. Secretary Cardona granted the petition and established a briefing schedule. DESE has filed its opening brief and reply brief. OSERS received leave to file a sur-reply brief, which is due January 3, 2022.

At this time, DESE cannot predict the timing or outcome of this process, including whether a reduction in the allocation to the Commonwealth of IDEA special education funding would be in the full amount of the penalty claimed ( $\$ 114$ million), or whether any penalty amount found to be due would be deducted in a single year or over multiple years.

## Federal Audits and Regulatory Reviews

In re: Centers for Medicare and Medicaid Services regulations (Uncompensated Care Pool/Health Safety Net Trust Fund). The federal Health Care Financing Administration (now the Centers for Medicare and Medicaid Services (CMS)) asserted in June 2000 that the portion of the Medicaid program funded by the Commonwealth's Health Safety Net Trust Fund (formerly the Uncompensated Care Pool) might violate federal regulations regarding permissible taxes on health care providers. The Commonwealth believes that the Commonwealth's assessment on
acute care hospitals and surcharge payers, respectively, which fund the Uncompensated Care Pool and its successor, the Health Safety Net Trust Fund, are within the federal law pertaining to health care-related taxes, but nevertheless sought federal waivers for the assessments as instructed by CMS. In 2017, a change in state law was made to the hospital assessment making a federal waiver for the hospital assessment unnecessary. Under federal regulations, if the Commonwealth were ultimately determined to have imposed an impermissible health care-related tax, the federal government could seek retroactive repayment of federal Medicaid reimbursements. The Commonwealth collected an estimated $\$ 6.234$ billion in acute hospital assessments between 1990 and the end of Health Safety Net fiscal year 2017 and will have collected an estimated $\$ 3.695$ billion in surcharge payments between 1998 and the end of Health Safety Net fiscal year 2022.

In re: Centers for Medicare and Medicaid Services: Disallowance Number MA/2018/001/MAP (1115(a) Demonstration Claiming Authority for Primary Care Payment Reform Initiative). On November 20, 2018, CMS issued to the Commonwealth a notice of disallowance in the amount of $\$ 70.9$ million in federal financial participation (FFP) for expenditures between March 31, 2014 and December 31, 2016 related to MassHealth's Primary Care Payment Reform Initiative (PCPRI). PCPRI was a payment model that bundled services payments to discourage billing based on fee for services, rewarded providers for achieving quality goals by providing certain quality incentive payments, and rewarded providers by sharing savings and losses with them. In its disallowance letter, CMS asserts that EOHHS lacked explicit authority under its 1115 Demonstration Project to make payments that deviated from those that were described (or could be approved) under the Medicaid State Plan because PCPRI was not mentioned by name in the 1115 Demonstration Project, because there was no specific expenditure authority to support these payments, and because CMS never approved the PCPRI addendum to the Primary Care Clinician (PCC) Plan contract. EOHHS maintains that it has authority under the 1115 Demonstration Project to make enhanced primary care clinician payments consistent with the PCPRI program and that no additional authority was necessary to make the payments. MassHealth contends that it sent CMS the PCPRI addendum to the PCC Plan contract in March 2014, but that CMS failed to act on it, either by approving or denying the addendum. EOHHS responded to the disallowance letter by requesting reconsideration, which CMS denied on March 15, 2019. EOHHS submitted a Notice of Appeal to the federal Health and Human Services Departmental Appeals Board ("DAB") on May 13, 2019. Briefing is now complete, and oral argument occurred on October 15, 2020. At oral arguments, the DAB asked whether CMS would consider waiving the two-year-claiming rule if the state were to now submit the fee-for-service claims for primary care services rendered through the PCPR program. On July 30, 2021, CMS filed a Case Statement apprising the DAB that CMS is not willing to consider reviewing disallowed claims because CMS believes it is unable to waive the timely filing requirement unless the state meets an exception to the rule, and CMS does not believe the state meets any such exception. EOHHS responded that, in light of CMS' decision to issue the disallowance more than two years after the claims accrued, CMS' unwillingness to consider reviewing the disallowed claims for the services provided under PCPR based on the timely filing requirement is arbitrary, capricious, and an abuse of discretion. A decision from DAB is currently pending. Decisions by the DAB regarding Medicaid disputes between CMS and states regarding FFP are the final decision of Health and Human Services. A final negative decision would be appealable to the federal district court.

In the Matter of the Massachusetts Department of Elementary and Secondary Education. United States Department of Education Office of Administrative Law Judges. Under the federal Individuals with Disabilities Education Act (IDEA), a state is required to maintain a minimum amount of state financial support for special education and related services. On January 6, 2021, the United States Department of Education Office of Special Education and Rehabilitative Services (OSERS) issued a proposed final determination finding that the Massachusetts Department of Elementary and Secondary Education (DESE) failed to meet these minimum financial support requirements in fiscal years 2010 and 2011, and it also denied a waiver request of those requirements submitted by DESE. OSERS reissued the proposed final determination on January 15, 2021, making only technical formatting changes. The proposed final determination seeks a penalty against the Commonwealth by reducing the allocation of IDEA federal special education funds to the Commonwealth in the amount of $\$ 114,023,641$ (\$42,835,083 for fiscal 2010 and $\$ 71,188,558$ for fiscal 2011).

DESE timely appealed the proposed final determination on February 11, 2021. In March 2021, DESE moved to dismiss the proposed determination as time barred under the applicable five-year statute of limitations under the General Education Provisions Act ( 20 U.S.C. $1234 \mathrm{a}(\mathrm{k})$ ), as well as the federal statute of limitations applicable to penalty proceedings ( 28 U.S.C. 2462). On March 16, 2021, DESE and OSERS jointly sought to stay the proceedings pending the outcome of DESE's motion to dismiss, which stay the administrative law judge
granted. On August 2, 2021, the administrative law judge denied the motion to dismiss but continued to stay the case based on an anticipated request for an interlocutory appeal of the decision. DESE intends to seek said interlocutory appeal and will do so before the August 17, 2021 deadline. At this time, the Commonwealth cannot predict the timing or outcome of this proceeding. If OSERS prevails on its claims, the Commonwealth could lose $\$ 114,023,641$ in federal special education funding.

## Taxes

Brownfields Tax Credits Claims. A brownfields tax credit for environmental response actions was established under the provisions of General Laws chapter $62, \S 6(\mathrm{j})$ and chapter $63, \S 38 \mathrm{Q}$. Under the statutes, a business corporation, individual taxpayer, or non-profit organization which remediates certain contaminated properties may be eligible for a credit for costs incurred in the remediation of such property. The Department of Revenue carefully examines facts on applications from various taxpayers for brownfields tax credits in amounts that often exceed $\$ 1$ million. With respect to claims filed with the Department of Revenue but not yet docketed at the Appellate Tax Board, currently the Department estimates a total of $\$ 113$ million worth of potential revenue loss, with four of the individual credit amount claims exceeding $\$ 10$ million each.

Film Credits Claims. Under the provisions of General Laws chapter 62, § 6(1), chapter 63, § 38X, and chapter $64 \mathrm{H}, \S 6(\mathrm{ww})$, personal income tax and corporate excise tax credits and sales tax exemptions are available to qualifying taxpayers in the motion picture industry (commonly referred to as Film Credits). The Department of Revenue carefully examines and sometimes declines preliminary approval of applications from various taxpayers for Film Credits, against taxable income, in amounts that often exceed $\$ 1$ million. Currently the Department of Revenue estimates a total potential revenue loss of approximately $\$ 12$ million, with no individual credit amount claims exceeding \$10 million

## Other Revenues

Commonwealth of Massachusetts v. Philip Morris Inc., RJ Reynolds Tobacco Company, Lorillard Tobacco Company, et al., Supreme Judicial Court, Middlesex Superior Court (a/k/a the Tobacco Master Settlement Agreement, Nonparticipating Manufacturer (NPM) Adjustment Disputes)

These matters arise under the Tobacco Master Settlement Agreement (MSA), entered into in 1998, that settled litigation and claims by Massachusetts and 51 other states or dependencies (collectively, the States) against the major tobacco manufacturers. Under the MSA, yearly payments made by the Original Participating Manufacturers (OPMs) and Subsequent Participating Manufacturers (collectively, the Participating Manufacturers or PMs) are subject to a number of adjustments. One such adjustment is the Non-Participating Manufacturer (NPM) Adjustment, which can be triggered if the PMs suffer a specified market share loss as compared to their market share during the base year 1997. Under the MSA, a nationally recognized economic firm selected jointly by the States and the PMs must make a determination that "the disadvantages experienced" by the PMs as a result of complying with the MSA were "a significant factor contributing to the Market Share Loss" for a given year. Even if such a determination is made, the States can still avoid the NPM Adjustment if it is determined that the States "diligently enforced" their individual NPM Escrow Statutes.

The PMs seek to reduce, by the approximate amount set forth in the chart below, the MSA payments they made to the States for sales in the respective years listed below. A determination has been made that the PMs suffered a market share loss in each of these years and that the disadvantages experienced by the PMs as a result of complying with the MSA were a significant factor contributing to such market share loss. The PMs notified the States of their intent to arbitrate the issue of whether each State diligently enforced its NPM Escrow Statute in each of the NPM Adjustment Years from 2005 through 2008, inclusive, following the conclusion of the 2003 NPM Adjustment Arbitration proceedings. The PMs have not yet notified the States of their intent to arbitrate the issue of whether each State diligently enforced its NPM Escrow Statute in each of the NPM Adjustment Years from 2009 through 2018. If the Commonwealth does not prevail, future MSA payments to Massachusetts would be reduced by an amount to be determined, which amounts would be, for the applicable NPM Adjustment Year, between the Minimum Potential Commonwealth Reduction set forth below, plus interest, up to but not exceeding the full amount of the Commonwealth's MSA payment for sales in the applicable year, depending upon the outcome of similar NPM proceedings against other States.

| NPM Adjustment Year | Payment Reduction Sought <br> for all States | Minimum Potential <br> Commonwealth Reduction |
| :---: | :---: | :---: |
| 2005 | $\$ 753,000,000$ | $\$ 30,000,000$ |
| 2006 | $704,000,000$ | $7,000,000$ |
| 2007 | $791,000,000$ | $8,800,000$ |
| 2008 | $888,000,000$ | 900,000 |
| 2009 | $859,000,000$ | $1,300,000$ |
| 2010 | $873,000,000$ | 500,000 |
| 2011 | $728,000,000$ | 500,000 |
| 2012 | $797,000,000$ | 300,000 |
| 2013 | $823,000,000$ | $300,000(5)$ |
| 2014 | $838,000,000$ | $300,000(5)$ |
| 2015 | $935,000,000$ | $300,000(5)$ |
| 2016 | $893,000,000$ | $300,000(5)$ |
| 2017 | $913,000,000(1)$ | $300,000(5)$ |
| 2018 | $1,000,000,000(2)$ | $300,000(5)$ |
| 2019 | $1,200,000,000(3)$ | $300,000(5)$ |
| 2020 | $1,500,000,000(4)$ | $300,000(5)$ |

(1) Subject to revision until a final calculation in March 2022.
(2) Subject to revision until a final calculation in March 2023.
(3) Subject to revision until a final calculation in March 2024.
(4) Subject to revision until a final calculation in March 2025.
(5) Since 2013, the Commonwealth's minimum potential reduction has been set as a constant $\$ 300,000$ for reporting purposes as it is now impossible to predict, calculate, or even approximate potential reductions due to a variety of factors, including a number of settlements with varying structures in multiple states. In addition to not knowing how many States in a given NPM year may be found to be "non-diligent," it is also unclear how an arbitration panel would calculate a non-diligent State's share of the NPM Adjustment. Therefore, the $\$ 300,000$ amount is used to represent, at least conceptually, the minimal potential reduction the Commonwealth may incur if it is found to be non-diligent in a given NPM year.

## Environment

In re Massachusetts Military Reservation (pre-litigation). The Commonwealth, through the Executive Office of Energy and Environmental Affairs, the Department of Environmental Protection and the Attorney General's office, were engaged in discussions with federal Natural Resource Trustees, including the United States Army and Air Force, the Department of the Interior and the National Oceanic and Atmospheric Administration, and private contractors regarding natural resource damages at the Massachusetts Military Reservation on Cape Cod. Federal Trustees and private contractors claim that the Commonwealth and others are liable for natural resource damages due to widespread contamination primarily from past military activities at the Reservation and are responsible for response actions and related clean-up activities. The assessment process for natural resource damages is set out in federal regulations and has not been completed. While no recent comprehensive estimate of natural resource damages and response actions is available, it is expected that the damages and response actions may cost at least tens of millions of dollars. In 2013, the state and federal trustees reopened preliminary discussions per a Trustee Council resolution on a potential settlement framework.

## Other

Drug Testing Laboratory Disputes. In 2012 and 2013, charges were brought against two chemists, working in two separate Commonwealth drug testing laboratories in Boston and Amherst, alleging malfeasance by such chemists in the handling and testing of laboratory samples and/or the adulteration or theft of seized drugs used as evidence in criminal cases. Both chemists were subsequently convicted. Following judicial review, more than 21,000 criminal cases potentially affected by altered drug evidence from the Boston laboratory were vacated or dismissed, with only a few hundred potentially affected criminal cases remaining open for re-prosecution. Pursuant to a court order, indigent defendants in the cases that remain who wish to pursue vacatur or a new trial will be assigned counsel, at state expense. Additionally, in actions relating to the Amherst laboratory, a court found that, in addition to the chemist's malfeasance, two former prosecutors "tampered with the fair administration of justice" and perpetrated "a fraud upon the court" by deliberately concealing documents relevant to the chemist's actions, with
implications for thousands of drug tests conducted by the Amherst laboratory. Notwithstanding the court's finding that, with the exception of the identified chemist's work, the Amherst laboratory was "free from any deficiency in analytical procedure, was kept in an orderly fashion, and that work flowed through the lab smoothly," the Supreme Judicial Court ordered, in relevant part, that all convictions based on evidence tested at the Amherst laboratory on or after January 1, 2009 and through January 18, 2013, must be vacated and dismissed, regardless of the chemist who signed the drug certificate, as well as all methamphetamine convictions where the drugs were tested at the Amherst laboratory during the convicted chemist's tenure (2004-2013). See Committee for Public Counsel Services, et al.v. Attorney General of Massachusetts, et al., SJC-12471 (Oct. 11, 2018). In September 2019, a court-appointed Special Master filed a report, stating that more than 24,000 convictions in more than 16,000 cases had been dismissed due to misconduct in the Amherst laboratory. More recently, the Suffolk County District Attorney's Office has sought to vacate additional convictions tied to the Boston laboratory, announcing that it was seeking to vacate all Suffolk County drug convictions for any individual whose drug certification was done at the Boston laboratory between May 2003 and August 2012. This action potentially impacts many more defendants.

Consequently, there are a number of ongoing civil actions, in both state and federal court, relating to the rights of those criminal defendants potentially affected by the malfeasance of the two chemists and the attorney misconduct described above, and more are expected. See, e.g., Penate v. Kaczmarek et al., C.A. No. 3:17-cv-30119KAR, United States District Court for the District of Massachusetts, in which the plaintiff alleges civil rights violations under 42 U.S.C. § 1983 and seeks approximately $\$ 5.7$ million in compensatory and punitive damages, interest, costs, and attorneys' fees. In Penate, the District Court dismissed claims against three Department of Public Health (DPH) defendants and two attorneys in January 2019 but denied motions to dismiss filed by two former DPH employees and a now-inactive attorney. The now-inactive attorney's interlocutory appeal in the First Circuit Court of Appeals was rejected on June 26, 2019. One of the DPH employees, the former supervisor of the Amherst laboratory, whose motion to dismiss was denied, also filed an interlocutory appeal in the Court of Appeals. On December 13, 2019, the Court of Appeals reversed the District Court's order denying the motion to dismiss the 42 U.S.C. § 1983 claim and vacated the District Court's denial of this DPH employee's motion to dismiss the intentional infliction of emotional distress state-law claim and remanded the matter for further proceedings consistent with its ruling, and the plaintiff has since dismissed all claims against this DPH employee. The plaintiff and the remaining defendants in the Penate case cross-moved for summary judgment, and the Court heard arguments on these motions on November 23, 2021. The Court took these cross-motions under advisement. The potential claims of other criminal defendants against the Commonwealth and other officials are likely to range from: restitution for the fees and costs imposed on and incurred by the criminal defendants, including for uncompensated labor; erroneous conviction; negligence of the Commonwealth in supervising the laboratories and their employees; and potential civil rights violations under federal law.

In addition, plaintiffs have sought, and may in the future seek, compensatory as well as punitive damages, interest, costs, and attorneys' fees. In Nelson v. Colorado, 137 S. Ct. 1239 (2017), the United States Supreme Court declared that when a criminal conviction is invalidated by a reviewing court and no retrial will occur, a state is obliged to refund fees, court costs, and any restitution exacted from a defendant upon, and as a consequence of, the conviction. Based on this Supreme Court decision, a class action has been filed on behalf of the criminal defendants, whose convictions were vacated as the result of the potentially tainted drug tests in the two laboratories, seeking "refund of all Case-Related Payments, payment for all Uncompensated Labor, and return of all Forfeited Property." Foster, et al. v. Commonwealth, et al., Docket No. 1:18-cv-10354-IT (D. Mass. filed Feb. 23, 2018). In Foster, the District Court has granted several motions to stay the proceedings, most recently until December 15, 2021 to permit the parties to pursue settlement negotiations and potential resolution of plaintiffs' claims in state court. In the latest joint motion to stay the proceeding, the parties asserted that they had recently reached an agreement in principle on the most significant material terms of a potential settlement and are negotiating the remaining components of a comprehensive administrative scheme. The plaintiffs have filed a state court complaint covering the majority of the claims contained in the federal complaint, and their motion for class certification was allowed on May 13, 2020. Foster et al. v. Commonwealth, No. 1984CV03373 (Suffolk Super. Ct. filed Oct. 29, 2019). To date, the parties have agreed upon 10 categories of case-related payments considered refundable to the extent they were made upon, and as a consequence of, now-vacated laboratory-related convictions. They have not agreed, however, that forfeited property must be returned pursuant to Nelson v. Colorado.

Additionally, in two state court cases, the Supreme Judicial Court (SJC), following Nelson, ruled that the criminal defendants have due process rights to refunds of fees, fines, and restitution paid by a defendant as a
consequence of a later invalidated conviction when it is determined the case will not or cannot be retried, but ruled that the civil forfeiture judgment was not solely a consequence of the invalidated drug convictions and need not be vacated under Nelson v. Colorado. See Commonwealth v. Martinez, SJC-12479 (Oct. 30, 2018); see also Commonwealth v. Green, SJC-12480 (Oct. 30, 2018). The SJC declined to exercise its superintendence authority to craft a global remedy for the potential refund motions that could be brought under Nelson v. Colorado, deferring to the attempts by the parties in Foster to craft a global remedy and reach a settlement. The SJC did, however, caution that "[n]othing bars this court from exercising [its] superintendence authority before that date [the Foster case global settlement is reached] if deemed necessary to preserve the fair administration of justice." In Commonwealth $v$. Jermaine K. Watt, No. SJC-12689 (Aug. 20, 2019), the defendant's criminal conviction was vacated as a result of the Amherst chemist's misconduct, and the defendant was seeking the return of monthly inmate account administration and maintenance fees, among other fees. The Superior Court denied the defendant's motion for fees and he appealed. The SJC overturned the Superior Court's decision with respect to a drug analysis fee but upheld the decision for all other fees the defendant was seeking as those fees were not being charged as a direct result of his vacated case.

There are tens of thousands of criminal cases potentially affected by misconduct at the two laboratories. In the Foster case, plaintiffs claim a class of approximately 40,000 individuals whose convictions were vacated and cases dismissed with prejudice. Given this, there likely will be continuing significant, but as yet undetermined, costs to the Commonwealth in remedying the alleged malfeasance, including vendor costs for information gathering and administration of exaction refunds; costs to investigate and defend the civil complaints alleging state liability in both state and federal courts, as described above; and the costs of settlements and judgments arising from the potential civil actions described above. The District Attorneys for both Middlesex and Suffolk Counties have separately filed motions asking that the SJC consider whether the remedies in response to the overall conduct and operation of the Boston and Amherst drug labs are sufficient, or whether convictions based on the drug analyses performed by all the chemists, in addition to the two identified chemists, should also be set aside. The motion of the Middlesex County District Attorney was denied without prejudice as premature. See Commonwealth v. Ricky Simmons, No. SJC13114 (July 28, 2021). The motion of the Suffolk County District Attorney asked the Superior Court to report certain questions to the SJC. See Commonwealth v. Justino Escobar, 479 Mass. 1010, 94 N.E.3d 844 (2018). After the Superior Court denied the motion on October 6, 2021, the criminal defendant filed a notice of appeal and a petition for direct appellate review, which are pending. See Commonwealth v. Justino Escobar, No. 2021-P-0920; Commonwealth v. Justino Escobar, DAR-28550. Were the SJC to grant the relief sought in these motions and petitions, the number of affected defendants would be significantly increased. Based on the court decisions to date and depending on the outcomes of the additional cases filed to date and cases that may be filed in the future, the Commonwealth could be required to budget for millions of dollars' worth of refundable exactions, settlements, and administrative expenses.

Sniadach vs. Walsh, et al., No. 3:20-cv-30115 (D. Mass July 17, 2020). On July 17, 2020, a class action lawsuit was filed in Massachusetts District Court, Springfield, under the Fourteenth Amendment to the United States Constitution and 42 U.S.C. § 1983 (Section 1983). The suit seeks class certification and alleges civil rights violations by five former state employees, named in their individual capacity, related to the COVID-19 outbreak at the Holyoke Soldiers' Home in March 2020. The plaintiffs seek damages for residents or their estates who contracted COVID-19 at the Soldiers' Home during a three month period starting in March 2020. On September 20, 2021, the suit was amended to add sixteen named plaintiffs (primarily filing on behalf of estates), as well as adding a sixth defendant, also in such person's individual capacity. The class has not yet been certified.

The Commonwealth has agreed to indemnify all defendants for defensive legal fees and costs, and has agreed to fully indemnify four of the six defendants for settlements and judgments, pursuant to G.L. c. $258, \S 9$, which allows for indemnification up to $\$ 1$ million per claimant. Plaintiffs recently presented a settlement demand of $\$ 76$ million.

There are significant defenses to this lawsuit, including qualified immunity for certain defendants, and immunity under the federal Public Readiness and Emergency Preparedness Act and similar state immunity under An Act to Provide Liability Protections for Health Care Workers and Facilities During the Covid-19 pandemic. Responsive pleadings are due January 31, 2022; none have been filed to date.

## CONTINUING DISCLOSURE

The Commonwealth prepares its Statutory Basis Financial Report and its Annual Comprehensive Financial Report with respect to each fiscal year ending June 30. The Statutory Basis Financial Report usually becomes available on or around October 31 of the following fiscal year and the Annual Comprehensive Financial Report becomes available in January of the following fiscal year. Copies of such reports and other financial reports of the Comptroller referenced in this document may be obtained by requesting the same in writing from the Office of the Comptroller, One Ashburton Place, $9^{\text {th }}$ Floor, Boston, Massachusetts 02108. The financial statements are also available at the Comptroller's web site located at http://www.macomptroller.org by clicking on "Financial Reports" on the Comptroller's homepage.

The Department of the State Auditor audits all agencies, departments and authorities of the Commonwealth at least every three years. Copies of audit reports may be obtained from the State Auditor, State House, Room 229, Boston, Massachusetts 02133.

On behalf of the Commonwealth, the State Treasurer will provide to the MSRB, through EMMA, no later than 270 days after the end of each fiscal year of the Commonwealth, certain financial information and operating data relating to such fiscal year, as provided in Rule 15c2-12, as amended, adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, together with audited financial statements of the Commonwealth for such fiscal year. Except as noted below, the Commonwealth has not failed in the last five years to comply with its continuing disclosure undertakings with respect to any of its debt.

The Commonwealth failed to file an event notice in December 2017 when the insurer on certain insured special obligation bonds payable from the Convention Center Fund asked that the ratings on such bonds be withdrawn. The Commonwealth has filed a notice of such rating change with respect to the bonds that are currently outstanding.

Certain annual financial information and audited financial statements of the Commonwealth were not properly linked to certain Commonwealth contract assistance bonds and certain CTF Bonds. Corrective filings have since been posted to EMMA.

In the course of substituting liquidity facilities in connection with certain Commonwealth general obligation variable rate demand bonds, supplements to the respective official statements for such bonds were posted in a timely manner to EMMA setting forth detailed information regarding the substituted liquidity facilities; however, separate event notices were not posted at the time. Event notices of the liquidity substitutions have since been posted.

In the course of reviewing its event notice filings, the Commonwealth discovered that bond call notices were not posted in a timely manner to EMMA in connection with certain advance refunding transactions. The Commonwealth has posted such notices with respect to all Commonwealth bonds that have been advance refunded, where the funds to redeem or pay the bonds remain held in escrow.

The State Treasurer also regularly files information with EMMA beyond the documents required by the Commonwealth's continuing disclosure undertakings, including updated Information Statements. In addition, information of interest to investors may be posted on the Commonwealth's investor website at www.massbondholder.com, on twitter at twitter.com/BuyMassBonds and on the Commonwealth's "Mass. Investor Disclosure" mobile app.

## MISCELLANEOUS

Any provisions of the constitution of the Commonwealth, of general and special laws and of other documents set forth or referred to in this Information Statement are only summarized, and such summaries do not purport to be complete statements of any of such provisions. Only the actual text of such provisions can be relied upon for completeness and accuracy.

This Information Statement contains certain forward-looking statements that are subject to a variety of risks and uncertainties that could cause actual results to differ from the projected results, including without limitation general economic and business conditions, conditions in the financial markets, the financial condition of the Commonwealth and various state agencies and authorities, receipt of federal grants, changes in federal programs that could increase or transfer financial or other obligations to the Commonwealth, litigation, arbitration, force majeure events and various other factors that are beyond the control of the Commonwealth and its various agencies and authorities. Because of the inability to predict all factors that may affect future decisions, actions, events or financial circumstances, what actually happens may be different from what is set forth in such forward-looking statements. Forward-looking statements are indicated by use of such words as "may," "will," "should," "intends," "expects," "believes," "anticipates," "estimates," "forecasts," "projects," "assumes" and other analogous expression.

All estimates and assumptions in this Information Statement have been made on the best information available and are believed to be reliable, but no representations whatsoever are made that such estimates and assumptions are correct. So far as any statements in this Information Statement involve any matters of opinion, whether or not expressly so stated, they are intended merely as such and not as representations of fact. The various tables may not add due to rounding of figures.

Neither the Commonwealth's independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to the prospective financial information contained herein, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, the prospective financial information.

The information, estimates and assumptions and expressions of opinion in this Information Statement are subject to change without notice. Neither the delivery of this Information Statement nor any sale made pursuant to any official statement of which this Information Statement is a part shall, under any circumstances, create any implication that there has been no change in the affairs of the Commonwealth or its agencies, authorities or political subdivisions since the date of this Information Statement, except as expressly stated.

References to web site addresses in this Information Statement are for informational purposes only and may be in the form of a hyperlink for convenience. Unless otherwise specified, such web sites and the information or links contained therein are not incorporated into, and are not part of, this Information Statement.

## EXHIBIT A

STATEMENT OF ECONOMIC INFORMATION AS OF JANUARY 4, 2022
[THIS PAGE INTENTIONALLY LEFT BLANK]

## Socioeconomic Indicators

January 2022

## Prepared by the UMass Donahue Institute's Economic \& Public Policy Research Group

This report was prepared by the UMass Donahue Institute and the information in text, tables, charts and graphs are the most recently available information as of January 4, 2022.

Established in 1971, the UMass Donahue Institute is a public service, research, and economic development arm of the University of Massachusetts. Our mission is to apply theory and innovation to solve real world challenges and enable our clients to achieve their goals and aspirations. We serve clients in the public, non-profit, and private sectors in the Commonwealth and throughout the nation and the world. For more information, www.donahue.umass.edu.

The Institute's Economic \& Public Policy Research (EPPR) group is a leading provider of applied research, helping clients make more informed decisions about strategic economic and public policy issues.

EPPR produces in-depth economic impact and industry studies that help clients build credibility, gain visibility, educate constituents, and plan economic development initiatives. EPPR is known for providing unbiased economic analysis on state-level economic policy issues in Massachusetts and beyond, and has completed a number of industry studies on IT, defense industries, telecommunications, health care, and transportation. Their trademark publication is called MassBenchmarks, an economic journal that presents timely information concerning the performance of and prospects for the Massachusetts economy, including economic analyses of key industries that make up the economic base of the state.

## Economy

Over the past decade, Massachusetts has been a leader in job growth in the Northeast (Figure 1), driven largely by the state's highly-educated workforce, the overall diversity of industries, and strengths in knowledge-based industries, such as health care, education, and professional services (Figure 2). Professional services and technical services have been increasingly important in the state, both as a share of employment and in terms of its contribution to state GDP. In terms of employment, professional services and technical services is fourth in the state and makes up 9.6 percent of jobs; the sector is second in the state as a share of GDP, making up 13.5 percent of the state GDP. While the sector includes everything from legal services to veterinary services, in Massachusetts the two leading subsectors in terms of employees are computer systems design and related services, and scientific research and development services. These subsectors benefit from the Commonwealth's well-established higher education and health care sectors.

Massachusetts continues to experience a decline in manufacturing employment and the Commonwealth's share of manufacturing employment is lower than in the United States as a whole. Since 1990, the earliest year for which NAICS data are available, manufacturing in Massachusetts went from 16.1 percent of the nonfarm payroll to 6.8 percent in 2020 . The rate of decline has slowed considerably.

Several NAICS service sectors, education and health services, professional services, and leisure and hospitality have grown to take the place of manufacturing in driving the Massachusetts economy and now account for almost half of total payroll employment, while financial activities, government, information, and trade, transportation and utilities have remained relatively level or declined in share (Figure 3).

[^9]Figure 3: Annual Average Employment in Massachusetts, 2010-2020 by NAICS Supersectors

Source: U.S. Bureau of Labor Statistics, Current Employment Statistics (CES). *Includes Mining \& Natural Resources, Construction, Information, and Other Services.

The COVID-19 pandemic interrupted the trajectory of the state's economic growth and has had tremendous short- and long-term ramifications for the state's economy. Over 690,000 jobs were lost in Spring 2020. The pandemic recovery continues, but as of November 2021, the state still has over 170,000 fewer jobs than the peak in February 2020 (Figure 4). Leisure and hospitality services is the slowest sector to recover both in terms of absolute number of jobs lost and as a share jobs lost compared to levels prior to the pandemic (Figure 4). Leisure and hospitality jobs are now recovering fastest, but the disproportionate losses mean that the sector's recovery continues to lag behind others'. The size of the labor force, which includes those who are unemployed and employed, has also begun to rebound, but is still below pre-pandemic levels: with a labor force of 3.74 million in November 2021, there were 6,800 fewer people in the labor force than there were in February 2020.

Figure 4: Jobs deficit in Massachusetts relative to February 2020 peak

Source: Massachusetts Executive Office of Labor and Workforce Development, Current Employment Statistics (CES790); UMDI analysis

Over the course of 2021, the state has demonstrated continued economic recovery. That said, the pace of economic growth has slowed recently after robust gains in the first half of the year. According to MassBenchmarks, the journal of the Massachusetts economy produced by the University of Massachusetts Donahue Institute (UMDI) and Federal Reserve Bank of Boston, real gross domestic product (GDP) increased at a 2.0 percent annualized rate in Massachusetts during the third quarter of 2021. This is similar to the U.S., which also grew at a 2.0 percent rate, according to the U.S. Bureau of Economic Analysis (BEA). Comparatively, Massachusetts real gross domestic product grew at annualized rates of 6.1 percent in the first quarter and 8.0 percent in the second quarter, while U.S. real gross domestic product grew at annualized rates of 6.3 percent and in the first quarter and 6.7 percent in the second quarter (Figure 5).

[^10]Figure 5: Growth in Real Product, Massachusetts and the United States

Source: U.S. Bureau of Economic Analysis, MassBenchmarks calculations by Dr. Alan Clayton-Matthews

The slowdown in the pace of growth from the second to third quarter of 2021 is the result of the Delta variant of COVID-19 restraining the pace of reopening, associated ongoing supply chain disruptions and labor shortages, and less exuberant consumer spending on goods, especially durable goods such as automobiles and home appliances. Much of the growth that did occur was driven by increased consumer spending and associated job growth in the leisure and hospitality, as well as other services sectors. Inflation diminished the impact of this consumer spending on real output and by extension real GDP growth.

Despite the slowdown in economic activity, payroll employment in the third quarter of 2021 expanded at a faster pace than in the second quarter. The number of jobs in Massachusetts grew at a 6.9 percent annual rate in the third quarter as compared to a 6.3 percent rate for the U.S. Despite this growth, total employment in Massachusetts remains 5.8 percent below the pre-pandemic peak in February 2020, a larger jobs deficit than the nation, which in Q3 stood at 3.3 percent below its previous peak.

Looking ahead to the end of 2021 and the start of 2022, MassBenchmarks projections, which were made prior to the Omicron variant and the seasonal surge, expected the state economy to expand at a 4.5 percent annual rate, consistent with continued gradual progress in getting back to normal. This reflects a dampening of the optimism that was present earlier this summer. The AIM Business Confidence Index fell in both August and September, and the Conference Board's Consumer Confidence Index for the U.S. declined throughout the third quarter. However, both indexes are at levels that indicate a continuation of moderate growth.

[^11]While it is not possible to isolate the impacts of COVID-19 on trade, the declines of 2020 were most likely related to the pandemic. Compared to the U.S. as a whole, the Massachusetts' declines were modest. The national total trade volume (exports and imports) decreased 13.9 percent from 2019, and Massachusetts decreased 5.5 percent (Figure 6). Massachusetts' total trade volume was $\$ 59.9$ billion in 2020. Canada was by far our most valuable trading partner, with a trade volume of $\$ 10.6$ billion, 17.6 percent of the total state trade (Figure 7). The Massachusetts' trade deficit, $\$ 10.1$ billion, decreased 3.4 percent in 2020. Massachusetts ranked 18th in the U.S. in 2020 and first in New England with $\$ 24.8$ billion in exports. This was a 5.9 percent decrease from the previous year's export value, while national exports decreased by 14.3 percent and total exports from New England decreased by 10.3 percent (Figure 8). Canada was again our top export destination in 2020 with $\$ 2.8$ billion. Imports decreased 5.2 percent to $\$ 35.0$ billion in 2020. Canada was also the largest source for Massachusetts imports in 2020, from which we imported $\$ 7.8$ billion, or 22.3 percent, of our total.

## Workforce

In recent history, the Massachusetts economy has generally performed better than the U.S., with the state unemployment rate typically below the nation. This was especially the case during and the period following the Great Recession. The Commonwealth's mix of knowledge-based industries and welleducated workforce led to high levels of labor force participation and low levels of unemployment in the state overall. That said, the early outbreak of COVID-19 in the northeastern part of the U.S. coupled with proactive social distancing efforts by the Commonwealth in the spring and summer of 2020 led to significant job losses throughout the state. Massachusetts unemployment peaked at 16.4 percent, while the U.S. peaked at 14.8 percent (Figure 9). As of November 2021 Massachusetts unemployment is at 5.4 percent and the U.S. is at 4.2 percent.

Figure 9: Unemployment Rates in Massachusetts and the United States as of November 2021 (Seasonally adjusted)

Source: Massachusetts Executive Office of Labor and Workforce Development, Local Area Unemployment (LAU) Statistics; UMDI analysis

Both the public health and the economic crises caused by COVID-19 have disproportionately harmed historically marginalized groups. In part this is due to the concentration of marginalized populations in certain sectors of the economy that meant they were more likely to be working in essential services or losing their jobs as shut-down orders shuttered restaurants and retail establishments. For example, the leisure and hospitality sector, which has a younger and less educated workforce, experienced the greatest loss of jobs and has been the slowest to recover. In contrast, highly-educated workers in knowledge-based industries were more likely to be able to work from the home during the COVID-19 pandemic and less likely to lose their jobs. Massachusetts ranked fourth in the U.S. for teleworking during the pandemic. In

Massachusetts, workers with previous well-established capacity to work from home were clustered in the Greater Boston area.

The peak unemployment rate among people of color (POC) exceeded rates among white workers and the recovery has been slower. ${ }^{1}$ In addition, while rates of labor force participation have remained higher among people of color, they have been slower to rebound the (Figures 10 and 11).

Women experienced higher rates of unemployment than men through much of the pandemic, as well as greater declines in labor force participation. This is explained by the fact that family caregiving responsibilities (e.g. caring for children or elderly family members) fell disproportionately on women and women are concentrated in industries that experienced significant job losses (e.g. service sector). From January 2020 to April 2020, Women's labor force participation rate fell by 7.9 percentage points from 62.8 percent to 54.9 percent, where men's rate fell by 6.2 percentage points from 71.8 percent to 65.6 percent.

Younger workers and those with lower levels of education were particularly hard hit as well. With regard to age, workers aged 16 to 24 had, and continue to have, the highest rates of unemployment. Workers with less than a bachelor's degree had higher rates of unemployment than those with a bachelor's degree or more. The fact that educational attainment, age, race, and gender are all interconnected with access to job opportunities in the more resilient sectors of the economy has meant that historically marginalized populations have faced greater challenges during the pandemic.

## Environment

Massachusetts faces diverse risks related to climate change that will have broad economic impacts, depending on the extent to which adaptive measures are taken, at the state, national, and global levels. The threat posed by sea-level rise is of particular concern in Massachusetts because so much of the state's economic activity is concentrated along the coast, where the effects of climate change are already being felt. For example, in Boston the average number of flood days per a year has increased from 2.8 days during the 1950s and 1960s to 13.8 days from 2010 through 2020. The impact of coastal alteration, larger storm surges, and greater storm damage may be acutely felt where economic activity and residents are clustered. In 2018, approximately 300,000 jobs in Massachusetts were located in 100-year flood plains (Figure 12).

Figure 12 : Jobs located in 100-year flood zones

Source: FEMA National Flood Hazard Layer via MA GIS, U.S. Census Bureau 2018 LODES data on Total Jobs, Analysis by the Donahue Institute
Note: Counts of jobs in this table represent jobs in Census Blocks or parts of blocks that intersect or are fully contained within areas designated as 100 Year Flood Zones by FEMA and assumes an even distribution of jobs in those blocks. FEMA's current national flood hazard layer does not contain finalized flood data for Berkshire, Franklin or Hampshire counties so analysis was not done on those areas.

## UMass Donahue Institute

Economic Research and Public Policy

If you examine risk posed by hurricanes the number of jobs potentially effected is even greater, with over 800,000 job in areas designated by the Army Corps of engineers as being in hurricane inundation zones (Figure 13).

Figure 13: Job located in hurricane inundation zones

Source: U.S. Army Corps of Engineers Hurricane Surge Inundation Zones via MA GIS, U.S. Census Bureau 2018 LODES data on Total Jobs, Analysis by the Donahue Institute

There are also risks associated with rising temperatures. According to the 2020 National Climate Report, published by National Oceanic and Atmospheric Administration, 2020 ranked as the second warmest year on record for Massachusetts. Abnormal dryness and drought were experienced throughout the Northeast and Massachusetts, which may have contributed to Massachusetts having more than 1,000 wildfires in 2020.

While the full effects of climate change are hard to predict at this time, it is certain that some industries will bear more of the burden than others. For example, the tourism industry will likely be affected as there are more than a dozen ski areas in the Commonwealth that will face challenges as precipitation is expected to shift from snow to rain with warmer winter temperatures. Agriculture will be impacted by changes to the growing season and increased risk of drought. Fisheries will be impacted as increasing temperatures change the habitats of ocean species. The health of residents may be impacted by climate change. For

```
UMass Donahue Institute
Economic Research and Public Policy
```

example, changes in temperature will likely increase the risk or incidence of acute respiratory diseases, such as Asthma, and increase the presence of ticks that carry Lyme disease and mosquitoes carrying West Nile Virus. The risks vary across the state, within communities, and from resident to resident. Vulnerability to climate change is a function of exposure, sensitivity, and adaptive capacity. The most vulnerable are often the young, old, and medically vulnerable, those who live in areas with higher risk of extreme events and those without the resources to adapt.

Changes to the environment, such as extreme weather events, do not respect political boundaries, therefore, policy makers have limited ability to mitigate the course of environmental change. However, local officials can prepare for natural disasters and plan for predicted changes in the environment, such as rising temperatures and sea-levels. To this end Massachusetts established the Municipal Vulnerability Preparedness grant program that supports city and towns through grants and technical assistance that fund and support local assessments of vulnerability to climate change and adaptation projects. Over 90 percent of municipalities in the state have enrolled in the program.

Citing the environmental risks of climate change, in March 2021, Governor Baker signed a net-zero emissions law setting the goal of Massachusetts achieving net-zero emissions by 2050. The law sets interim emission targets and sets targets for six sectors: electricity, transportation, commercial and industrial buildings, residential buildings, industrial processes, and natural gas distribution. Currently, Massachusetts consumes more energy than it produces and relies on the regional grid to meet demand. Massachusetts uses less energy to produce a dollar of GDP than all but two other states, New York and California. Furthermore, according to the US Energy Information Administration, Massachusetts used less energy per capita than all but six other states in 2019.

Over the past 20 years, Massachusetts has increasingly been reliant on natural gas for electric power generation, with the share of electric power from natural gas more than doubling from to 2001 to 2019; the Commonwealth's reliance on natural gas is greater than the U.S. as whole, where natural gas makes up only 38 percent of electricity generated in 2019 compared to over 70 percent in Massachusetts (Figure 14). The Commonwealth is generating less energy from coal, petroleum, and nuclear; the last nuclear power plant in the state closed in 2019. While the shift from coal and petroleum to natural gas has the potential to reduce greenhouse gas emissions because natural gas releases less carbon dioxide when burned, natural gas contributes to greenhouse gas emissions when methane leaks from both pipeline leakage and end users, such as furnaces in buildings. Solar energy has grown to be 19 percent of Massachusetts's total in state electricity net generation. Furthermore, Massachusetts ranked ninth in the U.S. in net generation from all solar in 2020. Electricity prices in Massachusetts are higher than in the nation as a whole. In July 2021, Massachusetts consumers faced the third highest electricity prices. Massachusetts consumers pay the $35^{\text {th }}$ highest natural gas prices; during the winter months prices are frequently higher than in the U.S. These higher prices can place burden on lower income residents. After the sharp declines of 2020, it is expected that heating oil prices will increase sharply.

[^13]Figure 14: Electric Power Generation by Primary Energy Source, 1990-2019

Source: U.S. Dept. of Energy, http://www.eia.doe.gov/; state electricity profiles.
Note: Other includes batteries, chemicals, hydrogen, pitch, purchased steam, sulfur, tire-derived fuels and misc. technologies. Pumped storage is omitted from the graph because it represents the storage of power generated elsewhere rather than newly generated power.

## Residents

Just over seven million residents called Massachusetts home in 2020, an increase of 7.4 percent since 2010, making it the fastest-growing state in the Northeast. The 2020 Decennial Census P.L. 94-171 Redistricting dataset, which was released in August 2021, provides a snapshot of Massachusetts' population and how it has changed over the past decade. From 2010-2020 the population increased by 482,288 people, from $6,547,629$ to $7,029,917$ ( $7.4 \%$ ). In contrast the average population growth in the Northeast was 4.1 percent (Figure 15). ${ }^{2}$

Figure 15: Change in Resident Population by Decade

Source: U.S. Census Bureau; UMDI analysis

Increasing levels of international migration has driven population growth in Massachusetts over the last couple of decades. Conversely, migration from Massachusetts to other states has increased. Natural increases in the population have slowly declined largely due to an aging population and declining birth rates (Figure 16). Massachusetts' combination of higher education institutions and knowledge-based industries appears to be an important factor in attracting and retaining foreign-born residents. The foreign-born in Massachusetts has a bimodal education distribution with a high concentration with less than a high school education ( $20 \%$ in 2019 ) and a significant concentration with college degree (18\%).

[^14]Interestingly, a higher proportion of immigrants in the state hold a graduate degree ( $22 \%$ ) than nativeborn residents (20\%).

While the population in Massachusetts has grown strongly over the past decade, the latest population estimates showed a 0.6 percent decline in the state's population from April 2020 to July 2021 . This cumulative decrease is more substantial than other Northeast states, with the exception of New York, which decreased by 1.8 percent. Massachusetts is not unique in experiencing a pandemic slowdown in population growth. The U.S. grew at the slowest rate since the nation's founding during this past year ( $0.1 \%$ ). The pandemic has halted migration to the state, and contributed to higher death rates and lower birth rates. For the first time, deaths exceeded births in the state leading to negative growth attributable to natural increases. Furthermore, domestic migration out of the state increased. Again this trend was not unique to Massachusetts, as the Southern Region of the U.S. was the only region to experience positive net domestic migration. As the pandemic recedes a return to international migration will be essential for resuming growth in the population.

Figure 16: Massachusetts Estimated Components of Change, 2000-2021

[^15] Division.

Figure 17. Educational Attainment of the Foreign Born in Massachusetts, 2019

Source: U.S. Census Bureau, 2019 1-Year American Community Survey; UMDI analysis

Overall, population growth in the state between 2010 and 2020 was uneven. Population growth, much like the previous decade, was strongest in the eastern part of the state, particularly in the Greater Boston region. Middlesex County saw the largest growth in absolute terms and grew at a rate of 8.6 percent. It was followed by Essex and Worcester Counties which grew at rates of 9 and 8 percent respectively, all faster than the state as whole. In terms of percentage change, the fastest population growth since Census 2010 was observed in the small island counties of Nantucket and Dukes, at 40.1 percent and 24.6 percent respectively. The two western-most counties, Franklin and Berkshire, saw small population declines over the last decade (Figure 17).

Figure 18: Percent Change in Massachusetts County Population, Census 2010 to Census 2020

Source: UMDI, U.S. Census Bureau

The population growth trends in Massachusetts reflect trends in the U.S. over the past decade. Metropolitan areas and urban and suburban counties grew much more rapidly than small places and rural counties. Similarly, in Massachusetts, population growth has been clustered around the Greater Boston area and Gateway Cities. The cities that grew the most in absolute terms were Boston, Worcester, Cambridge, Lawrence, and Brockton. In addition, all but two of Massachusetts' 26 "Gateway Cities" showed Census 2020 population counts greater than the Vintage 2020 evaluation estimates, which are based on the 2010 Census, suggesting that growth in these cities out-performed the Census Bureau's estimates. The Gateway Cities account for 15 out of the 25 most populous places in Massachusetts, and 25 out of the top 40.

The four slowest growing Gateway Cities were all in Hampden County. Hampden County, along with Berkshire, Franklin, and Hampshire counties is located in the Western Massachusetts region, which had a much slower rate of growth than Massachusetts as a whole, 0.5 percent. Furthermore, the region grew at a slower rate from 2010 to 2020 than it had from 2000 to 2010 (1.1\% from 2000 to $2010 ; 0.5 \%$ from 2010 to 2020). Both Berkshire and Franklin counties have been declining in population since 2000, while Hampden and Hampshire counties have seen modest growth. In contrast the Cape and the Islands region

[^16]has experienced a dramatic increase in population. The Island of Nantucket was the fastest growing place in Massachusetts followed by Martha's Vineyard. Cape Cod also experienced increased growth compared to the prior decade, growing at a rate of 6.1 percent. The strong growth in these areas that had seen declines from 2000 to 2010 may be attributable to the pandemic, as more individuals could choose where to live untethered from where their employer was located.

As with the nation, Massachusetts is becoming more racially and ethnically diverse. The share of the population that identifies as non-Hispanic, white decreased from 76 percent to 68 percent from 2010 to 2020, while the shares that identify as Black non-Hispanic, Asian non-Hispanic, and Hispanic increased to 6.5 percent, 7.2 percent, and 12.6 percent respectively. The share that identifies as two or more races (non-Hispanic) more than doubled to 4.7 percent (Figure 18). The state's population is older than the nation as a whole, the median ages is 39.7 . However, due to the presence of higher education institutions, young adults are somewhat overrepresented in the Commonwealth, 21 percent of residents are between the ages of 20-34 compared to 20 percent in the U.S.

Figure 19. Massachusetts Race and Ethnicity in 2010 and 2020

Source: 2010 Source Data: Census 2010 Summary File 1; 2020 Source Data: Census 2020 PL-91-171; UMDI analysis

Massachusetts' residents earn some of the highest incomes in the nation. Real per capita income consistently exceeds incomes in the Northeast and U.S. In 2020, the real per capita personal income in the Commonwealth was nearly \$80,000 compared to approximately $\$ 74,000$ in the Northeast and just under $\$ 60,000$ in the U.S. (Figure 19). The relatively high-income levels reflect the high level of education and the concentration of high-wage industries such as, health care, professional services, and finance and insurance. The poverty rate is lower in Massachusetts than in the nation as a whole at 9.4 percent compared to 12.3 percent. However, in several cities the poverty rate exceeds the state average,

[^17]Holyoke, Springfield, and Worcester all Gateway cities, have poverty rates of 15.2 percent, 10.9 percent and 10.7 percent respectively. Boston is slightly above the state average with a rate of 9.6 percent. Higher rates of poverty in these Gateway Cities and Boston are particularly concerning because Gateway Cities are home to a large share of the state's communities of color and immigrant communities. Forty-one percent of all people of color in Massachusetts live in Gateway Cities 18 percent live in Boston. Furthermore, 36 percent of Massachusetts immigrants live in Gateway Cities and 17 percent live in Boston. The concentration of poverty in these cities raises concerns about equity and quality of life.

Source: U.S. Department of Commerce, Bureau of Economic Analysis

The presence of a skilled and well-educated population is an important resource for the Commonwealth. At the primary and secondary level, the state invests more than the national average in its public schools (Figure 20). Furthermore, students in Massachusetts' K-12 public schools consistently outperform their peers in the U.S. on national assessments. The state has the most well-educated population in the country, with 45 percent of all residents 25 years of age or older earning a bachelor's degree or more. However, educational attainment varies significantly across racial groups: Black and Hispanic residents are less likely to have a bachelor's degree than the state average, at 28 percent and 21 percent respectively. Fortyseven percent of white residents and 63 percent of Asian residents hold a bachelor's degree or higher. That said, across all racial groups, educational attainment rates are higher than the national average (Figure 7). The well-educated population supports and is a product of the concentration of elite public and private colleges and universities in the state. Educational services is the second largest industry in Massachusetts in terms of jobs. Over half a million students are enrolled in higher education in the state, including over 73,000 foreign students in the 2019/2020 academic year.

While residents enjoy higher incomes than most other states, the cost of housing in Massachusetts is a burden for many, especially for Black and Hispanic households. Housing costs are rising across the Commonwealth, driven in part by population and economic growth and inadequate housing production over the last couple of decades. The increase in sale prices and the low supply of homes for sale has translated into high rental costs as well. Median sales price of existing homes increased to $\$ 460,000$ in 2020 from just over $\$ 418,000$ in 2019, well above the national median of $\$ 296,700$. Construction is not keeping up with demand. Nationally, the number of building permits increased 6.1 percent from 2019 to 2020, but were actually down two percent in Massachusetts over the same time period (Figure 23). Nearly a quarter ( $23 \%$ ) of Massachusetts renters are severely cost burdened, meaning they spend 50 percent or more of their income on housing. The rates of cost burden are highest among low-income residents, as well as Black and Hispanic households.

OFFICE OF THE COMPTROLLER
One Ashburton Place, 9th Floor Boston, Massachusetts ozio8
(617) 727-5000 MACOMPTROLLER.ORG

Secretary Michael J. Heffernan

Executive Office for Administration \& Finance
State House, Room 373
Boston, MA 02133

Honorable Michael J. Rodrigues, Chair
Senate Ways and Means Committee
State House, Room 212
Boston, MA 02133

Mr. Michael D. Hurley
Clerk of the Senate
State House, Room 335
Boston, MA 02133

Dear Sirs:
The Office of the Comptroller hereby files the Commonwealth's Statutory Basis Financial Report (SBFR) for Fiscal Year 2021, the 12-month period ended June 30, 2021.

The SBFR provides independent and unbiased accounting of Commonwealth revenues and expenditures for Fiscal Year 2021. The SBFR was prepared by the professional staff of the Office of Comptroller and reviewed by the Commonwealth's independent audit firm, CliftonLarsonAllen LLP (CLA), in accordance with professional standards established by the American Institute of Certified Public Accountants.

Pursuant to M.G.L c. 7A, § 12, the Comptroller is required to file the SBFR with the Governor, the Secretary of Administration and Finance, the House and Senate Committees on Ways and Means, the Clerks of the House and Senate, and any other Parties specified in general or special law by October 31 of each year.

The October 31 due date was not achievable, given that the final FY2021 Supplemental Appropriations Act was enacted on October 20, 2021. This filing comes nearly three weeks after
the statutory due date. While regrettable, this timing represents a marked improvement over the two preceding years, when the SBFR filings for Fiscal Years 2019 and 2020 occurred on January 6 and December 18, respectively. My sincere hope is that in the coming years, each step in the process can be initiated and completed earlier, allowing for the timely submission of the Statutory Basis Financial Report.

As in each annual cycle, the Office of Comptroller and financial professionals across the Commonwealth worked diligently to complete every task possible before the passage of the final supplemental appropriation of the year. After its enactment, the process of "closing the books" is executed with both speed and accuracy.

The completed draft is reviewed at two levels: First, by the Commonwealth's independent audit firm. This independent review function is critical, and I thank CliftonLarsonAllen LLP for completing it on a timely basis. Second, the SBFR is reviewed by the Comptroller Advisory Board, as required by statute.

I thank the staff of the Office of the Comptroller and financial professionals across the Commonwealth for their work, including Chief Financial Reporting Officer Pauline Lieu, Chief Accounting Officer Kristin Lacroix, and their respective teams. They have produced this informative, unbiased, and valuable record of the state's financial position. Finally, I would like to commend Howard Merkowitz on the occasion of his retirement. As Deputy Comptroller throughout Fiscal Year 2021 and for many years previously, he provided exemplary service and leadership to the Commonwealth during a distinguished career in service of state government.

Sincerely,

William McNamara
Comptroller of the Commonwealth

## Report Summary

As of June 30, 2021, the Commonwealth had a budgetary fund balance of approximately $\$ 12.099$ billion and completed FY21 with a budget surplus ("consolidated net surplus") of $\$ 1.460$ billion according to state finance law (see below for the statutory definition of a balanced budget). Per legislation enacted at the end of FY21, that surplus was deposited into a newly created Transitional Escrow Fund, whose balance was carried forward for use in FY22. During the fiscal year, the balance of the Commonwealth's Stabilization (or rainy day) Fund increased by $\$ 1.125$ billion, to $\$ 4.626$ billion, as a result of transfers of capital gains and gaming tax revenue transferred to the Fund and investment earnings on the Fund's balances. No funds were drawn from the Stabilization Fund in FY21. (The Budgeted Funds - Operations table on page 9 displays the FY21 summary of budgeted funds compared to FY20. Details of the FY21 Stabilization Fund activity are provided on pages 11-13 and 144.) The total budgeted fund balance of $\$ 12.099$ billion reflects a gain (revenues and other financing sources greater than expenditures and other financing uses) of approximately $\$ 7.804$ billion, from the FY21 beginning balance of $\$ 4.295$ billion. This follows an FY20 operating gain of $\$ 336$ million. In addition to the $\$ 4.626$ billion reserved in the Stabilization Fund, $\$ 1.099$ billion is reserved for continuing appropriations and debt service in FY22, $\$ 1.460$ billion is held in the Transitional Escrow Fund, and $\$ 4.892$ billion is in the Federal COVID-19 Response Fund, which was created to hold funds received from the federal government under the American Rescue Plan Act of 2021 (ARPA). The remaining undesignated balance of $\$ 21$ million is made up of other budgeted fund balances.

During FY21, budgeted fund tax revenues increased by $\$ 4.159$ billion, or $15.1 \%$, from FY20, as the national and Massachusetts economies recovered from the COVID-19-induced recession. Before transfers between budgeted funds (which do not affect total budgeted fund balances), total budgeted fund revenues and other financing sources increased by $\$ 9.566$ billion, or $20.2 \%$. Budgeted fund expenditures and other financing uses increased by $\$ 2.098$ billion, or $4.5 \%$, primarily due to increases in Medicaid spending, additional payments to hospitals that care for the uninsured, and higher contributions to the state pension system to pay down the Commonwealth's unfunded pension liability. A detailed analysis of revenue and spending changes, as well as the economic factors that affected the budget, is included in the sections that follow.

## Overview of the Financial Statements

This report focuses primarily on the Commonwealth's budgeted funds. For the budgeted funds, the activity (inflows and outflows) and balances (assets and liabilities) of each fund are presented separately. For all other funds included in this report, the activity - inflows and outflows - is presented in tabular form, but per statute, the full balance sheets for each fund are not shown.

The financial operations of these funds are maintained in the Massachusetts Management Accounting and Reporting System (MMARS), the statewide accounting system, which is operated by the Commonwealth and contains detailed information summarized in this report.

The SBFR satisfies the requirements of state finance law and to present the results of FY21 activity in the Commonwealth's funds. The report contains computations required by state finance law, including the certification of the state's consolidated net surplus and the balances in the Stabilization Fund.

## Basis of Accounting and Definition of the Consolidated Net Surplus

The statutory (or budgetary) basis of accounting, as defined in Massachusetts law, is used to budget and control the Commonwealth's fiscal operations. The statutory basis of accounting does not conform with accounting principles generally accepted in the United States of America (GAAP) as defined for governments by the Governmental Accounting Standards Board (GASB). In addition, per statute, the Commonwealth-managed fiduciary funds are not included in this presentation. The Comptroller's Office will report the Commonwealth's financial position on a GAAP basis in the State's Annual Comprehensive Financial Report (ACFR). That report provides a basis for comparison with other jurisdictions, as the accounting rules for the ACFR are the same for all governments, whereas the statutory basis of accounting may differ across states. There are significant differences between what is contained in the SBFR and what will be presented in the GAAP-based ACFR, the major ones being that the ACFR
reflects capital assets and depreciation expense, all types of long-term obligations - including debt, pensions, and other post-employment benefits (or OPEB, which are mainly retirees' health insurance benefits) - and in the ACFR the financial statements are presented in an all-encompassing, net position and net expense format. In addition, the statutory basis of accounting is mainly cash-based, with a two month accounts payable period for expenses and accounts receivable for revenues received from other government entities.

The Commonwealth's statutory basis of accounting, as set out in Chapter 29 of the Massachusetts General Laws (MGL), defines the "consolidated net surplus" or CNS as the ending "undesignated", or unreserved, balances in the budgeted funds, that is, those funds subject to the state's annual appropriation process, though by statute several budgeted funds (including the Federal COVID-19 Response Fund) are excluded from the consolidated net surplus calculation. State finance law defines a "balanced budget" as a consolidated net surplus of $\$ 0$ or greater. The largest of the budgeted funds are the General Fund and the Commonwealth Transportation Fund, which in FY21 together accounted for approximately $94.4 \%$ and $4.0 \%$, respectively, of total budgeted fund expenditures and other financing uses. The remaining approximately $1.6 \%$ of budgeted fund activity comprises fifteen other funds, nine of which by statute are excluded from the consolidated net surplus calculations.

In accordance with Section 12 of Chapter 7A of the MGL, the Office of the Comptroller is required to transmit the SBFR by October $31^{\text {st }}$. However, due to the fact that the final FY21 supplemental budget bill was not enacted and signed into law until mid-October, this SBFR is being transmitted on November 19, 2021 in order to provide sufficient time to accurately incorporate the bill's provisions into this report and have it reviewed by the Commonwealth's independent auditor.

The SBFR for the fiscal year ended June 30, 2021 is reviewed, not audited, by the state's independent auditor, CliftonLarsonAllen, and represents the closing of the Commonwealth's books for the fiscal year.

## The Economic Context

The funding available to the Commonwealth to finance its programs is determined largely by the performance of the state's economy, particularly growth in employment and wages, which drive the personal income tax, the state's largest revenue source, and the sales tax, which depends on the amount of income Massachusetts residents have available to spend. In FY21, the Commonwealth's economy began to recover from the economic impact of the global Coronavirus or COVID-19 pandemic. Between June 2020 and June 2021, employment increased by approximately 294,600 jobs, or $9.3 \%$, compared to an increase in employment of $5.8 \%$ for the United States as a whole. With the relatively rapid growth of the Commonwealth's economy over the past year, as of June 2021 the Massachusetts unemployment rate was $4.9 \%$, compared to $5.9 \%$ nationally.

## The Budgeted Funds

The FY21 budget enacted by the Legislature (the General Appropriation Act, or GAA) included an FY21 tax revenue estimate of $\$ 27.637$ billion prior to tax initiatives (and including $\$ 125$ million in tax settlements), a decrease of $\$ 3.514$ billion from the FY21 consensus estimate of $\$ 31.151$ billion, with the reduction due to the actual and projected impact of the pandemic on tax revenue in FY21. The GAA estimate was further increased to $\$ 27.976$ billion as a result of enacted tax law changes and other tax-generating initiatives included in the budget. $\$ 25.908$ billion of that revenue was to be deposited in the budgeted funds and and available for use, with $\$ 2.520$ billion to be deposited into non-budgeted funds, including transfers of sales tax revenue dedicated to the Massachusetts Bay Transportation Authority ( $\$ 1.102$ billion) and the Massachusetts School Building Authority ( $\$ 942$ million), capital gains tax revenues transferred to the Stabilization Fund ( $\$ 452$ million), and revenue allocated to the non-budgeted Workforce Training Fund (\$25 million).

In October 2020, the Secretary of Administration and Finance reduced the FY21 tax revenue estimate by $\$ 334$ million, to $\$ 27.642$ billion (including $\$ 50$ million in judgments and settlements revenue exceeding $\$ 10$ million each). In January 2021, the Secretary of Administration and Finance revised the Fiscal Year 2021 state tax revenue estimate upward to $\$ 29.090$ billion (including $\$ 50$ million in judgment and settlement revenue), to reflect stronger than projected growth in year-to-date income tax collections, primarily due to a surge in capital gains taxes.

FY21 tax revenues ended the year at $\$ 34.156$ billion (including $\$ 44$ million in tax settlements exceeding $\$ 10$ million each), of which $\$ 31.772$ billion was deposited in the budgeted funds. Tax revenue deposited in the budgeted funds increased by $\$ 4.159$ billion, or $15.1 \%$, from FY20, $\$ 5.864$ billion above the original FY21 tax estimate and $\$ 5.202$ billion above the final FY21 estimate.

The FY21 General Appropriation Act (GAA) authorized approximately $\$ 47.898$ billion in spending, exclusive of approximately $\$ 3.115$ billion in required pension contributions and $\$ 756$ million in FY20 spending authorized to be continued into FY21 as part of the FY20 and FY21 general appropriation acts and various FY20 supplemental budgets.

Approximately $\$ 593$ million in supplemental appropriations were authorized during FY21, $\$ 259$ million of which were enacted by June 30, 2021. Subsequent to year end, a supplemental budget was enacted totaling approximately $\$ 334$ million in new appropriations. The year's significant supplemental appropriation activity included:

- $\quad \$ 252$ million to fund collective bargaining costs of state employees;
- $\quad \$ 131$ million to fund childcare services;
- $\quad \$ 32$ million for the Medical Assistance Trust Fund payments to hospitals that care for low-income patients;
- $\quad \$ 28$ million for aid to families with dependent children;
- $\$ 26$ million to fund Sheriffs' personnel costs;
- $\quad \$ 20$ million for additional aid to local schools;
- $\quad \$ 17$ million for homeless services;
- $\quad \$ 13$ million to fund services provided by the Massachusetts National Guard.
- $\quad \$ 13$ million to fund police reform initiatives
- $\quad \$ 11$ million to fund State Police operations

# Budgeted Fund Revenues and Other Financing Sources Before Transfers Between Budgeted Funds (Total of \$56.882 billion) 

FY21 budgeted revenues and other financing sources (before transfers between the budgeted funds, which are included in both spending and revenue and thus have no effect on fund balances) totaled $\$ 56.882$ billion, an increase of $\$ 9.566$ billion, or $20.2 \%$, from FY20. Tax revenue growth picked up in FY21 as the Massachusetts economy reopened following a decline in FY20 due to the pandemic, with total taxes receipts increasing by $\$ 4.159$ billion, or $15.1 \%$ from FY20. All major tax types grew strongly in FY21. Total income tax collections increased by $\$ 2.258$ billion, or $13.0 \%$, with personal income tax withholding growing by $\$ 983$ million, or $7.2 \%$, non-withheld personal income tax increased by $\$ 1.225$ billion, or $35.9 \%$, the latter driven in large part by growth in capital gains tax revenue, which totaled $\$ 2.533$ billion an increase of $\$ 873$ million, or $52.6 \%$, from FY20. Corporate and business taxes (comprising corporate excise, financial institutions, insurance company, and public utilities taxes) increased by $\$ 1.206$ billion, or $40.9 \%$ (with approximately $\$ 50$ million of that increase due to businesses taking advantage of a delay in the tax payment deadline from the first half of calendar year 2020 to July 2021, which shifted payments from FY20 to FY21) and sales and use tax (including regular sales, meals, and motor vehicle sales tax, but excluding cannabis sales tax) increased by $\$ 629$ million, or $13.1 \%$, despite a $\$ 131$ million, or $12.1 \%$ decline in sales and meals taxes as the pandemic cut into restaurant dining. Other notable tax revenue changes include deeds excise revenues, which increased by $\$ 83$ million, or $26.4 \%$, as the real estate market staged a strong recovery, cannabis sales and excise taxes, which also increase by $\$ 83$ million, or $116.8 \%$, as the number of cannabis dispensaries expanded, and estate and inheritance taxes, which grew by $\$ 88$ million, $12.6 \%$.

Budgetary fund federal reimbursements totaled $\$ 18.339$ billion, an increase of $\$ 5.544$ billion, or $43.3 \%$, with growth primarily the result of $\$ 4.892$ billion in America Rescue Plan Act (ARPA) revenues received in the fourth quarter of FY21, and deposited in the newly created budgeted Federal COVID-19 Response Fund (a fund subject to appropriation by the Legislature) and carried forward for expenditure in future years (an additional $\$ 394$ million in ARPA revenues was retained in the non-budgeted Federal Grants, Special Revenue, and Expendable Trust funds in FY21 for COVID-19-related expenditures). Federal reimbursements for the Commonwealth's Medicaid program totaled $\$ 12.338$ billion, an increase of $\$ 968$ million, or $8.5 \%$, primarily due to increased costs of the program during the pandemic (see explanation on following page).

Departmental revenue, which consists primarily of assessments and fees for state licenses and state services, totaled $\$ 4.776$ billion, a decrease of $\$ 145$ million, or $2.9 \%$, from FY20, with the largest revenue declines being a reduction of $\$ 90$ million in one-time health insurance assessments received in FY20 and a drop of $\$ 98$ million, or $8.1 \%$, in Medicaid manufacturer prescription drug rebates. These declines were partly offset by growth in several other
revenue sources, the most significant of which was an increase motor vehicle license and registration revenues, which rose by $\$ 67$ million, or $13.8 \%$.
Interfund transfers from non-budgeted funds to the budgeted funds totaled $\$ 1.996$ billion, an increase of $\$ 8$ million, or $0.4 \%$, from FY20, including a $\$ 121$ million, or $21.0 \%$ decrease in fringe benefit assessments resulting from reductions in payroll in higher education (which accounts for a significant share of the Commonwealth's a fringe benefit recoveries) as well as reduced non-budgeted personnel spending in coronavirus-related accounts. These reductions were offset by a $\$ 123$ million, or $12.7 \%$ increase in Lottery Fund transfers to the General Fund as Lottery profits recovered in FY21 from their coronavirus-induced slump in the fourth quarter of FY20 (see Lottery and Gaming section on page 10).

The Commonwealth continues to receive revenues, as it will in perpetuity, from the Master Settlement Agreement (MSA) between the states and the tobacco industry to recover health care costs for tobacco-related illnesses. In FY21, the Commonwealth received $\$ 246$ million in tobacco settlement funds, an increase of $\$ 16$ million compared to FY20. Statute requires that a portion of tobacco settlement proceeds be transferred to the State Retiree Benefits Trust Fund (SRBTF) to fund the Commonwealth's liability for retiree health care, with the percentage of proceeds transferred increasing by $10 \%$ each year until $100 \%$ of such proceeds is deposited in the SRBTF in FY2022 and after. For FY21, the statutorily required transfer was $90 \%$ of tobacco settlement revenues; however, FY21 budget actions reduced the percentage of tobacco settlement revenues deposited to the SRBTF from $90 \%$ to $10 \%$. That action reduced the FY21 transfer to approximately $\$ 25$ million, compared to the statutorily required amount of \$221 million.

## Budgeted Expenditures and Other Financing Uses Before Transfers Between Budgeted Funds (Total of $\$ 49.078$ billion)

FY21 budgeted expenditures and other financing uses, including transfers to non-budgeted funds (but before transfers between the budgeted funds) totaled $\$ 49.078$ billion, an increase of $\$ 2.098$ billion, or $4.5 \%$, from FY20, with the increase primarily attributable to coronavirus relief expenditures, higher spending on Medicaid and other health care, pension contributions, and Local Aid.

Spending on programs and services totaled $\$ 41.593$ billion, an increase of $\$ 1.726$ billion, or $4.3 \%$, from FY20. Medicaid expenditures totaled $\$ 18.122$ billion, an increase of $\$ 1.100$ billion, or $6.5 \%$, from FY20, due to an approximate $10 \%$ increase in caseload during the coronavirus epidemic, when disenrollment of beneficiaries was suspended as long as a federally-declared public health emergency is in effect. Spending for direct local aid (both
education aid and unrestricted aid), at $\$ 6.482$ billion, was up $\$ 106$ million, or $1.7 \%$, from FY20. Other significant spending included $\$ 46$ million in new spending for economic recovery from COVID-19, $\$ 50$ million for a homeless prevention program (an increase of $\$ 32$ million from FY20),

Spending on state employee health benefits paid through the Group Insurance Commission increased by $\$ 55$ million, or $3.3 \%$, from $\$ 1.680$ billion to $\$ 1.736$ billion, Transfers to the state pension fund (including the $\$ 61$ million transfer capital gains tax transfer, as required by a statute that mandates such transfers from a portion of capital gains tax collections above an annual threshold) totaled $\$ 3.176$ billion, an increase of $\$ 335$ million, or $11.8 \%$. Budgeted debt service totaled $\$ 2.289$ billion, down $\$ 121$ million, or $5.0 \%$, from FY20, due to savings achieved when the Commonwealth refunded debt service at favorable interest. rates.

Interfund transfers from budgeted to non-budgeted funds totaled $\$ 1.444$ billion, an increase of $\$ 46$ million or $3.3 \%$, from FY20.

In conducting the budget process, the Commonwealth excludes from its forecast those "interfund" transactions within the budgeted funds that are included in this report; these transactions by their nature have no impact on the combined fund balance of the budgeted funds. The Budgeted Funds - Operations table isolates this "interfund" activity from the budgeted sources and subtracts this revenue and spending to align forecasts prepared during the budget process and in bond disclosure documents to actual amounts in this report. In FY21, transfers among the Budgeted Funds totaled $\$ 3.100$ billion, an increase of $\$ 2.087$ billion, or $205.9 \%$, from FY20, primarily due to transfers of $\$ 1.116$ billion in capital gains tax revenue deposited in the Stabilization Fund (there were no such transfers in FY20) and the $\$ 1.460$ billion to the Transitional Escrow Fund, which were partially offset by the expiration of annual transfers from the General Fund to the Commonwealth Transportation Fund and smaller deficit elimination transfers between the budgeted funds at fiscal year-end.

A detailed list of these interfund transfers is included in Note 3 of the financial statements and Schedule $C$ of the Supplemental Information section of this report.

## Budgeted Funds - Fund Balance (Including Stabilization Fund) (Amounts in millions)

The graph of Budgeted Funds - Fund Balance above portrays the combined fund balance in the budgeted funds for the past five years.

As of June 30, 2021, the ending balance is comprised mainly of the $\$ 1.057$ billion fund balance of the General Fund, $\$ 4.892$ billion in the Federal COVID-19 Response Fund, $\$ 4.626$ billion in the Stabilization Fund and $\$ 1.460$ billion in the Transitional Escrow Fund. Due to designations of fund balances, $\$ 1.099$ billion of the total budgeted fund balance, exclusive of the Stabilization Fund, is reserved for appropriations and debt service in FY21. The remaining $\$ 21$ million is undesignated in the budgeted environmental and other funds that are not included in the consolidated net surplus calculation and therefore was not transferred to the Transitional Escrow Fund at the close of FY21.

## Lottery and Gaming

FY21 Lottery revenues and profits recovered from the decline caused by the coronavirus pandemic in the second half FY20. Gross Lottery revenues (including revenues from the Arts Lottery) grew from $\$ 5.396$ billion in FY20 to $\$ 5.959$ billion in FY21, an increase of $\$ 564$ million, or $10.4 \%$. Lottery profits, after deducting administrative expenses and fringe benefit charges to reimburse the Commonwealth's General Fund for pension and employee health insurance benefits, but prior to distributions to reimburse the Massachusetts Cultural Council and compulsive gambling appropriations as mandated in the FY21 budget, totaled $\$ 1.113$ billion, an increase of $\$ 126$ million, or $12.7 \%$, from FY20. Of that $\$ 1.113$ billion in profits, and as mandated in the FY21 General Appropriation Act, approximately $\$ 1.014$ billion was transferred to the General Fund to fund so-called Unrestricted General Government Aid (formerly Lottery Local Aid), $\$ 18$ million funded the Massachusetts Cultural Council appropriation, and $\$ 1$ million reimbursed a compulsive gambling program appropriation.

FY21 gaming revenues also recovered from the FY20 decline caused by the pandemic. FY21 budgeted fund tax revenues remitted to the Commonwealth by the Plainridge slot machine parlor, which are equal to $40 \%$ of gross profits (or "gross gaming revenues") from slot machines, totaled approximately $\$ 49$ million, an increase of approximately $\$ 11$ million, or $27.6 \%$ from FY20, but still well below the FY19 pre-pandemic revenue of $\$ 68$ million. An additional $\$ 11$ million in non-budgeted fund revenue, equal to $9 \%$ of gross gaming revenue from the slot machines, was earmarked for the advancement of horse racing. Revenues from the Springfield casino (equal to $25 \%$ of gross gaming revenue) totaled $\$ 51$ million, an increase of $\$ 7$ million, or $16.6 \%$, from FY20, Taxes from the first
fully fiscal year of gaming operations of the Everett casino (also equal to $25 \%$ of gross gaming revenues) totaled $\$ 123$ million during FY21, up $\$ 18$ million, or $17.2 \%$, from FY20.

Statute requires that all tax revenues from the Plainridge slots parlor and a portion of the tax revenues from the Springfield and Everett casinos are allocated to fund unrestricted local aid. The FY21 General Appropriation Act allocated $\$ 114$ million in gaming revenues to local aid, but taxes on gaming revenues deposited in the Gaming Local Aid Fund generated only $\$ 84$ million, with the remaining $\$ 30$ million funded by the Commonwealth's other budgeted funds.

## Full-Time Equivalent Employment

The chart below shows the Commonwealth's full-time equivalent employment, including the Massachusetts Department of Transportation (MassDOT) for all state funding sources (budgetary, non-budgetary, capital, federal, and trust) over the past five fiscal years. As of June 30, 2021, the number of Commonwealth employees decreased by a net of 1,409 full-time equivalent employees (FTEs) from June 30, 2020, to a total of 85,174 . The largest decreases were in the Higher Education system, where FTEs declined by 1,308, with the University of Massachusetts dropping by 847, Community Colleges dropping by 244 FTEs, and State Universities declining by 217 due to furloughs, attrition, and layoffs in response to the declines in fee revenue caused by the COVID-19 pandemic. The Executive Office of Health and Human Services also reduced its FTE count by 430 compared to June 30, 2020.

## Full Time Equivalent Workforce Including Higher Education June 2017 - June 2021

## The Stabilization Fund

The Stabilization (or rainy day) Fund provides a reserve to be used in the event of an economic downturn or other fiscal emergency. The balance of the Stabilization Fund increased by $\$ 1.125$ billion, to $\$ 4.626$ billion, between FY20 and FY21, with the main sources of growth being the transfer of capital gains tax revenues to the Fund, with additional transfers of gaming tax revenues and crediting of interest income.

Massachusetts state finance law includes a statutory requirement to transfer tax revenue attributable to capital gains above an annual threshold to the Stabilization Fund, State Pension Liability Fund, and State Retiree Benefits Trust Fund. The FY21 capital gains tax threshold, as determined by the Department of Revenue, was $\$ 1.312$ billion. In July 2021, the Department of Revenue certified that FY21 tax collections attributable to capital gains totaled $\$ 2.533$
billion, $90 \%$, or $\$ 1.098$ billion of which was transferred to the Stabilization Fund, with the remaining $\$ 122$ million divided equally between the Commonwealth pension fund and State Retiree Benefits Trust Fund (which funds post employee health benefits). During the fiscal year, the Stabilization Fund also earned $\$ 9$ million in investment income, $\$ 17$ million from casino gaming tax revenue and a small amount of tax revenue. The Commonwealth made no withdrawals from the Stabilization in FY21. (Details of transfers and to and investment earnings of the Stabilization Fund are shown in the table on page 144).

The following two charts show the end of fiscal year Stabilization Fund balances since the inception of the fund in FY87, and the Stabilization Fund balance as a percentage of General Funds own-source expenditures over the past five fiscal years, compared to the median of all states.

## Stabilization Fund Balance <br> (Amounts in billions)

Rainy day fund balances are typically measured both in terms of the absolute size of those funds and the funds' balances as a percentage of General Fund expenditures, with the latter calculation taking into account a state's level of spending that stabilization funds are required to cover when economic downturns cause unanticipated declines in states' tax revenues and increases in demand for state services. According to The National Association of State Budget Officers' (NASBO) Spring 2021 Fiscal Survey of the States, at the close of FY20 (the most recent year for which final rainy day fund balances were available for all states), the Commonwealth Stabilization Fund's balance of $\$ 3.501$ billion was the third largest in the nation in absolute terms, and Massachusetts will again have the third largest Stabilization Fund balance at the end of FY21. As a percentage of total General Fund expenditures (after subtracting federally reimbursed General Fund expenditures, since all other states in the NASBO survey exclude such spending from their General Fund totals, making their Stabilization Fund percentage calculations a proportion of "own-source" General Fund expenditures), the Commonwealth's FY20 Stabilization Fund balance of $10.9 \%$ as a percentage of General Fund own-source expenditures was well above the national median of $8.5 \%$. For FY21, the Commonwealth's Stabilization Fund balance as a percentage of General Fund own source expenditures was $13.3 \%$, well above the projected national median of $8.7 \%$ as reported in the NASBO Spring survey.

With the $\$ 1.125$ billion added to the Stabilization Fund balance in FY21, the Fund's balance has risen to its highest level since its creation in FY87.

## The Non-Budgeted Funds

The Non-Budgeted Funds represent operations in which the government has imposed its sovereign authority but has excluded these operations from the annual budget process. During FY21, the Commonwealth maintained 125 nonbudgeted funds, while another 40 were inactive.

The largest non-budgeted funds in terms of operating revenues include the State Lottery and Gaming Fund, the Federal Grants Fund, the MBTA State and Local Contribution Trust Fund (which accounts for sales tax revenue dedicated to and transferred to the MBTA), Coronavirus Relief Fund (established in FY20, which accounts for revenue received from the federal government under the Coronavirus Aid, Relief, and Economic Security, or CARES, Act), the School Modernization Trust Fund (which accounts for sales tax revenue dedicated to and transferred to Massachusetts School Building Authority), the Commonwealth Care Trust Fund, the Medical Assistance Trust Fund, the Health Safety Net Trust Fund, the MassHealth Delivery System Reform Trust Fund, the Convention and Exhibition Center Fund and the Massachusetts Transportation Trust Fund. Other funds that show large inflows include the Grant Anticipation Notes Trust Fund, which is funded by federal highway spending reimbursements.

Under the Coronarvirus Aid, Relief, and Economic Security (CARES) Act, the Commonwealth received \$2.461 billion in federal revenue during FY20, of which $\$ 761$ million was spent in during that fiscal year and $\$ 1.309$ billion was expended spent in FY21, allocated to eligible COVID-19 related expenditures. (The Coronavirus Relief Fund financial statement is shown on page 134 of this report.) FY21, the Commonwealth received an additional $\$ 5.286$ billion in federal American Rescue Plan Act (ARPA) funds, of which $\$ 4.892$ billion was transferred to the newly established Federal COVID-19 Response Fund (a budgetary fund, subject to appropriation) and carried forward for allocation in FY22, $\$ 109$ million was distributed to certain cities and towns to equalize COVID-19 aid under the CARES Act, $\$ 10$ million was allocated to the Lottery for a program to encourage COVID-19 vaccinations, $\$ 75$ million was transferred to the COVID-19 Emergency Paid Sick Leave Fund, and $\$ 200$ million remained in the Federal Grants Fund for spending on other COVID-19 relief programs. In addition to the CARES Act and ARPA funding, approximately $\$ 1.314$ billion in coronavirus-related expenses were incurred by programs in the Commonwealth's non-budgetary Federal Grants Fund.

The table on the following page, Non-Budgeted Special Revenue Funds - Operations, summarizes the FY21 nonbudgeted funds. A Statement of Revenues, Expenditures and Changes in Fund Balance is presented in a table within this report for each of the individual non-budgeted funds in the financial section of this report. The table includes the State Lottery Funds, where Lottery revenues and expenditures occur prior to Lottery profits being transferred to the General Fund to reimburse it for local aid and other appropriations. The $\$ 257$ million FY21 operating deficit in the non-budgeted funds is primarily due to the fact that the Coronavirus Relief Fund spent down revenues that it received in FY20.

## Non-Budgeted Special Revenue Funds - Operations

## (Amounts in thousands)

|  | 2021 |  | 2020 |  |

| Ending fund balance |  | 4,249,034 | \$ | 4,506,466 |

In FY21, $\$ 80$ million of the Commonwealth's federal transportation funds were used to repay prior year expenditures, which were financed through Federal Grant Anticipation Notes (GANs). In addition, approximately $\$ 33$ million in interest payments for the GANs were funded by a General Fund appropriation.

The following chart, Non-Budgeted Special Revenue Funds - Fund Balance, shows the combined fund balance in the Non-Budgeted Special Revenue funds for the past five years.

## Non-Budgeted Special Revenue Funds - Fund Balance <br> (Amounts in millions)

Individual non-budgeted funds that represent approximately $78 \%$ of total non-budgeted fund FY21 year-end balances include:

- $\quad \$ 1.159$ billion - Massachusetts Transportation Trust Fund;
- $\$ 476$ million - Coronavirus Relief Fund;
- $\$ 329$ million - Central Artery/Tunnel Project Repair and Maintenance Trust Fund;
- $\$ 222$ million - Enhanced 911 Fund;
- $\quad \$ 194$ million - Convention and Exhibition Center Fund;
- $\$ 159$ million - Substance Use Disorder Federal Reinvestment Trust Fund;
- $\quad \$ 138$ million - Medical Assistance Trust Fund
- $\$ 122$ million - MassHealth Delivery System Reform Trust Fund;
- $\quad \$ 110$ million - Commonwealth Care Trust Fund;
- $\$ 88$ million - Grant Anticipation Note Trust Fund;
- $\quad \$ 77$ million - Health Safety Net Trust Fund;
- $\quad \$ 75$ million - COVID-19 Emergency Paid Sick Leave Trust Fund
- $\quad \$ 88$ million - Regional Greenhouse Gas Initiative (RGGI) Auction Trust Fund;
- $\quad \$ 61$ million - Workforce Training Trust Fund;
- $\$ 66$ million - Community Preservation Trust Fund;
- $\quad \$ 42$ million - Debt and Long-Term Liability Reduction Trust Fund;
- $\$ 31$ million - Community Mitigation Fund;
- $\quad \$ 20$ million - Race Horse Development Trust Fund;
- $\$ 20$ million - Workforce Competitiveness Trust Fund;
- $\quad \$ 19$ million - Child Support Enforcement Fund;
- $\quad \$ 19$ million - Housing Preservation and Stabilization Trust Fund; and
- $\quad \$ 10$ million - Department of Industrial Accidents Special Fund;

In FY21, three non-budgeted special revenue funds had operating deficits in excess of $\$ 10$ million. These were the , the Massachusetts Coronavirus Relief Fund with a deficit of $\$ 1.224$ billion (where revenue was received from the federal government in FY20, but most spending occurred in FY21), the Massachusetts Convention and Exhibition Center Fund, with a deficit of $\$ 120$ million (due to payment of debt service from previously collected revenue, and the Commonwealth Care Trust Fund, which had a deficit of $\$ 38$ million.

As noted in previous years, the Government Land Bank Fund has a continuing structural fund deficit. The FY21 deficit balance of approximately $\$ 35$ million remains an unbudgeted drain on the Commonwealth's cash pool. While steps have been taken to stop the growth in this deficit, the Fund should be abolished and the deficit transferred to the General Fund. More consolidation and elimination is needed for the non-budgeted special revenue funds generally.

## The Capital Projects Funds

The purpose of the capital project funds is to account for the construction or acquisition of capital assets. The Governor may propose capital outlay budgets which, upon enactment by the Legislature and approval by the Governor, become capital outlay acts. Capital outlay acts financed through the sale of debt require a two-thirds vote of the Legislature. Numerous acts may be combined for reporting in an individual capital projects fund, but each act is accounted for separately within the fund. These accounts record authorizations for expenditures in itemized capital appropriation accounts and equivalent authorizations to issue bonds or notes.

The structure of these funds is such that each capital outlay authorization is in balance, creating authorization for inflows (which may be from sales of bonds, federal reimbursements or other revenues) and expenditures. Imbalances due to timing differences develop when the expenditure precedes the inflow of funds from the sale of bonds or federal reimbursements. Due to restrictions imposed by federal tax arbitrage rules, tax exempt bonds are not routinely sold in anticipation of expenditures.

To fund the FY21 capital budget, the Commonwealth borrowed by issuing $\$ 2.382$ billion in new money long-term bonds; $\$ 1.982$ billion of which was general obligation debt and $\$ 400$ million was special obligation debt secured by motor fuel taxes and motor vehicle license and registration fees. In addition, the Commonwealth issued $\$ 1.766$ billion in debt to refund already existing obligations, taking advantage of continued low interest rates in FY21.

The following graph Capital Projects Funds - Fund Balance/(Deficit) shows the combined fund balance in the capital projects funds for the past five years. Typically, the combined ending balance in the capital projects funds is negative, as capital spending occurs prior to bonds being issued by the Commonwealth. At the end of FY21, the capital projects funds had a $\$ 995$ million deficit balance (including $\$ 841$ million in accounts payable), as the

Commonwealth had not yet reimbursed itself for capital spending that it typically funds in arrears through subsequent bond issues.

Capital Projects Funds - Fund Balance/(Deficit)
(Amounts in millions)

The following table, Capital Projects Funds - Operations, includes the FY21 capital projects funds, summarized and compared to FY20. Financial statements for each of the individual funds are included in the financial section of this report.

## Capital Projects Funds - Operations

(Amounts in thousands)

| (Amounts in thousands) |
| :--- | :--- | ---: | :--- |

The Administration oversees a coordinated fiscal strategy for the management of the capital projects funds. This strategy includes a five-year capital budget linked to debt management and capital management. The focus of this strategy is to manage capital spending within outstanding debt levels and debt service obligations the Administration considers appropriate for the Commonwealth. An important part of the strategy is to control capital spending within an administrative "cap."

During FY21, significant capital spending included:

- $\quad \$ 649$ million in support for rail enhancement projects and MBTA projects, including investment in reducing the MBTA's State of Good Repair backlog, acquisition of new vehicles for the Red and Orange Lines, the Green Line extension, and South Coast Rail;
- $\$ 433$ million for state-owned facilities including higher education campuses, trial courts, and state health care facilities;
- $\$ 273$ million for affordable housing development and public housing;
- $\$ 208$ million in Chapter 90 reimbursements to municipalities for local road and bridge projects;
- $\quad \$ 119$ million in spending for the Department of Conservation and Recreation, including improvements to roadways, parks, and for environmental spending;
- $\$ 111$ million for the MassWorks economic development initiative, which provides infrastructure grants to municipalities;
- $\quad \$ 51$ million to directly address climate change, including funds for repairing and rebuilding seawalls and inland dams, helping cities and towns plan for and protect against the impact of a changing climate, and energy efficiency improvements in public housing, some of which are also included in categories above;
- $\quad \$ 43$ million for the Life Sciences Capital program, providing grants to promote job growth, business expansion, discovery, and innovation in the industry and the Commonwealth economy;
- $\quad \$ 22$ million for the Food Security Infrastructure program, which provides grants to enhance food security for the people of the Commonwealth and to enhance access and production of local food;
- $\quad \$ 20$ million for construction and planning grants from the Board of Library Commissioners to public library systems;
- $\$ 19$ million for the Workforce Mobility programs, providing software and device deployment to support the ability to securely deliver government services including from remote work locations;
- $\quad \$ 17$ million for the Workforce Skills capital grants to educational institutions;
- $\$ 10$ million in bridge repair projects under the Commonwealth's Municipal Bridge Program; and
- $\quad \$ 8$ million for aid to towns in western Massachusetts to extend high-speed broadband networks.

Some capital spending originally planned for FY20 was delayed due to the COVID-19 pandemic and was expended in FY21.

## The Non-Appropriated Funds of Higher Education

The statistical section of this SBFR includes data on the financial operations of the non-appropriated funds of the 25 institutions of higher education as reported on MMARS. Each institution of higher education is authorized and directed in its enabling statute to collect, retain and expend certain fees, rents, sales, donations, federal financial participation and other types of revenue through campus-based systems. These financial resources are integral parts
of the total financial activity of each campus. They also represent resources in addition to amounts made available from Commonwealth appropriations.

The following table, Non-Appropriated Funds of Higher Education - Operations, includes the FY21 activity in the higher education funds, summarized and compared to FY20. Financial statements for each of the individual funds are included in the statistical section of this report.

## Non-Appropriated Funds of Higher Education - Operations (Amounts in thousands)

|  | 2021 |  | 2020 |  |
| :---: | :---: | :---: | :---: | :---: |
| Beginning fund balance | \$ | 2,833,293 | \$ | 2,374,986 |

# INDEPENDENT ACCOUNTANTS' REVIEW REPORT 

Mr. William McNamara, Comptroller<br>Commonwealth of Massachusetts

We have reviewed the accompanying combined financial statements-statutory basis of the Commonwealth of Massachusetts as of June 30, 2021, and the related notes to the combined financial statements-statutory basis as listed in the accompanying table of contents. A review includes primarily applying analytical procedures to management's financial data and making inquiries of the Commonwealth of Massachusetts' management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the combined financial statements-statutory basis as a whole. Accordingly, we do not express such an opinion.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these combined financial statements-statutory basis in accordance with Section 12 of Chapter 7A of the Massachusetts General Laws, as amended, and the budgetary principles of the Commonwealth of Massachusetts (hereinafter referred to as the Statutory Basis of Accounting) as described in Notes 1 and 2, and is not intended to be a presentation in accordance with accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of combined financial statements-statutory basis that are free from material misstatement whether due to fraud or error.

## Accountant's Responsibility

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the combined financial statements-statutory basis for them to be in accordance with the Statutory Basis of Accounting. We believe that the results of our procedures provide a reasonable basis for our conclusion.

## Accountant's Conclusion

Based on our review, we are not aware of any material modifications that should be made to the accompanying combined financial statements-statutory basis in order for them to be in accordance with the statutory basis of accounting as described in Notes 1 and 2.

## Basis of Accounting

We draw attention to Notes 1 and 2 of the financial statements, which describe the basis of accounting. The financial statements are prepared in accordance with the Commonwealth of Massachusetts' Statutory Basis of Accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to comply with Section 12 of Chapter 7A of the Massachusetts General Laws, as amended, and the budgetary principles of the Commonwealth of Massachusetts. Our conclusion is not modified with respect to this matter. As a result, the financial statements may not be suitable for another purpose.

## Other Matters

The combining and individual fund financial statements-statutory basis and supplemental information are presented for the purpose of additional analysis and are not required parts of the combined financial statements-statutory basis. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the combined financial statements-statutory basis. Such information has been subjected to the review procedures applied in our review of the combined financial statements-statutory basis. We are not aware of any material modifications that should be made to the combining and individual fund financial statements-statutory basis and supplemental information. We have not audited the combining and individual fund financial statements-statutory basis and supplemental information and do not express an opinion on such information.

The introductory and statistical sections have not been subjected to the review procedures applied in our review of the combined financial statements-statutory basis. Such information is the responsibility of management. We have not audited or reviewed such information and we do not express an opinion, a conclusion, nor provide any assurance on such information.

## Restriction on Use

This report is intended solely for the information and use of management and elected and appointed officials of the Commonwealth of Massachusetts and is not intended to be and should not be used by anyone other than these specified parties.

## 1. FINANCIAL STATEMENT PRESENTATION

## A. INTRODUCTION

The accompanying combined financial statements (Statutory Basis Financial Report or SBFR) of the Commonwealth of Massachusetts (the Commonwealth) are presented in accordance with the requirements of Section 12 of Chapter 7A as amended by Section 4 of Chapter 88 of the Acts of 1997 of the Massachusetts General Laws, as amended most recently by Chapter 26, Section 4 of the Acts of 2009. The Office of the Comptroller also publishes the Commonwealth's Annual Comprehensive Financial Report (ACFR), which is prepared in accordance with Generally Accepted Accounting Principles (GAAP) in the United States of America for governments.

The SBFR includes the budgeted, non-budgeted, special revenue, and capital projects funds of the Commonwealth, as recorded by the Office of the Comptroller in compliance with Massachusetts General Laws (MGL) and in accordance with the Commonwealth's budgetary principles.

The SBFR's financial statements are not intended to include independent authorities, non-appropriated funds of higher education, or other organizations included in the Commonwealth's reporting entity as it would be defined under GAAP.

## B. GOVERNMENTAL FUND TYPES

The fund types are organized as follows:
Governmental fund types account for the general governmental activities of the Commonwealth.
Budgeted Funds - are the primary operating funds of the Commonwealth. They account for all budgeted governmental transactions, i.e., those subject to the annual appropriation process. Major budgeted funds include the General, Commonwealth Transportation and Stabilization Funds, and the newly created Federal COVID-19 Response Fund, which are identified by the Comptroller as the operating funds of the Commonwealth. In addition, there are 12 other budgeted funds, the Intragovernmental Services Fund, the Inland Fisheries and Game Fund, the Marine Recreational Fisheries Development Fund, the Underground Storage Tank Petroleum Product Cleanup Fund, the Public Safety Training Fund, the Local Capital Projects Fund, the Gaming Local Aid Fund, the Education Fund, the Local Aid Stabilization Fund, the Gaming Economic Development Fund, the Marijuana Regulation Fund, and the Behavioral Health Outreach Access and Support Trust Fund. At the close of FY21 the Legislature also created the budgeted Transitional Escrow Fund, into which was transferred the FY21 consolidated net surplus for appropriation in FY22.

Non-Budgeted Special Revenue Funds - are established by law to account for revenue sources that have been segregated from the budgeted funds to support specific governmental activities such as federal grants, the operations of the state lottery and funds related to the Massachusetts Gaming Commission.

Capital Projects Funds - account for financial resources used to acquire or construct major capital assets and to finance local capital projects. These resources are derived almost entirely from proceeds of bonds and other obligations, which are generally received after related expenditures have been incurred, operating transfers authorized by the Legislature, and from federal reimbursements. Deficit balances in the capital projects funds represent amounts to be financed, primarily through future bond sales.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## A. STATUTORY BASIS OF ACCOUNTING

The SBFR is prepared from the Commonwealth's books and records and other official reports that are maintained on the basis of accounting used in the preparation of the Commonwealth's legally adopted annual budget (statutory basis). The statutory basis emphasizes accountability and budgetary control of appropriations. The SBFR is not intended to present the Commonwealth's financial condition and results of operations in conformity with GAAP. Under the statutory basis of accounting, revenues generally are recognized when cash deposits are received by the Treasury. However, revenues receivable for federal grants and reimbursements generally are recognized when related expenditures are incurred, provided that the related revenues are received by the Commonwealth by August 31, the end of the statutory accounts receivable period. For FY20, the statutory accounts receivable definition was modified by the Massachusetts Legislature in response to the Coronavirus pandemic and the Department of Revenue's granting of payment extensions to individual income taxpayers from April 15, 2020 to July 15, 2020, which resulted in the deferral of more than $\$ 2.3$ billion in net tax revenue (payments minus refunds) from the April through June 2020 period to July and August 2020. The Legislature required that the Comptroller record these income tax payments as statutory receivables (i.e., FY20 revenue) for the purpose of calculating the FY20 consolidated net surplus. In addition, the Legislature modified the statutory receivable definition to include an estimate of the reimbursements to be received from the Federal Emergency Management Agency (FEMA) after June 30, 2020 for coronavirus-related expenses incurred during FY20; those estimated reimbursements totaled $\$ 350$ million and were recorded in the FY20 financial statements. For FY21, the Commonwealth reverted to its traditional statutory receivable definition, as described above.

Amounts due from political subdivisions of the Commonwealth are recognized when considered measurable and available. These are largely payments from municipalities reimbursing for pension costs paid by the Commonwealth on their behalf, authorized under Section 3(8)c of Chapter 32 of the MGL, provided that the revenues are received by August 31.

Under the statutory basis of accounting, expenditures are generally recorded when the related cash disbursement occurs. At year-end, payroll is accrued and payables are recognized, to the extent of approved encumbrances, for goods or services received by June 30, and payment made by August 31. Costs incurred under the federallysponsored Medicaid program, amounts required to settle claims and judgments against the Commonwealth, and certain other liabilities are not recognized until they are encumbered or otherwise processed for payment. In some cases the liabilities will have been incurred prior to June 30, but recorded when paid in the following fiscal year, not as statutory payables.

The accounting policies followed in preparing the accompanying statutory basis financial report are described in the remainder of this section.

## B. CASH, SHORT-TERM INVESTMENTS AND INVESTMENTS

The Commonwealth follows the practice of pooling cash and cash equivalents, except for balances in the Commonwealth Stabilization Fund, which are sequestered. Cash equivalents consist of short-term investments with an original maturity of three months or less and are stated at cost. Interest earned on pooled cash is allocated to the General Fund and, when so directed by law, to certain other governmental funds.

During FY20, the Commonwealth reported approximately $\$ 1.5$ billion in the budgeted funds as a deficiency in cash and short-term investments. This was primarily due to a change in the filing deadline for the state personal income tax payments with returns and estimated payments from April 15, 2020 to July 15, 2020 that was implemented by the Department of Revenue in response to the COVID-19 pandemic, aligning the Commonwealth's deadline with the delayed deadline implemented by the Internal Revenue Service for federal income taxes. Because this payment delay resulted in a shift in cash payments from the fourth quarter of FY20 (April through June 2020) to July and August 2020, the Legislature enacted a provision that required the Commonwealth to record an FY20 statutory receivable (accrued revenue) for the delayed income tax as of June 30, 2020 in these financial statements. As a result, the general fund reported a deficit cash balance in FY20 and a statutory receivable of approximately \$2.33
billion attributable to personal income taxes received in July and August 2020. For financial reporting purposes, any negative cash balance is reclassified to a liability on the balance sheet.

The Office of the Treasurer and Receiver-General (Treasury) manages the Commonwealth's short-term external mixed investment pool, the Massachusetts Municipal Depository Trust (MMDT). MMDT is comprised of two portfolios, a Cash Portfolio and a Short Term Bond Fund. The Cash Portfolio is a money-market-like investment pool; its investments are carried at amortized cost, which approximates fair value. The Short Term Bond Fund investments are carried at fair value.

Investors in MMDT are not allowed to overdraw their shares. For a complete copy of MMDT's separately issued financial statements, please contact the Office of the State Treasurer's Cash Management Department, at (617) 367-9333. The statements can also be downloaded from the Cash Management section of the Office of the State Treasurer's website at www.mass.gov/treasury. MGL Chapter 29, Section 38 enumerates the Commonwealth's investment policy for non-pension assets.

## C. DEDICATED REVENUE AND PLEDGES

The Commonwealth has a number of bond programs in which bonds are secured by a pledge of dedicated revenues provided to bondholders, pursuant to trust agreements, as well as pledges of revenue for general operations. Like the Commonwealth, certain state authorities have also issued special obligation bonds secured by specific Commonwealth revenues. These other authorities' debts are not included in the SBFR, but are included in the ACFR.

All federal highway reimbursements are dedicated to funding the principal portion only of federal grant anticipation notes (GANs) issued in fiscal years 2011, 2014, 2015, 2017 and 2018. The Commonwealth had no GANs in FY21. As of June 30, 2021, total principal remaining to be paid was approximately $\$ 583$ million. Maturities are from FY22 through FY27. Debt service paid during FY21 was approximately $\$ 113$ million.

In FY21, the Commonwealth issued approximately $\$ 400$ million in new money special obligation bonds under the Rail Enhancement Program (REP) and $\$ 289$ million to refund special obligation bonds under the Accelerated Bridge Program (ABP). These bonds mature from FY22 to FY49 and are secured by a senior lien on 17 cents of the total 24 cents per gallon gasoline tax, the full 24 cents per gallon of special fuels taxes (comprised primarily of taxes on diesel fuel), and the full $19.1 \%$ of the average price per gallon tax on liquefied natural gas and all Registry of Motor Vehicle fees deposited into the Commonwealth Transportation Fund (CTF). These bonds also have a subordinate lien on 6.86 cents of the 24 cent per gallon gasoline tax not included in the senior lien. As of June 30, 2021, approximately $\$ 1.555$ billion and $\$ 1.637$ billion in principal was outstanding on the ABP and REP bonds, respectively, and approximately $\$ 965$ million and $\$ 1.497$ billion of interest (net of the federal subsidy) was expected to be paid through maturity related to the ABP and REP bonds, respectively.

The ABP projected interest costs are net of federal subsidies under the Build America Bond (BABs) program. BABs is a temporary program under which the Commonwealth and other state and local governments issued taxable bonds in calendar 2009 and 2010 in return for a subsidy from the federal government equal to $35 \%$ to $45 \%$ (depending on whether the proceeds are used for projects in economically distressed areas) of the interest costs on the bonds.

Other special obligation bonds for highway construction purposes are secured by a pledge of 6.86 cents of the 24 cent per gallon gasoline tax, with no new debt issued during FY21. As of June 30, 2021, bonds secured by these pledged funds totaled approximately $\$ 28$ million of principal. These bonds were issued in multiple series and those outstanding mature in FY22. Principal and interest paid during FY21 amounted to approximately $\$ 27$ million and $\$ 3$ million, respectively. The lien on these bonds has been closed, meaning that no additional new-money bonds can be issued against these revenues under this trust agreement.

A portion of the Commonwealth's receipts from the sales tax (other than the tax on meals) is dedicated through nonbudgeted special revenue funds to the Massachusetts Bay Transportation Authority (MBTA) and the Massachusetts School Building Authority (MSBA). The amount dedicated to the MBTA is the amount raised by a $1.0 \%$ sales tax (not including meals), subject to an inflation-adjusted floor. A comparable amount, though without the floor, is
dedicated to the MSBA beginning in fiscal 2010, with lesser amounts having been dedicated to the MSBA from fiscal 2005 through fiscal 2009.

Legislation approved by the Governor on October 31, 2014 increased the amount statutorily required to be credited to the MBTA by $\$ 160$ million annually, starting in fiscal 2015 . The $\$ 160$ million increase in the dedicated sales tax revenue amount and the amount included in the inflation-adjusted floor were intended to replace the $\$ 160$ million annual state appropriation the MBTA received from fiscal 2010 through fiscal 2014. In FY21, total dedicated sales tax revenue that was directed to the MBTA was approximately $\$ 1.261$ billion. Dedicated revenues to the MBTA increase by the lesser of the annual increase in the Boston consumer price index or prior calendar year annual sales taxes, with a floor of $0 \%$ and a ceiling of $3.0 \%$.

The MSBA also receives a pledge starting in FY11 of a $1.0 \%$ sales tax (not including meals) but with no annual floor or ceiling. In FY21, approximately $\$ 1.101$ billion of the dedicated sales tax revenue stream was directed to the MSBA.

The Commonwealth has also pledged sales tax revenue and rooms tax surcharges from areas contiguous to convention centers and the Worcester DCU Arena and Convention Center to support such centers' operations. As of June 30, 2021, taxes within the Convention Center districts support approximately $\$ 480$ million of outstanding principal and approximately $\$ 205$ million of interest on debts related to these Convention Centers. Taxes collected in FY21 were approximately $\$ 46$ million, while debt service on the bonds was approximately $\$ 52$ million.

The Transportation Modernization Act of 2009, as amended, eliminated the pledges of sales tax revenue to MassDOT through the Commonwealth Transportation Fund (CTF). Beginning in FY14, motor vehicle sales tax collections were shifted from the General Fund to the CTF while also eliminating the $0.385 \%$ pledge of regular and meals sales tax. During FY21, approximately $\$ 577$ million in motor vehicle sales tax revenue was transferred to MassDOT. From the Commonwealth Transportation Fund, $\$ 127$ million was dedicated to funding the operations of the MBTA while an additional $\$ 90$ million was dedicated to funding the operations of the regional transit authorities. These amounts are transferred through the CTF.

## D. INTERFUND/INTRAFUND TRANSACTIONS

Transactions of a buyer/seller nature between departments within a fund are not eliminated.

Transfers in and out net to approximately $\$ 1$ million due to higher education non-appropriated fund activity, which is not included in the combined statements - statutory basis.

## E. CURRENT EMPLOYEE BENEFITS

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements and state laws. Upon retirement, termination or death, certain employees are compensated for unused vacation and sick leave (subject to certain limitations) at their current rate of pay (not accrued on a statutory basis).

## F. FRINGE BENEFIT COST RECOVERY

The Commonwealth pays the fringe benefit costs of its employees and retirees through the General Fund. These fringe benefits include the costs of employees' health insurance, pensions, unemployment compensation, and other costs necessary to support the state work force. As directed by Chapter 29, Sections 5D and 6B(f) of the MGL, these costs are assessed to other funds based on their payroll costs, net of credits for direct payments.

Since these fringe benefit costs and pensions are not appropriated in the budget, the required assessment creates a variance between budget and actual expenditures at year-end. The fringe benefit cost recoveries of approximately $\$ 453$ million in the General Fund results from cost assessments from the other budgeted funds, non-budgeted special revenue funds, capital projects funds, non-appropriated activities of higher education, expendable trust, and agency funds.

## G. LOTTERY REVENUE AND PRIZES

Ticket revenues are recognized when sold and prizes awarded by the Massachusetts State Lottery Commission are recognized as drawings are held. Games expenditures are accrued at year-end only for open jackpots for Mega Millions, Powerball and Megabucks.

## H. RECEIVABLES

Reimbursements due to the Commonwealth for its expenditures on federally funded reimbursement and grant programs are reported as "Due from federal government." Other receivables include reimbursement of fringe benefit assessments from authorities and the institutions of higher education along with other departmental receivables.

## I. DUE FROM CITIES AND TOWNS

"Due from Cities and Towns" represents reimbursements due to the Commonwealth for its expenditures on certain programs for the benefit of cities and towns.

## J. RISK MANAGEMENT

The Commonwealth is self-insured for state employees' workers' compensation, casualty, theft, tort claims and other losses. Such liabilities are not recognized in the governmental funds on the statutory basis until encumbered and/or processed for payment. For employees' workers' compensation, the Commonwealth assumes the full risk of claims filed under a program managed by the Human Resources Division.

For personal injury or property damages, Chapter 258 of the MGL limits the risk assumed by the Commonwealth to $\$ 100,000$ per occurrence, in most circumstances.

The Group Insurance Commission administers contributory health care and other insurance programs for the Commonwealth's employees and retirees.

## K. ENCUMBRANCES

Encumbrance accounting is utilized in the Governmental Funds as a significant aspect of budgetary control. The full amounts of purchase orders, contracts and other commitments of appropriated resources are encumbered and recorded as deductions from appropriations prior to actual expenditure, ensuring that such commitments do not exceed appropriations. Encumbrances outstanding at year-end for goods or services received on or before June 30, but paid after, are reported as expenditures and statutory basis liabilities as a component of accounts payable.

## L. FUND BALANCES

Fund balance has been reserved as follows:
"Reserved for continuing appropriations" - are unexpended amounts in appropriations, which the Legislature has specifically authorized to be carried into the next fiscal year.
"Reserved for Commonwealth Stabilization" - are amounts set aside in the Commonwealth Stabilization Fund in accordance with Section 5C of Chapter 29 of the MGL.
"Reserved for debt service" - are amounts held by fiscal agents or the Commonwealth to fund future debt service obligations.
The remainder of fund balance is unreserved and undesignated and consists of cumulative surplus or deficits of the fund not otherwise designated.

## M. TOTAL COLUMN-MEMORANDUM ONLY

Total and subtotal columns on the combined financial statements - statutory basis are captioned "Memorandum Only" to indicate that they are presented only to facilitate financial analysis. Data in these columns do not present consolidated financial position, results of operations, or changes in financial position. Interfund eliminations have not been made in the aggregation of these data.

The financial statements include certain prior year summarized comparative information in total but not by fund. Such information does not include sufficient detail to constitute a full comparative presentation. Accordingly, such information should be read in conjunction with the Commonwealth's financial statements for the year ended June 30, 2020, from which the summarized information was derived.

## N. ESTIMATES

The preparation of the SBFR requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures at the date of the financial report. Estimates also affect the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

## 3. BUDGETARY CONTROL

State finance law requires that a balanced budget be approved by the Governor and the Legislature. The Governor presents an annual budget to the Legislature, which includes estimates of revenues and other financing sources and recommended expenditures and other financing uses. The Legislature, which has full authority to amend the budget, adopts an expenditure budget by appropriating monies at the individual appropriation account level in an annual appropriations act.

Before signing the appropriations act, the Governor may veto or reduce any specific item, subject to legislative override. Further changes to the budget established in the annual appropriations act may be made via supplemental appropriation acts or other legislative acts. These must also be signed by the Governor and are subject to the line item veto.

In addition, MGL authorizes the Secretary of Administration and Finance, with the approval of the Governor, upon determination that available revenues will be insufficient to meet authorized expenditures, to withhold allotments of appropriated funds, which effectively reduce the affected accounts' expenditure budgets.

The majority of the Commonwealth's appropriations are non-continuing accounts which lapse at the end of each fiscal year. Others are continuing accounts for which the Legislature has authorized that an unspent balance from the prior year be carried forward and made available for spending in the current fiscal year. In addition, the Legislature may direct that certain revenues be retained and made available for spending within an appropriation. Fringe benefits, pension costs, and certain other costs that are mandated by state finance law are not itemized in the appropriation process and are not separately budgeted.

Because revenue budgets are not updated subsequent to the original appropriation act, the comparison of the initial revenue budget to the subsequent, and often modified, expenditure budget can be misleading. Also, these financial statements portray fund accounting with gross inflows and outflows, thus creating a difference from separately published budget documents, which eliminate some interfund activity. In conducting the budget process, the Commonwealth excludes those interfund transactions that by their nature have no impact on the combined fund balance of the budgeted funds.

Generally, expenditures may not exceed the level of spending authorized for an appropriation account. However, the Commonwealth is required to pay certain Medicaid expenses regardless of appropriations, due to superseding federal law.

The FY04 General Appropriation Act (Chapter 26, Section 167 of the Acts of 2003) amended Section 9C, of Chapter 29, directing the Governor to notify the Legislature in writing as to the reasons for and the effect of any
reductions in spending. This proposal must be delivered to the Legislature 15 days before any reductions take effect. Alternatively, funds from the Stabilization Fund may be used to cure the deficiency, subject to appropriation.

The following table summarizes budgetary activity for FY21 (amounts in thousands):

|  | Revenues | Expenditures |
| :---: | :---: | :---: |
| General Appropriation Act, Chapter 41 of the Acts of 2020: |  |  |
| Direct appropriations. | \$ 43,641,100 | \$ 45,730,612 |
| Estimated revenues, transfers, retained revenue appropriations, and appropriations carried forward from FY2020 | - | 2,166,957 |
| Total original budget | 43,641,100 | 47,897,569 |
| Supplemental Acts of 2020: |  |  |
| Chapter 316 | - | 47 |
| Supplemental Acts of 2021: |  |  |
| Chapter 29 | - | 259,008 |
| Chapter 76 | - | 333,575 |
| Total budgeted revenues and expenditures per Legislative action. | - | 592,631 |
| Plus: Pension contributions and revenue authorized in the General Appropriation Act, and other transfers of revenue and spending | 3,115,177 | 4,393,419 |
| Budgeted revenues and expenditures as reported | \$ 46,756,277 | \$ 52,883,619 |

The following table identifies the interfund activity from budgeted sources and uses to reconcile forecasts prepared during the budget process to the results presented in these statements (amounts in thousands):

|  | Revenuesand OtherFinancing Sources |  | $\begin{aligned} & \text { Expenditures } \\ & \text { and Other } \\ & \text { Financing } \\ & \text { Uses } \\ & \hline \end{aligned}$ |  |
| :---: | :---: | :---: | :---: | :---: |
| Actual as presented in the combined budget and actual statement - statutory basis | \$ | 59,982,530 | \$ | 52,178,558 |
| Adjustments to revenues and expenditures: |  |  |  |  |
| Transfer of revenues to the Intragovernmental Service Fund |  | $(441,643)$ |  | $(441,643)$ |
| Adjustments to other financing sources and uses: |  |  |  |  |
| Fringe benefit cost assessments |  | $(17,029)$ |  | $(17,029)$ |
| Transfer of surplus revenues from the Intragovernmental Service Fund to the General Fund |  | $(13,580)$ |  | $(13,580)$ |
| RMV license plates |  | $(4,394)$ |  | $(4,394)$ |
| Transfers from General Fund to the Stabilization Fund |  | $(1,098,140)$ |  | $(1,098,140)$ |
| CNS Transfers from budgeted funds to the Transitional Escrow Fund |  | (1,460,324) |  | $(1,460,324)$ |
| Other fund deficit support |  | $(30,068)$ |  | $(30,068)$ |
| Other |  | $(34,914)$ |  | $(34,914)$ |
| Adjusted actuals pertaining to the budgeted funds | \$ | 56,882,438 | \$ | 49,078,466 |

The section divider for the budgeted funds contains a list of budgeted funds grouped by categories.
The Office of the Comptroller has the responsibility to ensure that budgetary control is maintained on an individual appropriation account basis. Budgetary control is exercised through the state accounting system, the Massachusetts Management Accounting and Reporting System (MMARS). Encumbrances and expenditures are not allowed to exceed the appropriation account's spending authorization.

## 4. MASSACHUSETTS DEPARTMENT OF TRANSPORTATION (MassDOT)

MassDOT is a legally separate entity from the Commonwealth. MassDOT operations are reported separately in the non-budgeted special revenue funds section of this report, which includes all of the Commonwealth's highway and turnpike-related operations as well as the activity of the Registry of Motor Vehicles. MassDOT capital spending and revenue activity are reported in the capital funds section of this report, in the General Capital Projects Fund, Central Artery Statewide Road and Bridge Infrastructure Fund, the Highway Capital Projects Fund, and the Federal Highway Construction Program Fund.

MassDOT financial activity is included in this report in order to reflect all activity reported on the Commonwealth's MMARS accounting system. For the SBFR, MassDOT is treated as an agency or department of the Commonwealth, as specified in Massachusetts General Laws. However, for GAAP reporting purposes, as reflected in the Commonwealth's ACFR, MassDOT is reported as a discretely presented component unit of the Commonwealth.

## 5. INDIVIDUAL FUND DEFICITS

The following non-budgeted special revenue and capital projects funds are included in the combined totals and have individual fund deficits at June 30, 2021, as follows (amounts in thousands) (excludes MassDOT):

None of the funds detailed above were in deficit due to finance-related contractual provisions and all were allowed to be in deficit by MGL.

## 6. MEDICAID COSTS

Approximately $43.6 \%$ of the Commonwealth's budgeted fund spending for programs and services is devoted to Medicaid. It is the largest and has been one of the fastest growing items in the Commonwealth's budget. For the fiscal year ended June 30, 2021, the General Fund includes approximately $\$ 18.122$ billion in expenditures for Medicaid claims. The combined financial statements - statutory basis includes Medicaid claims processed but unpaid at June 30, 2021 of approximately $\$ 97$ million as accounts payable.

## THE BIG PICTURE: HISTORICAL CONTEXT

Commonwealth Transportation Fund Fund Balance (deficit) at End of Year Last Ten Fiscal Years (Amounts in \$ Millions)

## Individual Budgeted Funds

Budgeted funds are those funds subject to appropriation in either the annual General Appropriation Act (GAA) or other appropriations bills. Unless otherwise specified, budgeted funds are also subject to Section 5C of Chapter 29 of the Massachusetts General Laws (MGL) which defines the "consolidated net surplus" calculation (and determines whether the annual budget is in balance) as well as year-end transfers to eliminate deficits in budgeted funds.

## MAJOR BUDGETED FUNDS:

The General Fund - The General Fund is the Commonwealth's primary Governmental Fund. All governmental activities not specifically directed to another fund are accounted for in the General Fund. As a result, most budgeted expenditures of the Executive secretariats, the Legislature, constitutional offices, Judiciary, institutions of higher education and independent commissions are paid from the General Fund. It similarly receives a significant portion of sales, individual income and corporate taxes and the full amount of most other governmental taxes.

Commonwealth Transportation Fund - to account for revenues from motor fuels taxes and all fees and fines received by the Registry of Motor Vehicles relating to the use and operation of motor vehicles and trailers. Spending is for debt service on general and special obligation debt, as well as for amounts, subject to appropriation, to fund the programs and services of the Massachusetts Department of Transportation.

The Commonwealth Stabilization Fund - to account for amounts calculated in accordance with state finance law and to maintain a reserve to enhance the Commonwealth's fiscal stability. Tax revenues from certain lottery winners selling their stream of future winnings in exchange for current payments are recorded in this fund. In addition, transfers are required for fiscal year capital gains tax revenues exceeding $\$ 1$ billion (adjusted annually for economic growth), judgments and settlements of more than $\$ 10$ million that exceed the previous 5 years average of judgments and settlements, and a portion of the gaming tax revenues. Any excess undesignated fund balance as calculated by Section 5C of Chapter 29 of the MGL, are also transferred to this fund.

## ADMINISTRATIVE CONTROL FUND:

This fund accounts for the revenues generated by certain administrative functions of government, for which the Legislature has required a separate fund be established.

Intragovernmental Service Fund - to account for the charges of any state agency for services provided to another state agency.

Transitional Escrow Fund - to account for an amount equal to the fiscal year 2021 consolidated net surplus. This Fund shall not be subject to section 5C of Chapter 29 of the General Laws. The fund shall expire on June 30, 2022, and transfer the remaining unexpended balance to the Stabilization Fund established in section 2 H of chapter 29 of the General Laws.

## BUDGETED ENVIRONMENTAL FUNDS:

Inland Fisheries and Game Fund - to account for revenues from license and permit fees for inland fishing, hunting, trapping, and sporting licenses and revenue producing stamps or the sales of land, rights and properties, gifts, interest, and federal grant reimbursements; used for developing, maintaining and operating the Division of Fisheries and Wildlife. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Marine Recreational Fisheries Development Fund - to account for salt water permit fees collected, funds, grants and gifts received as authorized, including investment income; used for development and administration of
recreational saltwater fishing improvement programs. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Underground Storage Tank Petroleum Product Cleanup Fund - to account for fees, appropriations, grants, gifts or other contributions, and investment income. Annually, the fund is to receive the first $\$ 30$ million in underground petroleum storage fees. Expenditures are to provide reimbursements for cleanup and other expenses as a result of damage caused by underground storage tanks and systems.

## OTHER BUDGETED FUNDS:

These funds account for a variety of miscellaneous taxes, fees, fines and other revenues, which are restricted to the financing of specific Commonwealth programs.

Public Safety Training Fund - to account for certain surcharge revenues imposed by MGL. Expenditures are for the instruction and recruitment of public safety personnel. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Local Capital Projects Fund - to account for funds generated by the casino license fees and by the tax imposed on revenues generated by casinos (but not the slots parlor).

Gaming Local Aid Fund - to account for gaming tax revenues imposed on casino revenues. The fund is used to finance local aid distributions to cities and towns.

Education Fund - to account for a portion of the funds generated by the tax imposed on casino revenue (but not slots parlor) revenue. $35 \%$ of the funds received shall be appropriated for higher education purposes. Any expenditures for either higher education or K-12 education from this fund are required to supplement, not offset, General Appropriation Act spending.

Local Aid Stabilization Fund - to account for funds generated by the tax imposed on casino revenues. Monies are used to supplement local aid distributions to cities and towns. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Gaming Economic Development Fund - to account for a portion of the funds generated by the tax imposed on casino (but not slots parlor) revenue. Expenditures from the are to be used to support economic development and job growth.

Marijuana Regulation Fund - to account for tax, application, civil penalties and interest revenues generated by the licensing and regulation of marijuana establishments. The fund is used to administer the operations of the Cannabis Control Commission and other departments to carry out marijuana regulations.

Behavioral Outreach, Access and Support Trust Fund - to account for appropriations, grants, gifts or other contributions, investment income, and certain Federal Financial Participation (FFP) revenues. Funds shall be used to increase access to behavioral health professionals, ensure equal access to behavioral health services, ensure a complete continuum of behavioral health services and promote awareness and encourage the use of available behavioral health services. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Federal COVID-19 Response Fund - to account for federal funds authorized under the federal legislation enacted after December 4, 2020 and in response to the COVID-19 outbreak or related economic recovery. Expenditures assist the commonwealth in its public health, community and economic recovery efforts to respond to the novel coronavirus disease outbreak.

The following funds have been enacted in legislation but had no activity in FY21 and are not presented in this report:

Temporary Holding Fund - to account for cumulative tax revenues during the fiscal year in excess of permissible tax revenues as defined in Chapter 62F, Section 6A of the MGL. The fund balance in the fund closes annually to the Stabilization Fund to the extent of expenditures from that fund. Any remaining balance transfers to the General

Fund. The mechanism transferring tax revenues to the fund was repealed effective January 1, 2013, but the fund itself was not repealed.

Tax Reduction Fund - to account for the maintenance of a reserve, which shall be used only to reduce personal income taxes.

Substance Abuse Prevention and Treatment Fund - to account for sales tax revenues (non-dedicated) collected from the sale of alcoholic beverages, with the funds used for substance abuse treatment and prevention services. In November 2010, the sales tax on alcoholic beverages was repealed via referendum, effective January 1, 2011, but the fund itself was not repealed.

International Educational and Foreign Language Grant Program Fund - to account for appropriations, bond proceeds or other monies authorized to be used to support programs and activities that advance cultural awareness, to support international education programs and promote the study of foreign languages.

Dam Safety Trust Fund - to account for all revenues generated through agreements with public or private entities for dam safety purposes, and all fines, costs, expenses and interest imposed. Revenues over $\$ 250,000$ in a fiscal year shall be credited to the General Fund.

Children and Families Protection Fund - to account for any penalties collected for violations of the Massachusetts Pesticide Control Act, amounts credited to the fund are used for the implementation and enforcement of said Act.

Community First Trust Fund - The secretary of health and human services may expend amounts in excess of the $\$ 16$ million collected from federal reimbursements in the nonbudgeted Community First Trust Fund to ensure compliance with the state balancing incentive payment program. Monies deposited in the fund are used for non-institutionally-based long-term services and support. The fund is not subject to the requirements of Section 5C of Chapter 29 of the MGL.

Home and Community-based Services Policy Lab Fund - to account for appropriations and any additional nonstate-sourced funds such as federal or private grants or donations. The fund is used to support research and analysis to enhance the development, evaluation, design and continued improvement of programs to individuals who need long-term services and support.

Regional Water Entity Reimbursement Fund - to account for amounts to reimburse the Massachusetts Water Resources Authority for costs to provide financial assistance to cities and towns to rehabilitate collection systems.

Manufacturing Fund - to account for a portion of gaming facility license fees.
Community College Fund - to account for a portion of gaming license fees.
Agricultural Resolve and Security Fund - to account for gifts, grants, donations, federal reimbursements and grants plus any interest earnings. Expenditures are to be used to foster agriculture in the Commonwealth and other purposes of the Department of Agricultural Resources.

School Improvement Fund - to account for appropriations allocated in each fiscal year to the fund which are to be used to improve the quality of education at the school building level.

THE BIG PICTURE: HISTORICAL CONTEXT
Non-Budgeted Special Revenue Funds
Fund Balances (deficits) at End of Year
Last Ten Fiscal Years
(Amounts in \$ Billions)
5

# Non-Budgeted Special Revenue Funds 

These funds account for the proceeds of specific revenue sources that are restricted to finance specific functions. Funds that are not subject to appropriation are considered Non-Budgeted Special Revenue Funds.

Federal Grants Fund - to account for federal grants that are designated for specific programs, excluding federal highway construction grants, which are accounted for in the Federal Highway Construction Capital Projects Fund, and federal reimbursement programs, such as Medicaid, which are accounted for in the General Fund.

## LOTTERY FUNDS:

The two lottery funds account for the operations of the State and Arts Lotteries.

State Lottery and Gaming Fund - to account for revenue from the sale of lottery tickets and for the payment of prizes, expenses of the State Lottery Commission and the distribution to municipalities and school districts. Transfers are made from lottery profits to the General Fund.

Arts Lottery Fund - to account for revenues from the sale of lottery tickets, for payment of prizes and the expenses of the State Lottery Commission, and for the administration of the Arts Lottery Council. Residual fund balance transfers are made to the General Fund at the end of the fiscal year.

## GAMING FUNDS:

Massachusetts Gaming Control Fund - to account for all gaming fees and assessments not recorded in other funds by legislative mandate and other monies authorized by the General Court. Expenditures are to finance the activities of the Massachusetts Gaming Commission (MGC).

Gaming Revenue Fund - to account for revenues collected from taxes on gross gaming revenue received from gaming licenses. The revenues shall be transferred to other funds to finance the activities of those funds.

## OTHER FUNDS:

The other special revenue funds account for a variety of miscellaneous taxes, assessments, fees, fines and other revenues, which are restricted to the financing of specific Commonwealth programs.

Catastrophic Illness in Children Relief Fund - to account for a portion of an employer's unemployment health insurance contribution and certain Federal Financial Participation (FFP). The funds are for medical expenses of childhood catastrophic illnesses not covered by any other state and federal program.

Commonwealth Care Trust Fund - to collect fair share employer assessments, free rider surcharges, cigarette tax revenues, transfers from the Health Safety Net Trust Fund and any funds that may be appropriated or transferred into the fund for the purpose of increasing health care coverage, including subsidized health insurance to low - income residents. Funds may be transferred to the Health Safety Net Trust Fund.

Medical Assistance Trust Fund - to account for any funds from public entities and federal revenues related to medical assistance; to be used to provide supplemental Medicaid payments to certain safety net hospitals.

Health Safety Net Trust Fund - to account for reimbursing hospitals and community health centers for a portion of the cost of reimbursable health services provided to low-income, uninsured or underinsured residents of the Commonwealth. Revenues are from surcharges and assessments in health care services.

Community First Trust Fund - To account for revenues received from FFP earned on any qualifying expenditures from the fund. Expenditures are for non - institutionally - based long-term service and support and may be made for services provided in prior fiscal years, but may not exceed more than $\$ 16$ million.

Money Follows the Person Rebalancing Demonstration Grant Trust Fund - to account for funds used for expenses that primarily benefit individuals who have disabilities or long-term illnesses or who are elders. Monies equal to the amount of FFP collected from the previous quarter shall be transferred to the fund.

Public Health Trust Fund - to account for fees assessed on slot machines and all other monies credited or transferred to the fund from any other source under law. Funds shall be expended to assist social service and public health programs dedicated to addressing problems associated with compulsive gambling.

Healthcare Payment Reform Fund - to account for a portion of gaming license fees, 5\% of the acute hospital assessments and any monies credited or transferred to the fund from any other fund or source. Funds are used to improve the quality and reduce the cost of health care in the Commonwealth.

Distressed Hospital Trust Fund - to account for gifts, grants and donations, interest earnings, 60\% of the acute hospital assessments, and any funds provided from other sources. Expenditures support efforts to meet the health care cost growth benchmark and any activities funded by the e-Health Institute, the Healthcare Payment Reform Fund, other health related purposes.

Prevention and Wellness Trust Fund - to account for appropriations or other monies authorized to be credited to the fund, fines and penalties gifts, grants and donations, interest earnings, and any funds provided from other sources. Also, $262 / 3 \%$ of the acute hospital assessments shall be credited to this fund. Expenditures shall support the state's efforts to meet the health care cost growth benchmark and any activities funded by the Healthcare Payment Reform Fund and other health related purposes.

MassHealth Delivery System Reform Trust Fund - to account for any transfers from the Health Safety Net Trust Fund, FFP revenues, appropriations; and any interest earned. The monies will be expended for approved Medicaid payments, reimbursements for services delivered to MassHealth beneficiaries; and for enhanced service and incentive payments to acute hospitals, and other providers or care organizations.

Community Hospital Reinvestment Trust Fund - to account for gifts, grants, donations, and interest earned. To be used to provide financial support to eligible acute care hospitals.

Non-acute Care Hospital Reimbursement Trust Fund - to account for assessments on acute care hospitals, FFP revenues, appropriations, and interest income. Funds shall be expended for Medicaid payments to non-acute, nonpublic hospitals licensed by the Department of Public Health.

Substance Use Disorder Federal Reinvestment Trust Fund - to account for FFP revenues, other federal reimbursements, grants, premiums, gifts, interest income and any other funds specifically designated to the fund. Funds shall be used to implement MassHealth's substance use disorder waiver demonstration project and to enhance and expand substance use disorder services.

Safety Net Provider Trust Fund - to account for operating transfers and any income designated to the fund by legislation. Funds shall be expended for payments to qualifying provider under an approved federal waiver.

Home Care Technology Trust Fund - to account for fees, appropriations, transfers, federal reimbursements, grants, premiums, gifts or other contributions from any source, investment income, and any other revenues. Funds shall be used to provide technological support for the aging service access points network.

Dam and Seawall Repair or Removal Fund - to account for federal grants, loan repayments, and investment earnings. Funds shall be used to provide grants or loans to local governmental entities, charitable organizations and private dam owners to finance or refinance costs related to dams and flood or wave control repair or remediation projects.

Department of Telecommunication and Energy Trust Fund - to account for assessments on interstate operating revenue of electric companies and investment income. The expenditures are for activities of the Department related to the regulation of electric companies.

Fingerprint-Based Background Check Trust Fund - to account for any appropriations and other monies including any private donations. Expenditures shall be for the sole purpose of carrying out state and national criminal background checks and verifications.

Liability Management and Reduction Fund - to account for chargebacks assessed to departments as premiums for the provision of insurance coverage for state agencies to cover payment of judgments, settlements and litigation costs in tort claims.

Dockside Testing Trust Fund - to account for fees collected from harvesters of molluscan shellfish on Georges Bank in the amount of $\$ 35,000$ per vessel. Expenditures shall be for the administrative costs of the operations and programs related to regulating and monitoring the shellfish harvesters, including the testing of shellfish as necessary to ensure that they are safe for human consumption.

Commonwealth of Massachusetts Civil Monetary Penalty (CMP) Fund - to account for civil monetary penalties paid by nursing homes participating in the medical program for the protection of health and property of residents in a nursing home if the facility is found deficient.

MBTA State and Local Contribution Fund - to account for the transfer of dedicated sales tax revenue and the Massachusetts Bay Transportation Authority (MBTA) service area assessments from the Commonwealth to the MBTA .

Massachusetts Community Preservation Trust Fund - to account for surcharges from the registry of deeds, public and private sources as gifts, grants and donations, from damages, penalties costs from litigation settlements and surcharge on municipal liens imposed by the cities and towns that accept funds from the trust, to further community open space preservation programs.

Health Insurance Portability and Accountability Act Fund - to account for revenues received from Federal reimbursements under the Social Security Act, other Federal reimbursements, grants, gifts or other contributions to meet the costs of compliance with the Federal Health Insurance Portability and Accountability Act (HIPPA) of 1996.

State Racing Fund - to account for racing-related taxes and assessments, to be used for expenditures governing simulcasting and to provide certain relief to the racing industry in the Commonwealth.

Division of Professional Licensure Trust Fund - to support programs and administrative costs of the Division of Professional Licensure. Revenues are from professional registration fees. Moneys deposited into the trust fund that are unexpended at the end of the fiscal year, and that total not more than $50 \%$ of the division's expenditures for the previous fiscal year, shall not revert to the General Fund.

Victims of Drunk Driving Trust Fund - to account for fines collected from individuals convicted of driving under the influence of various substances defined by the law. Expenditures are for grants to community based programs to provide counseling and support services to victims of accidents.

State Athletic Commission Fund - to account for licensing fees, other fees and fines collected up to a maximum of $\$ 200,000$ per year. All revenues in excess of $\$ 200,000$ shall be transferred to the General Fund. Expenditures are for the administration of the State Athletic Commission, including payments for officials and referees of athletic events sanctioned by the Commission.

Organ and Tissue Donor Registration Fund - to account for funds received from public and private donations, fees, and interest revenue; for the purpose of registration of residents of the Commonwealth as organ and tissue donors.

Department of Fire Services Hazardous Materials Emergency Mitigation Response Recovery Trust Fund - to account for monies received from fees, fines and investment income up to a maximum of $\$ 250,000$ per year. Any unexpended funds in excess of $\$ 250,000$ at the end of a fiscal year are transferred to the General Fund. Expenditures are for emergency hazardous materials response and mitigation costs.

Registers Technological Fund - to account for funds received from deed surcharges for the benefit of abolished counties. Expenditures are for technological improvements at the registries of deeds in those counties.

County Registers Technological Fund - to account for monies received from deed surcharges for Barnstable, Bristol, Dukes, Norfolk, Plymouth and Nantucket Counties. Expenditures are for technical improvements at those counties.

Wellfleet Hollow State Campground Trust Fund - to account for a surcharge of $\$ 5$ upon each fee charged and collected for admission to camping in Wellfleet hollow state campground for out-of-state residents. Funds shall be used for the long-term preservation and maintenance of Wellfleet hollow state campground in the town of Wellfleet.

COVID-19 Domestic Violence and Sexual Assault Survivors' Safety Trust Fund - to account for appropriations or monies authorized by the general court and specifically designated to be credited to the fund and funds from public or private sources. Funds shall be used to provide grants to support domestic and sexual violence liaisons, advocacy and outreach in communities throughout the commonwealth.

Opioid Recovery and Remediation Trust Fund - to account for settlements received from claims arising from the manufacture, marketing, distribution or dispensing of opioids, appropriations, gifts, grants, donations, rebates and settlements and investment income. The fund shall be used to mitigate the impacts of the opioid epidemic, including, expanding access to opioid use disorder prevention, intervention, treatment and recovery options.

COVID-19 Massachusetts Emergency Paid Sick Leave Fund - to account for monies from specific transfers and any other gifts, grants, or contributions specifically designated for this fund, to be used for the purpose of reimbursing employers for the cost of providing employees with COVID-19 emergency paid sick leave.

## MASSACHUSETTS DEPARTMENT OF TRANSPORTATION (MassDOT) FUNDS:

Massachusetts Transportation Trust Fund - to account for assessments, federal grants, departmental revenues, transfers and expenditures related to MassDOT.

Central Artery/Tunnel Project Repair and Maintenance Trust Fund - to account for any costs incurred in connection with the repairs and maintenance of the Central Artery and the Ted Williams Tunnel.

Motor Vehicle Safety Inspection Trust Fund - to account for motor vehicle inspection fees for administration and operation of safety inspection programs by the Registry of Motor Vehicles.

Transportation Infrastructure and Development Fund - to account for monies transferred from the Gaming Revenue Fund and all other monies credited or transferred to the fund from any other fund or source and proceeds from the investment of such funds. Any expenditures from this fund shall be solely for the purpose of transportation and related infrastructure projects.

The following funds have been enacted in legislation but were inactive in FY21 and are not presented in this report:

Medical Marijuana Trust Fund - to account for revenues generated from fees collected after July 1, 2013, as authorized by the MGL. Expenditures from the fund shall be for the administrative costs of operations and programs regulating medical marijuana use in the Commonwealth.

Essex Regional Emergency Communication Center Fund - The fund shall be used for the operation of the Regional Emergency Communications Center (RECC) to provide centralized emergency communication services to participating communities. There shall be credited to the fund a per capita assessment, any other funding, including, but not limited to, appropriations, gifts, grants, contributions, transfers or investment income.

MBTA Infrastructure Renovation Fund - to account for supplemental appropriations beyond the MBTA State and Local Contribution Fund for certain MBTA infrastructure improvements. Funds are to be used for, but not limited to, compliance with the American with Disabilities Act, elevator and escalator improvements, waterproofing, fare gates, signage, lighting and structural improvements.

Smart Growth Housing Trust Fund - to account for revenues from state surplus property sold for between \$25 million to $\$ 50$ million, appropriations, and monetary sanctions imposed by the department. Expenditures are for payments to communities for zoning incentive and density bonus payments related to smart growth or starter home zoning districts.

Essential Community Provider Trust Fund - to account for amounts appropriated for transfers and interest earned by the fund; used for payments to acute care hospitals and community health centers.

Department of Mental Retardation Trust Fund - to account for any receipts from assessments, transfers for public facilities and any other FFP. Expenditures are for operating the intermediate care facilities and community residences serving individuals with mental retardation.

Agricultural Inspection and Infrastructure Trust Fund - to account for agricultural inspection fees, interest or investment earnings; and all other monies credited or transferred to the fund by law. Expenditures shall be for agricultural programs and costs related to the Agricultural Innovation Center.

Massachusetts Board of Higher Education Scholar-Internship Match Fund - to provide a match not to exceed $\$ 5,000$ per student, for industry scholarships given to Massachusetts students going on to study for a post-secondary degree at Massachusetts public higher education institutions.

District Local Technical Assistance Fund - to account for grants to regional planning agencies for technical assistance to municipalities and to develop a statewide permitting model. Technical assistance services funded by these grants shall include services for zoning, land use planning, conservation, public safety planning, information technology and statistical trend modeling.

Educational Rewards Grant Program Fund - to account for grants to students in accredited post-secondary certificate or vocational technology programs or associate degrees in targeted high-demand occupations.

Housing and Economic Development Trust Fund - to account for grants, bequests, gifts or contributions of cash or securities, or contributions of services or property in kind and all interest earned on monies in the trust. Expenditures shall be for operating costs of the executive office of housing and community development, operating costs of the Massachusetts marketing partnership, and costs associated with housing and economic development programs, grants and initiatives.

Climate Change Adaptation Infrastructure Investment Fund - to account for amounts credited or transferred to the fund, federal grants, loan repayments, investment earnings and any other amounts required to be credited to the fund. Amounts credited to the fund may be used for the operations of the division of waterways and the office of dam safety, the department of environmental protection, the department of fish and game and the office of coastal zone management and to provide grants or loans to agencies of the Commonwealth and local governmental bodies to finance or refinance costs of certain environmental or coastal projects.

Massachusetts Alternative and Clean Energy Investment Trust Fund - to account for any funds invested in clean energy technology research and issued as seed grants to companies, universities and nonprofits to encourage the creation of clean technology ventures and the training of workers to perform associated green jobs.

Substance Abuse Services Fund - to account for funds used to expand inpatient treatment facilities and ongoing case management for civilly committed individuals.

Human Service Salary Reserve Fund - to account for funds transferred from the General Fund to provide a onetime subsidy to personnel earning less than $\$ 40,000$ in annual compensation who are employed by private human service providers that deliver human and social services under contracts with departments within the Executive Office of Health and Human Services and the Executive Office of Elder Affairs.

Commonwealth Sewer Rate Relief Fund - to account for transfers of amounts from the General Fund or other funds; used for the purpose of mitigating sewer rate increases and making sewer rate relief grants to municipalities.

Gaming Licensing Fund - to account for the licensing fees of all gaming establishments but excluding initial application fees. Monies from this fund shall be transferred to various funds. This fund expired on December 31, 2015.

Massachusetts Health Information Exchange Fund - to account for expenditures to support the dissemination and development of the statewide health information exchange. There shall be credited to the fund any appropriations, proceeds of any bonds or notes of the commonwealth issued for the purpose, federal grants or loans; private gifts, grants or donations, and investment income.

Capital Needs Investment Fund - to account for funds appropriated. The funds shall be for the restoration costs of the Mayflower II and the construction of a public safety building in the Town of Barre.

Securities Fraud Prosecution Fund - to account for criminal penalties, fines and settlements and any income from the investment of amounts credited to the fund. Expenditures from this fund are for investigations, enforcement of and dissemination of information about the Uniform Securities Act.

Flood Control Compact Fund - to account for any funds authorized and specifically designated to the fund plus any interest or investment earnings on any such monies. Expenditures shall be made for costs arising under any compact authorized by the general court, which may include reimbursing cities and towns or other states for flood control costs.

Public Records Assistance Fund - to account for revenues collected from punitive damages fines assessed to agencies or municipalities in violation of certain public record laws, appropriations, bond proceeds, gifts, grants, private contributions, operating transfers and earned investment income. To be used to provide grants to municipalities to support information technology capabilities and improve access to public records.

Olmsted Park Improvement Fund - to account for expenditures by the Department of Conservation \& Recreation for the purposes of providing rehabilitation and improvement grants to cities and towns with an Olmsted Park within its municipal boundaries. The fund shall consist of public and private sources such as gifts, grants and donations, interest earned on revenues from gifts, grants and donations and any funds provided from other sources.

Municipal Epinephrine Bulk Purchase Trust Fund - to account for payments from participating cities and towns, appropriations, gifts, grants, donations, rebates and settlements. Funds shall be used for the purchase and distribution of epinephrine to first responder departments and the elementary and secondary schools in participating cities and towns.

State Parks Preservation Trust Fund - to account for revenues received from public and private gifts, grants, and donations, and from the federal government for preservation efforts. Funds shall be used for the purposes of maintaining and preserving all state-owned parks.

Abandoned Vessel Trust Fund - to account for revenues generated from the sale of abandoned vessels and any appropriations from the General Fund. Funds shall be used for removing abandoned vessels from public waterways.

Endowment Incentive Holding Fund - to account for the collection of private contributions into each higher education institution's recognized foundation. The commonwealth shall contribute funds to each institution's recognized foundation in an amount necessary to match private contributions in the current fiscal year.

Technical Rescue Services Fund - to account for compensation received under specific contracts, cost reimbursements, any monies specifically authorized for the fund, any public and private gifts, grants and donations, and interest earned. Funds shall be used for the maintenance and operation of technical rescue regions, technical rescue services and training, and the acquisition of technical rescue equipment.

Massachusetts Veterans and Warriors to Agriculture Program Fund - to account for appropriations, any public and private gifts, grants and donations, and interest earned. Funds shall be used to enhance the education, training, employment, income, productivity and retention of veterans currently working or aspiring to work in the agricultural field.

Global Warming Solutions Trust Fund - to account for appropriations, any public and private gifts, grants and donations, rebates, settlements, interest earned and any other revenues specifically credited to the fund. The fund is used to issue grants or loans to governmental, quasi-governmental or non-profit entities for costs incurred implementing the Clean Energy and Climate Plan related to climate change mitigation and adaptation.

Transfer of Development Rights Revolving Fund - to account for appropriations, any public and private gifts, grants and donations, rebates, settlements, interest earned and any other revenues specifically credited to the fund. Expenditures from the fund are to provide loans to municipalities for the acquisition of transferable development rights to protect conservation values and encourage development.

Castle Island and Marine Park Trust Fund - to account for appropriations from the General Court, bond proceeds, investment earnings, or public or private gifts, donations, and grants to be used for the long-term preservation and maintenance of the Castle Island and Marine Park in South Boston.

Fishing Innovation Fund - to account for appropriations from the General Court, bond proceeds, investment earnings, or public or private gifts, donations, and grants to be used to finance grants to support the design, construction, research, and development of new technology for fishing vessels.

Agricultural Innovation Fund - to account for appropriations from the General Court, bond proceeds, investment earnings, or public or private gifts, donations, and grants to be used to finance grants for the Commonwealth's agricultural and cranberry producers through the agricultural innovation center.

Early Education Care Public-Private Trust Fund - to account for appropriations, public and private gifts, grants, donations, and interest income. Funds are to provide support for childcare providers through state, philanthropic and private partnership efforts.

Nonpublic Ambulance Service Reimbursement Trust Fund - to account for assessment, any federal reimbursement, any revenue from appropriations or other money authorized by the general court and specifically designated to be credited to the fund and interest earnings. Funds shall be used for Medicaid payments to nonpublic ambulance services.

Student Loan Assistance Trust Fund - to account for monies appropriated from the General Court and any public and private gifts, grants and donations to support the student loan ombudsman within the Office of the Attorney General.

Healthy Soils Program Fund - to account for monies from the General Court, transfers, any gifts, grants, private contributions, and investment income to implement, administer and develop healthy soils practices under the healthy soils program

Lampson Brook Farm Fund - to account for monies from appropriations, repayment of loans, lease payments, timber sales, settlements, and any other gifts, grants, or donations specifically designated for this fund, to be used for the implementation and administration of the Lampson Brook Farm.

## Capital Projects Funds

The Capital Projects Funds are used to account for the financial resources used to acquire or construct major capital assets of the Commonwealth and to finance local governmental capital projects.

General Capital Projects Fund - to account for proceeds of bonds sold to fund the construction or acquisition of capital assets for general Commonwealth purposes, excluding highway construction and projects targeted for specific localities or purposes.

Convention and Exhibition Center Project Fund - to account for proceeds of bonds to finance the construction of a convention center in the City of Boston.

Capital Improvements and Investment Trust Fund - to account for the Commonwealth's reimbursement to cities and towns for expenses incurred for projects for construction and reconstruction of town and county ways.

Highway Capital Projects Fund - to account for the proceeds of bonds sold to finance construction of state highways and to fund the Commonwealth's share of Federally sponsored highway construction.

Federal Highway Construction Program - to account for federal highway construction grants which, with the Commonwealth's required share of matching funds, finance interstate highways and similar projects within Massachusetts to promote a nationwide highway system.

## OTHER FUNDS:

Government Land Bank Capital Projects Fund - to account for proceeds of bonds used to finance the acquisition, holding, protection, maintenance, repair or use of lands and for personnel and the administrative costs of the Massachusetts Development Finance Agency.

Local Aid Capital Projects Fund - to account for the proceeds of bonds sold to finance the construction of correctional facilities, water pollution abatement projects and other local projects in specific localities of the Commonwealth.

## MASSACHUSETTS DEPARTMENT OF TRANSPORTATION (MassDOT) FUND:

Central Artery Statewide Road and Bridge Infrastructure Fund - to account for bond proceeds, certain revenues from Registry of Motor Vehicle fees, (net of debt service expenditures) and payments from authorities. The purpose of expenditures from the fund is to meet the estimated additional costs associated with the Central Artery/Ted Williams Tunnel Project and for costs of the statewide road and bridge program.

## The following funds have been enacted in legislation but were inactive in FY21 and are not presented in this report:

Capital Investment Trust Fund - to account for a transfer from the General Fund to finance appropriated items of a capital nature.

FY 2021 state tax revenue$\xlongequal{\$ \quad 34,649,027}$
This schedule is prepared on the statutory basis of accounting. It presents tax revenues as reported in the governmental funds of the Commonwealth. It differs from the schedule of tax collections prepared by the Comptroller, Commissioner of Revenue and State Auditor for calculations in accordance with Chapter 62F of the General Laws, as amended. The differences are due to $2 / 5$ ths of Beano revenue and the health care coverage penalty in the Commonwealth Care Fund, both of which are recognized on the statutory basis of accounting but are not accounted for on the schedule of tax collections prepared by the Department of Revenue.

# Non-Tax Revenue Initiatives 

Fiscal Year Ended June 30, 2021
(Amounts in thousands)

Chapter 653 of the Acts of 1989, amended Chapter 29 of the Massachusetts General Laws by adding Sections 29D and 29E, which authorize certain non-tax revenue initiatives and require reporting thereon, as follows.

## I. Debt Collection:

Pursuant to Massachusetts General Laws Chapter 29, Section D, Chapter 7A Section 8, allows private debt collection agencies to engage in debt collection for the Commonwealth. The fees paid are contingency-based from the proceeds collected. Collections and fees paid during FY21 were (amounts in thousands):

| Department Collectors | Collections |  | Fees |  |
| :---: | :---: | :---: | :---: | :---: |
| Allen Daniels | \$ | 1,245 | \$ | 174 |
| F.H. Cann \& Associates |  | 895 |  | 164 |
| Premier Credit of North America, LLC |  | 1,170 |  | 149 |
| Linebarger, Goggan, Blair \& Sampson, LLP |  | 217 |  | 55 |
| Financial Asset Management Systems, Inc |  | 25 |  | 3 |
| Reliant Capital Solutions, Inc. |  | 1,511 |  | 233 |
| Windham Professionals Inc |  | 1,063 |  | 173 |
| Total | \$ | 6,126 | \$ | 951 |

Under the same program, the following amounts were collected and fees paid for the Institutions of Higher Education (these figures are as subset of the above) (amounts in thousands):

| Department Collectors | Collections |  | Fees |  |
| :---: | :---: | :---: | :---: | :---: |
| Allen Daniels | \$ | 1,057 | \$ | 146 |
| Premier Credit of North America, LLC |  | 683 |  | 102 |
| F.H. Cann \& Associates |  | 895 |  | 164 |
| Reliant Capital Solutions, Inc. |  | 1,206 |  | 181 |
| Windham Professionals Inc |  | 957 |  | 161 |
| Total. | \$ | 4,798 | \$ | 754 |

## II. Cost Avoidance:

The Comptroller's appropriation authorizes contract arrangements engaged on a contingent fee basis for the purpose of identification and pursuit of cost saving/avoidance opportunities. During FY21, the following amounts were generated (amounts in thousands):

| State expenditures avoided | \$ | 801 |
| :---: | :---: | :---: |
| Contractor payments |  | (163) |
| Net cost savings/avoidance | \$ | 638 |

## III. Intercept:

Intercept is authorized by M.G.L. Chapter 7A Section 3 and 815 CMR 9:06. Intercept is an automated process that offsets Commonwealth payments to delinquent receivables that have been approved by the Office of the State Comptroller. FY21 activity (amounts in thousands):
Total Commonwealth intercepts............ \$ 19,063
Amounts included above that were intercepted on behalf of the Institutions of Higher Education $\ldots \ldots \ldots \xlongequal{\$ 8,100}$

*A pension funding actuarial valuation as of January 1, 2020 was not performed for SERS and MTRS. GASB 67 compliant pension valuations will be presented in the Commonwealth's Annual Comprehensive Financial Report (ACFR).

For a complete analysis of the Commonwealth's actuarial valuation report, please go to http://www.mass.gov/perac. Alternatively, copies of the Commonwealth's actuarial valuation may be obtained by contacting the Massachusetts Public Employee Retirement Administration Commission, 5 Middlesex Avenue, Suite 304, Somerville, MA 02145. Telephone number: (617) 666-4446.

## State Retiree Benefits Trust

The results of the January 1, 2020 Other Post-Employment Benefits (OPEB) Actuarial Valuation will be presented in the ACFR due to changes in accounting standards.

## HIGHER EDUCATION NON-APPROPRIATED ACTIVITY

The Commonwealth's Public Institutions of Higher Education are allowed, by their enabling statutes, to collect, retain, and expend certain fees, rents, donations and other types of revenue. These financial resources are important elements in the overall financial operations of the respective institutions, and are in addition to amounts made available from appropriations. The Public Institutions of Higher Education include:

University of Massachusetts System - The University system includes the campuses at Amherst, Worcester, Boston, Lowell, Dartmouth and certain institutes and programs operated by the Office of the University President.

State University Systems - The State College and University Systems include the three state colleges, and six state universities, which provide four-year post-secondary education programs. These include:

- Bridgewater State University
- Framingham State University
- Fitchburg State University
- Massachusetts College of Art \& Design
- Massachusetts Maritime Academy
- Massachusetts College of Liberal Arts
- Salem State University
- Worcester State University
- Westfield State University

Community College System - The Community College System includes the fifteen community colleges, which provide two-year post secondary education programs.

- Berkshire Community College
- Bunker Hill Community College
- Bristol Community College
- Cape Cod Community College
- Greenfield Community College
- Holyoke Community College
- Massasoit Community College
- Massachusetts Bay Community College
- Middlesex Community College
- Mount Wachusett Community College
- Northern Essex Community College
- North Shore Community College
- Quinsigamond Community College
- Roxbury Community College
- Springfield Technical Community College

Secretary Michael J. Rodrigues, Chair
Senate Ways and Means Committee
State House, Room 212
Boston, MA 02133
Mr. Michael D. Hurley
Clerk of the Senate
State House, Room 335
Boston, MA 02133

The Office of the Comptroller is pleased to provide this Letter of Transmittal for the Commonwealth's fiscal year 2020 (FY20) Comprehensive Annual Financial Report (Annual Report) prepared in accordance with Generally Accepted Accounting Principles (GAAP) in the United States of America. The objective of this report is to provide a clear financial picture of our government as a single, unified entity.

This document presents the Commonwealth's financial information on three bases of accounting, each serving a different purpose. The report includes "required supplementary information" in the form of budgetary basis statements, which are prepared in accordance with the Commonwealth's budgetary or statutory basis of accounting and is summarized by Commonwealth branch and agency. This information is aggregated from FY20 line item appropriations, the legal level of budgetary control -- i.e., the amount up to which state departments can spend without approval of additional appropriations (in a so-called "supplemental budget") by the Massachusetts Legislature. Line items specify a dollar amount that can be legally spent on specified programs or activities; for example, separate line items are authorized in the state's annual budget for general administrative expenses (including personnel expenses) and for benefit payments in the Commonwealth's Medicaid program. More detailed information on the statutory basis of accounting and the results of operations on that basis from FY20 are found in the Statutory Basis Financial Report (SBFR) issued separately on December 18, 2020. The SBFR documents compliance with the legislatively adopted budget at a fund level. Further documentation is found within the Commonwealth's accounting system, the Massachusetts Management Accounting and Reporting System (MMARS). Each state maintains different rules for budgetary reporting and therefore the SBFR should not be used for comparisons across states.

The Annual Report "fund perspective" statements present the governmental operations on a modified accrual basis of accounting. The fund perspective is designed to measure inter-period equity, the extent to which current resources (available within one year) fully fund all current services provided by the government. Long-term
liabilities are excluded with the implicit assumption that future tax revenues will fund these liabilities as they come due. This fund perspective provides results similar to the SBFR.

In addition to the fund perspective, this Annual Report presents a "government-wide" perspective. This perspective combines all governmental and business-type activities in a statement of net position and a statement of activities, presenting all functions on a full accrual basis of accounting. All capital assets are added to the government-wide statements, as are most long-term liabilities. Funds that are shown as fiduciary under the fund perspective are not portrayed in the government-wide statements, as the assets do not belong to the Commonwealth.

In the government-wide statements, the balance sheet has been organized into a "net position format." This format classifies all assets and liabilities as either short-term or long-term and then subtracts liabilities and deferred inflows of resources from assets and deferred outflows of resources to arrive at net position.

The Commonwealth's government-wide revenues, expenses and activities are included in the statement of activities. The expenses of the Commonwealth, organized by function, are netted against fees, fines, grant revenues, and assessments generated to fund each function in an attempt to derive the net cost to the taxpayer of each function. This format allows the reader of the financial statements to discern the net cost of a particular function of government funded by taxation and other general revenues.

This Annual Report is presented in three sections: Introductory, Financial, and Statistical. The Introductory Section contains an overview of current initiatives and summary financial data. The Financial Section contains the Management's Discussion and Analysis (MD\&A) and the Commonwealth's Basic Financial Statements. GAAP requires that management provide a narrative overview and analysis in the form of an MD\&A to accompany the basic financial statements.

This letter of transmittal is designed to complement the MD\&A, where the financial analysis is presented. The Commonwealth's MD\&A can be found immediately following the Independent Auditors' Report. The Statistical Section contains selected financial and demographic information; it also contains background information on the Commonwealth.

## PROFILE OF THE COMMONWEALTH

The Commonwealth of Massachusetts was the sixth of the original 13 colonies to ratify the United States Constitution, joining the United States on February 6, 1788. Boston, the capital of the Commonwealth since its founding, dates from 1630. The Commonwealth has an area of 8,257 square miles. Geographically, the Commonwealth includes 351 cities and towns. The largest city is the capital, Boston. Employment is largely in the education, health services, wholesale and retail trade, financial, technology, and public sectors. Due to the Commonwealth's high levels of basic and advanced education and the presence of world-class educational institutions, the Commonwealth's economy is driven in large part by innovation in technology, life sciences, health care, and business services.

The Massachusetts Constitution was ratified in 1780 while the Revolutionary War was still in progress, nine years before the United States Constitution was adopted, and is the oldest written Constitution now in use. It specified three branches of Government: Legislative, Executive, and Judicial. "The Great and General Court," elected every two years, is made up of a Senate of 40 members and a House of Representatives of 160 members. It is the second oldest democratic deliberative body in the world.

The table on page 3 reconciles the fund balances on three bases of accounting: the statutory basis as presented in the separately issued financial statements on December 18, 2020; the fund basis; and the entity-wide basis statements, the latter two of which are included in this report.

The deficit of $\$ 77.677$ billion in governmental activities net position is largely attributable to several factors. First, the Commonwealth has made a policy decision to finance construction of assets owned by other government entities, particularly Commonwealth roads and bridges, school buildings, and assets of cities and towns and local authorities. As a result of transportation reform implemented during FY10, the Commonwealth shifted virtually all
its road and bridge assets from its books to the newly created Massachusetts Department of Transportation (MassDOT), a component unit of the Commonwealth. Second, starting in FY15, the Commonwealth's net (or unfunded) pension liability, was placed on the Commonwealth's books in accordance withGASB Statement No. 68, Accounting and Financial Reporting for Pensions. Third, the Commonwealth's net (or unfunded) OPEB, or other post-employment benefits (mainly health insurance), liability, was placed on the Commonwealth's books starting in FY18 in accordance with GASB Statement No. 75, Accounting and Financial Reporting for Post Employment Benefits Other than Pensions.

At the end of FY20, MassDOT held $\$ 25.629$ billion in road, bridge, and other transportation-related assets (excluding assets of the Massachusetts Bay Transportation Authority) net of related depreciation, the vast majority of which were formerly held by the Commonwealth. The Commonwealth also has financed significant transportation and non-transportation assets currently held by Massachusetts Institutions of Higher Education, Massachusetts cities and towns, and quasi-public authorities. While the exact amount of Commonwealth-funded assets held by these entities is difficult to determine, between FY05 and FY20 the Commonwealth's capital spending on Higher Education capital projects totaled approximately $\$ 2.272$ billion, capital spending for transportation-related financial assistance to local governments totaled approximately $\$ 4.211$ billion, and other grants and financial assistance for non-Commonwealth entities such as cities and towns and quasi-public authorities funded through the Commonwealth's capital budget totaled $\$ 6.981$ billion, including $\$ 1$ billion to fund the Massachusetts School Building Authority (MSBA) in FY05 and FY06. In addition, the Commonwealth has a net liability of $\$ 4.918$ billion for debt and grant obligations for the School Building Assistance Program that finances construction of schools for the Commonwealth's cities and towns. As almost all of this capital spending was financed by Commonwealth debt, the liabilities are retained by the Commonwealth while the assets are held by the Institutions of Higher Education, Massachusetts cities and towns, and entities such as local housing and other quasigovernmental authorities.

Since MassDOT ended FY20 with a positive net position of $\$ 27.588$ billion, it is more informative to view the Commonwealth's financial statements in combination with MassDOT than to analyze the two separately, while also keeping in mind that significant assets owned by the Institutions of Higher Education and local governments and authorities were financed by liabilities still on the Commonwealth's books.

As of June 30, 2020, the net pension liability in governmental activities totaled $\$ 40.837$ billion, offset by GASB 68 related adjustments (in the form of deferred inflows and outflows of resources) of $\$ 5.779$ billion; resulting in a reduction in governmental activities net position of $\$ 35.057$ billion. Governmental activities' net OPEB liability totaled $\$ 15.972$ billion.

The net deficit in governmental activities (which excludes "business-type activities" of Unemployment Insurance, the Family and Employment Security Trust and Higher Education) increased by $\$ 3.100$ billion on between June 30, 2019 and June 30, 2020, as increases in assets were approximately offset by increases in liabilities. The most significant changes were as follows:

- The Commonwealth's current assets increased by $\$ 2.077$ billion, primarily as a result of increased cash on hand due to the federal government provision of financial aid under the Coronavirus Aid, Relief, and Economic Security (CARES) Act, which provided the state with $\$ 2.461$ billion in aid to offset costs of the COVID-19 pandemic. Of that amount, $\$ 1.862$ billion in cash remained as of June 30.
- The Commonwealth's other net post employment benefits (OPEB) liability, after taking into account deferrals of the liability decrease caused by lower than projected retiree medical costs and a change in the discount rate by which OPEB liabilities are calculated, increased by $\$ 246$ million between FY19 and FY20. As further explained in Footnote 1T, the OPEB actuarial valuation was also corrected due to errors discovered in calculations underlying the amounts reported in the GASB 75 report as of the June 30, 2018 measurement date, which was reported in the FY2019 Annual Report.
- The Commonwealth's net pension liability, after taking into account deferrals of FY20 investment gains and other adjustments that will be recognized over the next several years, increased by $\$ 4.313$ billion, primarily due to a reduction, from $7.25 \%$, to $7.15 \%$, in the rate used to discount liabilities.
- As noted on page 3, the Commonwealth continues to fund, through its own debt, transportation-related assets owned by the Massachusetts Department of Transportation (MassDOT), Institutions of Higher

Education, cities and towns and quasi-public authorities. In FY20, approximately $\$ 1.999$ billion of the more than $\$ 2.497$ billion in state-funded capital spending generated assets not owned by the Commonwealth, including $\$ 1.358$ billion in transportation spending (more than $\$ 326$ million of which were grants and other financial assistance to cities and towns), $\$ 146$ million for Institutions of Higher Education (which are attributed to the Commonwealth's business-type activities), and approximately $\$ 474$ million in other capital grants and financial assistance to local governments and quasi-public entities. As a result of this capital spending on assets owned by entities other than the Commonwealth, the amount of debt outstanding increased by $\$ 1.560$ billion while the Commonwealth's governmental activities capital assets net of depreciation increased by only $\$ 169$ million.

The net deficit in the primary government, in addition to governmental activities, includes the Commonwealth's business-type activities of the Unemployment Insurance system, Family and Employment Security Trust and Higher Education institutions, increased by $\$ 4.019$ billion from FY19, due primarily to increased liabilities for pension and post-employment (health insurance) benefits for state employees, which together increased by a total of $\$ 1.612$ billion, and decrease in net position of business-type activities of $\$ 919$ million, caused by a reduction of $\$ 1.795$ billion in the Unemployment Insurance fund balance, partially offset by an increase of $\$ 830$ million in Family and Employment Security Trust and smaller surpluses in Higher Education. These changes are explained in more detail on pages 23 through 32 of this report.

The Commonwealth engages in multi-year financial planning in several areas, including the adoption of a statutorily required triennial pension funding schedule (which is funded prior to the adoption of each year's annual budget), a five-year capital spending plan, and a multi-year debt issuance planning process via a Debt Affordability Committee established in statute, comprised of Massachusetts government and non-government financial experts. The Commonwealth's short and long-term goal is to achieve annual statutory structural budget balance, i.e., where annual revenues equal or exceed annual expenditures, thus minimizing the use of one-time resources. A related goal is to limit the growth in state expenditures to increases in budgeted revenues. The current Administration has also committed to a policy of annual increases in unrestricted aid to cities and towns equal to the growth in projected budgetary fund tax revenues.

## REPORTING ENTITY

The financial statements incorporate activity from over 150 departments. These departments include the various agencies, boards, and commissions, the 25 Institutions of Higher Education, the judicial and legislative branches of government, and constitutional offices. The departments record their daily financial operations in the state accounting system, MMARS, operated by the Office of the Comptroller.

In addition, the financial statements include 41 independent public authorities. These entities are defined as component units and meet the criteria for inclusion in the Commonwealth's reporting entity in accordance with GAAP. They are further described in Note 14 to the basic financial statements. The Massachusetts School Building Authority (MSBA) is blended into the Commonwealth's operations.

## INDEPENDENT AUDIT

The Commonwealth's independent auditors, KPMG LLP, have performed an independent audit of the Commonwealth for the fiscal year ended June 30, 2020. The Independent Auditors' Report is presented in the Financial Section.

The Office of the Comptroller prepares these financial statements and is responsible for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the Office of the Comptroller, working in conjunction with the State Auditor, has established a comprehensive internal control framework that is designed to protect the Commonwealth's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the Commonwealth's financial statements in conformity with GAAP. Because of the cost, internal controls should not outweigh their benefits. The Commonwealth's comprehensive framework of internal controls has been designed to provide reasonable, rather than absolute assurance that the financial statements will be free from material misstatement.

All fifty states produce a Comprehensive Annual Financial Report but I believe that the accuracy and information value of the Commonwealth's report is unsurpassed. Particularly in the year of the pandemic, I greatly appreciate the skill and hard work of the state's financial professionals. I thank the dedicated employees of the Office of the Comptroller, and in particular First Deputy Comptroller Jeffrey Shapiro, Deputy Comptroller Howard Merkowitz, and Assistant Comptrollers Kristine Hill-Jones, Kevin McHugh, Amy Nable, Peter Scavotto, and Peter Murphy. They and their teams, as well as the financial professionals across state government with whom they collaborate, have served the Commonwealth extremely well in a challenging time.

Respectfully submitted,

William McNamara
Comptroller of the Commonwealth

## Independent Auditors' Report

Mr. William McNamara, Comptroller<br>The Commonwealth of Massachusetts<br>Boston, Massachusetts

## Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Commonwealth of Massachusetts (the Commonwealth), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Commonwealth's basic financial statements as listed in the accompanying table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the following entities and funds:

- Governmental Activities
- Massachusetts School Building Authority, which is a major governmental fund and represents 7.9\% and $1.9 \%$ of the total assets and total revenues, respectively, of the Governmental Activities.
- Business-Type Activities
- Individual state universities listed in Note 14 which represent $100 \%$ of the total assets and total revenues of the State Universities major enterprise fund
- Individual community colleges listed in Note 14 which represent $100 \%$ of the total assets and total revenues of the Community Colleges major enterprise fund

These entities and funds collectively represent $28.8 \%$ and $9.1 \%$ of the total assets and total revenues, respectively, of the Business-Type Activities.

- Discretely Presented Component Units
- Individual nonmajor component units listed in Note 14 which represent $7.1 \%$ and $5.5 \%$ of the total assets and total revenues, respectively, of the aggregate discretely presented component units.

## kPMG

Those financial statements were audited by other auditors, whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for these entities and funds indicated above, are based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Massachusetts Municipal Depository Trust, the Massachusetts Technology Park Corporation and the Massachusetts Life Sciences Center were not audited in accordance with Government Auditing Standards

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Commonwealth of Massachusetts as of June 30, 2020, and the respective changes in financial position, and where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

## Emphasis of Matter

As discussed in Note 1 ( t ) to the financial statements, in 2020, the Commonwealth adopted Governmental Accounting Standards Board (GASB) Statement No. 84, Fiduciary Activities. Our opinions are not modified with respect to this matter.

## Other Matters

## Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis and required supplementary information, as listed in the accompanying table of contents (collectively referred to as RSI) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any

## kPMG

assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

## Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Commonwealth's basic financial statements. The introductory section, other supplementary information and statistical section as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, and the reports of the other auditors, the other supplementary information is fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated March 25, 2021 on our consideration of the Commonwealth's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Commonwealth's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Commonwealth's internal control over financial reporting and compliance.

# Management's Discussion and Analysis <br> (Unaudited) 

## Financial Highlights - Primary Commonwealth Government

## Government-Wide Highlights

This analysis, prepared by the Office of the Comptroller, offers readers of the Commonwealth's financial statements a narrative overview of the activities of the Commonwealth for the fiscal year ended June 30, 2020 (FY20). We encourage readers to consider this information in conjunction with the additional information that is furnished in the letter of transmittal and with the Commonwealth's financial statements, which follow. This analysis is required by the Governmental Accounting Standards Board (GASB), which provides preparers with guidelines on what must be included in and excluded from this analysis.

Net Position - The liabilities and deferred inflows of resources of the primary government exceeded its assets and deferred outflows of resources at the end of FY20 by $\$ 73.000$ billion, an increase in the net deficit of $\$ 4.019$ billion from the FY19 net deficit.

Of the $\$ 73.000$ billion deficit, "unrestricted net position" has a deficit of $\$ 78.097$ billion and there is a $\$ 2.233$ billion positive balance attributable to net investment in capital assets. There are five primary reasons for the Commonwealth's negative unrestricted net position:

- In FY10, the Commonwealth implemented transportation reform, which created the Massachusetts Department of Transportation (MassDOT) and transferred to that entity virtually all highway and bridge assets of the Commonwealth totaling approximately $\$ 15.521$ billion, net of depreciation, as of the date of the transfer. These and subsequently constructed road and bridge assets were valued at $\$ 25.629$ billion as of June 30, 2020. However, the Commonwealth originally paid and continues to pay for the construction of these assets and retains approximately $\$ 13.275$ billion in transportation-related debt, which is now unrelated to any capital asset owned by the Commonwealth.
- The Commonwealth has a net liability of $\$ 4.918$ billion for its share of the construction costs of schools owned and operated by municipalities through the Massachusetts School Building Authority (MSBA).
- The Commonwealth, through debt issuances, also pays for non-transportation capital assets held by quasipublic entities, local governments, and housing authorities.
- With the implementation of Governmental Accounting Standards Board (GASB) Statement No. 68, Accounting and Financial Reporting for Pensions-an amendment of GASB Statement No. 27, which was effective starting in FY15, the Commonwealth was required to place on its books the full amount of its unfunded pension liability (known as the "net pension liability"), which totaled $\$ 41.643$ billion as of June 30, 2020 (based on a June 30, 2019 actuarial valuation, per GASB 68).
- The implementation of GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, which was effective starting in FY18, required the Commonwealth to record on its statement of net position its unfunded non-pension retiree benefits (or OPEB, mostly health insurance benefits), which totaled $\$ 17.487$ billion as of June 30, 2020 (based on a June 30, 2019 valuation, per GASB 75).

At the end of FY20, the Commonwealth also held $\$ 2.863$ billion in "restricted net position", which are assets restricted primarily for payment of debt service, unemployment insurance benefits, and the Institutions of Higher Education. Approximately $\$ 202$ million in restricted net position balances were set aside for unemployment benefits, an additional $\$ 987$ million was restricted for debt retirement (of which $\$ 959$ million was restricted for MSBA debt retirement), $\$ 289$ million was restricted for Higher Education, and $\$ 556$ million was restricted for other governmental purposes.

The Commonwealth's governmental activity (which excludes the "business-type activities" of the Institutions of

Higher Education, Family and Employment Security Trust and Unemployment Insurance) net deficit increased by $\$ 3.100$ billion, to $\$ 77.677$ billion, and its governmental activities unrestricted net deficit increased by approximately $\$ 3.597$ billion, to $\$ 77.515$ billion, as of June 30, 2020.

Total revenues of the primary government increased by $\$ 10.865$ billion, or $16.5 \%$ in FY20, to $\$ 76.583$ billion. Total expenses of the primary government increased by $\$ 15.558$ billion, or approximately $23.9 \%$, to $\$ 80.603$ billion. (Both revenue and expense increases in FY20 were driven largely by federally-reimbursed responses to the Coronavirus pandemic, which began in the last four months of the fiscal year.) Details on revenues and expenses for the primary government can be found on pages 24-32.

The net position of business-type activities declined by $\$ 919$ million, due to a deficit of $\$ 1.795$ billion in the Unemployment Insurance program (as unemployment benefits increased due to the pandemic), partially offset by surpluses of $\$ 830$ million in the Family and Employment Security Trust Fund and $\$ 46$ million in Higher Education.

On a "funds perspective" basis, at June 30, 2020, the Commonwealth's governmental funds reported a combined ending fund balance of $\$ 9.058$ billion, a decrease of $\$(108)$ million from June 30,2019 . Of the ending balances:

- There are no nonspendable balances, $\$ 1.294$ billion is restricted, $\$ 5.326$ billion is committed, $\$ 1.683$ billion is assigned, and $\$ 755$ million is unassigned fund balance (a full discussion of these classifications is included in Note 1 to the basic financial statements, on pages 70-73).
- The MSBA's fund balance of $\$ 1.717$ billion is blended with the Commonwealth. Within this fund balance is $\$ 1.617$ billion in cash and restricted investments, which resulted primarily from the issuance of debt in FY20 and previous fiscal years, less approximately $\$ 67$ million in liabilities. In FY20, $\$ 925$ million was dedicated to the MSBA from Commonwealth sales taxes, and the MSBA issued $\$ 1.015$ billion in long-term dedicated sales tax bonds.

Other highlights of FY20 financial operations include:

- Tobacco settlement proceeds for the year were approximately $\$ 222$ million on a GAAP basis, a decrease of approximately $\$ 8$ million from FY19. Approximately $\$ 126$ million has been reported as a receivable in the governmental funds, equal to half of the anticipated tobacco settlement proceeds to be received in FY21. In FY20 approximately $\$ 23$ million, or the equivalent of $10 \%$ of tobacco settlement proceeds, was transferred to the State Retiree Benefits Trust Fund (SRBTF) to fund the Commonwealth's liability for retiree health care. Per statute, the proportion of tobacco settlement revenues transferred to the SRBTF increases annually until an amount equal to $100 \%$ of the tobacco settlement proceeds is to be transferred to the SRBTF in FY23, although the requirement to transfer increasing percentages of tobacco settlement proceeds was modified for FY20 with the percentage reduced to $10 \%$.
- During the fiscal year, the Commonwealth passed or agreed to terms of approximately $\$ 33$ million in bond authorizations. There were no bond de-authorizations of previously approved capital appropriations during the fiscal year. The Commonwealth determines the timing and extent of capital spending and bonding as part of its five-year capital plan.
- Lottery revenues for FY20 were $\$ 5.395$ billion, a decrease of approximately $\$ 258$ million, or $4.6 \%$, from FY19, as the coronavirus pandemic reduced ticket sales. Prizes were approximately $\$ 4.305$ billion. Lottery profits, after deducting administrative expenses and fringe benefit charges to reimburse the Commonwealth's General Fund for pension and employee health insurance benefits, but prior to distributions to reimburse the Massachusetts Cultural Council and compulsive gamblers appropriation as mandated in the FY20 budget, totaled $\$ 985$ million a decrease of $\$ 119$ million, or $10.8 \%$, from FY19. Mandated transfers to the General Fund to reimburse it for administrative expense appropriations and other spending totaled $\$ 1.089$ billion.

## Full-Time Equivalent Employment

The following chart shows the Commonwealth's full-time equivalent employment, including the Massachusetts Department of Transportation (MassDOT) for all state funding sources (budgetary, non-budgetary, capital, federal, and trust) over the past five fiscal years. As of June 30, 2020, the number of Commonwealth employees increased by a net of 463 full-time equivalent employees (FTEs) from June 30, 2019, to a total of 86,583 . The largest increases were in the Community Colleges (416), the Executive Office of Public Safety ( 194 FTEs) and the the University of Massachusetts ( 130 FTEs). These increases were offset by a decrease in the State Universities (457 FTEs).

Full Time Equivalent Workforce Including Higher Education June 2016 - June 2020

## OVERVIEW OF THE FINANCIAL STATEMENTS

This MD\&A is intended to serve as an introduction to the Commonwealth's basic financial statements. The Commonwealth's basic financial statements comprise the following: 1) government-wide financial statements; 2) fund financial statements; and 3) notes to the financial statements. This report also contains additional required supplementary information in the form of budgetary schedules, which are prepared on the statutory basis of accounting, as well as pension and other post-employment benefits (OPEB) schedules. Other supplementary information is also provided to furnish additional detail to support the basic financial statements.

## Government-Wide Financial Statements

The government-wide financial statements present the reader with a broad overview of the Commonwealth's finances in a manner similar to a private sector business. The statements include the Statement of Net Position, which presents the assets and deferred outflows of resources, liabilities and deferred inflows of resources and net position for the government as a whole. Also presented is the Statement of Activities, which presents the functional expenses, offsetting revenues and changes in net position of the Commonwealth. The statements report the Commonwealth's net position and changes in net position. An increase or decrease in the Commonwealth's net position is one way to measure financial health as well as the trend of increases or decreases over time. Nonfinancial measures such as the types of capital investments, changes in taxation, population, employment and economic conditions are also indicators of the overall health of any government.

Both the statement of net position and the statement of activities have separate sections for three different categories of the Commonwealth's operations. These activities are Governmental Activities, Business-type Activities, and

Discretely Presented Component Units. Governmental activities are where the Commonwealth's basic services are reported. Business-type activities are those for which fees are charged for particular services. For the Commonwealth, business-type activities comprise the unemployment insurance compensation system, the Family and Employment Security Trust and the Institutions of Higher Education. The component units are separate legal entities that are included in this report due to the nature of their governance and financial relationship with the Commonwealth.

The government-wide financial statements can be found on pages 37-41 of this report.

## Fund Financial Statements and Component Unit Financial Statements

Funds are groups of related accounts that are used to maintain control over resources that have been segregated for specific activities or objectives. The Commonwealth, like other governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. Within the funds, budgetary compliance is demonstrated at the appropriation level for budgeted expenditures.

Only the major funds are shown separately in the fund financial statements, with the remaining funds aggregated and reported as nonmajor funds.

Fund financial statements focus on individual parts of the Commonwealth, reporting its operations in more detail than the government-wide statements. The Commonwealth's funds can be divided into three categories: Governmental Funds, Proprietary Funds, and Fiduciary Funds. It is important to realize that these fund categories use different bases of accounting and should be interpreted differently. Further discussion of the funds can be found in the section "Financial Analysis of the Commonwealth's Funds" and in Note 1 to the basic financial statements.

Component unit financial statements are presented for entities where the Commonwealth has financial accountability, but the entities are independent of the core Commonwealth operations. Most component units operate similarly to private-sector businesses.

Although the Massachusetts School Building Authority (MSBA) is a component unit of the Commonwealth, the MSBA's operations have been determined by management to operate in a similar fashion to a Commonwealth department due to the MSBA's service to the Commonwealth and because it relies on a pledged portion of the Commonwealth's sales tax revenue to fund its debt service. In FY05, legislation changed the funding of school construction from a direct appropriation of the Commonwealth to a dedicated portion of the sales tax allocated to the MSBA. Because of the nature of transactions between the Commonwealth and this authority, per GASB Statement No. 39, Determining Whether Certain Organizations Are Component Units as amended by GASB Statement No. 61, The Financial Reporting Entity: Omnibus, the authority's operations are blended with the primary government and reported as a governmental fund in the government-wide financial statements.

## Notes to the Financial Statements, Required Supplementary Information and Other Supplementary Information

The notes to the financial statements provide additional information that is essential to a full understanding of the financial statements as of the date provided in the government-wide and the fund financial statements. The notes to the financial statements can be found on pages 65-141.

The required supplementary information section includes a budgetary comparison schedule for the General Fund, along with a reconciliation comparing the original General Appropriation Act and supplemental appropriations to actual budgetary spending. A variance column is also provided. A further reconciliation schedule of the budgeted revenues and expenses to governmental fund perspective revenues and expenditures for the General Fund is also provided. Required pension and OPEB schedules are also presented in this section.

Other supplementary information is not required, but is included to present combining schedules of various nonmajor funds, fiduciary funds, and component units.

## GOVERNMENT-WIDE ANALYSIS

The primary government's combined net position (governmental and business-type activities) showed a net deficit of $\$ 73.000$ billion at the end of FY20, an increase in the net deficit of $\$ 4.019$ billion from the end of FY19. Government-wide unrestricted net position is negative by $\$ 78.097$ billion. As explained previously, in addition to the $\$ 41.643$ billion government-wide net pension liability and the $\$ 17.487$ billion OPEB liabilities recorded on the Commonwealth's books, a substantial portion of this deficit is a result of programs where the Commonwealth has funded assets owned by political subdivisions of the Commonwealth (in particular the result of the transfer of assets to MassDOT during FY10), as well as continued borrowing by the Commonwealth that funds, through its capital budget and debt issuance, construction of new assets owned by MassDOT, local governments, and local authorities. MassDOT reports its capital assets on its financial statements, which are incorporated into the Commonwealth's financial statements similarly to other component units.

## Major Long - Term Obligations for Assets of Political Subdivisions (amounts in thousands)

| Massachusetts School Building Authority net deficit | \$ | 4,917,803 |
| :---: | :---: | :---: |
| Outstanding bonds issued to fund the MBTA |  | 207 |
| Debt related to MassDOT assets |  | 13,274,840 |
| Effects on governmental unrestricted net position of items unique to the Commonwealth.......... | \$ | 18,192,850 |

Of the Commonwealth's approximately $\$ 2.497$ billion in FY20 state funded capital spending, about $\$ 1.999$ billion did not result in capital assets attributed to governmental activities of the Commonwealth, including approximately $\$ 1.358$ billion in transportation spending (with $\$ 326$ million in grants and other financial assistance to cities and towns), $\$ 146$ million for Institutions of Higher Education (which are included in the Commonwealth's business-type activities) and approximately $\$ 474$ million in other capital grants and financial assistance to local governments and quasi-public entities. Between FY05 and FY20 the Commonwealth's capital spending on projects owned by nonCommonwealth entities or by the Institutions of Higher Education totaled $\$ 27.217$ billion. These include Higher Education capital projects totaling approximately $\$ 2.272$ billion, capital spending for transportation projects now owned by the Massachusetts Department of Transportation totaling approximately $\$ 13.560$ billion, transportationrelated financial assistance to local governments totaling more than $\$ 4.211$ billion and other grants and financial assistance for non-Commonwealth entities such as cities and towns and quasi-public authorities funded through the Commonwealth's capital budget of almost $\$ 6.981$ billion, including $\$ 1$ billion in FY05 and FY06 to capitalize the Massachusetts School Building Authority.

The Commonwealth also funds school construction through debt issued by the MSBA (beyond its initial $\$ 1$ billion capitalization), and includes the MSBA's debt on its statement of net position, but the assets paid for with that debt are owned by Massachusetts cities, towns, and school districts.

Current assets and liabilities are amounts that are available in the current period and obligations that will be paid within one year of the financial statement date, respectively. As of June 30, 2020, the Commonwealth's government-wide current unrestricted cash and cash equivalents totaled $\$ 7.880$ billion, a decrease of $\$ 82$ million from June 30 , 2019, with a reduction of $\$ 2.454$ billion in income tax revenue whose collection was shifted from April to July as a result of extension of the tax filing deadline offset by $\$ 2.461$ billion in federal aid for Coronavirus relief. Total current assets were $\$ 19.171$ billion, an increase of $\$ 3.344$ billion from June 30, 2019, mainly due to increased funding from the federal aid for Coronavirus relief. As of June 30, 2020, the Commonwealth's current liabilities were $\$ 11.948$ billion, an increase of $\$ 2.467$ billion from June 30,2019 , with $\$ 1.7$ billion of that in unexpended Coronovirus Relief Fund federal aid classified as "unearned revenue" under GASB rules.

As of June 30, 2020, the primary government's non-current assets decreased by $\$ 1.049$ billion from June 30, 2019, to $\$ 17.338$ billion, due mainly to a reduction of $\$ 1.433$ billion in restricted assets in the Unemployment Insurance program.

The Commonwealth holds $\$ 12.883$ billion in traditional capital assets such as land, construction in process, buildings, infrastructure, and equipment, net of accumulated depreciation. GASB requires the reporting of the value of investments in the Commonwealth's infrastructure, including roads, bridges, beaches, dams and other immovable
assets on the face of the Commonwealth's financial statements. As these assets provide services to citizens, they are not available to finance future spending unless they are sold. Although the Commonwealth's investment in its capital assets is also reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves generally cannot be used to liquidate these liabilities.

The following table shows the Commonwealth's net position. Restricted net position represents resources that are subject to external constraints.

Net Position as of June 30, 2020 and 2019 (in thousands of dollars)

## Changes in Net Position

As noted earlier, the Commonwealth's total primary government net deficit increased by approximately $\$ 4.019$ billion between FY19 and FY20, to $\$ 73.000$ billion. The main reasons for the increase in the net deficit were the $\$ 3.100$ billion loss in governmental activities due to increases in the Commonwealth's pension and OPEB liabilities,

The following table shows the major categories of government-wide revenues and expenses for FY19 and FY20, as well as net position for the two fiscal years. In FY20, approximately $39.8 \%$ of the primary government's total revenue came from taxes, while the remainder resulted from programmatic revenues, including charges for services and grants and contributions, the majority of which was federal aid. FY20 revenues totaled $\$ 76.583$ billion, an increase of $\$ 10.865$ billion, or $16.5 \%$ from FY19, with tax revenue totaling $\$ 30.482$ billion, a decrease of $\$ 128$ million, or $0.4 \%$, from FY19. Income tax revenue was virtually unchanged, while sales tax revenue grew by $\$ 107$ million, or $1.6 \%$, corporate excise tax decreased by $\$ 341$ million, or $11.1 \%$. Both sales and corporate taxes were adversely affected by the pandemic, with healthy growth in the first three quarters of FY20 with declines in the fourth quarter.

## Revenue from Taxation <br> FY11-FY20

Changes in Net Position during the Fiscal Years Ended June 30, 2020 and 2019 (in thousands of dollars except percentages)

|  | Governmental Activities |  |  |  | Business - Type Activities |  |  |  | Total Primary Government |  |  |  | Total Primary Government |  |  |

Operating grants and contributions (including federal revenue for Medicaid, coronavirus relief, and Unemployment Insurance) totaled $\$ 27.913$ billion, an increase of $\$ 10.683$ billion, or $62.0 \%$, in FY20, with federal revenue for the Unemployment Compensation program growing from $\$ 49$ million in FY19 to $\$ 8.320$ billion in FY20, as federal supplementary aid for expanded and extended unemployment insurance benefits was delivered to the Commonwealth. The remainder of the increase in operating grants and contributions was primarily due to additional federal coronavirus relief delivered to the state.

Charges for services totaled $\$ 16.462$ billion increasing $\$ 421$ million, or $2.6 \%$ from FY19, with the increase resulting from $\$ 841$ million in charges for the Paid Family and Medical Leave (PFML) program, which began receiving assessments in fourth quarter of calendar year 2019. There were also increases in charges in Health and Human Services Medicaid and general government, almost fully offset by declines in Lottery ticket purchases as the pandemic cut into sales and a decrease in Labor and Workforce Development charges.

As of June 30, 2020, government-wide restricted net position totaled $\$ 2.863$ billion, a decrease of $\$ 679$ million, with the majority of the increase due to assets restricted for other purposes.

Primary government spending totaled $\$ 80.603$ billion, an increase of $\$ 15.558$ billion, or $23.9 \%$, from FY19, with governmental activities spending (i.e., excluding business-type activities such as Higher Education and the Unemployment Insurance program) totaling $\$ 63.165$ billion, an increase of $\$ 4.949$ billion, or $8.5 \%$, and businesstype activities spending totaling $\$ 17.438$ billion, an increase of $\$ 10.609$ billion, or $155.3 \%$. Medicaid expenses totaled $\$ 19.207$ billion, an increase of $\$ 1.113$ billion, or $6.2 \%$, from FY19, with the increase due to higher spending on responses to the coronavirus pandemic, which more than offset decreased utilization of routine and elective services due to restrictions put in place as a result of COVID-19. Health and Human services spending totaled $\$ 9.645$ billion, an increase of $\$ 983$ million or $11.4 \%$, transportation and public works spending totaled $\$ 2.807$ billion, an increase of $\$ 253$ million, or $9.9 \%$, early and secondary education spending totaled $\$ 6.618$ billion, an increase of $\$ 1.011$ billion, or $18.0 \%$, public safety and homeland security spending totaled $\$ 3.962$ billion, an increase $\$ 955$ million, $31.8 \%$, and general government expenses totaled $\$ 2.923$ billion, an increase of $\$ 157$ million, or $5.7 \%$. Included in these increases across these functions and programs (especially those with large numbers of employees) is $\$ 1.580$ billion in higher expenditures due to growth in pension and OPEB liabilities in FY20 compared to FY19. In addition, direct local aid spending totaled $\$ 6.390$ billion, an increase of $\$ 301$ million, or $4.9 \%$ as the Commonwealth continued its commitment to allocating a proportionate increase in projected budgetary tax revenues to local assistance. In business-type activities, unemployment insurance compensation expenditures totaled $\$ 11.948$ billion, an increase of $\$ 10.464$ billion, or $705.2 \%$, in the form of expanded benefits mandated by the federal government due to increased unemployment caused by the pandemic.

Income taxes comprise the majority of tax revenue. Of the $\$ 30.482$ billion in FY20 tax revenue within governmental activities, $\$ 17.414$ billion, or approximately $57.1 \%$, of total taxes, was from income taxes, $\$ 6.958$ billion, or $22.8 \%$, was from sales taxes, $\$ 2.727$ billion, or $8.9 \%$, was from corporate taxes, $\$ 694$ million, or $2.3 \%$, was from motor fuels taxes and $\$ 2.689$ billion, or $8.8 \%$, was from other forms of taxation. Lottery revenues of $\$ 5.391$ billion made up $48.7 \%$ of the Commonwealth's governmental charges for services. The largest operating grants were federal Medicaid subsidies, which totaled $\$ 11.232$ billion, or approximately $60.2 \%$, of all grants, other health and human services grants of $\$ 3.326$ billion, or $17.8 \%$ of all grants, and education grants of $\$ 1.312$ billion, or $7.0 \%$ of all grants. Most of the state's capital grants are for highway construction, and those federal grants are recorded not in the Commonwealth's financial statements but in the financial statements of the Massachusetts Department of Transportation.

Revenue-Governmental Activities
Fiscal Year Ending June 30, 2020

Medicaid expenses of $\$ 19.207$ billion accounted for $30.4 \%$ of the Commonwealth's governmental activities expenses. Historically, approximately half of Medicaid expenses have been reimbursed by the federal government, although under the Affordable Care Act some Medicaid expenditures are reimbursed at higher rates. The largest expense that is not subsidized by program revenues is direct local aid to the municipalities of the Commonwealth of approximately $\$ 6.390$ billion.

Other large expenditures for governmental activities included non-Medicaid health and human services costs of approximately $\$ 9.645$ billion, accounting for $15.3 \%$ of governmental expenses, pre-kindergarten through secondary education costs of approximately $\$ 6.618$ billion, accounting for $10.5 \%$ of governmental expenses and public safety and homeland security costs of approximately $\$ 3.962$ billion, accounting for $6.3 \%$ of governmental expenses. State employees' pensions and other post-employment benefits, which are included in the department spending amounts above, were $\$ 4.423$ billion.

Fiscal Year Ending June 30, 2020

## Business-Type Activities

Business-type activities are functions that are similar to activities of a private enterprise. In the Commonwealth, the Family and Employment Security Trust Fund and the Institutions of Higher Education are deemed to be businesstype activities because of their lack of separate taxation and GASB standards mandate that the Unemployment Compensation Trust Fund be reported as a business-type activity.

As of June 30, 2020, business-type activities' net position totaled $\$ 4.677$ billion, a decrease of $\$ 919$ million, or $16.3 \%$, from FY19, with the net position of the Institutions of Higher Education decreasing by $\$ 7$ million, to $\$ 3.646$ billion, and the net position of the Unemployment Insurance program decreasing by $\$ 1.795$ billion, to $\$ 202$ million, as a result of increased expenditures for unemployment insurance due to the coronavirus pandemic that were not fully offset by increased federal aid. These decreases in net position were partly offset by revenues in the Family and Employment Security Trust Funds, which receives revenues from the newly implemented Paid Family and Medical Leave (PFML) program, which had a net position of $\$ 830$ million, having begun to receive revenues midway through the fiscal year, with benefit expenses for the PFML program not scheduled to begin until January 2021. Program revenues of business-type activities totaled $\$ 14.781$ billion an increase of $\$ 9.063$ billion, or $158.5 \%$, resulting from increased charges for services totaling $\$ 5.385$ billion, an increase of $\$ 755$ million, or $16.3 \%$, with with the increase driven by $\$ 830$ million in new assessments for the new Paid Family and Medical Leave (PFML) program which offset reductions in Unemployment Insurance and Higher Education, which decreased by $\$ 19$ million, or $1.0 \%$, and $\$ 67$ million, or $2.4 \%$, respectively, due to the decline in economic and campus activity caused by the pandemic. Operating grants and contributions totaled $\$ 9.251$ billion, an increase of $\$ 8.275$ billion, or $847.7 \%$, entirely a result of increase federal aid for unemployment insurance benefits due to the pandemic, and capital grants and contributions totaled $\$ 146$ million, an increase of $\$ 34$ million, or $30.0 \%$. The two charts on the following page show fiscal year ending balances of the Unemployment Compensation Trust Fund as well as revenue and expenses of the Fund over the past five fiscal years.

## FINANCIAL ANALYSIS OF THE COMMONWEALTH'S FUNDS

The Commonwealth uses fund accounting to demonstrate inter-period equity and the extent to which current resources are financing the full cost of services that citizens are receiving. The basic governmental funds financial statements can be found immediately following the government-wide financial statements.

## Governmental Funds

Governmental funds account for the near term inflows, outflows, and balances of expendable resources of the Commonwealth's core functions and services. Each major fund is presented in a separate column in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in
fund balances.
The General Fund is the primary operating fund of the Commonwealth. At the end of FY20, the fund balance of the General Fund was $\$ 5.930$ billion. Of this amount, $\$ 3.501$ billion represents the balance in the Commonwealth's Stabilization Fund. $\$ 732$ million was classified as assigned for continuing appropriations from FY20 into FY21 and $\$ 1.697$ billion was unassigned.

## Governmental Fund Balance Statutory* vs. GAAP (amounts in millions)

*Statutory basis includes the Massachusetts Department of Transportation (MassDOT) and excludes expendable trust funds

*     - Beginning balance restated due to early implementation new accounting standards

FY20 governmental fund revenues and other financing sources totaled $\$ 72.507$ billion, an increase of $\$ 2.731$ billion, or $3.9 \%$, from FY19, with an increase of $\$ 845$ million in Massachusetts School Building Authority (MSBA) long term debt and commercial paper issuance, an increase of $\$ 1.744$ billion, or $2.5 \%$, in non-MSBA revenues and other financing sources. Tax revenues totaled $\$ 30.266$ billion, a decrease of $\$ 352$ million, or $1.1 \%$, due to the recession caused by the coronavirus pandemic. Federal grants and reimbursements totaled $\$ 18.475$ billion, an increase of $\$ 2.147$ billion, mainly due to increases in Medicaid reimbursements, including revenues from the $6.2 \%$ increase in the federal reimbursement rate implemented to provide states with an infusion of cash to offset the fiscal impacts of the pandemic. It should be noted that while federal aid from the Coronavirus Aid Relief, and Economic Security (CARES) Act totaled $\$ 2.461$ billion, GAAP requirements specify that only the $\$ 761$ million of such revenues that were expended in FY20 be recognized on the Statement of Revenues and Expenditures, with the balance of $\$ 1.700$ billion classified on the balance sheet as "unearned revenue". Assessments, fees, and investment earnings totaled $\$ 12.814$ billion, a decrease of $\$ 575$ million, or $4.3 \%$. Revenues from other financing sources totaled $\$ 10.951$ billion, an increase of $\$ 1.511$ billion, or $16.0 \%$, due to net growth of $\$ 992$ million in new and refunding bond issuance at the MSBA and by the Commonwealth generally and $\$ 426$ million in other transfers in, due primarily to
transfers among the major budgeted such that balances in funds with surpluses are used to eliminate deficits in other funds prior to closing the fiscal year, as required by state finance law.

FY20 governmental fund expenditures and other financing uses totaled $\$ 72.615$ billion, an increase of $\$ 5.112$ billion, or $7.6 \%$ from FY19, with the $\$ 3.101$ billion of that growth in programmatic spending (as opposed to "other financing uses). Medicaid expenditures totaled $\$ 19.207$ billion, an increase of $\$ 1.113$ billion or $6.2 \%$, from FY19. Other changes in programmatic expenditures include increases of $\$ 763$ million, or $9.5 \%$, in Health and Human Services expenditures, due primarily to $\$ 111$ million in new Coronavirus Relief Fund expenditures, an increase of $\$ 264$ million, or $23.2 \%$ in food stamp expenditures (both in response to the pandemic), as well as an increase of $\$ 118$ million, or $22.30 \%$ in Medical Assistance Trust Fund (MATF) payments to Massachusetts hospitals that care for higher than average lower-income patients, and $\$ 117$ million, or $27.6 \%$ increase in payments to the federal government for recoveries of payments by Medicare to Medicaid patients, , $\$ 603$ million, or $41.2 \%$, in Public Safety and Homeland Security, with the entire increase due to coronavirus-related expenditures by the Massachusetts Emergency Management Agency (MEMA) for protective equipment and other relief spending, $\$ 352$ million, or $8.9 \%$, in Executive Office of Education spending, and $\$ 301$ million, or $4.9 \%$ in direct local aid. Other financing uses totaled $\$ 9.721$ billion, an increase of $\$ 2.011$ billion, or $26.1 \%$, with $\$ 1.777$ billion of that amount due to debt service-related expenditures, of which $\$ 1.655$ billion was payments to an escrow agent in support of an advanced bond refunding.

As of June 30, 2020 the Commonwealth's governmental funds reported combined ending fund balance of $\$ 9.058$ billion, a decrease of $\$(108)$ million, or $(1.2) \%$, from the previous year.

| Governmental Funds - Fund Balance Classification (amounts in thousands) |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

GAAP requires that fund balances be classified by the degree of restriction placed upon their use by constitutional, statutory, or contractual requirements, and these classifications are shown in the table above. Restricted fund balances represent amounts restricted for Commonwealth and MSBA debt service or restricted by bond covenants, funds that are restricted in capital projects and special revenue funds, balances in the federal grants funds, and some balances held in expendable trusts. Unrestricted amounts include fund balances classified as committed, including those generated by revenue sources directed to specific purposes but with a lower level of constraint on their use than restricted balances, as well the fund balance of the Stabilization Fund. Unrestricted amounts also included prior appropriations continued, and residual balances in the General Fund, both of which are classified as unassigned. The $\$ 318$ million, or $6.4 \%$, increase in committed balances results primarily from growth in balances in numerous non-budgetary funds which Legislature has designated for specific purposes. Assigned fund balance increased by $\$ 426$ million or $33.9 \%$, due primarily to $\$ 286$ million growth in budgetary fund "prior appropriations continued", or PACs, where the Legislature allocated FY20 funding for expenditure in FY21, as well as an increase in funds the MSBA reserved for grants and loans to local cities and towns for school construction projects, and the $\$ 776$ million, or $50.7 \%$, decline in unassigned balances is due mainly to a $\$ 487$ million deficit in the capital projects funds, where the Commonwealth issues its bonds in arrears subsequent to expenditures being made, partially offset by increased balance in the General Fund between FY19 and FY20. A full discussion of the Commonwealth's fund balance classification policy under GASB 54 and a table of fund balances by program type can be found in Note 1 to the basic financial statements, on pages 68-73.

In FY20, the Commonwealth implemented GASB Statement No. 84, Fiduciary Activities, which resulted in
reclassifying certain fiduciary funds as governmental funds, and vice versa. Those reclassifications resulted in a net increase of approximately $\$ 55$ million in the beginning fund balance of the other governmental funds. See Footnote 1T for further details.

## Proprietary Funds

Proprietary Funds report activities of the Commonwealth that are structured similar to for-profit businesses. Proprietary fund financial statements provide the same type of information as the government-wide financial statements, only in greater detail.

As discussed on pages 29-30, the business-type activities decreased the Commonwealth's net position by approximately $\$ 919$ million.

## BUDGETARY HIGHLIGHTS

The FY20 budget enacted by the Legislature (the General Appropriation Act) included an FY20 tax revenue estimate of $\$ 29.893$ billion, an increase from the FY20 consensus estimate of $\$ 29.299$ billion, which the Legislature adjusted upward by $\$ 594$ million after tax revenue ended FY19 well above forecast, and was further increased to $\$ 30.170$ billion as a result of enacted tax law changes and an assumption of $\$ 100$ million in tax settlements included in the General Appropriation Act. $\$ 27.655$ billion of that revenue was to be deposited in the budgeted funds and and available for use, with $\$ 2.515$ billion was to be deposited into non-budgeted funds for transfers of sales tax revenue dedicated to the Massachusetts Bay Transportation Authority ( $\$ 1.100$ billion) and the Massachusetts School Building Authority ( $\$ 940$ million), revenue deposited in the non-budgeted Workforce Training Fund ( $\$ 25$ million), and the Stabilization Fund on account of capital gains tax revenues that was estimated to exceed an annual threshold ( $\$ 452$ million).

In October 2019, with tax revenues tracking estimates assumed in the FY20 enacted budget, the Secretary of Administration and Finance affirmed the FY20 tax revenue estimate. In January 2020, the Secretary of Administration and Finance revised the Fiscal Year 2020 state tax revenue estimate upward to $\$ 30.339$ billion (including $\$ 49$ million in projected judgment and settlement revenue), to reflect strong growth in year-to-date income tax collections, primarily due to a surge in capital gains taxes.

FY20 budgetary fund tax revenues ended the year at $\$ 29.633$ billion (including $\$ 49$ million in tax settlements exceeding $\$ 10$ million each), of which $\$ 27.613$ billion was deposited in the budgeted funds. Tax revenue deposited in the budgeted funds declined by $\$ 156$ million, or $0.6 \%$, from FY19, and was $\$ 211$ million below the final FY20 tax estimate.

The FY20 General Appropriation Act (GAA) authorized approximately $\$ 44.706$ billion in spending, exclusive of approximately $\$ 2.842$ billion in required pension contributions and $\$ 506$ million in FY19 spending authorized to be continued into FY20 as part of the FY19 and FY20 general appropriation acts and various FY19 supplemental budgets.

Approximately $\$ 1.726$ billion in supplemental appropriations were authorized during FY20, $\$ 1.303$ billion of which were enacted by June 30, 2020. Subsequent to year end, a supplemental budget was enacted totaling approximately $\$ 423$ million in new appropriations, $\$ 422$ million of which funded FY20 Medicaid expenses. In addition to the year-end FY20 supplemental appropriations just described, the year's significant supplemental appropriation activity included:

- $\$ 1.156$ billion for COVID-related spending in various accounts, virtually all of which has been or will be reimbursed by the federal government;
- $\$ 25$ million for the Medical Assistance Trust Fund payments to hospitals that care for low-income patients;
- $\$ 16$ million to fund FY20 collective bargaining costs;
- $\$ 15$ million for heating assistance subsidies to low income residents;
- $\quad \$ 15$ million to fund legal services for indigent defendants;
- $\$ 12$ million for the Safety Net Provider Trust Fund;
- $\$ 10$ million to fund information technology costs within the Executive Office of Health and Human services;
- $\quad \$ 10$ million to capitalize the Twenty-First Century Education Trust Fund.

Budgeted revenues and other financing sources (before transfers between the budgeted funds, which are included in both spending and revenue and thus have no effect on fund balances) totaled $\$ 47.316$ billion, an increase of $\$ 934$ million, or $2.0 \%$, from FY19. As tax revenues grew at a healthy rate in the first three quarters of FY20, but as the Massachusetts economy contracted due to the coronavirus pandemic, tax revenue slowed in the fourth quarter of the fiscal year, and ended up declining by only $\$ 156$ million, or $0.6 \%$ from FY19. Personal income tax withholding increased by $\$ 528$ million, or $4.0 \%$, capital gains revenue (part of the personal income tax) decreased by $\$ 391$ million, or $19.1 \%$, from FY19, sales and use tax was virtually unchanged from FY19 (up $\$ 2$ million, or $0.03 \%$, with $5.0 \%$ growth in regular sales tax offset by $11.4 \%$ and $7.0 \%$ declines in meals and motor vehicle sales taxes, respectively), corporate and business taxes declined by $\$ 399$ million, or $11.9 \%$ as the waiving of late payment penalties resulted in many business taxpayers delaying tax year 2019 final payments until July, and estate and inheritance taxes increased by $\$ 98$ million, or $16.3 \%$. Federal reimbursements totaled $\$ 12.795$ billion, an increase of $\$ 1.023$ billion, or $8.7 \%$, primarily due to an increase in the federal reimbursement rate for Medicaid program spending that was implemented in response to the pandemic as a method for quickly providing federal aid to state governments (with Medicaid reimbursements up $\$ 700$ million, or $11.4 \%$, from FY19) and $\$ 350$ million recorded as a receivable for the estimated value of FEMA reimbursements to be claimed after the close of FY20. Departmental revenue, which consists primarily of assessments and fees for state licenses and state services, totaled $\$ 4.920$ billion, an increase of $\$ 88$ million, or $1.8 \%$, from FY19. Interfund transfers from non-budgeted funds totaled $\$ 1.988$ billion, a decrease of $\$ 22$ million, or $1.1 \%$, from FY19, due primarily to a $\$ 123$ million, or $27.2 \%$ increase in fringe benefit assessments resulting from a higher fringe benefit rate and increased federal expenditures in non-budgeted coronavirus-related accounts, which was offset by a $\$ 121$ million, or $11.1 \%$ decrease in Lottery Fund transfers to the General Fund due to a decline in Lottery profits.

FY20 budgeted expenditures and other financing uses, including transfers to non-budgeted funds (but before transfers between the budgeted funds) totaled $\$ 46.980$ billion, an increase of $\$ 2.170$ billion, or $4.8 \%$, from FY19, with the increase primarily attributable to coronavirus relief expenditures, higher spending on Medicaid and other health care, pension contributions, and Local Aid.

Spending on programs and services totaled $\$ 39.866$ billion, an increase of $\$ 1.935$ billion, or $5.1 \%$, from FY19. Medicaid expenditures totaled $\$ 17.023$ billion, an increase of $\$ 502$ million, or $3.0 \%$, from FY19. Expenditures by the Massachusetts Emergency Management Agency (MEMA) increased from $\$ 4$ million in FY19 to $\$ 344$ million in FY20 to fund purchases of personal protective equipment (PPE) and for other coronavirus-related responses. Spending for direct local aid (both education aid and unrestricted aid), at $\$ 6.376$ billion, was up $\$ 302$ million, or $5.0 \%$, from FY19.

Spending on state employee health benefits paid through the Group Insurance Commission (excluding benefits paid to retirees) increased by $\$ 16$ million, or $1.0 \%$, increasing from $\$ 1.646$ billion to $\$ 1.662$ billion, as utilization of non-COVID-19-related health services declined, offsetting trend growth in general health care spending. Budgeted debt service totaled $\$ 2.410$ billion, up $\$ 83$ million, or $3.6 \%$, from FY19.

Interfund transfers from budgeted to non-budgeted funds totaled $\$ 1.399$ billion, a decrease of $\$ 42$ million or $2.9 \%$. Transfers to the Medical Assistance Trust Fund (where expenditures vary greatly from year-to-year, depending on the timeliness of federal government approval of certain reimbursements) grew by $\$ 143$ million, or $39.3 \%$ from FY19, but this was offset by reductions due to non-recurring transfers made in FY19 but not FY20, including FY19 transfers of $\$ 46$ million from the General Fund to the Commonwealth Care Trust Fund, $\$ 85$ million in FY19 capital gains taxes transferred to the state pension and OPEB funds, and an FY19 transfer of $\$ 46$ million related to the defeasance of Commonwealth debt.

## CAPITAL ASSETS

Capital assets of the Commonwealth include land, buildings, improvements, equipment, vehicles and infrastructure. The Commonwealth's investment in capital assets for its governmental and business-type activities as of June 30, 2020 amounts to approximately $\$ 23.729$ billion, with accumulated depreciation of approximately $\$ 10.846$ billion, leaving a net book value of $\$ 12.883$ billion. Infrastructure includes assets that are normally immovable and of value only to the Commonwealth, such as roads, bridges, piers and dams (the investments in capital assets noted above do not include capital assets owned by MassDOT). The total increase in the Commonwealth's net investment in capital assets from 2019 to 2020 was approximately $\$ 168$ million, with a $\$ 115$ million increase in governmental activities and a $\$ 53$ million increase in business-type activities. The major increase in the net value of capital assets was in construction in process and machinery and equipment.

The following table details the capital assets for the Commonwealth.

## Capital Assets at Year - End

Additional detail on the Commonwealth's FY20 capital asset activity can be found in Note 5 to the basic financial statements ("Capital Assets") on pages 95-96.

## DEBT ADMINISTRATION

The Commonwealth issues short-term and long-term debt. Debt that is general obligation in nature is backed by the full faith and credit of the Commonwealth and paid from governmental funds. Additionally, short-term notes are issued and redeemed annually.

To fund the FY20 capital budget, the Commonwealth borrowed by issuing $\$ 1.518$ billion in long-term bonds, which was new money general obligation debt and $\$ 254$ million was special obligation date secured by motor fuel taxes and motor vehicle license and registration fees. All new bond sales were either for general government purposes, for road and bridge repair, or unallocated as of year-end and assumed to be for general purposes, including for construction and equipment purchases. In addition, the Commonwealth issued $\$ 1.225$ billion in debt to refund already existing debt, taking advantage of continued low interest rates in FY20. During the year, the Commonwealth also issued $\$ 1.4$ billion in Revenue Anticipation Notes (RANs) in two separate $\$ 500$ million series and one $\$ 400$ million series. The two $\$ 500$ million notes were retired in April and May, 2020 while the $\$ 400$ million note was retired in June 2020. In addition, during FY20 the Commonwealth drew down $\$ 500$ million from working capital agreements. This was repaid in August 2020. Finally, to meet cash needs the Department of Unemployment borrowed $\$ 160$ million under Title XII of the Social Security Act which was outstanding as of June 30, 2020.

Approximately $8.3 \%$ of the Commonwealth's $\$ 23.953$ billion in general obligation debt outstanding as of June 30, 2020 was issued as variable rate bonds. During fiscal 2020 there were no changes to credit ratings on any of the Commonwealth's outstanding debt.

The following table details the Commonwealth's debt by type for the fiscal year compared to the prior fiscal year, excluding premiums and discounts.

Outstanding Long - Term Debt Obligations

Additional detail on the Commonwealth's short-term debt can be found in Note 6 ("Short-Term Financing and Credit Arrangements") on pages 96-97 and Note 7 ("Long-Term Obligations") on pages 97-112.

## ECONOMIC FACTORS AFFECTING THE FISCAL YEAR 2021 BUDGET

The Commonwealth, with an international reputation for medical, cultural, historical and educational institutions remains the economic and educational hub of New England. The Commonwealth's economy remains diversified, but its strongest component is its knowledge-based technology and service industries and consequently the State relies heavily on a highly educated workforce. The Commonwealth is home to sixteen S\&P 500 companies, among them thirteen Fortune 500 headquarters.

The Massachusetts economy, along with the rest of the nation, was adversely affected by the recession caused by the coronavirus pandemic, after many years performing better than the U.S. economy as a whole. In January 2020 the Massachusetts unemployment rate was $2.8 \%$, compared to the national rate of $3.5 \%$, but by July 2020 , the Massachusetts rate was $16.2 \%$ versus a national rate of $10.2 \%$. Since then the two rates have converged with the Massachusetts rate only slightly higher than the national rate in December 2020, 7.4\% versus 6.7\%.

## Unemployment Rate <br> January 2008 - December 2020

The FY21 General Appropriation Act (GAA) is based on an FY20 tax revenue estimate of approximately $\$ 27.976$ billion, an increase of $\$ 363$ million, or $1.3 \%$, from FY20 actual tax collections. Of that amount, $\$ 22.712$ billion represents taxes available for budget after adjusting for $\$ 5.264$ billion in tax revenue that is allocated to state pension contributions ( $\$ 3.115$ billion), sales tax revenue dedicated to the Massachusetts Bay Transportation Authority ( $\$ 1.142$ billion), the Massachusetts School Building Authority ( $\$ 982$ million), and revenue allocated to the non-budgetary Workforce Training Fund (\$25 million).

With tax revenues through December $2020 \$ 372$ million above the year-to-date tax revenue benchmark, on January 15, 2021, the Secretary of Administration and Finance raised the FY21 tax revenue estimate by $\$ 700$ million. Through January 31, 2020, FY21 year-to-date tax collections totaled $\$ 17.653$ billion, up $\$ 764$ million, or $4.5 \%$, from the same period in FY20, $\$ 429$ million above the upwardly revised year-to-date benchmark.

## REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Commonwealth's finances and accountability for all of the Commonwealth's citizens, taxpayers, customers, investors and creditors. Questions concerning any of the information provided in this report or requests for additional information should be addressed via email to comptroller.info@state.ma.us or mail to: Commonwealth of Massachusetts, Office of the Comptroller, 1 Ashburton Place, $9^{\text {th }}$ Floor, Boston, MA 02108. # Reconciliation of Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities 

For the fiscal year ended June 30, 2020
(Amounts in thousands)
Net change in fund balances - total governmental funds ..... \$ ..... $(108,371)$
Amounts reported for governmental activities in the statement of activities are different because:
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This amount represents capital outlays including increases to construction in process, but excluding reductions and dispositions.370,075
Current year depreciation expense
Amounts presented in the statement of activities, but not in the change in fund balances due to differences in revenue and expense recognition under different bases of accounting
The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized as part of the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items
Change in capital leases ..... 2,721Massachusetts School Building Authority191,681
Net pension costs $(2,677,100)$
Net OPEB costs
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore, are not reported as expenditures in governmental funds. These expenses include accrued interest, lottery prizes, claims and benefits that are reported in the statement of activities, but not in funds

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## A. FINANCIAL REPORTING ENTITY - BASIS OF PRESENTATION

The accompanying financial statements of the Commonwealth of Massachusetts (the Commonwealth) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles. The Commonwealth's significant accounting policies are described below.

The Commonwealth is comprised of three branches: the Executive Branch, with the Governor as the chief executive officer; the Legislative Branch, consisting of a Senate of 40 members and a House of Representatives of 160 members; and the Judicial Branch, made up of the Supreme Judicial Court, the Appeals Court, and the Trial Court. In addition, the Legislature has established 57 independent authorities and agencies. Below the level of state government are 351 cities and towns exercising the functions of local governments. The cities and towns of the Commonwealth are also organized into 14 counties.

For financial reporting purposes, the Commonwealth has included all funds, organizations, agencies, boards, commissions, and institutions. The Commonwealth has also considered all potential component units for which it is financially accountable, as well as other organizations for which the nature and significance of their relationship with the Commonwealth is such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. As required by GAAP, these financial statements present the Commonwealth (the primary government) and its component units. The Commonwealth has included 41 entities as component units in the reporting entity because of the significance of their operational and/or financial relationships with the Commonwealth. Additional information related to the component units is found in Note 14 to the basic financial statements.

Blended Component Units - Blended component units are entities that are legally separate from the Commonwealth but are so closely related to the Commonwealth, that they are, in substance, the same as the Commonwealth or entities providing services entirely or almost entirely to the Commonwealth. The net position and results of operations of the following legally separate entities are presented as part of the Commonwealth's operations:

The Massachusetts School Building Authority (MSBA) is charged with administering the Commonwealth's school construction and renovation program. The MSBA's revenues are derived almost entirely from dedicated sales taxes from the Commonwealth which is $1 \%$ of applicable sales tax in the Commonwealth. The MSBA's bonded debt is secured by these sales tax revenues. Expenditures by the MSBA are made on behalf of the Commonwealth as a successor to a long-standing Commonwealth program of school construction. The MSBA's operations and results thereon are blended with the Commonwealth and as such are reported as a major governmental fund.

The Pension Reserves Investment Trust Fund (PRIT) is the investment portfolio for the pension assets of the Commonwealth and as such, is presented as a blended component unit. PRIT is managed by the Pension Reserves Investment Management (PRIM) Board. Certain portions of PRIT's net position totaling approximately $\$ 16.067$ billion relate to holdings on behalf of cities and towns that participate in the Pool and are reported as an external investment trust within the fiduciary fund type.

The Massachusetts Municipal Depository Trust (MMDT) is an investment pool of the Commonwealth and its political subdivisions. The various local governments and other political subdivisions share of net position is approximately $\$ 6.308$ billion at June 30,2020 , and is reported as an external investment trust within the fiduciary fund type.

Departments Audited Separately from the Commonwealth but not legally separate from the Commonwealth - the following entities are audited separately from the Commonwealth but are not legally separate from the

Commonwealth:
The Massachusetts State Lottery Commission, a division of the Office of the State Treasurer and ReceiverGeneral, operates the Commonwealth's lottery. The net position of the Commission and results thereon are presented as a major governmental fund.

The Institutions of Higher Education of the Commonwealth are also not legally separate from the Commonwealth and have operations and net position that are presented as part of the Commonwealth's business-type activities. These systems include:

The University of Massachusetts System including the University of Massachusetts Building Authority, and the Worcester City Campus Corporation. The Worcester City Campus Corporation includes a not-for-profit subsidiary, the Worcester Foundation for Biomedical Research, Inc.

The State University and Community College Systems including the 9 state universities and 15 community colleges located throughout the Commonwealth and the Massachusetts State College Building Authority.

Other Discretely Presented Component Units that are Separately Audited - Discrete component units are entities that are legally separate (often called Authorities) but financially accountable to the Commonwealth, or whose relationships with the Commonwealth are such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. The component units column of the basic financial statements includes the financial data of the following entities:

## Major component units:

The Massachusetts Department of Transportation (MassDOT) incorporates the former Massachusetts Turnpike Authority and has jurisdiction over the Massachusetts Bay Transportation Authority (MBTA) and the Regional Transit Authorities. MassDOT has attributes of a state department as well as an authority. It operates like a state department for purposes of state finance law and is reported as part of the Commonwealth for compliance with federal and state tax law. In this unique relationship all road and bridge assets of the Commonwealth (including the former Turnpike Authority (MTA)) have been transferred to MassDOT, while the Commonwealth will continue to hold current and future debt for the construction repair, improvement, and replacement of these assets.

The Massachusetts Clean Water Trust provides a combination of federal and Commonwealth funds for water and sewer projects around the Commonwealth as operator of the Commonwealth's State Revolving Fund. The Trust's three member Board is comprised of Commonwealth Officials and the Commonwealth provides annual contract assistance and matching grants to fund the operations of the Trust.

Commonwealth Insurance Connector Authority administers the Commonwealth health insurance programs to facilitate subsidized health insurance for individuals without access to employer-sponsored health insurance as well as offer an affordable commercial health insurance product named Commonwealth Care for small businesses that are eligible for the program. The Authority's 11 member governing board has four members who are Commonwealth Officials, four who are appointed by the Governor with the final three appointed by the Attorney General and is legally accountable to the Commonwealth.

Fiduciary Component Units - hold funds in trust for the benefit of others and are not available to fund activities or obligations of the primary government. The Commonwealth reports the following fiduciary component units:

State Employees' Retirement System (SERS) - is a public employee retirement system (PERS), that administers a cost-sharing multiple employer defined benefit pension plan covering substantially all employees of the Commonwealth and certain employees of the independent authorities and agencies, including the state police officers at the Massachusetts Port Authority. The former Massachusetts Turnpike Authority (MTA) employees and retirees became members of SERS upon the creation of MassDOT. Other employees who transferred to MassDOT have been, and remain, members of SERS. The assets and liabilities of the former

MTA have been transferred to SERS.

Management of the SERS is vested in the SRB, which consists of five members-two elected by current and active SERS members, one by the remaining members of the SRB, one who is appointed by the State Treasurer, and the State Treasurer, who serves as ex-officio and is the Chairman of the SRB.

Massachusetts Teachers' Retirement System (MTRS) - is a PERS that administers a cost-sharing multiple employer defined benefit pension plan managed by the Commonwealth on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a non-employer contributing entity and is legally responsible for all contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts and Quincy College.

Management of the MTRS is vested in the MTRB, which consists of seven members-two elected by the MTRS members, one who is chosen by the six other MTRB members, the State Treasurer (or their designee), the State Auditor (or their designee), a member appointed by the Governor, and the Commissioner of Education (or their designee), who serves as ex-officio and is the Chairman of the MTRB.

State Retirees' Benefit Trust (SRBT) - is a single employer defined benefit Other Post-Employment Benefit (OPEB) plan administered by the Commowealth. Benefits are managed by the Group Insurance Commission (GIC) and investments are managed by PRIM. The GIC has representation on the Board of Trustees of the State Retirees' Benefits Trust (SRBT).

The SRBT is set up solely to pay for OPEB benefits and the cost to administer those benefits. It can only be revoked when all such health care and other non-pension benefits, current and future, have been paid or defeased. The GIC administers benefit payments, while the Trustees are responsible for investment decisions. The SRBT is administered by the board of trustees and is reported as an OPEB Trust Fund and does not issue a stand-alone audited financial report.

Management of the SRBT is vested with a board of trustees, which consists of seven members including the Secretary of Administration and Finance (or their designee), the Executive Director of the GIC (or their designee), the Executive Director of PERAC (or their designee), the State Treasurer (or their designee), the Comptroller (or a designee), one person appointed by the Governor and one person appointed by the State Treasurer. The members elect one person to serve as chair of the board.

The Commonwealth reports these fiduciary component units with other fiduciary funds and therefore are omitted from the government-wide financial statements.

## Related Organizations

The following are "related organizations" under GASB Statement No. 14, The Financial Reporting Entity, as amended by Statement No. 39, Determining Whether Certain Organizations are Component Units - an Amendment of GASB Statement No. 14 and Statement No. 61, The Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34: Massachusetts Port Authority, Massachusetts Housing Finance Agency, MassVentures, and Massachusetts Educational Finance Authority. The Commonwealth is responsible for appointing a voting majority of the members of each entity's board, but the Commonwealth's authority does not extend beyond the appointments. These entities do not meet the criteria for inclusion as component units of the Commonwealth and therefore are not part of these financial statements.

Availability of Financial Statements

The separately audited financial statements of the Commonwealth's component units and funds may be obtained from the various entities, or by contacting the Statewide Financial Reporting Team in the Office of the Comptroller at (617) 973-2660 for component unit contact information.

## B. GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

The Statement of Net Position and the Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are defined as either governmental or business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods and services.

## C. MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

## Government-Wide Financial Statements

The Statement of Net Position presents all of the reporting entity's non-fiduciary assets and liabilities, with the difference reported as net position. Net position is reported in three categories:

- Net investment in capital assets consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.
- Restricted net position results when constraints placed on net position use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through enabling legislation.
- Unrestricted net position consists of net position which does not meet the definition of the two preceding categories.

Resources from restricted net position are used prior to those from unrestricted net position.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Program revenues include charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are instead reported as general revenue and offset or supplant the net operating deficit or surplus from governmental or business-type operations.

## Fund Financial Statements

The fund financial statements present a balance sheet and a statement of revenues, expenditures, and changes in fund balances for its major and aggregated non-major funds.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements pursuant to GASB reporting standards, with non-major funds being combined into a single column.

The Commonwealth reports its financial position and results of operations in funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues, and expenditures/expenses. Transactions between funds within a fund type, if any, have not been eliminated.

Governmental Activities - Government-wide financial statements are reported using the economic resources management focus and the full accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Grants and similar items are recognized as revenues as soon as all eligibility requirements have been met.

Governmental Funds - Fund financial statements account for the general governmental activities of the Commonwealth. Governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as they become susceptible to accrual and are both measurable and available. Revenues are considered to be available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. Significant revenues susceptible to accrual include income, sales and use, corporation, and other taxes, federal grants, federal reimbursements and other reimbursements for use of materials and services which are recognized in the year the materials are received, the grants are expended, or services are provided. The measurement period for accrual for taxes earned is generally one year for income, corporate and other taxes and within thirty days for sales and use taxes. For federal and other reimbursements, the measurement period for accrual is generally sixty days if the related expenditures being reimbursed occurred prior to year-end. Expenditures are recorded in the period in which the related fund liability is incurred. Principal and interest on general long-term obligations are recorded as fund liabilities when due. Compensated absences, claims and judgments, termination benefits and similar activities are recognized to the extent that they are normally expected to be liquidated with expendable available financial resources. Amounts incurred but not reported for Medicaid are reported to the extent that services are rendered before June 30th.

Business-Type Activities - Government-wide financial statements account for activities for which a fee is charged to external users for goods or services. In these services, debt may be issued backed solely by these fees and charges.

There may be also a legal requirement or a policy decision to recover costs. As such, these funds account for operations similarly to a for-profit business. The operations of the Commonwealth's Institutions of Higher Education are reported as systems within the proprietary funds. Proprietary fund types are described in more detail below.

Proprietary and Fiduciary Funds - Fund financial statements are presented on the same basis of accounting as the business-type activities in the government-wide financial statements. For fiduciary funds, post-employment benefits and refunds are recognized when due and payable.

The Commonwealth reports the following fund types:

## Governmental Fund Types:

General Fund, a governmental fund, is the primary operating fund of the Commonwealth. It is used to account for all governmental transactions except those required to be accounted for in another fund.

Special Revenue Funds account for specific revenue sources that have been aggregated according to Commonwealth general laws to support specific governmental activities.

Debt Service Funds account for the accumulation of resources for and the payment of debt.
Capital Projects Funds account for the acquisition or construction of major Commonwealth capital facilities financed primarily from bonds and federal reimbursements.

Within the governmental fund types, the Commonwealth has established the following major funds, in addition to the General Fund:

Lottery Funds are governmental funds and account for the operations of the State and Arts Lotteries, which primarily reimburse the General Fund for local aid to cities and towns.

The Massachusetts School Building Authority is presented as a governmental fund, reflecting the activity of the blended component unit, the Massachusetts School Building Authority, accounting for grants to cities, towns and regional school districts for school construction and renovation projects.

The Coronavirus Relief Fund is a special revenue fund to account for activities under the Federal Coronavirus Aid,

Relief and Economic Security (CARES) Act to combat the global Covid-19 pandemic.

## Proprietary Fund Types:

Business-Type Activities account for programs financed in whole or in part by fees charged to external parties for goods and services.

The proprietary funds include the following:
Unemployment Compensation Fund reports the taxes collected from employers and held by the United States Treasury in the Federal Unemployment Trust Fund, from which funds are drawn for the payment of benefits to the unemployed.

Family and Employment Security Trust Fund accounts for taxes collected from employers which are used to provide up to 26 weeks of paid leave for medical or family reasons.

College and University Information, is presented here, aggregated by the University's activity, the State Universities' activity and the Community Colleges' activity.

## Fiduciary Fund Types:

Post-Employment Benefit and OPEB Trust Funds report resources that are required to be held in trust for the members and beneficiaries of the Commonwealth's post-employment and OPEB benefit plans. These funds recognize employer contributions when legally due and employee contributions in the period when due. Further information on the significant accounting policies for post-employment and OPEB benefit trust funds may be found in Notes 9 and 10 to the basic financial statements on pages 113-130.

External Investment Trust Funds account for the portion of pooled cash and pension assets held under the custodianship of the Commonwealth for the benefit of entities outside the Commonwealth's financial reporting entity, including cities, towns and other political subdivisions of the Commonwealth.

Private Purpose Trust Funds account for various gifts and bequests held in trust by the Commonwealth of which only the income is expendable for purposes specified by the donor. The majority of the individual accounts are for perpetual cemetery care endowments on behalf of deceased individuals.

Custodial Funds account for assets held by the Commonwealth on behalf of other governmental entities, other organizations or individuals. These funds include, but are not limited to, fines, forfeitures, tax collections, and payroll withholding taxes.

## Fund Balances:

Governmental fund balances are considered nonspendable, restricted, committed, assigned, and unassigned, based on the relative strength of spending constraints.

Nonspendable fund balances are those that cannot be spent because they are either: (a) not in spendable form; or (b) legally or contractually required to be maintained intact, such as balances in the form of inventories, permanent funds, and notes receivable. As of June 30, 2020, there were no nonspendable fund balances.

Restricted fund balances are those where constraints on their use are: a) externally imposed by creditors (such as through debt covenants), grantors, contributors or laws or regulations of other governments; or b) imposed by constitutional provisions or enabling legislation such that there is a legally enforceable requirement that those resources be used only for the specific purposes stipulated. Legal enforceability means that a government can be compelled by an external party-such as citizens, public interest groups, or the judiciary-to use resources created by enabling legislation only for the stipulated purposes.

Committed fund balances are those that can be used only for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority, which in the case of the Commonwealth is the Legislature and Governor. Committed amounts cannot be used for other than the specified purposes unless the Governor and Legislature remove or change the specified use through legislation. The authorization specifying the purposes for which amounts can be used must have the consent of both the legislative and executive branches of the government prior to the end of the reporting period.

Assigned fund balances are amounts that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. Intent should be expressed by: (a) the governing body itself; or (b) a body (a budget or finance committee, for example) or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes. The Massachusetts Legislature has the authority to assign or modify previously assigned fund balance. In distinction to restricted and committed balances, the authority for making an assignment is not required to be the government's highest level of decision-making authority, i.e., the Legislature and Governor, and the action to assign fund balance can occur after the end of the year. Furthermore, the nature of the actions necessary to remove or modify an assignment is not as prescriptive as it is with committed fund balances-constraints imposed on the use of assigned amounts are more easily removed or modified than those imposed on amounts that are classified as committed. Per GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions, (GASB 54) assigned balances include those funds remaining at the end of the fiscal year that are reappropriated for the following fiscal year. Assigned balances also include administratively established accounts whose purpose is defined by the Secretary of Administration and Finance and other cabinet secretaries.

Unassigned fund balance is the residual classification for the General Fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes in the General Fund. The General Fund is the only fund that reports a positive unassigned fund balance amount. In addition, in accordance with GASB No. 54, negative balances in other governmental funds are classified as unassigned.

While the Commonwealth has not announced a formal policy governing the priority of spending fund balances, in conformance with GASB 54 requirements, when an expenditure is incurred for purposes for which both restricted and unrestricted resources are available, restricted resources are spent first, followed by committed resources, assigned resources, and unassigned resources.

Details of FY20 governmental fund balances are shown below (amounts in thousands);

|  | Restricted Purposes |  | Committed Purposes |  | Assigned Purposes |  | Unassigned Purposes |  | Totals |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

The Commonwealth does not have a formally adopted minimum fund balance policy. However, most governmental funds cannot end a fiscal year in deficit. Those funds that are authorized to end a fiscal year in deficit are discussed in Note 8 to the basic financial statements, "Individual Fund Deficits" on page 113.

## Stabilization Fund Arrangements:

In accordance with Section 2H of Chapter 29 of the Massachusetts General Laws, the Commonwealth maintains a Stabilization ("Rainy Day") Fund. Per Chapter 29, balances in the Stabilization Fund can be expended only when non-routine budget shortfalls occur and upon appropriation by the Legislature and approval by the Governor. Chapter 29 requires that after calculating the Commonwealth's "consolidated net surplus" (the sum of the "undesignated" balances in certain specific state budgeted funds, equal to balances that are neither restricted nor reappropriated for the following fiscal year) any remaining surplus be transferred to the Stabilization Fund. In addition, withholding taxes on certain Lottery transfers are required to be transferred to the Stabilization Fund. Starting in FY10, statute requires the Comptroller, after certification by the Commissioner of Revenue, to transfer any capital gains tax revenues in excess of $\$ 1$ billion (adjusted annually for economic growth) during a fiscal year to the Stabilization Fund. Starting in FY12, statute requires the Comptroller, after certification by the Commissioner of Revenue and the Attorney General, to transfer to the Stabilization Fund all revenue from individual settlements and
judgments greater than $\$ 10$ million each that exceeds the five year rolling annual average of such settlements and judgments. During FY20, the settlements and judgments revenue did not reach the five year average threshold and all such revenue was retained in the General Fund.

Historically, balances in the Stabilization Fund have been used almost exclusively during recessionary periods to offset budget shortfalls after other budgetary measures have been taken. Per Chapter 29, the Commonwealth is required to maintain a balanced budget, and if a revenue shortfall is projected, the Secretary of Administration and Finance is required to reduce state agencies' spending authorizations in an amount equal to any projected shortfall.

The Stabilization Fund ended FY20 with a balance of $\$ 3.501$ billion. For the fiscal year ending June 30, 2020, the Stabilization Fund's balance increased by $\$ 62$ million from investment income, approximately $\$ 362$ thousand in statutorily mandated deposits of withholding taxes on certain Lottery proceeds, and $\$ 15$ million from gaming tax revenue. In accordance with GASB 54 requirements, balances in the Stabilization Fund are classified as committed.

## Fiscal Year-End

All funds and component units are reported using fiscal years, which end on June 30.

## Program Revenue

Program revenue is defined by the Commonwealth to be the revenue from fees and assessments collected by departments that are directly applicable to that department's operations.

Operating and non-operating revenues and expenses

Revenues and expenses of business-type activities and proprietary funds are classified as operating or non-operating and are sub-classified by object. Operating revenues and expenses generally result from providing services and producing and delivering goods. All other revenues and expenses are reported as non-operating.

## D. CASH, CASH EQUIVALENTS, SHORT-TERM INVESTMENTS AND INVESTMENTS

The Commonwealth follows the practice of pooling cash and cash equivalents. Cash equivalents consist of shortterm investments with an original maturity of three months or less and are stated at cost. Interest earned on pooled cash is allocated to the General Fund and, when so directed by law, to certain other Governmental Funds.

The Office of the Treasurer and Receiver-General (Treasury) manages the Commonwealth's short-term external mixed investment pool, the Massachusetts Municipal Depository Trust (MMDT), which is comprised of two portfolios: a Cash Portfolio and a Short Term Bond Portfolio. The Cash Portfolio is a money-market-like investment pool; its investments are carried at amortized cost. As of June 30, 2020, the MMDT's entire cash fund is included as cash equivalents in the accompanying financial statements. The Short Term Bond Portfolio investments are carried at fair value. As of June 30, 2020, the MMDT's entire bond fund is included as short-term investments in the accompanying financial statements.

Investors in MMDT are not allowed to overdraw their shares. For a complete copy of MMDT's separately issued financial statements, please contact the Office of the State Treasurer's Cash Management Department, at (617) 367-9333 or download the statements from the Cash Management section of the Office of the State Treasurer's website at www.mass.gov/treasury. Massachusetts General Law Chapter 29, Section 38 enumerates the Commonwealth's investment policy for non-pension assets.

The post-employment and OPEB benefit trust funds invest in the Pension Reserves Investment Trust (PRIT) Fund, a diversified external investment pool managed by the Pension Reserves Investment Management (PRIM) Board and are reported at fair value in the accompanying financial statements. The State Employees', Teachers' Public Employee Retirement Systems (PERS) and the State Retirees' Benefit Trust (SRBT) are required to invest in the PRIT Fund and comprise approximately $37.8 \%, 38.9 \%$ and $1.9 \%$ respectively, of the net position of the PRIT Fund.

For a complete copy of PRIT's separately issued financial statements, contact the PRIM Board at 84 State Street, Boston, MA 02109.

Other Commonwealth investments are comprised of equities (marketable securities) and fixed income securities, as well as interests in alternative investment funds such as private equity, debt and real estate. Marketable securities are reported at fair value based upon quoted market prices. Investments in fixed income securities, including U.S. government agency obligations, are reported at fair value using independent pricing services. In determining the price, the services may reflect such factors as market prices, yields, maturities, and ratings, supplemented by deal quotations. Alternative investments are generally reported at net asset values (NAV) reported by the investment manager for the respective securities, which are used as a practical expedient to estimate the fair value of the Commonwealth's interests therein, unless it is probable that all or a portion of the investment will be sold for an amount different from NAV. As of June 30, 2020, the Commonwealth had no plans or intentions to sell investments at amounts different from NAV.

Reported fair values for shares in registered mutual funds are based on share prices reported by the funds as of the last business day of the fiscal year.

Investments also include pooled investment funds with Commonfund which are valued at fair value based upon estimated net asset values provided by the management of Commonfund. These pooled investment funds are invested in marketable debt and equity securities.

Certificates of deposit and guaranteed investment/annuity contracts are carried at amortized cost.

## E. RECEIVABLES AND UNEARNED REVENUE

In general, tax revenue is recognized on the government-wide statements when assessed or levied and on the governmental financial statements to the extent that it is both measurable and available, based upon collection experience. If revenue is not received within the availability period, receivables are deferred. Receivables are stated net of estimated allowances for uncollectible accounts.

Reimbursements due to the Commonwealth for its expenditures on federally-funded-reimbursement and grant programs are reported as "Federal grants and reimbursements" or "Due from federal government" in the statement of net position.

Federal grants received in advance are recorded as unearned revenue until all eligibility requirements of the grant have been met. In FY20, the Commonwealth received $\$ 2.461$ billion of Coronavirus Relief of which $\$ 1.700$ billion is recorded as unearned revenue.
"Other Receivables" represent amounts due to the Commonwealth including Lottery revenues and Higher Education receivables from students, amounts due to the University of Massachusetts from related organizations and other items. Also included in other receivables for FY20 are amounts due to the Commonwealth under provisions of the Master Settlement Agreement among five tobacco companies and 46 states, including the Commonwealth. Pursuant to provisions of GASB Technical Bulletin No. 2004-1 "Tobacco Settlement Recognition and Financial Reporting Entity Issues", a receivable has been recorded in the general fund for approximately $\$ 126$ million, representing $50 \%$ of the amounts expected to be received during FY21. Also, included as a long-term receivable is approximately $\$ 28$ million representing the Commonwealth's share of the Nonparticipating Manufacturer (NPM) adjustment for 2004 tobacco sales which were not contested by the manufacturers.
"Loans Receivables" - The MSBA has entered into various loan agreements with municipalities at a $2.0 \%$ interest rate with principal to be paid in equal installments for varying terms. Currently, the longest repayment schedule has a final payment in FY43. This program is designed to assist a limited number of school districts with unanticipated inflationary construction costs over the district's original project budget. The loans outstanding as of June 30, 2020 were $\$ 74$ million, of which $\$ 6$ million is due in FY21. During FY20, the MSBA collected $\$ 6$ million of scheduled principal payments.

## F. DUE FROM CITIES AND TOWNS

"Due from Cities and Towns" represents reimbursements due to the Commonwealth for its expenditures on certain programs for the benefit of cities and towns.

## G. CAPITAL ASSETS

Capital assets, which include property, plant, equipment and infrastructure (e.g. roads, bridges, ramps and other similar items), are reported in the applicable governmental or business-type activity columns of the governmentwide financial statements.

## Methods used to value capital assets

Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at acquisition value at the date of acquisition.

## Capitalization policies

All land, non-depreciable land improvements and donated historical treasures or works of art are capitalized. Single pieces of equipment, vehicles, computer equipment and software that equal or exceed $\$ 50,000$ are capitalized. Buildings and infrastructure projects with a cost that equals or exceeds $\$ 100,000$ are capitalized. The costs of normal maintenance and repairs that do not add to the value of assets or materially extend asset lives are not capitalized.

Capital assets of the component units are capitalized upon purchase and depreciated on a straight-line basis over the estimated useful lives of the assets.

## Depreciation and useful lives

Applicable capital assets are depreciated using the straight-line method. Unless unallocable, depreciation expense is charged to the function of the capital asset being depreciated. Estimated useful lives are as follows:
$\left.\begin{array}{ll}\text { Type of } \text { Asset }\end{array} \quad \begin{array}{c}\text { Estimated } \\ \text { Useful Life } \\ \text { (in years) }\end{array}\right]$

## Construction in process

Construction in process includes all associated cumulative costs of a constructed capital asset. Construction in process is relieved at the point at which an asset is placed in service for its intended use.

## H. INTERFUND / INTRAFUND TRANSACTIONS

As a general rule, the effect of interfund activity has been eliminated in the government-wide statements. Exceptions to this rule are: 1) activities between funds reported as governmental activities and funds reported as business-type activities and 2) activities between funds that are reported in different functional categories in either the governmental or business-type activities column. Elimination of these activities would distort the direct costs and program revenues for the functions concerned. Interfund receivables and payables have been eliminated from the government-wide Statement of Net Position, except for the residual amounts due between governmental and business-type activities.

## I. STATEWIDE COST ALLOCATION PLAN - FRINGE BENEFIT COST RECOVERY

The Commonwealth has elected not to present its cost allocation and recovery separately on the Statement of Activities. Certain costs of nine "central service" agencies of the Commonwealth are recovered from the remaining agencies in a federally approved statewide cost allocation plan. These costs that are allocated are based upon benefits received by the user agency that benefit from these services. The Commonwealth also appropriates and pays the fringe benefit costs of its employees and retirees, as well as MassDOT employees and retirees, through the General Fund. These fringe benefits include the costs of employees' group health insurance, pensions, unemployment compensation, and other costs necessary to support the workforce. As directed by Massachusetts General Laws, these costs are assessed to other funds based on payroll costs, net of credits for direct payments. Since fringe benefit costs are not separately appropriated or otherwise provided for in these funds, the required assessment creates an unfavorable budget variance in the budgeted funds. The employees' group health insurance and workers' compensation activity is accounted for in the governmental funds.

## J. SCHOOL CONSTRUCTION GRANTS, CONTRACT ASSISTANCE AND OTHER PAYABLES

Under the former school building assistance program (prior to the creation of the MSBA) the Commonwealth reimbursed $50 \%$ to $90 \%$ of approved eligible construction and borrowing costs for school construction and renovation to municipalities and regional school districts for 728 previously approved projects noted by MSBA as Prior Grant projects. The MSBA has assumed responsibility for these projects under its enabling statute.
The MSBA records a liability for its share of total eligible project costs differently depending on the type of project. However, for all projects, the MSBA recognizes a liability for its estimated share of total eligible project costs when the applicable eligibility requirements have been met.

Prior Grants - All of the 728 Prior Grant projects had been receiving an annual payment under the former program. The liability for these projects will be reduced over time through annual payments, and savings from debt refundings by the local communities in which the MSBA shares in the savings based on the reimbursement rate of the project. As of June 30, 2020, the liability for prior grant projects is approximately $\$ 80$ million.

Waiting List - The MSBA funds Waiting List projects using two different methods, lump sum and progress payments. Each funding method has different eligibility requirements.

Waiting List projects that are under the lump sum method were recognized as a liability once construction started. The liability for these projects will be reduced over time through annual payments and savings from debt refundings by the local communities in which the MSBA shares in the savings based on the reimbursement rate of the project. These projects operate similar to Prior Grant projects. As of June 30, 2020, the liability outstanding for Waiting List projects under the lump sum method is $\$ 43$ million.

Under the progress payment method, the MSBA's shares of costs incurred are generally recognized as a liability once a grantee requests reimbursement from the MSBA. As of June 30, 2020, there is no remaining liability related to the progress payment method.

Waiting List projects that are not currently recognized as a liability are considered commitments of the MSBA. As of June 30, 2020, there are no commitments outstanding for the Waiting List projects.

New Program - The MSBA funds New Program projects on a progress payment basis. Under this process, communities may submit reimbursement requests no more frequently than once per month. Upon review, audit, and approval, the MSBA processes payment for its share of eligible costs incurred. The MSBA's share of costs incurred for New Program projects are recognized as a liability once a grantee's request for reimbursement is reviewed, audited, and approved by the MSBA. The MSBA has recorded a liability of $\$ 52$ million in the governmental funds for reimbursements received, reviewed, and approved for payment by June 30, 2020. Additionally, a liability of $\$ 60$ million was recorded for the reimbursements not reviewed or approved for payment prior to June 30, 2020, as well as final project hold back payments subject to final audit and Board approval after year end. The long-term portion of this liability is estimated at $\$ 15$ million. New Program projects that are not currently recognized as a liability are considered commitments of the MSBA. As of June 30, 2020, the amount of commitments outstanding for the New Program projects is $\$ 1.6$ billion, and will be funded under the progress payment method.

For all projects, regardless of the funding mechanism, costs incurred by the grantees are subject to audit by the MSBA. Completion of these audits will allow the MSBA to determine the final approved cost of these projects, and the MSBA will adjust the payments it makes for these projects, as necessary, in accordance with the results of those audits.

As of June 30,2020 , MSBA had an outstanding liability of $\$ 112$ million, and $\$ 1.6$ billion of commitments outstanding, for the New Program projects. The Commonwealth dedicates a $1 \%$ statewide sales tax (drawn from the existing statewide $6.25 \%$ sales tax), excluding sales tax revenues on meals and from certain additional statutorily exempted revenues from sales, to the School Modernization and Reconstruction Trust Fund (the "SMART Fund"), in support of these grant programs and for all other operations of the MSBA, including debt service.

The Massachusetts Clean Water Trust (the Trust) loans to its borrowers are subsidized by interest earnings on its pledged assets which include debt service reserve funds, direct loans and contract assistance provided to the Trust by the Commonwealth. Although borrowers are obligated to the Trust to make scheduled payments, these subsidies are expected to be available for the duration of the loan financing agreements. The Commonwealth has committed to provide contract assistance in the amount of $\$ 202$ million over 30 years. This obligation of the Commonwealth to the Trust is a general obligation of the Commonwealth, for which its full faith and credit are pledged. Annual appropriations are made each year by the Commonwealth to fund the current year's obligation.

Accounts payable includes amounts due to vendors of the Commonwealth for goods and services delivered before June $30^{\text {th }}$ but paid for after year-end, the largest of which is Medicaid for $\$ 543$ million.

## K. COMPENSATED ABSENCES

Compensated absences are recorded as a long-term liability in the Statement of Net Position. For the governmental fund statements, accumulated vacation and sick leave are reported as expenditures and fund liabilities when incurred upon retirement, termination or death. Sick and vacation payments to terminated employees as of June 30, 2020 but paid after the fiscal year ends are also reported in the funds.

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements and state laws. Upon retirement, termination or death, certain employees are compensated for unused vacation and sick leave (subject to certain limitations) at their current rate of pay.

Compensated absences in the governmental funds are liquidated from the same sources that fund the personnel expenses of the employees who are compensated for unused vacation and sick leave pay. In most cases, this is the General Fund, but also includes non-General Fund sources to the extent that personnel expenses are charged to those funding sources.

In the business-type activity and the discretely presented component units, employees' accumulated vacation and
sick leave are recorded as an expense and liability as the benefits accrue.

## L. DEDICATED REVENUES AND PLEDGES

The Commonwealth has a number of pledges of revenue streams for its own bonds and various other bond issues of other authorities. Commonwealth debt supported by dedicated revenue streams include special obligation bonds for road and bridge construction secured by motor fuels taxes and federal grant anticipation notes (GANS) secured by federal grants for highway construction. Detailed information on pledges for the Commonwealth's own debt is included in sections $\underline{B}$ and $\underline{C}$ of Note 7 , on pages 102-103.

The Commonwealth dedicates receipts from the sales tax (other than the tax on meals) to the Massachusetts Bay Transportation Authority (MBTA) and the Massachusetts School Building Authority (MSBA). Each entity receives $1.0 \%$ of the sales tax. The MBTA's portion is subject to an inflation-adjusted floor.

The amount dedicated to the MBTA is accounted for in a nonbudgeted special revenue fund and is subject to adjustment equal to the lesser of the annual increase in the Boston consumer price index or prior calendar year annual sales taxes, with a floor of $0.0 \%$ and a ceiling of $3.0 \%$. Legislation approved by the Governor on October 31, 2014 increased the amount statutorily required to be credited to the MBTA by $\$ 160$ million annually, starting in fiscal 2015. The $\$ 160$ million increase in the dedicated sales tax revenue amount and the amount included in the inflation-adjusted floor was intended to replace the $\$ 160$ million annual state appropriation the MBTA received from fiscal 2010 through fiscal 2014.

In FY20, approximately $\$ 1.096$ billion and $\$ 925$ million of the dedicated sales tax revenue stream was directed to the MBTA and the MSBA, respectively.

The Commonwealth has also pledged sales tax revenue and rooms tax surcharges from areas contiguous to convention centers and the Worcester DCU Arena and Convention Center to support such centers' operations. As of June 30, 2020, taxes within the Convention Center districts support approximately $\$ 504$ million of outstanding principal and approximately $\$ 232$ million of interest on debts related to these Convention Centers. Taxes collected in FY20 were approximately $\$ 131$ million, while debt service on the bonds was approximately $\$ 52$ million.

Under additional transportation finance reform effective July 1, 2013, motor vehicle sales tax collections were shifted from the General Fund to the Commonwealth Transportation Fund (CTF), while also eliminating a $0.385 \%$ pledge of regular and meals sales tax to the CTF. During FY20, approximately $\$ 515$ million in motor vehicle sales tax revenue was transferred to MassDOT. From the Commonwealth Transportation Fund, $\$ 127$ million was dedicated to funding the operations of the MBTA while an additional $\$ 90$ million was dedicated to funding the operations of the regional transit authorities. These amounts are transferred through the CTF.

## M. LOTTERY REVENUE AND PRIZES

Ticket revenues and prizes awarded by the Massachusetts Lottery Commission are recognized as drawings are held. For certain prizes payable in installments, the Commonwealth purchases annuities and principal-only and interestonly Treasury strips in the Commonwealth's name, which are recorded as annuity contracts and prizes payable in the agency fund and on the Statement of Net Position. Though the annuities are in the Commonwealth's name in the case of a default, they are solely for the benefit of the prizewinner. The Commonwealth retains the risk related to such annuities.

## N. RISK FINANCING

The Commonwealth self-insures for employees' workers' compensation, casualty, theft, tort claims and other losses. Such losses, including estimates of amounts incurred but not reported, are included as accrued liabilities in the accompanying financial statements when the loss is incurred. For employees' workers' compensation, the Commonwealth assumes the full risk of claims filed under a program managed by the Human Resources Division. For personal injury or property damages, Massachusetts General Laws limits the risk assumed by the Commonwealth to $\$ 100,000$ per occurrence, in most circumstances. The Group Insurance Commission administers health care and other insurance for the Commonwealth's employees and retirees.

## O. DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES

Deferred outflows of resources are defined as a consumption of net position by the government that is applicable to a future reporting period. Deferred inflows of resources are defined as an acquisition of net position by the government that is applicable to a future reporting period. Deferred outflows of resources increase net position, similar to assets, and deferred inflows of resources decrease net position, similar to liabilities.

## P. NET POSITION

The Commonwealth reports net position as restricted where legally segregated for a specific future use by enabling legislation. Otherwise, these balances are considered unrestricted.

Net position has been restricted as follows:
"Restricted for unemployment benefits" - identifies amounts solely for the payment of unemployment compensation under federal labor laws.
"Restricted for retirement of indebtedness" - identifies amounts held by fiscal agents to fund future debt service obligations pertaining to Special Obligation Revenue Bonds authorized under Section $2 O$ of Chapter 29 of the Massachusetts General Laws and Chapter 33 of the Acts of 1991. It also includes amounts held for Grant Anticipation Notes authorized by Chapter 11 of the Acts of 1997 and Chapter 121 of the Acts of 1998.
"Restricted for other purposes" - identifies amounts held for various externally imposed restrictions either by creditors, grantors or laws and regulations of other governments.

The net position of the Post-Employment Benefit and OPEB Trust Funds and the Pension Reserves Investment Trust portion of the External Investment Trust Funds are restricted for post-employment benefits. These restrictions identify resources held in trust for the members and beneficiaries of the Commonwealth's post-employment benefit plans. The Pension Reserves Investment Trust portion of the External Investment Trust Funds also includes pooled cash and pension assets held under the custodianship of the Commonwealth for the benefits of cities, towns and other political subdivisions of the Commonwealth.

## Q. SERVICE CONCESSION AGREEMENTS

The higher education institutions of the Commonwealth (State Universities and Colleges) enter in to services concession agreements for campus dining facilities and bookstores. In exchange for these agreements the vendors provide contributions to the institutions to improve the facilities as well as revenue sharing arrangements. All improvements and equipment purchased with the payments remain the property of institutions. The contracts range from five to eighteen years in duration. These agreements generate deferred inflows of resources, and liability for the unamortized portion of assets transferred. Per terms of the agreements, either party can terminate the agreement
at any time, without cause, by providing a written notice. In the event of termination, the unamortized portion is to be returned. Following is a summary of amounts of the arrangements as of June 30, 2020 (amounts in thousands):

| State Universities | \$ | 14,318 |
| :---: | :---: | :---: |
| Community Colleges. |  | 215 |
| Total | \$ | 14,533 |

Approximately $\$ 21$ million in the carrying value of capital assets, $\$ 47$ thousand in other assets and $\$ 7$ million in liabilities associated with these service concession agreements are reported in the business-type activities in these financial statements.

## R. ESTIMATES

The preparation of the Comprehensive Annual Financial Report requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures at the date of the financial report.

Estimates also affect the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

## S. PENSIONS AND OPEB

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the State Employees' Retirement System (SERS) and the Massachusetts Teachers' Retirement System (MTRS) and additions to/ deductions from the SERS and the MTRS fiduciary net position have been determined on the same basis as they are reported by SERS and MTRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

For purposes of measuring the liability, deferred outflows of resources and deferred inflows of resources, and expense associated with the Commonwealth's requirement to contribute to the Boston Retirement System (BRS) for Boston teachers, information about BRS's fiduciary net position and additions to/deductions from BRS's fiduciary net position have been determined on the same basis as they are reported by BRS. For this purpose, benefit payments (including refunds of contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the State Retiree Benefit Trust (SRBT) and additions to/deductions from the SRBT fiduciary net position have been determined on the same basis as they are reported by the SRBT. For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

## T. SIGNIFICANT NEW ACCOUNTING PRONOUNCEMENTS/IMMATERIAL CORRECTIONS

During FY20 the Commonwealth early implemented GASB Statement No. 84, Fiduciary Activities. This statement established criteria for identifying fiduciary activities of all state and local governments and introduces a Statement of Changes in Net Position for the renamed fiduciary activity, custodial funds. This resulted in restatements for funds that were reclassified under the new standard. As a result, the beginning fund balance of the governmental activities were restated by approximately $\$ 55$ million for the adoption of a new accounting principle.

In addition, the Commonwealth corrected the beginning net position for immaterial errors identified in the GASB

Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits - Other Than Pensions, actuarial valuation as of the June 30, 2018 measurement date. Further the Commonwealth Corporation, a discretely presented component unit, reclassified a prior year transaction from fund balance to a liability.

The details of the impact of the restatement and the immaterial error corrections on the fund level and governmentwide financial statements are detailed below (amounts in thousands):

|  | $\begin{gathered} \text { Governmental } \\ \text { Funds } \\ \hline \end{gathered}$ |  | Proprietary Funds |  |  |  |  |  |  | Fiduciary Funds |  |  |

## 2. DEPOSITS, SHORT-TERM INVESTMENTS AND INVESTMENTS

## Primary Government

The Commonwealth's cash and cash equivalents and restricted cash is comprised of the following (amounts in thousands):

|  | Governmental Activities |  | Business-Type Activities |  |  | Government Wide Total |  | Fiduciary Funds |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Cash | \$ | 81,347 | \$ | 1,268,628 | (1) | \$ | 1,349,975 | \$ | 66,199 |
| MMDT - cash fund |  | 6,322,305 |  | 530,994 | (1) |  | 6,853,299 |  | 6,900,335 |
| Restricted cash with fiscal agent |  | 268,599 |  | - |  |  | 268,599 |  | - |
| Total | \$ | 6,672,251 | \$ | 1,799,622 |  | \$ | 8,471,873 | \$ | 6,966,534 |

(1) of which $\$ 323,098$ (in thousands) is presented as restricted cash in the accompanying financial statements.

## Lottery Annuity Contracts and U.S. Treasury Strips

The Massachusetts State Lottery Commission, a division of the Office of the State Treasurer and Receiver-General, purchases annuity contracts from insurance companies and United States treasury strips to fund the Commonwealth's liability for future installment prize obligations. These annuities and treasury strips represent obligations of the insurance companies and the custodial banks, respectively, to provide a fixed series of payments over a specified period. Only the annuity investments are subject to credit risk. For the annuity contracts, risk is controlled by purchasing these investments only from insurance companies with the top two ratings issued by a national recognized ratings organization. However, due to the nature of these annuity contracts, the credit quality of the insurance company issuer is subject to change. As of June 30, 2020, the amortized cost of annuities was approximately $\$ 106$ million. At June 30, 2020, the U.S Treasury Strips have a fair value of approximately $\$ 749$ million. Approximately $87.6 \%$ of these amounts are held in United States Treasury strips at a custodial bank. No insurance company has an amount of annuities over $5.7 \%$ of the overall portfolio.

## MSBA Deposits and Investments

The MSBA is authorized to invest in obligations of the US Treasury, its agencies and instrumentalities, bonds or notes of public agencies or municipalities, bank time deposits, guaranteed investment contracts, money market accounts and repurchase agreements. These investments are recorded at fair value. The MSBA has an investment policy that establishes the minimum credit quality for certain instruments, outlines investment procedures and updates for periodic reporting. The MSBA investment policy does not specifically limit the amount the MSBA may invest in any one issuer.

As of June 30, 2020, the MSBA held the following deposits and investments which are a component of Governmental Activities above (amounts in thousands):

| Cash and cash equivalents. | \$ | 472,685 |
| :---: | :---: | :---: |
| Restricted cash with fiscal agent |  | 1,072 |
| Restricted investments |  | 1,143,253 |
| Total | \$ | 1,617,010 |

## Custodial Credit Risk - Pooled Cash

Custodial credit risk is the risk that in the event of a bank failure, deposits and investments may not be returned to the Commonwealth. Cash balances represent amounts held in bank depository accounts that may be subject to custodial credit risk.

The Commonwealth requires all bank deposits in excess of insurance coverage by the Federal Deposit Insurance

Corporation (FDIC) to be collateralized with a perfected pledge of eligible collateral or a letter of credit. For programs created by the Treasury, such as the Small Business Banking Program, eligible collateral must be pledged in an amount equal to $102 \%$ of the amount of the deposits that exceed FDIC insurance. Sufficient collateral to cover total Commonwealth deposits in excess of the FDIC insured amount must be pledged and held in safekeeping by a custodian that is approved by and under the control of the Treasurer and Receiver General.

Membership by a financial institution in the Depositors Insurance Fund (DIF) or the Share Insurance Fund (SIF) will be accepted by the Treasurer and Receiver General's Office as alternative security, provided that the financial institution submits proof of membership in the DIF or the SIF. Membership in the DIF is limited to Massachusetts chartered savings banks while membership in the SIF is limited to Massachusetts cooperative banks.

## Custodial Credit Risk - Higher Education

The Institutions of Higher Education have investment policies that may vary by institution for custodial credit risk. Each institution carries deposits that are fully insured by the FDIC, as well as uninsured deposits. As of June 30, 2020, the bank balances of uninsured deposits totaled approximately $\$ 224$ million.

## Custodial Credit Risk - MSBA

The MSBA does not have a formal investment policy for custodial credit risk. The MSBA carries deposits that are fully insured by the Federal Deposit Insurance Corporation (FDIC) insurance, as well as deposits that are fully collateralized. As of June 30, 2020, all MSBA bank balances were fully protected against loss.

## Interest Rate Risk - MMDT

Interest rate risk is the extent that changes in interest rates of debt investments will adversely affect the fair value of an investment. These investments include certain short-term cash equivalents, various long-term items and restricted assets by maturity in years. The Treasury cash portfolio minimizes the risk of the fair value of securities falling due to changes in interest rates by maintaining a dollar-weighted average portfolio maturity of 60 days or less. The Treasury cash portfolio's assets are managed to maintain a dollar-weighted average life to maturity of 120 days or less. The Cash Portfolio is operated in compliance with Governmental Accounting Standards Board (GASB) Statement No. 79, Certain External Investment Pools and Pool Participants.

The MMDT Cash Portfolio's dollar-weighted average maturity fluctuated from 33 days on July 1, 2019 to 52 days on June 30, 2020.

Investments in the MMDT Short Term Bond Portfolio are made in investment-grade securities as defined by national statistical rating agencies. The Commonwealth assesses risk for the Short Term Bond Portfolio by using duration. Duration is the weighted maturity of the security's cash flows, where the present values of the cash flows serve as weights.

For the MMDT Short Term Bond Portfolio, the duration fluctuated from 2.50 to 2.67 years. At June 30, 2020, investments in the MMDT Short Term Bond Portfolio had a total net position of $\$ 824$ million with investment maturities ranging from less than one year to ten years. At June 30, 2020, the Short Term Bond Portfolio's effective maturity schedule was as follows:

| Securities with an Effective Maturity of | Percentage of Total Net Position |
| :---: | :---: |
| Less than one year.............. | 13.6 \% |
| One to five years.... | 85.7 \% |
| Six to ten years................. | 0.1 \% |
| Total*. | 99.4 \% |

*The remaining $0.6 \%$ consists of cash equivalents and other assets.

## Interest Rate Risk - Higher Education

As of June 30, 2020, the Institutions of Higher Education had debt investments stated at fair value of approximately $\$ 346$ million and had investment maturities ranging from less than one year to more than ten years, with approximately $24.9 \%$ of the investment's fair values maturing in less than 1 year, approximately $54.1 \%$ from one to five years, approximately $12.1 \%$ from six to ten years, and approximately $8.9 \%$ more than ten years.

Interest Rate Risk - MSBA

The MSBA's investment policy does not specifically limit investment maturities as a means of managing its exposure to fair value losses arising from interest rates. As of June 30, 2020, the MSBA had approximately $\$ 200$ million invested in a collateralized guaranteed investment contract and approximately $\$ 539$ million invested in U.S. Treasury Bonds. These investments are included in restricted investments on the balance sheet. The guaranteed investment contract matures on July 25, 2022 while the U. S. Treasury Bonds mature from May 2027 to February 2045. These investments represent approximately $77.1 \%$ of the MSBA's total investments in debt service funds and debt service reserve funds.

## Interest Rate Risk - Custodial Funds

The custodial funds hold certain debt investments in trust as collateral for regulatory purposes. As of June 30, 2020, these investments had a fair value of approximately $\$ 533$ million, with investment maturities ranging from less than one year to more than ten years. Of the total fair value, approximately $33.6 \%$ has maturities of less than one year, $38.2 \%$ from one to five years, $17.3 \%$ from six to ten years and $10.8 \%$ greater than ten years.

## Credit Risk - MMDT

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Commonwealth, exclusive of Pension Trust Funds, minimizes concentration of credit risk, the risk attributed to the magnitude of the investment in a single issuer. The Commonwealth's investment policy prohibits the Treasury from investing more than $5 \%$ of the total investment portfolio in any single financial institution or issuer, excluding various public entity securities and repurchase agreements. However, there are no restrictions on the amount that can be invested in public entity securities and the portfolio may be invested in U.S. Treasury and other Government Sponsored Enterprises (GSE's) obligations and repurchase agreements.

The Treasury cash portfolio is invested only in First Tier Securities as defined by the Securities and Exchange Commission's Rule 2A-7 of the Investment Company Act of 1940. The Treasury does have additional policies regarding credit ratings of investments as detailed in the Investment Circulars which can be found in the documents tab at https://www.mymmdt.com/mmdt/pools.do. At June 30, 2020, the Cash Portfolio's securities were all rated as First Tier.

At June 30, 2020, the Short Term Bond Portfolio's follows:

| Portfolio Composition | Percentage of Total Net Position |
| :---: | :---: |
| AAA | 67.7 \% |
| AA | 5.5 \% |
| A | 11.4 \% |
| BBB............................ | 14.8 \% |
| Total*........................... | 99.4 \% |

[^23]
## Credit Risk - Higher Education

For the Institutions of Higher Education presented in the Business-Type Activities, fair values of debt investments were approximately $\$ 102$ million at AAA, approximately $\$ 85$ million from AA+ to A- and approximately $\$ 159$ million either unrated, $\mathrm{BBB}+$ or less.

Credit Risk - MSBA
The MSBA's investment policy generally limits investments in fixed income products with institutions that have an investment grade rating as determined by one of the nationally recognized rating agencies. The MSBA's policy requires issuers of investment contracts to be rated AA or above by at least two of the nationally recognized rating agencies or A with pledged collateral equal to $102 \%$ of the principal balance. As of June 30, 2020, the guaranteed investment contracts were not rated; however, the issuer was rated AA by Standard \& Poor's and A2 by Moody's and the guaranteed investment contracts were collateralized.

As of June 30, 2020, the MSBA's investments in municipal bonds were rated AA+ or above.

## Credit Risk - Custodial Funds

The custodial funds had debt investments with a fair value of $\$ 533$ million, of which approximately $\$ 330$ million were in U.S Government securities. Of the remaining $\$ 203$ million, the majority were investment grade or above.

## Interest Rate Risk - PRIT Funds

As pension and OPEB trust funds have a longer investment horizon than many of the Commonwealth's other investments, the PRIM Board manages PRIT's exposure to fair value loss arising from movements in interest rates by establishing duration guidelines with its fixed income investment managers. The guidelines with each individual manager require that the effective duration of the domestic fixed income investment portfolio be within a specified percentage or number of years of the effective duration band of the appropriate benchmark index. For emerging markets fixed income investments, the portfolio must have a duration with a band ranging from three to eight years. Effective duration is a measure of a fixed income investment's exposure to fair value changes arising from changes in interest rates. Effective duration makes assumptions regarding the most likely timing and amounts of variable cash flows. These assumptions take into consideration factors indicative of investments highly sensitive to interest rate changes, including callable options, prepayments and other factors.

The PRIM Board compares the effective duration of a manager's portfolio to their relevant benchmark including Bloomberg Barclays Capital Aggregate index, US Treasury STRIPS 20+ Year index, Bloomberg Barclays Capital Treasury 1-3 Year index, Bloomberg Barclays Capital US TIPS index, Barclays Capital Inflation Linked Bonds index, S\&P LSTA Leveraged Loan index, JP Morgan Global Emerging Markets Bond index, and the Intercontinental Exchange Bank of America Merrill Lynch (ICE BofAML) High Yield index. The PRIT Fund had fixed income and short-term investments totaling approximately $\$ 24.129$ billion at fair value with an effective weighted average duration range from 0.19 to 16.28 years at June 30, 2020.

## Credit Risk - PRIT Funds

The PRIM Board establishes credit investment guidelines with each of its fixed income securities investment managers in establishing a diversified portfolio. These guidelines vary depending on the manager's strategy and the role of its portfolio to the overall diversification of the PRIT fund. The guidelines for the PRIT Fund's core fixed income portfolio establish the minimum credit rating for any security in the portfolio and the overall weighted average credit rating of the portfolio. The guidelines for the PRIT Fund's high yield, fixed income portfolio establish a market value range of securities to be held with a specific minimum credit rating and the overall weighted average credit rating of the portfolio.

Credit risk for derivative instruments held by PRIT results from counterparty risk. PRIT is exposed to credit risk resulting from counterparties being unable to meet their obligations under the terms of the derivative agreements.

The weighted average quality rating of the debt securities portfolio, excluding pooled investments, investments explicitly backed by the United States Government and other nonrated investments was BBB+ at June 30, 2020.

Credit ratings associated with the Commonwealth's investment in the PRIT Fund ranged from AAA to Ainvestments with a fair value of approximately $\$ 3.763$ billion, $\mathrm{BBB}+$ to B - investments with a fair value of approximately $\$ 3.206$ billion, $\$ 696$ million rated $\mathrm{CCC}+$ to $\mathrm{D}, \$ 8.999$ billion are unrated, and the remaining $\$ 7.941$ billion are investments that are explicitly backed by the U. S. Government.

## Foreign Currency Risk - PRIT Funds

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of investments. The Treasury does not have a policy regarding foreign currency risk for the Pension Trust. The PRIM Board manages PRIT's exposure to foreign currencies by hedging a percentage of PRIT's non-U.S. dollar denominated investments through forward foreign currency contracts. The PRIT Fund's investments in foreign currency denominated investments as of June 30, 2020 were approximately $\$ 191$ million in cash and short-term investments, $\$ 12.761$ billion in equities, $\$ 734$ million in fixed income investments, $\$ 515$ million in portfolio completion strategies, $\$ 1.161$ billion in private equity investments and $\$ 311$ million in timberland investments. An additional $\$ 3.443$ billion is invested in international investments denominated in U . S . dollars.

## Concentration of Credit Risk - PRIT

The PRIM Board manages PRIT's exposure to concentration of credit risk by establishing guidelines with each investment manager that limit the percent of investment in any single issue or issuer. PRIT has no investments, at fair value, that exceed 5\% of PRIT's net position held in trust for pool participants as of June 30, 2020.

## A. DERIVATIVE INSTRUMENTS

PRIT may invest in derivative instruments. In accordance with GASB Statement No 53, Accounting and Financial Reporting for Derivative Instruments, PRIT's derivatives are accounted for as investment derivatives and are reported at fair value.

## Forward Currency Contracts

PRIT enters into forward currency contracts to hedge the exposure to changes in foreign currency exchange rates on foreign portfolio holdings. The fair value of the contracts will fluctuate with changes in currency exchange rates. Risks may arise from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

The contracts are marked-to-market daily and the change in fair value is recorded as an unrealized gain or loss by PRIT.

When a contract is closed, PRIT records a realized gain or loss equal to the difference between the cost of the contract at the time it was opened and the value at the time it was closed.

As of June 30, 2020, PRIT had open foreign exchange contracts with combined net unrealized gain of approximately $\$ 9$ thousand with various delivery dates.

Further information on derivative instruments can be found in the notes to PRIT's basic financial statements.

## Futures Contracts

PRIT may purchase and sell financial futures contracts to hedge against changes in the values of securities the fund owns or expects to purchase.

Upon entering such contracts, they must pledge to the broker an amount of cash or securities equal to a percentage of the contract amount.

The potential risk is that the change in the value of futures contracts may not correspond to the change in the value of underlying instruments, which may not correspond to the change in value of the hedged instruments. In addition, there is a risk that PRIT may not be able to close out its future positions due to a non-liquid secondary market. Risks may also arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

PRIT may also invest in financial futures contracts for non-hedging purposes.
PRIT held contracts outstanding at June 30, 2020 with various expirations from FY21 to FY24. These contracts are for cash and cash equivalents, fixed income, equities and commodities. A portion of the contracts were short contracts. The aggregated notional exposure amount as of June 30,2020 was approximately $\$ 1.166$ billion with a fair value of $\$ 1.172$ billion, yielding an unrealized net gain of approximately $\$ 6$ million.

Payments are made or received by PRIT each day, depending on the daily fluctuations in the value of the underlying security and are recorded as unrealized gains or losses. When the contracts are closed, the PRIT Fund recognizes a realized gain or loss.

Swaps - PRIT

PRIT has entered into swap agreements to gain exposure to certain markets and actively hedge other exposures to market and credit risk. The swap contracts are reported at fair value, which represents their estimated liquidation values on costs. PRIT either receives cash from the swap counterparties or pays the swap counterparties monthly depending on whether the fixed-rate interest is lower or higher than the variable-rate interest. Changes in fair value are included as part of investment income.

As of June 30, 2020, PRIT had contracts in effect with an aggregated notional amount of approximately $\$ 1.279$ trillion to various investment banks that had maturity dates from FY21 to FY73. The contracts have an aggregate fair value loss of approximately $\$ 83$ million. PRIT values these contracts using standard methods and techniques including the discounted cash flow analysis and option pricing models.
PRIT's counterparty exposure was with various major investment companies with ratings ranging from AA- to A and various other banks with other ratings. Open swap contracts as of June 30, 2020 were as follows (amounts in thousands):

| Counterparty | Credit <br> Ratings | Interest Rate Swaps |  |  |  | Credit Default Swaps |  |  | Total Return and Other Swaps |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## B. DISCRETELY PRESENTED COMPONENT UNIT INVESTMENTS

Component units invest in derivative transactions. Detailed information on those transactions is found in the notes to the basic financial statements of those component units.

## C. FAIR VALUE MEASUREMENTS OF INVESTMENTS

In accordance with GASB Statement No. 72, Fair Value Measurement and Application, the Commonwealth categorizes the fair value measurements of its investments within the fair value hierarchy established by GAAP. The fair value hierarchy categorizes the inputs to valuation techniques used for fair value measurement into three levels as follows:

- Level 1 - Inputs are quoted prices for identical investments in active markets.
- Level 2 - Observable inputs other than quoted market prices.
- Level 3 - Unobservable inputs.

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. In certain instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy the level in the fair value hierarchy is based on the lowest level of input that is significant to the fair measurement.

Level 2 investments are categorized using various inputs that include, but are not limited to, pricing models, independent third party evaluated services, benchmarking yields, reported trades, broker-dealer quotes, issuer spreads and benchmarking securities among others.

The following tables present a summary of the fair value hierarchy of investments at June 30, 2020 (amounts in thousands):

| Primary government | Total |  | Level |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1 |  | 2 |  | 3 |  |
| Debt securities: |  |  |  |  |  |  |  |  |
| US Treasury and agency securities.................................. | \$ | 674,212 | \$ | 661,927 | \$ | 12,285 | \$ | - |
| Municipal securities...................................................... |  | 30,820 |  | 28,883 |  | 1,937 |  | - |

| Gross receivables | \$ | - | \$ | 25,839 | \$ | 49,049 | \$ | 1,769,756 | \$ | 1,844,644 |
| Less: allowance for uncollectibles |  | - |  | - |  | $(3,563)$ |  | $(733,961)$ |  | $(737,524)$ |
| Receivables, net allowance for uncollectibles |  | - |  | 25,839 |  | 45,486 |  | 1,035,795 |  | 1,107,120 |
| Less: current portion |  | - |  | $(25,839)$ |  | $(6,321)$ |  | $(1,019,754)$ |  | $(1,051,914)$ |
| Noncurrent receivables. | \$ | - | \$ | - | \$ | 39,165 | \$ | 16,041 | \$ | 55,206 |

## B. TAX ABATEMENTS

As of June 30, 2020, the Commonwealth provided tax abatements through the following three programs: the Massachusetts Economic Development Incentive Program Credit (EDIP), Life Sciences Tax Incentive Program and the Film Tax Credit.

## Economic Development Incentive Program

Under the Economic Development Incentive Program (EDIP), companies receive state and local tax incentives in exchange for job creation, manufacturing job retention and private investment commitments. On or after January 1, 2010 and before January 1, 2017, the Economic Assistance Coordination Council (EACC) may award to taxpayers up to $40 \%$ of the cost of qualifying properties as credits to certain certified projects ("expansion project", "enhanced expansion project", or a "manufacturing retention project"). The EACC may also award EDIP credits of up to $\$ 1,000$ per job ( $\$ 5,000$ per job in gateway municipalities) to certified job creation projects. The total award for a project may not exceed $\$ 1$ million. On or after January 1, 2017, the credit is instead determined by the EACC based on factors set out in M.G.L. c. 23A, §3D.

For tax years beginning on or after January 1, 2019, the EACC is authorized to establish a program to incentivize businesses to occupy vacant storefronts in downtown areas. Pursuant to this program, the EACC may award up to $\$ 500,000$ of available EDIP tax credits annually to businesses that occupy previously vacant storefronts. The businesses must commit to occupying the previously vacant storefront for a period of not less than one year.

The total dollar amount of the EDIP credit that may be used in a calendar year is $\$ 30$ million.
The taxes eligible for abatement using these credits include the corporate excise, financial institutions excise, insurance premiums excise and personal income tax, with tax payments reduced by applying the amount of the credits directly against the relevant calculation of tax liability as determined by the rules governing the particular tax to be abated.

For projects certified before January 1, 2017, if a project's certification is revoked, or if property upon which a certification is based is sold prior to the end of its useful life, the difference between the credit taken and the credit allowed for actual use must be added back as additional taxes due in the year of disposition, except if the property had been in qualified use for more than twelve consecutive years. For an expansion project where the actual number of permanent full-time employees employed by the controlling business at the project is less than $50 \%$ of the number of such permanent full-time employees projected in the project proposal, this shall be deemed a material variance for the purpose of a revocation determination. Upon such a revocation, all tax credits available to the controlling business as a result of project certification shall be revoked and forfeited for the year in which revocation occurred and all subsequent years, and the Commonwealth, in the case of a certified expansion project, shall recover the value of any tax credits received by the controlling business prior to or subsequent to such revocation.

For projects certified on or after January 1, 2017, recapture is required only if the EACC revokes certification. The amount of credit subject to recapture shall be proportionate to the corporation's job creation requirements applicable to the certified project. The corporation's proportion of compliance will be determined by the EACC as part of the revocation process and reported to DOR and the taxpayer at time of revocation.

## Life Sciences Tax Incentive Program

The Massachusetts Life Sciences Center (MLSC) certifies and awards five types of tax credits to life sciences companies, with the purpose of creating and retaining jobs in the Massachusetts life sciences sector. Unless stated otherwise, if one of these tax credits is claimed by a taxpayer and exceeds the tax otherwised due, $90 \%$ of the balance of such credit may, at the option of the taxpayer and to the extent authorized by the MLSC, be refundable to the taxpayer. These tax credits, together with other life sciences tax incentives, are subject to an aggregate $\$ 30$ million annual cap.

- The Life Sciences Investment Tax Credit is equal to $10 \%$ of the cost of qualifying property acquired, constructed, reconstructed or erected during the taxable year and used exclusively in Massachusetts.
- The Life Sciences User Fees Tax Credit is equal to $100 \%$ of the user fees paid to the U.S. Food and Drug Administration (USFDA) upon submission of an application to manufacture a human drug in Massachusetts, and may be claimed in the taxable year in which the application for licensure of an establishment to manufacture the drug is approved by the USFDA. To be eligible for the credit, more than $50 \%$ of the research and development costs for the drug must have been incurred in Massachusetts.
- The Life Sciences Refundable Jobs Tax Credit is available to life sciences companies that commit to the creation of a minimum of 50 net new permanent full-time positions in Massachusetts. The amount of the credit is determined by the MLSC.
- The Life Sciences Research Tax Credit is equal to $10 \%$ of excess qualified research expenses, including expenditures for legally mandated clinical trial activities performed both inside and outside of Massachusetts, and $15 \%$ of basic research payments. The Life Sciences Research Tax Credit is not refundable.

The MLSC may also authorize life sciences companies to obtain refunds of the Research Credit authorized by M.G.L. c. $63, \S 38 \mathrm{M}$. Generally, the Research Credit authorized by M.G.L. c. 63 , § 38M provides a credit for research expenses incurred in Massachusetts based on a formula that measures a taxpayer's year-to-year increases in Massachusetts research expenses. See the regulations and public written statements cited below for a more detailed description of the formula.

- The Angel Investor Tax Credit is equal to $20 \%$ of the amount of qualifying investments in a qualifying business, and $30 \%$ of the amount of qualifying investments made by a taxpayer investor in a qualifying business located in a "Gateway municipality," as defined in M.G.L. c. 23A, § 3A. A taxpayer cannot claim more than $\$ 50,000$ of the credit for a single calendar year. The Angel Investor Tax Credit is not refundable.

Recipients of these tax credits agree to increase or maintain their employee headcount in Massachusetts, compared to their "baseline" employee headcount at the time of the award and the company's projected net increase in headcount in the tax year following the award. Baseline and projected headcounts are summed to create a "total projected headcount" metric that is used for MLSC agreement and compliance purposes.

A life sciences company that has received tax incentives from the MLSC and subsequently fails to achieve the minimum net new headcount thresholds as specified in the MLSC's Annual Tax report and Multiple Awards policy will have the award terminated and must return the amount of the tax credit claimed to the Commonwealth, although the company may be given an additional year to achieve the employment goals if the MLSC determines that it has the potential to meet those goals. The MLSC is required by statute to de-certify any life sciences company that fails to achieve at least $70 \%$ of its job target for two consecutive years. The MLSC has decided through administrative action that any life sciences company failing to achieve at least $80 \%$ of its job target by the end of any extension period and, in the case of the Life Sciences Refundable Jobs Tax Credit, failing to create at least 50 net new jobs, will be de-certified. More information on these job creation and recapture requirements is available on the MLSC's website, $\underline{\text { http://www.masslifesciences.com/programs/tax/. }}$

The taxes eligible for abatement using these credits include the corporate excise, financial institutions excise, insurance premiums excise and personal income tax, with tax payments reduced by applying the amount of the credits directly against the relevant calculation of tax liability as determined by the rules governing the particular tax to be abated.

## Film Tax Incentive

M.G.L. c. $62, \S 6(1)$ and M.G.L. c. $63, \S 38 X$, provide tax credits to encourage the production in Massachusetts of films, television shows, commercials, and other motion pictures. Entities that fund such productions (known under the statute as "motion picture production companies") may claim (1) a credit equal to $25 \%$ of the total qualifying aggregate payroll for employing persons within the Commonwealth in connection with filming and production of a motion picture and (2) a credit equal to $25 \%$ of their Massachusetts production expenses (not including the qualifying aggregate payroll expenses). Each credit has its own qualification requirements and a taxpayer is allowed to qualify for and claim both credits. The production companies must incur a minimum of $\$ 50,000$ in total Massachusetts production expenses during a consecutive twelve-month period to be eligible for the credits. The credits are either transferable or $90 \%$ refundable to the motion picture production companies to the extent that the credits exceed the companies' Massachusetts tax liability. Transferees do not qualify for the $90 \%$-refundability option.

The taxes eligible for abatement using these credits include the corporate excise, financial institutions excise, insurance premiums excise and personal income tax, with tax payments reduced by applying the amount of the credits directly against the relevant calculation of tax liability as determined by the rules governing the particular tax to be abated. There is no cap on the amount of the credits.

There are no provisions in the statutes to recapture the film tax credits.
In addition to the tax credit, M.G.L. c. $64 \mathrm{H}, \S 6(\mathrm{ww})$ provides that sales of tangible personal property to a qualifying motion picture production company or to an accredited film school student for the production expenses related to a school film project are exempt from the sales tax. In order to qualify for the sales tax exemption, a motion picture production company must incur at least $\$ 50,000$ in total production costs in Massachusetts during a consecutive 12 month period and must be conditionally pre-approved as a qualifying company by the Commissioner of Revenue. Any taxpayer that has been conditionally pre-approved for the sales tax exemption that then fails to expend the requisite $\$ 50,000$ within a consecutive 12 month period shall be liable for the sales taxes that would have been due had the conditional pre-approval not been granted.

The following is the total revenue estimated to be reduced under these programs for fiscal year 2020 (amounts in thousands):

| Tax abatement program | Total estimated revenue reduced by |  |
| :---: | :---: | :---: |
| Economic Development Incentive Program (EDIP) | \$ | 1,735 |
| Life Sciences Tax Incentive Program. |  | 18,570 |
| Film Tax Incentive Program: |  |  |
| Film Tax Credit |  | 75,115 |
| Sales Tax Exemption. |  | 322 |
| Total | \$ | 95,742 |

## 4. INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS BETWEEN FUNDS

The purposes of interfund receivables, payables and transfers between funds vary by legislative authority. Transfers include the following: intergovernmental services, fringe benefit cost assessments, the year-end Stabilization Fund transfer, certain license fees collected by the Registry of Motor Vehicles that fund various highway project initiatives, fund closure transfers, and various other transfers for operations, largely for Institutions of Higher Education.

Activity between funds reflected as due to/from primary government in the various statements is summarized as follows (amounts in thousands):

|  |  | General |  | Lotteries | Coronavirus Relief |  | Other Governmental Funds |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total proprietary funds.................................... | \$ | $(5,554)$ | \$ | 631,699 | \$ | 343,215 | \$ | 434,976 |  | 1,404,336 |
| Net transfers in/(out) between funds.................... |  |  |  |  |  |  |  |  | \$ | - |

Due to/from component units on the Statement of Net Position reflects a timing difference for payments of approximately $\$ 15$ million at year end.

Remaining receivables and payables between funds as of June 30, 2020 largely occur due to the timing of accruals and the funding of escrows. The University of Massachusetts also reported unremitted benefits costs as of June 30, 2020. The amount due to the General Fund largely represents deficits funded by the General Fund. The following is a summary of receivables and payables between funds remaining as of June 30, 2020 (amounts in thousands):

| Receivable Fund | Payable Fund | Amount |
| :---: | :---: | :---: |
| Governmental Funds: |  |  |
| General | Non-major Governmental Funds. | \$ 523,066 |
| Non-major Governmental Funds | Non-major Governmental Funds. | 67,685 |
| Total Governmental Funds |  | \$ 590,751 |

## 5. CAPITAL ASSETS

Capital asset activities for both governmental and business-type activities were as follows (amounts in thousands):

| Governmental Activities | Beginning Balance July 1, 2019 | Increases | $\begin{gathered} \text { Decreases } \\ \text { and } \\ \text { Reclassifications } \end{gathered}$ | $\begin{gathered} \text { Ending } \\ \text { Balance } \\ \text { June } 30,2020 \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| Capital assets not being depreciated: |  |  |  |  |
| Land | \$ 933,152 | \$ 8,977 | \$ (168) | \$ 941,961 |
| Construction in process | 608,149 | 233,203 | $(127,633)$ | 713,719 |

| Total accumulated depreciation | $(5,110,953)$ | $(254,766)$ | 257,887 | $(5,107,832)$ |
| Total capital assets being depreciated, net | 3,266,229 | 50,274 | $(49,344)$ | 3,267,159 |
| Governmental activities capital assets, net | 4,807,530 | 292,454 | $(177,145)$ | 4,922,839 |

## Business - Type Activities

Depreciation expense was charged to the various functions of governmental and business-type activities as follows (amounts in thousands):

| Function | Amount |  |
| :---: | :---: | :---: |
| General government | \$ | 123,121 |
| Judiciary |  | 20,750 |
| Health and human services |  | 26,310 |
| Early elementary and secondary education. |  | 2,609 |
| Public safety and homeland security... |  | 73,757 |
| Housing and economic development |  | 43 |
| Labor and workforce development. |  | 8,176 |
| Total depreciation, governmental activities. | \$ | 254,766 |
| University of Massachusetts | \$ | 288,667 |
| State universities |  | 104,034 |
| Community colleges |  | 45,319 |
| Total depreciation, business-type activities... | \$ | 438,020 |

## 6. SHORT-TERM FINANCING AND CREDIT AGREEMENTS

Massachusetts General Laws authorize the Treasurer to issue temporary notes in anticipation of revenue or bond financing. Short-term borrowing may be issued as fixed rate notes, floating rate notes or through a commercial paper program supported by bank liquidity facilities maintained by the Commonwealth. Per the State Constitution, revenue anticipation notes (RANs) issued for cash flow purposes are required to be paid within the same fiscal year. Temporary financings for capital needs, such as bond anticipation notes, may be outstanding for up to three years, per statute.

## A. GENERAL FUND

The balance of revenue anticipation notes (RANs) and commercial paper outstanding may fluctuate during a fiscal year, but all short-term borrowing for cash flow purposes must be reduced to zero by June 30. For short-term borrowing for cash flow purposes, the Commonwealth borrowed $\$ 1.4$ billion by selling RANs in October, 2019 in two separate $\$ 500$ million series and one $\$ 400$ million series. The two $\$ 500$ million notes were retired in April and May, 2020 while the $\$ 400$ million note was retired in June, 2020.

In order to manage cash flows through the COVID-19 pandemic, the Commonwealth has entered into a line of credit with a syndicate of commercial banks in an amount up to $\$ 1.75$ billion. The Commonwealth also has enacted special legislation to authorize the Commonwealth to issue notes in anticipation of revenues or for which revenues are not otherwise available, which notes will mature no later than June 30, 2021. During FY20, the Commonwealth drew down $\$ 500$ million, which is recorded as a note payable in the general fund. The note was repaid in August, 2020.

The following schedule details short-term financing for all funds for the fiscal year (amounts in thousands):

|  | Beginning Balance July 1, 2019 |  | Issued <br> Drawn |  | $\begin{gathered} \text { Redeemed/ } \\ \text { Repaid } \\ \hline \end{gathered}$ |  | $\begin{gathered} \text { Ending } \\ \text { Balance } \\ \text { June } 30,2020 \end{gathered}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| General Fund: |  |  |  |  |  |  |  |  |
| Revenue anticipation notes | \$ | - | \$ | 1,400,000 |  | $(1,400,000)$ | \$ | - |
| Notes payable |  | - |  | 500,000 |  | - |  | 500,000 |
| Total. | \$ | - | \$ | 1,900,000 |  | $(1,400,000)$ | \$ | 500,000 |

## B. CREDIT FACILITIES

During FY20, the Commonwealth maintained a credit facility to provide liquidity support for commercial paper notes totaling $\$ 200$ million with TD Bank which expires on April 18, 2023. Additionally, in lieu of issuing commercial paper, the Commonwealth has the capacity under a note purchase agreement to issue general obligation tax exempt bonds or revenue anticipation notes up to $\$ 200$ million with RBC Capital Markets, LLC, which will expire on February 8, 2024. In addition to credit facilities for commercial paper, the Commonwealth maintained standby bond purchase agreements for outstanding Variable Rate Demand Bonds (VRDBs) sold from (FY01 through FY06). These VRDBs require external liquidity support because bond-holders have the right to tender the bonds back to the Commonwealth at par at any time. As of June 30, 2020, these agreements totaled $\$ 419$ million, were unused and will expire on various dates in FY21 through FY23. Agreements which expired in FY21 were not renewed or replaced by new liquidity agreements as the underlying VRDBs were refunded by fixed rate debt.

## 7. LONG-TERM OBLIGATIONS

Section 1 of Article 62 of the Massachusetts Constitution empowers the State Legislature to borrow money on the credit of the Commonwealth for various public purposes. Under the State Constitution, the Commonwealth may pledge its credit to borrow money only by a vote of two-thirds of each house of the Legislature. Borrowed funds may be used for defense of the State or of the United States, and in anticipation of receipts from taxes or other sources, "any such loan to be paid out of the revenue of the year in which the loan is made." The Legislature may not in any manner allow the Commonwealth's credit to be given or loaned to or in aid of any individual, or of any private association, or of any corporation, which is privately owned or managed. The Constitution further provides that borrowed money shall not be expended for any other purpose than that for which it was borrowed or for the reduction or discharge of the principal of the loan.

Statutorily, the authority to borrow is delegated to the Massachusetts State Treasurer \& Receiver General pursuant to Chapter 29 of the Massachusetts General Laws. Section 49 of Chapter 29 of the Massachusetts General Laws is the primary statute governing the issuance of Commonwealth debt and contains a number of provisions spelling out the process for the issuance of bonds.

The issuance of bonds to fund the Commonwealth's capital needs must be authorized by the Legislature. Pursuant to legislative authorizations to borrow, the Governor determines the amount and timing of any authorized borrowing to fund capital investments. At the request of the Governor, the State Treasurer \& Receiver General borrows by issuing bonds to the public or through direct placement. The Governor approves the use of the bond proceeds by agencies to pay for authorized and budgeted capital projects.

Massachusetts General Law provides for the allocation of bond proceeds to bond authorizations and capital spending in arrears (as needed), as expenditures are made, or at the time of issuance of the bonds. In general, bond proceeds are primarily allocated to capital spending that has already occurred. When allocating in arrears, the allocation of segregated bond proceeds is a reimbursement to the General Fund.

Bond proceeds that are awaiting allocation are typically invested by the State Treasurer in the Commonwealth's primary investment vehicle, the Massachusetts Municipal Depository Trust (MMDT) (for more information please
see the notes on the Commonwealth's short-term investments). Bond proceeds are segregated from other funds until they are allocated to capital expenditures, a process that requires review by the Commonwealth's bond counsel.

The Commonwealth has waived its sovereign immunity and consented to be sued on contractual obligations, including bonds and notes issued by it and all claims with respect hereto. However, the property of the Commonwealth is not subject to attachment or levy to pay a judgment, and the satisfaction of any judgment generally requires legislative appropriation. Enforcement of a claim for the payment of principal or interest on bonds and notes of the Commonwealth may also be subject to the provisions of federal or Commonwealth statutes, if any, enacted to extend the time for payment or impose other constraints upon enforcement. The Commonwealth cannot file for bankruptcy under the United States Bankruptcy Code.

As of June 30, 2020, the Commonwealth had issued two types of long-term debt obligations: general obligation bonds and special obligation bonds. General obligation bonds, which account for the large majority of outstanding Commonwealth bonds, are backed by the full faith and credit of the Commonwealth. Special obligation bonds, however, are bonds secured by all or a portion of a specific revenue source that are pledged to bondholders and are not general obligations of the Commonwealth. For this type of securities, bondholders rely on pledged revenue only for repayment of principal and interest.

The following is a summary of the Commonwealth's outstanding debt, exclusive of capital leases, (amounts in thousands):

| Type of Bond | Amount Outstanding |  |
| :---: | :---: | :---: |
| General obligation bonds - public offering, net proceeds | \$ | 25,620,142 |
| General obligation bonds - direct placement, net proceeds. |  | 468,615 |
| Special obligation bonds (including GANs) - public offering, net proceeds.... |  | 4,612,665 |
| Outstanding Commonwealth bonds, net proceeds |  | 30,701,422 |
| MSBA bonds, - public offering, net proceeds |  | 6,570,341 |
| Total governmental activities, net proceeds |  | 37,271,763 |
| Less: |  |  |
| Unamortized premiums on general obligation bonds - public offering*. |  | $(2,135,597)$ |
| Unamortized premiums on special obligation bonds |  | $(466,935)$ |
| Unamortized premiums on MSBA bonds. |  | $(516,394)$ |
| Total governmental activities, principal | \$ | 34,152,837 |

*     - As of June 30, 2020 there were no unamortized premiums on direct placement GO bonds.

The general obligation (GO) bonds listed in the table above include outstanding tax-exempt bonds, taxable bonds including Build America Bonds, College Opportunity Bonds, and debt assumed from former counties. The special obligation (SO) bonds listed above include outstanding tax-exempt and taxable bonds (including Build America Bonds and Recovery Zone Economic Development Bonds) secured by indentures that legally define the specific revenues pledged to bondholders, as defined in the trust agreement. This includes outstanding bonds or notes secured by Federal Highway funds to be received by the Commonwealth, certain portions of the Commonwealth's motor fuel excise taxes and Registry of Motor Vehicle fees, and dedicated taxes and fees levied in certain geographic areas of the state to support the Commonwealth's convention center facilities. As of June 30, 2020, there were four different special obligation bond programs with bonds outstanding. It should be noted that one of the four bond programs has a closed lien, meaning that no additional new-money bonds will be issued under that specific special obligation bond indenture.

The following is a table of GO bonds principal outstanding as of June 30, 2020, (amounts in thousands):

| General Obligation Bonds | Principal Outstanding |  | Percent of Total GO |
| :---: | :---: | :---: | :---: |
| Fixed rate bonds | \$ | 21,966,379 | 91.7 \% |
| Variable rate bonds. |  | 1,986,781 | 8.3 \% |
| Total | \$ | 23,953,160 | 100.0 \% |

The following is a table of the different types of outstanding variable rate GO bonds, (amounts in thousands):

| Variable Rate GO Bonds | Principal Outstanding |  | Percent of Total GO |
| :---: | :---: | :---: | :---: |
| LIBOR index bonds. | \$ | 507,025 | 2.1 \% |
| Direct purchase bonds |  | 468,615 | 2.0 \% |
| Variable rate demand bonds |  | 418,950 | 1.7 \% |
| Multi-Modal |  | 400,000 | 1.7 \% |
| College opportunity bonds... |  | 154,096 | 0.6 \% |
| CPI-index bonds |  | 38,095 | 0.2 \% |
| Total. | \$ | 1,986,781 | 8.3 \% |

The following is a table of hedged and unhedged variable rate GO bonds, (amounts in thousands):

|  | Principal Outstanding |  | Percent of Total GO |
| :---: | :---: | :---: | :---: |
| Hedged variable rate GO bonds....... | \$ | 785,680 | 3.3 \% |
| Unhedged variable rate GO bonds... |  | 1,201,101 | 5.0 \% |
| Total variable rate GO bonds. | \$ | 1,986,781 | 8.3 \% |

The following is a table of SO bond principal, by rate structure, outstanding as of June 30, 2020, (amounts in thousands):

| Special Obligation Bonds | Principal Outstanding |  | Percent of Total SO |
| :---: | :---: | :---: | :---: |
| Fixed rate bonds | \$ | 4,117,345 | 99.3 \% |
| Variable rate bonds |  | 28,385 | 0.7 \% |
| Total. | \$ | 4,145,730 | 100.0 \% |

All of the variable rate special obligation bonds are hedged as of June 30, 2020.

The following is a table of the different types of outstanding Special Obligation bonds (amounts in thousands):

| Special Obligation Bonds | Amount Outstanding |
| :---: | :---: |
| Special obligation dedicated tax revenue bonds, net proceeds: |  |
| Fixed rate convention center bonds | \$ 504,255 |
| Special obligation revenue bonds, net proceeds: |  |
| Fixed rate gas tax bonds. | 26,905 |
| CPI variable rate gas tax bonds | 28,385 |
| Total gas tax bonds, net proceeds | 55,290 |
| Special obligation revenue bonds, net proceeds: |  |
| Accelerated bridge program. | 1,800,062 |
| Rail enhancement program | 1,447,797 |
| Total revenue bonds, net proceeds | 3,247,859 |
| Special obligation GANS, net proceeds: |  |
| Federal highway grant anticipation notes and accelerated bridge program. | 810,071 |
| Total special obligation bonds, net proceeds | 4,617,475 |
| Less: unamortized premiums. | $(471,745)$ |
| Outstanding special obligation principal. | \$ 4,145,730 |

## A. GENERAL OBLIGATION BONDS

General obligation bonds are authorized and issued primarily to provide funds for the Commonwealth's five-year capital improvement program (CIP), including capital infrastructure projects throughout the state as well as Commonwealth- supported local government capital improvements. The five-year plan is developed by the Executive Office for Administration and Finance (A\&F) and updated annually. The CIP is primarily funded through the issuance of bonds that are sold by the State Treasurer and Receiver General. The Commonwealth borrows from the capital markets by selling GO bonds and notes pursuant to Chapter 29 of the Massachusetts General Laws. GO bonds are backed by the full faith and credit of the Commonwealth and are paid from the Governmental Funds, to which debt service principal and interest payments are appropriated in the state's operating budget.

In addition to GO bonds issued to fund the state's capital needs, certain bonds are approved by the Legislature to be issued for a specific program. These bonds, known as College Opportunity Bonds, are issued pursuant to statute directly to the Massachusetts Educational Financing Authority for its pre-paid tuition program called the "U.Plan". As of June 30, 2020, the Commonwealth had approximately $\$ 154$ million in "U. Plan" bonds (at accreted value) outstanding. Pursuant to statute, all of the outstanding bonds are variable rate bonds. Interest on the bonds is based on the percentage change in the consumer price index plus $2.0 \%$ together with current interest at the rate of $0.5 \%$.

In terms of bond structure, the large majority of GO bonds have been sold as fixed rate obligations. As of June 30 , 2020, approximately $91.7 \%$ of the Commonwealth's outstanding GO debt is in the form of fixed-rate bonds. The remaining $8.3 \%$ of outstanding GO debt is in the form of variable rate bonds - bonds whose rate of interest fluctuate based on market or market index changes. The outstanding GO variable rate debt consists of several different variable rate structures. These structures include floating rate notes in various interest rate modes, direct purchase agreements in various interest rated modes, multi-modal bonds currently in the Term Mode, and variable rate demand bonds. Variable rate demand bonds, or "VRDBs", are long-term bonds whose interest rates re-set daily or weekly through an active remarketing process. Because these bonds provide bondholders with a "put" or tender feature enabling the bonds to be sold back to the Commonwealth at par at any time by an investor, they are supported by standby liquidity facilities provided by third-party commercial banks which require the applicable bank to purchase any bonds that are tendered by investors and not successfully remarketed. As of June 30, 2020, the

Commonwealth had approximately $\$ 419$ million in outstanding VRDBs. This accounts for approximately $1.7 \%$ of total GO debt and approximately $21.1 \%$ of total GO variable-rate debt. All of these bonds are uninsured. As of June 30, 2020, none of the Commonwealth's outstanding VRDBs have been subject to failed remarketing and "put" back to the Commonwealth; consequently, there have not been any draws on any of the outstanding bank liquidity facilities.

A portion of the Commonwealth's outstanding bonds have been directly purchased by banks (or "direct purchase bonds"). These variable rate, direct purchase bonds bear interest at an index rate and are payable on the first business day of each month until maturity. As of June 30, 2020, the Commonwealth had $\$ 469$ million direct purchase bonds outstanding.

The following table details the general obligation direct purchase bonds (amounts in thousands):

| Series |  | Par Outstanding | Final Maturity | Reset Mode/ <br> Payment <br> Frequency | Direct Purchase Bank | Direct Purchase Agreement Date | Direct Purchase Expiration Date |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2016 Series C. |  | 200,000 | 4/1/2046 ${ }^{(1)}$ | 1 Month LIBOR/ Monthly Pay | State Street | 5/12/2016 | 4/1/2021 ${ }^{(3)}$ |
| 2001 Series B Refunding Bonds |  | 48,250 | $1 / 1 / 2021^{(2)}$ | 1 Month LIBOR/ Monthly Pay | TD Bank | 8/1/2017 | $1 / 1 / 2021^{(2)}$ |
| 2016 Series B................ |  | 100,000 | 4/1/2036 ${ }^{(1)}$ | 1 Month LIBOR/ Monthly Pay | TD Bank | 5/10/2016 | 4/1/2021 ${ }^{(3)}$ |
| 2018 Series A Refunding Bonds |  | 120,365 | 2/1/2021 ${ }^{\text {(2) }}$ | 1 Month SIFMA Monthly Pay | RBC Capital | 1/30/2018 | 2/1/2021 ${ }^{(2)}$ |
| Total |  | 468,615 |  |  |  |  |  |

(1) These issuances have a mandatory tender prior to their final maturity Put dates.
(2) These issuances were refunded prior to their final maturity dates and the liquidity facilities were no longer needed.
(3) The Commonwealth plans to extend or replace these agreements upon expiration.

The remaining outstanding GO variable-rate debt pays interest to bondholders based on certain indices. For example, as of June 30, 2020, the Commonwealth had approximately $\$ 38$ million of bonds that pay interest based on the consumer price index (CPI); $\$ 507$ million of bonds that pay interest based on the three-month London Interbank Offered Rate (LIBOR), and $\$ 400$ million in Multi-Modal bonds. These bonds make up approximately $0.2 \%, 2.1 \%$, and $1.7 \%$ of total outstanding general obligation indebtedness, respectively.

To fund the FY20 capital budget and prior capital spending, the Commonwealth borrowed by issuing $\$ 1.772$ billion in new money long-term bonds; $\$ 1.518$ billion of which was general obligation debt and $\$ 254$ million of which was special obligation debt secured by federal highway reimbursements and/or motor fuels taxes and motor vehicle license and registration fees. In addition, $\$ 1.225$ billion in refunding bonds were issued in three separate transactions. Two of these transactions were executed as current refundings with the remaining executed as an advance refunding; all of which were executed for savings. The cash and present value savings of the refunding transactions are immaterial to these financial statements.

## MSBA Debt

As of June 30, 2020, the MSBA had outstanding approximately $\$ 6.570$ billion of Dedicated Sales Tax bonds, which includes approximately $\$ 516$ million of unamortized premiums for the purpose of funding school construction and renovation projects. Coupons on the bonds range from approximately $3.00 \%$ to $5.715 \%$ and each series is payable semiannually with the latest maturity occurring in FY48. A portion of the interest on the Dedicated Sales Tax Bonds is reimbursed by the federal government. Of the $\$ 6.054$ billion of debt outstanding as of June 30, 2020, $\$ 450$ million is taxable Build America Bonds for which the MSBA is eligible to receive a $35 \%$ interest subsidy directly from the United States Treasury. In addition, $\$ 293$ million of the Subordinated Dedicated Sales Tax Bonds was issued as "Qualified School Construction Bonds" for which the MSBA is eligible to receive a $100 \%$ interest subsidy
payment directly from the United States Treasury. During FY20, the federal government continued automatic budget cuts imposed through sequestration required pursuant to the Budget Control Act of 2011. On September 30, 2013, the IRS published a notice indicating that subsidy payments processed on or after October 1, 2013 and on or before September 30, 2014 will be reduced by the FY14 sequestration rate of $7.2 \%$. The notice was updated in September 2014 to announce that subsidy payments processed on or after October 1, 2014 and on or before September 30, 2015 will be reduced by the FY15 sequestration rate of $7.3 \%$. The subsidy payments made between October 1, 2015 and September 30, 2016 were reduced by the FY16 sequestration rate of $6.8 \%$. The subsidy payments made between October 1, 2016 and September 30, 2017 were reduced by the FY16 sequestration rate of $6.9 \%$. The subsidy payments made between October 1, 2017 and September 30, 2018 were reduced by the FY17 sequestration rate of $6.6 \%$. The IRS announced that the sequestration rate for the federal fiscal year ending September, 2019 would be $6.2 \%$. The notice states that the sequestration reduction rate will be applied unless and until a law is enacted that cancels or otherwise modifies the sequester. The reductions were approximately $\$ 2$ million on the 2009 Series B Bonds, 2010 Series A Bonds and 2011 Series A Bonds in FY19.

## B. SPECIAL OBLIGATION BONDS

## Commonwealth Transportation Fund (CTF)

The largest amount of special obligation bonds outstanding (by par) are bonds secured by certain revenues of the Commonwealth Transportation Fund. During FY20, the Commonwealth issued approximately $\$ 15$ million in special obligation bonds under the Accelerated Bridge Program (ABP) and $\$ 185$ million under the Rail Enhancement Program (REP). These bonds mature from FY21 to FY49 and are secured by a senior lien on 17 cents of the total 24 cents per gallon gasoline tax, the full 24 cents per gallon of special fuels taxes (comprised primarily of taxes on diesel fuel), and the full $19.1 \%$ of the average price per gallon tax on liquefied natural gas and all Registry of Motor Vehicle fees deposited into the CTF. These bonds also have a subordinate lien on 6.86 cents of the 24 cent per gallon gasoline tax not included in the senior lien. As of June 30, 2020, approximately $\$ 1.663$ billion and $\$ 1.261$ billion in principal was outstanding on the ABP and REP bonds, respectively, and approximately $\$ 1.071$ billion and $\$ 1.178$ billion of interest (net of the federal subsidy) was expected to be paid through maturity related to the ABP and REP bonds, respectively.

## Motor Fuels Tax Bonds

Other special obligation bonds for highway construction purposes are secured by a senior lien on 6.86 cents of the 24 cent per gallon gasoline tax. As of June 30, 2020 bonds secured by these pledged funds totaled approximately $\$ 55$ million of principal. These bonds mature from FY21 to FY22 and were issued in multiple series. Principal and interest paid during FY20 amounted to approximately $\$ 26$ million and $\$ 4$ million, respectively.

## Convention Center Fund

Chapter 152 of the Acts of 1997, as amended, authorized $\$ 694$ million of special obligation bonds to be issued for the purpose of building a new convention center in Boston ( $\$ 609$ million), the Springfield Civic Center ( $\$ 66$ million) and the Worcester Convention Center ( $\$ 19$ million). The bonds are payable from monies credited to the Convention Center Fund created by that legislation, which include certain hotel tax receipts from hotels in Boston, Cambridge, Springfield and Worcester, a surcharge on car rentals in Boston, a parking surcharge at all three facilities, a surcharge on sightseeing tours and cruises in Boston, and sales tax receipts from certain hotels and other retail establishments in Boston, Cambridge, and Springfield. The trust agreement requires a capital reserve fund to be maintained at a level equal to maximum annual debt service and provides that if the fund falls below its required balance, the $2.75 \%$ convention center financing fee in Boston is to be increased (though the overall hotel tax in Boston, including the fee, cannot exceed $14 \%$ ). As of June 30, 2020, taxes within the Convention Center districts support approximately $\$ 504$ million of outstanding principal and approximately $\$ 232$ million of interest on debts related to these Convention Centers. Taxes collected in FY20 were approximately $\$ 131$ million, while debt service on the bonds was approximately $\$ 52$ million.

## C. FEDERAL GRANT ANTICIPATION NOTES

All federal highway reimbursements are dedicated to funding the principal portion only of federal grant anticipation notes (GANs) issued in fiscal 2011, 2014, 2015, 2017 and 2018. During FY20, the Commonwealth issued approximately $\$ 54$ million in GANs for new money needs under the Commonwealth's Accelerated Bridge Program (ABP). As of June 30, 2020, total principal remaining to be paid is approximately $\$ 662$ million. Maturities are from FY21 through FY27. Debt service paid during FY20 was approximately $\$ 112$ million.

The legislation authorizing such notes contains a statutory covenant that as long as any such GANs remain outstanding, the Commonwealth will deposit all federal highway reimbursements into the Grant Anticipation Note Trust Fund, to be released to the Commonwealth once all the debt service and reserve funding obligations of the trust agreement securing the GANs have been met. Principal amortization of the notes will continue through FY27. Such notes and the interest thereon are secured by the pledge of federal highway construction reimbursement payments and by a contingent pledge of certain motor fuels excises. In practice, the interest on such notes has been paid from Commonwealth appropriations.

## D. THE BUILD AMERICA BOND PROGRAM

As part of the federal America Recovery and Reinvestment Act (ARRA) in 2009, municipal issuers were authorized to issue taxable bonds to fund new capital expenditures and receive an interest rate subsidy from the U.S. Treasury. As part of the temporary Build America Bond (BABs) program issuers, including the Commonwealth, issued taxable bonds in calendar years 2009 and 2010 in return for a subsidy from the federal government equal to $35 \%$ to $45 \%$ of the interest costs on the bonds, depending on whether the proceeds were used for projects in economically distressed areas. Between the GO bond program and the special obligation bond programs, the Commonwealth issued a total of $\$ 2.791$ billion in Build America Bonds and Recovery Zone Economic Development Bonds in six separate financings over the two-year period of the program. All of the bonds were issued as "direct pay to issuer", meaning that the interest rate subsidies would be paid to the Commonwealth from the U.S. Treasury and not pledged to bondholders. As of June 30, 2020, the expected interest rate subsidy to be received through final maturity of all of the bonds issued as part of this program totaled $\$ 562$ million. The Commonwealth's repayment obligation to bondholders is based on the gross interest rate. From a budgetary perspective, the bonds' debt service is net of the interest-rate subsidy.

Given the interest rate subsidy from the U.S. Treasury and given market conditions at the time of the Commonwealth's BABs sales, this program resulted in borrowings whose net interest costs will be significantly lower than the interest on traditional tax-exempt bonds. The BABs program expired on December 31, 2010.

## E. INTEREST RATE SWAP AGREEMENTS - OBJECTIVES AND RISKS

Prior to 2008, the Commonwealth had periodically entered into interest rate swap agreements for the sole purpose of hedging interest-rate risk on a portion of its outstanding variable rate bonds. By synthetically fixing the interest rates via the swap agreement this generally resulted in lower interest costs than traditional fixed rate bonds. Of the Commonwealth's variable-rate debt (including special obligation bonds) outstanding of approximately $\$ 2.015$ billion, approximately $\$ 814$ million was hedged via floating-to-fixed interest rate swap agreements. Of this amount, $\$ 786$ million are for G.O. bonds and the remainder on outstanding special obligation bonds.

In connection with the issuance of variable rate GO refunding bonds in 1998, 2001, 2003, 2005, 2006, and 2007, the Commonwealth entered into interest rate swap hedge agreements with certain counterparties to hedge against the volatility of the interest rates on certain bonds whose interest costs were floating and not fixed. Additional swap agreements were entered into to hedge this same volatility on certain special obligation bonds, including the Commonwealth's Series 2005 Special Obligation Tax Revenue (Gas Tax) Bonds. Since 2008, the Commonwealth has not entered into any new swap agreements and has restructured its swap portfolio to novate or transfer several outstanding swap agreements to new counterparties with stronger credit ratings following the financial crisis of 2008. In many cases, the original bonds that were hedged by the swap agreements have been refinanced with new
variable rate bonds. In all cases, the new bonds that were issued are effective hedges pursuant to GASB Statement No. 53.

In addition, a floating-to-fixed rate swap agreement was novated or transferred to the Commonwealth from the Route 3 North Transportation Improvements Association (secured by Commonwealth Contract Assistance) in November 2008 after the lease revenue bonds associated with that swap experienced remarketing failure. The swap was assigned to a portion of the Commonwealth's previously unhedged variable rate bonds that were outstanding.

Under the terms of these floating-to-fixed rate hedge agreements, counterparties to the hedge agreements are obligated to pay the Commonwealth an amount equal to or approximately equal to the variable-rate interest payment to bondholders of the related bonds or an interest payment based on a market index. In return, the Commonwealth is obligated to pay counterparties a stipulated fixed rate. The floating rate payments received by the Commonwealth from its swap counterparties are used to offset the variable rate payments paid to bondholders. Only the net difference in interest payments is actually exchanged with the swap counterparty. The net payments made or received on these hedge agreements are reported as part of interest expense recorded in the Commonwealth's basic financial statements. In all cases, the Commonwealth remains responsible for making interest payments to the variable rate bondholders.

## Objective of the Interest Rate Swap Agreements

The intended effect of these agreements is essentially to fix the Commonwealth's interest rate obligations with respect to its variable-rate bonds in order to hedge or mitigate the Commonwealth's exposure to changes in interest rates on these bonds. For example, during a period when interest rates rise, the Commonwealth would receive higher payments from swap counterparties that would be used to offset higher payments to bondholders of the outstanding variable rate bonds. During a period when interest rates decline, the reduction in interest payments to bondholders would offset the higher payments made to swap counterparties. But in both scenarios, the net obligation of the Commonwealth is essentially fixed through the life of the swap and bonds. As of June 30, 2020, all of the Commonwealth's interest rate swaps were floating-to-fixed rate agreements and were deemed effective hedges pursuant to GASB Statement No. 53.

## Terms of the Interest Rate Swap Agreements

The variable rate bonds and their related swap agreements have final maturities ranging from 2021 to 2033. The swaps' total notional value of approximately $\$ 814$ million effectively matches the par amount of the related variable-rate bonds.

Under the swap agreements, the Commonwealth pays the relevant counterparties fixed rates ranging from $3.85 \%$ to $5.059 \%$ and receives variable-rate payments equal to or approximately equal to the amount of variable rate payments the Commonwealth pays on the related variable-rate refunding bonds which are generally based on a market index. For almost all of the outstanding swap agreements, the Commonwealth receives an interest rate based on changes to LIBOR, the SIFMA index, or the CPI index. In some of these agreements, the variable rate payment to bondholders is exactly equal to the variable rate payment received from the swap counterparty. In other agreements, there is a slight differential in the payments resulting from refinancing of variable rate bonds. One of the agreements is a which is not liked to a variable rate index is a Cost of Funds swap where the swap counterparty pays the exact cost of the funds of the underlying variable rate bond.

## Credit Risk of the Interest Rate Swap Agreements

As of June 30, 2020, the Commonwealth is not exposed to credit risk because the swaps had a negative fair value. Should interest rates change and the fair value of the swaps become positive, the Commonwealth would be exposed to credit risk in the amount of the swaps fair value. All of the Commonwealth's counterparties are required to post collateral in certain circumstances, including credit rating downgrades. The Commonwealth is not required to post collateral in any of its existing swap agreements.

The chart below details the Commonwealth's outstanding swaps and related bond issuances (amounts in thousands except for percentages).

## Fair value of the Interest Rate Swap Agreements

The aggregate fair value balance of interest rate swaps at June 30,2020 was negative $\$ 133$ million and is reflected on the statement of net position as a liability for derivative instruments which is offset by deferred outflows from derivative instruments. The fair values of the interest rate swaps are estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps. Because all of the interest rate swaps were deemed effective hedges, changes in fair value of the interest rate swaps during the fiscal year ended June 30, 2020 were recognized as deferred outflows resulting in no impact on the Statement of Activities.

If all the Commonwealth's swap agreements had been terminated as of the end of FY20, the Commonwealth would have been required to make a payment of this magnitude. Although the Commonwealth has the option of terminating its swap agreements at any time (and either make or receive any termination payment due), the Commonwealth's counterparties do not have such an option. Therefore, the Commonwealth would only have to make a payment of the amount estimated above if certain termination events occurred, as described below. Based on the terms and provisions of the swap agreements and the Commonwealth's current bond ratings, an involuntary termination of the swap agreements due to an event of the Commonwealth is remote. In the case of a voluntary termination due to an event of a counterparty, the Commonwealth would likely seek to maintain the existing hedge by replacing that counterparty with another.

## Basis and Market-Access Risk of the Interest Rate Swap Agreements

Because the terms on most of the interest rate swap hedge agreements require the Commonwealth's counterparties to make variable rate payments equal or approximately equal to those the Commonwealth makes on the related variable rate bonds, the Commonwealth is not subject to significant basis risk as a result of the terms of these agreements. Under certain circumstances, such as a downgrade of the credit rating of the bonds being hedged or the enactment of tax-related legislation which causes the related bonds to trade differently, certain of the swap
agreements provide that the Commonwealth's counterparties, may, at their option, pay a variable rate that is based on one or more market indices such as LIBOR or the SIFMA swap index. Under these circumstances, the Commonwealth would be subject to basis risk if these indices varied from the basis for the variable rates that were paid to bondholders that were determined for the Commonwealth's variable-rate demand bonds through the associated remarketing process. For certain other interest rate swap agreements, the variable rate on the swap is based on a market index that differs from the variable rate on the hedged bonds, which is generally remarketed or auction rate. The Commonwealth is subject to basis risk on these agreements.

All but one of the swap contracts outstanding have the same or shorter maturity dates and amortizations as the related bonds. The 2018A refunding bonds that are hedged by the $\$ 119$ million notional swap with Wells Fargo Bank comes due before the swap termination date. For one of the swap agreements, the underlying bonds have mandatory tender dates that come due before the termination date of the associated swaps. This applies to the 2016B and 2016C bonds being hedged by the $\$ 254$ million notional swap with Barclays Bank. The Commonwealth's stated debt plan is to either identify other variable rate bonds the swap may hedge upon the mandatory tender date or to re-market or issue bonds in the same variable rate index mode as the swap agreement to ensure hedge effectiveness pursuant to GASB Statement No. 53. If the Commonwealth is unable to identify other variable rate bonds the swaps may hedge, the Commonwealth would be required to make net settlement payments on the swaps without the offsetting effects of changes in variable rate bond settlement payments.

On January 17, 2019, the Commonwealth issued $\$ 318$ million General Obligation Refunding Bonds 2019 Series A to refund the (SIFMA Index Bonds) 2015 Series C, 2017 Series A and 2006 (VRDB) Series B bonds. In addition, approximately $\$ 78$ million General Obligation Refunding Bonds 2019 Series B (Delayed Delivery) were issued to refund the (SIFMA Index Bonds) 2017 Series B, 2009 Series B and 2009 Series C on May 3, 2019. The Commonwealth selected to refinance the SIFMA floating rate bonds and terminated the mini-swaps associated with each maturity on February 5, 2019. The 2018 Series A refunding bonds are the only outstanding bonds that are being hedged by $\$ 120$ million notional swap with Wells Fargo Bank.

## Termination Risk of the Interest Rate Swap Agreements

The swap agreements are based on the International Swap Dealers Association (ISDA) Master Agreement, which includes standard termination events, such as failure to pay and bankruptcy. The swap agreements include termination events additional to those in the standard ISDA master agreement based on credit ratings. The swap agreements are not otherwise subject to termination except at the Commonwealth's option. The swap agreements require that the Commonwealth's counterparties maintain certain ratings levels. If they fail to maintain such ratings, the Commonwealth would have the option to terminate the related swap agreement and receive or pay a termination payment depending on the interest rates at the time. Similarly, the Commonwealth is required to maintain certain credit ratings under the agreements, generally 'BBB-' or above, well above the current credit rating of 'AA-' (based on long-term ratings assigned by Standard \& Poor's). If the Commonwealth's rating fell below the defined threshold levels, the Commonwealth's counterparties would have the option to terminate the related swap agreements or for certain agreements choose to make variable rate payments based on a market index (instead of the actual bond rate) which would subject the Commonwealth to basis risk, as previously described. If one or more of the swap agreements were terminated, then the related variable rate bonds would no longer be hedged and the Commonwealth would no longer be paying a synthetic fixed rate with respect to the bonds. In addition, if at the time of termination, the swap had a negative fair value, the Commonwealth would incur a loss and would be required to settle with the related counterparty or counterparties at the swaps' fair market values. However, to avoid a termination payment and to maintain the interest rate hedge, when the terminating event is an event of the counterparty, the Commonwealth would likely seek to replace counterparties to the swap agreement. Based on the terms and provisions of the swap agreements and the Commonwealth's current bond ratings, an involuntary termination of the swaps due to an event of the Commonwealth is remote.

## F. OUTSTANDING SWAPPED DEBT

## Security for Interest Rate Swap Agreements

Under legislation approved by the then Governor on August 11, 2008, scheduled, periodic payments to be made by the Commonwealth pursuant to swap agreements in existence on August 1, 2008 or entered into after such date shall constitute general obligations of the Commonwealth for which its full faith and credit is pledged.

Future bond interest payments are calculated using rates applicable to the scheduled payment nearest to June 30 , 2020 for variable rate bonds. The net swap payments are calculated by subtracting the projected future variable rate interest payment per the swap agreement from the projected future fixed rate payment per the swap agreement. Projected future variable rate payments on the swap agreements are based on variable rates applicable to the scheduled payment nearest to June 30, 2020. The actual amount of variable rate interest paid to bondholders and net swap payments made to counterparties are affected by changes in variable interest rates, changes in inflation (CPI), as well as changes in the London Interbank Offered Rate (LIBOR) and the Securities Industry and Financial Markets Association (SIFMA) floating rate indices. Changes in the amounts paid to bondholders versus amounts paid to counterparties are largely offsetting.

Debt service requirements to maturity for variable-rate bonds hedged by interest rate swap agreements and projected future net settlement payments on interest rate swap agreements at June 30, 2020 are provided below (amounts in thousands):

| Fiscal Year <br> Ending June 30 | Variable-Rate Bonds |  |  |  | Interest Rate |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Principal |  | Interest |  |  | est Rate <br> ps, Net |  |  |
| 2021 | \$ | 78,905 | \$ | 9,658 | \$ | 23,195 | \$ | 111,758 |
| 2022 |  | 126,575 |  | 8,775 |  | 20,676 |  | 156,026 |
| 2023 |  | 142,290 |  | 6,950 |  | 16,304 |  | 165,544 |
| 2024 |  | 126,385 |  | 5,264 |  | 12,060 |  | 143,709 |
| 2025 |  | 131,780 |  | 3,176 |  | 8,803 |  | 143,759 |
| 2026-2030 |  | 135,010 |  | 5,789 |  | 23,260 |  | 164,059 |
| 2031-2033. |  | 73,120 |  | 980 |  | 4,075 |  | 78,175 |
| Total.... | \$ | 814,065 | \$ | 40,592 | \$ | 108,373 | \$ | 963,030 |

## Business - Type Activities - Swapped Debt

The business-type activities have various swaps. At June 30, 2020, the fair value liability of the outstanding interest rate swaps was $\$ 75$ million.

## Component Unit - Swapped Debt

At June 30, 2020, the majority of interest rate swaps outstanding are held by MassDOT, which in aggregate have a negative fair value of approximately $\$ 194$ million. For complete details, see separate MassDOT financial statements.

## G. OUTSTANDING LONG-TERM DEBT AND CHANGES IN LONG TERM DEBT

The amount of long-term debt authorized but unissued is measured in accordance with the statutory basis of accounting.

Long-term debt principal outstanding and debt authorized and unissued at June 30, 2020 is as follows (amounts in thousands):

| Purpose | Principal Outstanding | Fiscal Year Maturities | Authorized and Unissued |
| :---: | :---: | :---: | :---: |
| GANs | \$ 662,270 | 2021-2027 | \$ |
| Capital projects: |  |  |  |
| General | 13,613,926 | 2021-2050 | 16,657,883 |
| Highway | 12,620,034 | 2021-2050 | 9,728,722 |
| Local aid | 698,405 | 2021-2039 | 11,105 |
| Other | 504,255 | 2021-2034 | - |
| Subtotal | 27,436,620 |  | 26,397,710 |
| Subtotal - governmental activities debt (exclusive of MSBA) | 28,098,890 |  | \$ 26,397,710 |
| MSBA debt | 6,053,947 |  |  |
| Governmental activities debt | \$ 34,152,837 |  |  |

Interest rates on the Commonwealth's outstanding debt at the end of FY20 ranged from $0.5 \%$ to $6.6 \%$.

Changes in long-term debt outstanding (excluding discount and premium) and bonds authorized - unissued for the year ended June 30, 2020 are as follows (amounts in thousands):

|  | Governmental Funds (excluding MSBA) |  | MSBA |  | Total <br> Governmental Funds Bonded Debt |  | Authorized and Unissued |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Balance July 1, 2019 | \$ | 27,739,221 | \$ | 6,054,994 | \$ | 33,794,215 | \$ | 28,417,839 |
| Plus: Increases in bonds authorized |  | - |  | - |  | - |  | 32,618 |
| General and special obligation bonds: |  |  |  |  |  |  |  |  |
| Proceeds, defined as principal, plus premium, less discount. |  | 3,227,232 |  | 1,068,221 |  | 4,295,453 |  | $(2,052,747)$ |
| Less: Premium/discount |  | $(223,684)$ |  | $(52,801)$ |  | $(276,485)$ |  | - |
| Less: Principal on refunded bonds |  | $(1,260,210)$ |  | $(747,690)$ |  | $(2,007,900)$ |  | - |
| Less: Bonds retired |  | $(1,383,669)$ |  | $(268,777)$ |  | $(1,652,446)$ |  |  |
| Outstanding principal June 30, 2020 | \$ | 28,098,890 | \$ | 6,053,947 | \$ | 34,152,837 |  | 26,397,710 |

## Business - Type Activities - Colleges and University Debt

Building authorities related to the University of Massachusetts and the state universities have issued bonds for construction of higher education facilities and equipment. Such bonds are guaranteed by the Commonwealth in an aggregate amount not to exceed $\$ 200$ million. The bond agreements generally provide that revenues from student fees are pledged as collateral on the bonds and establish bond reserve funds, bond funds, and maintenance reserve funds. The University of Massachusetts and state universities have also entered into various loan agreements as participants in the MassDevelopment's ongoing capital asset program to finance construction projects and equipment.

At June 30, 2020, debt service requirements to maturity for principal and interest are as follows (amounts in thousands):

(1) FY20 interest subsidies reflect announced sequestration reductions. There may be sequestration reductions in future years as well.

## H. PRIOR DEFEASANCE

The Commonwealth defeased certain general and special obligation bonds by purchasing securities from the proceeds of advance refunding bonds or from surplus operating funds and placing them in irrevocable trusts to provide for all future debt service payments on the defeased bonds. The trust account assets and the liabilities for the defeased bonds are not included in the financial statements. As of June 30, 2020, approximately $\$ 2.538$ billion of bonds outstanding from advance refunding activities is considered defeased.

## Business - Type Activities

The University of Massachusetts (UMass) and the Massachusetts State College Building Authority (MSCBA) defeased various bonds by issuing refunding bonds and placing the proceeds in irrevocable trusts to provide for all future debt service payments on the defeased bonds. The trust assets and the liabilities of the defeased bonds are not included in the business type activity financial statements. As of June 30, 2020, approximately $\$ 281$ million and $\$ 337$ million of bonds outstanding from advanced refunding transactions are considered defeased for UMass and MSCBA, respectively.

## I. STATUTORY DEBT LIMIT

The Massachusetts General Laws, as recently amended, establishes limits on the amount of direct debt outstanding. By statutorily limiting the Commonwealth's ability to issue direct debt, a control is established on annual capital spending. The direct debt limit for FY20 was approximately $\$ 25.220$ billion. Outstanding debt subject to the limit at June 30, 2020 was approximately $\$ 22.510$ billion.

For purposes of determining compliance with the limit, outstanding direct debt is defined by statute, as amended on June 10, 2013 (effective January 1, 2013), as principal outstanding. It excludes BANs and associated discount or premium, if any, special obligation bonds, GANs, refunded bonds, certain refunding bonds, debt issued by counties, debt issued in conjunction with the MBTA Forward Funding, certain Central Artery/Tunnel debt, debt issued for the SMART program and effective August 10, 2016 bonds issued under the Rail Enhancement Program. The amounts excluded from the debt limit are as follows (amounts in thousands):

|  | Principal Outstanding |  |
| :---: | :---: | :---: |
| Statutory debt June 30, 2020 | \$ | 28,098,890 |
| Less amounts excluded: |  |  |
| Central artery project bonds |  | $(945,574)$ |
| Accelerated bridge program |  | $(2,325,620)$ |
| MBTA forward funding. |  | (207) |
| SMART bonds |  | $(496,936)$ |
| Convention center bonds |  | $(504,255)$ |
| Special obligation gas tax bonds |  | $(55,290)$ |
| Rail enhancement program bonds. |  | $(1,260,565)$ |
| Outstanding direct debt June 30, 2020 | \$ | 22,510,443 |

## J. ADMINISTRATION DEBT LIMIT

During FY09, the Administration announced a policy that sets the annual borrowing limit at a level designed to keep debt service at a maximum of $8 \%$ of budgeted revenues. For this purpose, debt service includes principal and interest payments on all general obligation debt, special obligation gas tax debt, interest on federal grant anticipation notes, general obligation contract assistance payment obligations, and budgetary contract assistance payment obligations on certain capital lease financings. Debt of the Massachusetts School Building Authority and of the Massachusetts Bay Transportation Authority that is supported by the portion of the sales tax legally dedicated to such entities is not included for purposes of this analysis, as the Commonwealth is not liable for such debt; similarly, the sales tax revenues legally dedicated to such entities are not included in the budgeted revenue projections.

In addition to keeping debt service at a maximum of $8 \%$ of budgeted revenues, the debt management policy limits future growth in annual bond issuance (the "bond cap") to not more than $\$ 125$ million through fiscal 2020. This additional constraint is designed to ensure that projected growth in the bond cap will be held to stable and sustainable levels.

The current Administration intends to treat all debt and debt-like obligations of the Commonwealth as subject to the bond cap for purposes of developing the annual capital budget, except in limited circumstances when there is a sound policy justification for not including a particular debt issue. Debt may be excluded from the bond cap, for example, where there is a new, dedicated source of project-related revenues supporting the payment of debt service on such debt. In such cases, the dedicated revenue would also be excluded from projected budgeted revenues for purposes of determining the bond cap as described above.

The following table shows the annual bond cap, the resulting total annual debt service payment obligations and debt service as a percentage of statutory basis budgeted revenues, (amounts in thousands):

|  | $\begin{gathered} \text { Fiscal } \\ 2020 \end{gathered}$ |  |
| :---: | :---: | :---: |
| Bond cap as approved by the Governor. | \$ | 2,430,000 |
| Total annual debt service obligations. |  | 3,026,865 |
| Statutory basis budgeted fund revenues. |  | 48,329,410 |
| Debt service as \% of budgeted revenues |  | 6.3\% |

## K. CHANGES IN LONG-TERM LIABILITIES

The following table summarizes changes in long-term liabilities for both governmental activities and business-type activities (amounts in thousands):

Changes in Long Term Liabilities - Governmental Activities:

| Description | $\begin{aligned} & \text { Beginning } \\ & \text { Balance } \\ & \hline \end{aligned}$ |  | Additions |  | Deletions |  | Ending Balance |  | Due Within One Year |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Other long-term obligations: |  |  |  |  |  |  |  |  |  |  |
| Compensated absences | \$ | 616,343 | \$ | 688,326 | \$ | \$ $(616,343)$ | \$ | 688,326 | \$ | 485,510 |
| Claims and judgments |  | 33,241 |  | 8,288 |  | $(7,412)$ |  | 34,117 |  | 14,117 |
| Prizes payable |  | 908,737 |  | 84,868 |  | $(138,282)$ |  | 855,323 |  | - |

| Total bonded debt and other financing arrangements............ |  | 4,294,293 |  | 1,103,807 |  | $(721,341)$ |  | 4,676,759 |  | 187,621 |
| Long-term liabilities, business - type activities $. . . .0 . . . . . . . . . . .$. | \$ | 6,839,435 | \$ | 1,580,974 | \$ | $(1,129,985)$ | \$ | 7,290,424 | \$ | 344,501 |

Discretely Presented Component Units - The change in bonds and notes outstanding at June 30, 2020, net of unamortized discounts and premiums, compensated absences, net pension and net OPEB liabilities are as follows (amounts in thousands):

The net pension liability of the discretely presented component units of $\$ 2.222$ billion includes $\$ 1.555$ billion related to the MBTA and RTAs and $\$ 667$ million related to entities that participate in SERS. See the MassDOT financial statements for further information regarding the MBTA and RTA pension plans and see pages $\underline{113-123}$ of this report for the SERS pension disclosures.

Further information on debt is found in the notes to the basic financial statements for the various component units.

## 8. INDIVIDUAL FUND DEFICITS

Certain funds within the Governmental Fund Type had fund deficits at June 30, 2020. None of these funds were in deficit due to finance-related contractual provisions and all were allowed to be in deficit by General Law. The amounts are as follows (amounts in thousands):

| Other Governmental Funds | Amount |  |
| :---: | :---: | :---: |
| Other Special Revenue Funds: |  |  |
| Community Preservation Trust Fund | \$ | $(14,230)$ |
| Government Land Bank Fund |  | $(35,033)$ |
| General Capital Projects Fund |  | $(174,241)$ |
| Highway Capital Projects Fund |  | $(711,523)$ |
| Federal Highway Construction Program Capital Projects Fund |  | $(9,180)$ |

## 9. PENSIONS

The Commonwealth is statutorily responsible for the pension benefits for Commonwealth employees (members of the State Employees' Retirement System) and for teachers of the cities, towns, regional school districts throughout the Commonwealth and Quincy College (members of the Teachers' Retirement System). The members of the retirement systems do not participate in the Social Security System.

## A. PLAN DESCRIPTIONS

## Plan administration

The Massachusetts State Employees' Retirement System (SERS) is a public employee retirement system (PERS), that administers a cost-sharing multiple employer defined benefit pension plan covering substantially all employees of the Commonwealth and certain employees of the independent authorities and agencies, including the state police officers at the Massachusetts Port Authority. The former Massachusetts Turnpike Authority (MTA) employees and retirees became members of SERS upon the creation of MassDOT. Other employees who transferred to MassDOT have been, and remain, members of SERS. The assets and liabilities of the former MTA have been transferred to SERS. SERS is administered by the Massachusetts State Retirement Board (the SRB) and is part of the reporting entity as a fiduciary component unit and does not issue a stand-alone audited financial report.

Management of the SERS is vested in the SRB, which consists of five members-two elected by current and active SERS members, one by the remaining members of the SRB, one who is appointed by the State Treasurer, and the State Treasurer, who serves as ex-officio and is the Chairman of the SRB.

The Massachusetts Teachers' Retirement System (MTRS) is a PERS that administers a cost-sharing multiple employer defined benefit pension plan managed by the Commonwealth on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a non-employer contributing entity and is legally responsible for all contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts and Quincy College. The MTRS is administered by the Massachusetts Teachers' Retirement Board (the MTRB) and is part of the reporting entity as a fiduciary component unit and does not issue a stand-alone audited financial report.

Management of the MTRS is vested in the MTRB, which consists of seven members-two elected by the MTRS members, one who is chosen by the six other MTRB members, the State Treasurer (or their designee), the State Auditor (or their designee), a member appointed by the Governor, and the Commissioner of Education (or their designee), who serves as ex-officio and is the Chairman of the MTRB.

The Boston Retirement System (BRS) is a PERS that administers a cost-sharing multiple employer defined benefit pension plan managed by the City of Boston Retirement Board covering all City of Boston departments and agencies as well as the School Department, the Boston Planning and Development Agency, the Boston Housing Authority, the Public Health Commission and the Boston Water and Sewer Commission. The BRS is not administered by the Commonwealth and is not part of the reporting entity of the Commonwealth.

Chapter 112 of the Acts of 2010, signed on May 22, 2010, changed the methodology for the Commonwealth funding of Boston teachers in the BRS (hereafter referred to as BRS-Teachers) and created a special funding situation for the Commonwealth. The cost of pension benefits of the other participants of the BRS is the responsibility of the City of Boston. Chapter 112 clarified that the Commonwealth is legally responsible for all contributions and future benefit requirements for BRS-Teachers. The net pension liability related to the BRS-Teachers is included in the Commonwealth's net pension liability in this report.

Management of the BRS is vested with in a Board of Trustees, which consists of five members-two elected by the active and retired members of the system, the City Auditor as ex-officio, one member appointed by the Mayor of Boston, and one member who is elected by the other four members. The BRS issues a stand-alone audited financial report. For a complete copy of BRS's separately issued financial statements, please contact the City of Boston Retirement Board at (617) 635-4305, or you may download this report at http://www.cityofboston.gov/retirement/ investment.asp.

Plan membership. As of January 1, 2019, for SERS and MTRS, the dates of the most recent valuations, plan membership consisted of the following:

|  | SERS | MTRS |
| :---: | :---: | :---: |
| Retirees and beneficiaries currently receiving benefits. | 64,758 | 67,110 |
| Terminated employees entitled to benefits but not yet receiving them | 4,119 | - |
| Subtotal | 68,877 | 67,110 |
| Current members. | 87,969 | 94,103 |
| Total | 156,846 | 161,213 |

Benefits provided. SERS, MTRS and BRS provide retirement, disability, survivor, and death benefits to members and their beneficiaries. Massachusetts General Laws (MGL) establishes uniform benefit and contribution requirements for all contributory PERS. These requirements provide for superannuation retirement allowance benefits up to a maximum of $80 \%$ of a member's highest three-year average annual rate of regular compensation. For employees hired after April 1, 2012, retirement allowances are calculated on the basis of the last five years or any five consecutive years, whichever is greater in terms of compensation. Benefit payments are based upon a member's age, length of creditable service, and group creditable service, and group classification. The authority for amending these provisions rests with the Legislature.

Members become vested after ten years of creditable service. A superannuation retirement allowance may be received upon the completion of twenty years of service or upon reaching the age of 55 with ten years of service. Normal retirement for most employees occurs at age 65 ; for certain hazardous duty and public safety positions, normal retirement is at age 55. Most employees who joined the system after April 1, 2012 cannot retire and receive benefits prior to age 60 .

The policy for post-retirement benefit increases for all retirees of the SERS, MTRS and for those participants who serve in the City of Boston's School Department in a teaching capacity is subject to legislative approval.

Contributions. The retirement systems' funding policies have been established by Chapter 32 of the MGL. The Legislature has the authority to amend these policies. The annuity portion of the SERS and MTRS retirement allowance is funded by employees, who contribute a percentage of their regular compensation. Costs of administering the plan are funded out of plan assets.

Chapter 32 of the General Laws directs the Secretary of Administration and Finance to prepare a funding schedule to
meet actuarially determined requirements, and to update this funding schedule every three years on the basis of new actuarial valuation reports prepared under the Secretary's direction. Any such schedule is subject to legislative approval. If a schedule is not so approved, payments are to be made in accordance with the most recently approved schedule. Under the current schedule adopted in January 2017, the amortization payments increase $8.94 \%$ per year to FY36 with a final amortization payment in FY36 (four years before the statutory deadline of FY40). The funding schedule as published follows an acceptable actuarial funding methodology to compute normal cost and the unfunded accrued actuarial liability.

Member contributions for SERS, MTRS and BRS vary depending on the most recent date of membership:

| Hire Date | $\%$ of Compensation |
| :---: | :---: |
| Prior to 1975 | $5 \%$ of regular compensation |
| 1975-1983. | 7\% of regular compensation |
| 1984 to 6/30/1996 | $8 \%$ of regular compensation |
| 7/1/1996 to present. | $9 \%$ of regular compensation except for State Police, which is $12 \%$ of regular compensation |
| 7/1/2001 to present | $11 \%$ of regular compensation (for teachers hired after 7/1/01 and those accepting provisions of Chapter 114 of the Acts of 2000) |
| 1979 to present. | An additional $2 \%$ of regular compensation in excess of \$30,000 |

Members who joined the system on or after April 2, 2012 will have their withholding rate reduced as follows after achieving 30 years of creditable service:

- SERS:
- Members of Group 1 will have their withholding rate reduced to $6 \%$.
- MTRS:
- Members participating in Retirementplus will have their withholdings reduced to $8 \%$ otherwise their withholdings are reduced to $6 \%$ plus $2 \%$ on earnings over $\$ 30,000$ a year.

## B. INVESTMENTS

Investment Policy. SERS and MTRS are required to invest in the Pension Reserves Investment Trust (PRIT) Fund, which is managed by the Pension Reserves Investment Management (PRIM) Board. The PRIM Board seeks to maximize the total return on investments, within acceptable levels of risk and cost for an approximately $60 \%$ funded public pension fund. The PRIM Board recognizes that over the long term, asset allocation is the single greatest contributor of return and risk to the PRIT Fund. The investment policy statement adopted by the PRIM Board requires a comprehensive review of the PRIM Board's asset allocation plan and its underlying assumptions at reasonable intervals of not more than three to five years. In addition, the investment policy statement requires that the PRIM Board conduct an annual evaluation of the PRIT Fund's asset allocation. The PRIM Board's last comprehensive review of the PRIT Fund asset allocation was conducted during FY2019.

The following was the PRIT Fund asset allocation as of June 30, 2020:

| Asset Class | Target Allocation |
| :---: | :---: |
| Global Equity . | 39.0 \% |
| Core Fixed Income | 15.0 \% |
| Private Equity | 13.0 \% |
| Portfolio Completion Strategies | 11.0 \% |
| Real Estate | 10.0 \% |
| Value Added Fixed Income | 8.0 \% |
| Timber/Natural Resources | 4.0 \% |
| Total | 100.0 \% |

The annual money-weighted return on pension plan investments calculated as the internal rate of return on pension plan investments net of pension plan expenses for FY2020 were $2.01 \%$ and $2.00 \%$ for SERS and MTRS, respectively. A money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

## C. NET PENSION LIABILITY OF THE SYSTEMS REQUIRED BY GASB 67

The components of the net pension liability for SERS and MTRS at June 30, 2020 are as follows (amounts in thousands):

|  | SERS |  | MTRS |  |
| :---: | :---: | :---: | :---: | :---: |
| Total pension liability | \$ | 45,725,000 | \$ | 57,862,841 |
| Plan fiduciary net position |  | $(28,567,300)$ |  | $(29,317,997)$ |
| Net pension liability. | \$ | 17,157,700 | \$ | 28,544,844 |
| Fiduciary net position as a percentage of the total pension liability |  | 62.5\% |  | 50.7\% |

Additional information regarding changes in the net pension liability can be found in the Required Supplementary Information section of these financial statements.

Actuarial assumptions. The total pension liability, for both SERS and MTRS, was determined by an actuarial valuation as of January 1, 2019 rolled forward to June 30, 2020, using the following actuarial assumptions:

1. The actuarial assumptions included: (a) $7.15 \%$ investment rate of return; (b) $3.5 \%$ interest rate credited to the annuity savings fund; and (c) $3.0 \%$ cost of living increase on the first $\$ 13,000$ of allowance per year.
2. Salary increases are based on analyses of past experience but range from $4.0 \%$ to $9.0 \%$ depending on group and length of service.
3. Experience studies were performed as follows:
a SERS:

- Dated February 27, 2014 and encompasses the period January 1, 2006 to December 31, 2011, updated to reflect actual experience from 2012 through 2016 for post-retirement mortality.
a MTRS:
- Dated July 21, 2014 and encompasses the period January 1, 2006 to December 31, 2011, updated to reflect post-retirement mortality through January 1, 2017.

4. Mortality rates were as follows:
a SERS:

- Pre-retirement mortality reflects RP-2014 Blue Collar Employees table projected generationally with Scale MP-2016, set forward 1 year for females.
- Post-retirement mortality reflects RP-2014 Blue Collar Healthy Annuitant table projected generationally with Scale MP-2016, set forward 1 year for females.
- For disabled retirees, mortality reflects the post-retirement mortality described above, set forward 1 year.
b MTRS:
- Pre-retirement mortality reflects Pub-2010 Teachers Employees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct)
- Post-retirement mortality reflects Pub-2010 Teachers Retirees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct)
- For disabled members, the mortality rate is assumed to be in accordance with the Pub-2010 Teachers Retirees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct)

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate arithmetic expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These assumptions are converted into nominal assumptions by adding inflation, then combined by weighting them by the target asset allocation percentages. Finally, the arithmetic portfolio expected return is converted into a geometric expected return using assumed asset class standard deviations and correlations. Best estimates of geometric rates of return for each major asset class included in the PRIT Fund's target asset allocation as of June 30, 2020 (see the discussion of the pension plan's investment policy in Note 9(B)) are summarized in the following table:

| Asset Class | Long-term Expected Real Rate of Return |
| :---: | :---: |
| Private Equity | 8.2\% |
| Global Equity | 4.8\% |
| Value Added Fixed Income | 4.2\% |
| Timberland/Natural Resources... | 4.1\% |
| Real Estate | 3.5\% |
| Portfolio Completion Strategies | 3.2\% |
| Core Fixed Income........... | 0.7\% |

Discount rate. The discount rate used to measure the pension liability for SERS and MTRS was $7.15 \%$. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rates and the Commonwealth's contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rates. Based on those assumptions, the SERS and MTRS net positions were projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability for SERS and MTRS.

Sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of SERS and MTRS, calculated using the discount rate of $7.15 \%$, as well as what the SERS and MTRS net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower ( $6.15 \%$ ) or 1-percentage-point higher ( $8.15 \%$ ) than the current rate (amounts in thousands):

## D. NET PENSION LIABILITY OF THE COMMONWEALTH REQUIRED BY GASB 68

## Proportionate Share of Net Pension Liability

As of the respective measurement dates below, the net pension liability for SERS, MTRS and BRS were $\$ 14.634$ billion, $\$ 25.214$ billion, and $\$ 4.558$ billion, respectively. The net pension liabilities for SERS and MTRS were determined by an actuarial valuation as of January 1, 2019 and rolled forward to June 30, 2019. The BRS net pension liability was determined by an actuarial valuation as of January 1, 2019 and rolled forward to December 31, 2019. The SERS, MTRS and BRS actuarial valuations were rolled forward to their respective measurement dates using generally accepted actuarial procedures.

The Commonwealth (the primary government) reported the following net pension liabilities for its proportionate share of the SERS, MTRS and BRS-Teachers net pension liabilities (amounts in thousands):

| System | Measurement Date | Proportionate Share | Net Pension Liability |  |
| :---: | :---: | :---: | :---: | :---: |
| State Employees' Retirement System. | June 30, 2019 | 94.7\% | \$ | 13,856,209 |
| Massachusetts Teachers' Retirement System | June 30, 2019 | 100.0\% |  | 25,214,020 |
| Boston Retirement System - Teachers........... | December 31, 2019 | 56.5\% |  | 2,572,923 |
| Total net pension liability...................... |  |  | \$ | 41,643,152 |

Certain of the Commonwealth's discretely presented component units (the Massachusetts Convention Center Authority [MCCA] and the Massachusetts Department of Transportation [MassDOT]) participate in SERS. As of the measurement date the proportionate share of the SERS net pension liability for the discretely presented component units was as follows (amounts in thousands):

| System | Measurement Date | Proportionate Share | Net Pension Liability |  |
| :---: | :---: | :---: | :---: | :---: |
| State Employees' Retirement System. | June 30, 2019 | 4.6\% | \$ | 667,050 |

## Pension Expense and Deferred Outflows and Inflows of Resources Related to Pension

As of the measurement dates, the Commonwealth (primary government) recognized pension expense of approximately $\$ 5.472$ billion and the discretely presented component units recognized approximately $\$ 328$ million of pension expense. The following details the components of deferred outflows of resources and deferred inflows of resources related to pensions (amounts in thousands):

|  | Primary Government |  |  |  |  |  |  | Discretely Presented Component Units |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | SERS |  | MTRS |  | BRS-Teachers |  |  |  |  |
|  | Deferred Outflows of $\qquad$ | Deferred Inflows of Resources | Deferred Outflows of $\qquad$ | Deferred Inflows of Resources |  | Deferred Outflows of esources | Deferred Inflows of Resources | Deferred <br> Outflows <br> of <br> Resources | Deferred Inflows of Resources |
| Change of assumptions | \$ 1,027,083 | \$ | \$ 2,255,228 | \$ | \$ | 205,818 | \$ | \$ 178,880 | \$ 4,150 |
| Changes in proportion ........... | 164,321 | 129,340 | - | - |  | - | - | 1,404 | 37,635 |
| Net difference between projected and actual earnings on pension plan investments. | - | 206,685 | - | 225,238 |  | - | 65,095 | - | 62,666 |
| Differences between expected and actual experience | 460,165 | 180,206 | 158,508 | 26,267 |  | - | 107,446 | 78,799 | 18,504 |
| Payments made after the measurement date | 1,011,991 | - | 1,553,433 | - |  | - | - | 101,564 | - |
| Totals | \$ 2,663,560 | \$ 516,231 | \$ 3,967,169 | \$ 251,505 | \$ | 205,818 | \$ 172,541 | \$ 360,647 | \$ 122,955 |

The $\$ 2.565$ billion and $\$ 102$ million reported as deferred outflows of resources in the primary government and the discretely presented component units, respectively, are the contributions made subsequent to the measurement date and will be recognized as a reduction of the net pension liability in the next fiscal year. Other amounts reported above as deferred outflows of resources and deferred inflows of resource related to pension will be recognized in pension expense as follows (amounts in thousands):

| Fiscal Year Ending June 30 | Primary Government |  |  |  |  |  | Discretely <br> Presented <br> Component Units |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | SERS |  | MTRS |  | BRS-Teachers |  |  |  |
| 2021... | \$ | 571,486 | \$ | 962,653 | \$ | 14,374 | \$ | 85,663 |
| 2022 |  | 30,662 |  | 261,223 |  | $(15,164)$ |  | 45,535 |
| 2023. |  | 235,938 |  | 422,774 |  | 36,367 |  | 24,587 |
| 2024 |  | 263,416 |  | 386,985 |  | $(22,239)$ |  | $(21,167)$ |
| 2025 |  | 33,836 |  | 118,302 |  | 19,939 |  | 1,581 |
| Thereafter |  | - |  | 10,294 |  | - |  | (71) |
| Totals | \$ | 1,135,338 | \$ | 2,162,231 | \$ | 33,277 | \$ | 136,128 |

The SERS and MTRS total pension liabilities were based on an actuarial valuation as of January 1, 2019 rolled forward to June 30, 2019, using the following actuarial assumptions:

1. The actuarial assumptions included (a) $7.25 \%$ investment rate of return, (b) $3.50 \%$ interest rate credited to the annuity savings fund and (c) $3.00 \%$ cost of living increase on the first $\$ 13,000$ of allowance per year.
2. Salary increases are based on analyses of past experience but range from $4.00 \%$ to $9.00 \%$ (SERS) and $4.0 \%$ to $7.50 \%$ (MTRS) depending on group and length of service.
3. Experience studies were performed as follows: SERS:

- Dated February 27, 2014 and encompasses the period January 1, 2006 to December 31, 2011

MTRS:

- Dated July 21, 2014 and encompasses the period January 1, 2006 to December 31, 2011, updated to reflect post-retirement mortality through January 1, 2017

4. Mortality rates were as follows:

SERS:

- Pre-retirement - reflects RP-2014 Blue Collar Employees Table projected generationally with Scale MP-2016, set forward 1 year for females
- Post-retirement - reflects RP-2014 Blue Collar Healthy Annuitant Table projected generationally with Scale MP-2016, set forward 1 year for females
- Disability - the morality rate reflects RP-2014 Blue Collar Healthy Annuitant table projected generationally with Scale MP-2016, set forward 1 year.

## MTRS:

- Pre-retirement - reflects RP-2014 White Collar Employees Table projected generationally with Scale MP-2016 (gender distinct).
- Post-retirement - reflects RP-2014 White Collar Healthy Annuitant Table projected generationally with Scale MP-2016 (gender distinct).
- Disability - assumed to be in accordance with the RP-2014 White Collar Healthy Annuitant Table projected generationally with Scale MP-2016 (gender distinct).

The BRS-Teachers total pension liability was based on an actuarial valuation as of January 1, 2018 rolled forward to December 31, 2019 using the following actuarial assumptions:

1. The actuarial assumptions included (a) $7.15 \%$ investment rate of return, (b) $3.25 \%$ interest rate credited to the annuity savings fund and (c) $3.0 \%$ cost of living increase on the first $\$ 14,000$ of allowance per year.
2. Salary increases range from $4.0 \%$ to $7.5 \%$ depending on length of service.
3. Mortality rates were as follows:

- Healthy - reflects Pub-2010 Teacher Employee, Healthy Retiree and Contingent Survivor Headcount-Weighted Mortality Tables projected generationally using Scale MP-2019.
- Disabled - reflects Pub-2010 Teacher, Healthy Retiree and Contingent Survivor HeadcountWeighted Mortality Tables projected generationally using Scale MP-2019.

## Investments

The Massachusetts legislature enacted Section 17 of Chapter 112 of the Acts of 2010, which requires the SBRS to invest all assets, current and future, related to BRS-Teachers in the PRIT pooled fund.

The following was the PRIT Fund target asset allocation and best estimates of geometric rates of return for each major asset class as of June 30, 2019:

| Asset Class | Target Allocation | Long-term Expected Real Rate of Return* |
| :---: | :---: | :---: |
| Global Equity... | 39.00\% | 4.90\% |
| Core Fixed Income. | 15.00\% | 1.30\% |
| Private Equity... | 13.00\% | 8.20\% |
| Portfolio Completion Strategies | 11.00\% | 3.90\% |
| Real Estate. | 10.00\% | 3.60\% |
| Value Added Fixed Income | 8.00\% | 4.70\% |
| Timber/Natural Resources... | 4.00\% | 4.10\% |
| Total. | 100.00\% |  |

[^24]Because SERS, MTRS and BRS-Teachers are all required to invest in the PRIT Fund, the long-term expected real rate of return was determined on that same basis as described in Note 9C.

The discount rate used to measure the pension liabilities was $7.25 \%$ for SERS and MTRS as of the June 30, 2019 measurement date and $7.15 \%$ for BRS-Teachers as of the December 31, 2019 measurement date.

Sensitivity of the proportionate share of the net pension liability to changes in the discount rate. The following presents the net pension liability of the Commonwealth calculated using the discount rate of $7.25 \%$ for SERS and MTRS and $7.15 \%$ for BRS-Teachers, as well as what the Commonwealth's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower ( $6.25 \%$ for SERS and MTRS and $6.15 \%$ for BRSTeachers) or 1-percentage-point higher ( $8.25 \%$ for SERS and MTRS and $8.15 \%$ for BRS-Teachers) than the current rate (amounts in thousands):

|  | $\begin{aligned} & \text { 1\% Decrease } \\ & (6.25 \%) \\ & \hline \end{aligned}$ |  | $\begin{gathered} \text { Current Discount } \\ \text { Rate ( } 7.25 \% \text { ) } \\ \hline \end{gathered}$ |  | $\begin{gathered} \text { 1\% Increase } \\ (8.25 \%) \\ \hline \end{gathered}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| SERS net pension liability | \$ | 18,446,234 | \$ | 13,856,209 | \$ | 9,938,670 |

| Net position available for post-employment benefits at beginning of year..... |  | 28,763,796 |  | 29,536,980 |  | 58,300,776 |
| Net position available for post-employment benefits at end of year......... | \$ | 28,567,300 | \$ | 29,317,997 | \$ | 57,885,297 |

## F. RESERVES

Chapter 32 of the MGL establishes certain legally required reserve accounts for both SERS and MTRS. These reserves are used to account for the accumulation of resources according to purpose for which they are received, acquired or held. The reserve accounts can only be modified or changed by legislation.

The balances of legally required reserves at June 30, 2020 were as follows (amounts in thousands):

|  | SERS |  | MTRS |  | Purpose |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Annuity Savings Fund | \$ | 6,834,769 | \$ | 8,820,631 | Active members' contribution balance |
| Annuity Reserve Fund. |  | 1,946,022 |  | 1,715,843 | Retired members' contribution account |
| Special Military Service Fund. |  | 34 |  | 314 | Members' contribution account while on military leave |
| Pension Reserve Fund |  | 19,786,475 |  | 18,781,209 | Amounts appropriated to fund future retirement benefits |
| Total. | \$ | 28,567,300 | \$ | 29,317,997 |  |

## 10. OTHER POST EMPLOYMENT BENEFITS

## A. PLAN DESCRIPTIONS

## Plan administration

The Commonwealth administers a single employer defined benefit Other Post-Employment Benefit (OPEB) plan. Benefits are managed by the Group Insurance Commission (GIC) and investments are managed by PRIM. The GIC has representation on the Board of Trustees of the State Retirees' Benefits Trust (SRBT).

The SRBT is set up solely to pay for OPEB benefits and the cost to administer those benefits. It can only be revoked when all such health care and other non-pension benefits, current and future, have been paid or defeased. The GIC administers benefit payments, while the Trustees are responsible for investment decisions. The SRBT is administered by the board of trustees and is reported as an OPEB Trust Fund and does not issue a stand-alone audited financial report.

Management of the SRBT is vested with a board of trustees, which consists of seven members including the Secretary of Administration and Finance (or their designee), the Executive Director of the GIC (or their designee), the Executive Director of PERAC (or their designee), the State Treasurer (or their designee), the Comptroller (or a designee), one person appointed by the Governor and one person appointed by the State Treasurer. The members elect one person to serve as chair of the board.

Plan membership. As of January 1, 2020 the date of the most recent actuarial valuation, plan membership consisted of the following:

|  | SRBT |
| :---: | :---: |
| Inactive plan members or beneficiaries currently receiving benefit payments... | 86,091 |
| Inactive plan members entitled to but not yet receiving benefit payments. | 3,351 |
| Active plan members. | 70,071 |
| Total | 159,513 |

Benefits provided. Under Chapter 32A of the Massachusetts General Laws (MGL) the Commonwealth is required to provide certain health care and life insurance benefits for retired employees of the Commonwealth, housing authorities, redevelopment authorities and certain other governmental agencies. Substantially all of the Commonwealth's employees may become eligible for these benefits if they reach retirement age while working for
the Commonwealth. Eligible retirees are required to contribute a specified percentage of the health care/benefit costs, which are comparable to contributions required from employees.

Employer and employee contribution rates are set in MGL. The Commonwealth recognizes its share of the costs on an actuarial basis. As of June 30, 2020 and as of the valuation date (January 1, 2020), Commonwealth participants contributed $10 \%$ to $20 \%$ of premium costs, depending on the date of hire and whether the participant is active, retiree, or survivor status. As part of the FY10 General Appropriation Act, all active employees pay an additional $5 \%$ of premium costs. Normal costs paid for OPEB to retirees during FY20 totaled approximately $\$ 525$ million.

Effective beginning FY14, the Commonwealth by statute is required to allocate, to the SRBT, a portion of revenue received under the Master Settlement Agreement with tobacco companies, increasing from 10\% in FY14 to 100\% by FY23. In FY20, $10 \%$ of tobacco settlement proceeds or approximately $\$ 23$ million was allocated to the SRBT. The percentage of proceeds to be transferred to the SRBT in FY20 was set at $10 \%$, overriding existing statute.

## B. INVESTMENTS

Investment Policy. The SRBT is required to invest in the PRIT Fund. Consequently, information about SRBT's target asset allocation and long-term expected real rate of return as of June 30, 2020, are the same as discussed in Notes 9 (B) and (C).

The annual money-weighted return on OPEB plan investments calculated as the internal rate of return on OPEB plan investments net of OPEB plan expenses for fiscal 2020 was $1.75 \%$. A money-weighted rate of return expresses investment performance, net of OPEB plan investment expense, adjusted for the changing amounts actually invested.

## C. NET OPEB LIABILITY OF THE OPEB PLAN REQUIRED BY GASB 74

The components of the net OPEB liability at June 30, 2020 are as follows (amounts in thousands);

|  | SRBT |  |
| :---: | :---: | :---: |
| Total OPEB liability | \$ | 22,105,511 |
| Plan fiduciary net position. |  | (1,414,312) |
| Net OPEB liability | \$ | 20,691,199 |
| Fiduciary net position as a percentage of the total OPEB liability. |  | 6.4\% |

Additional information regarding changes in the net OPEB liability can be found in the Required Supplementary Information Section of these financial statements.

Actuarial assumptions. The total OPEB liability was determined by an actuarial valuation as of January 1, 2020 rolled forward to June 30, 2020, using the following actuarial assumptions:

1. The annual healthcare cost trend rates were developed based on the most recently published GAO-Getzen trend rate model, version $2020 \_$b. The short-term trend assumptions were based on a review of the plan's historical trend rates during fiscal years 2019 and 2020, along with industry surveys, separately for nonMedicare and Medicare benefits. The industry surveys were used were used to predict short-term future per capita cost increases. The most recently published SAO-Getzen model was then used to determine the trend rates beginning in 2024 and thereafter, based on the plan's long-term inflation assumption and reasonable macro-economic assumptions for the growth of health care expenditures during this period relative to the general economy.

| Year | Medicare Benefits | Non-Medicare Benefits |
| :---: | :---: | :---: |
| 2020...... | 4.90\% | 6.70\% |
| 2021...... | 4.80\% | 6.60\% |
| 2022...... | 4.70\% | 6.50\% |
| 2023...... | 4.60\% | 6.40\% |
| 2024...... | 4.70\% | 6.20\% |
| 2030...... | 5.18\% |  |
| 2040...... | 5.18\% |  |
| $2050 \ldots$ | 5.18\% |  |
| 2060...... | 4.84\% |  |
| 2070 | 4.38\% |  |
| 2075+.... | 4.04\% |  |

Getzen long run growth factors assumptions:

- Inflation: 2.5\%
- Real GDP Growth: 1.5\%
- Excess Medical Growth: 1.1\%

2. Mortality rate was in accordance with RP 2014 Blue Collar Mortality Table projected with scale MP-2016 from the central year, with females set forward one year.
3. Participation rates:
a. $100 \%$ of employees currently electing healthcare coverage are assumed to elect coverage at retirement.
b. $35 \%$ of employees currently opting out of active employee health coverage are assumed to elect to enroll in retiree coverage.
c. $85 \%$ of current and future vested terminated participants will elect health care benefits at age 55 , or if later, the participant's current age.
d. Retirees who currently elect to waive their coverage are assumed to remain uncovered in the future.
e. $100 \%$ of spouses are assumed to elect to continue coverage after the retiree's death.
f. Current non-Medicare eligible retirees and spouses (if covered) under age 65 who are in a POS/PPO plan are assumed to move to an Indemnity plan if they are Medicare eligible at 65. All others are assumed to remain in their currently elected product type (Indemnity/POS/PPO/HMO).

Future retirees are assumed to enroll in the existing plans in the same proportion as the current retiree mix, as show in the table below. These proportions are established separately for non-Medicare and Medicare coverage for each product type.

|  | Retirement Age |  |
| :---: | :---: | :---: |
|  | Under 65 | Age 65+ |
| Indemnity | 28.0\% | 96.0\% |
| POS/PPO.. | 60.0\% | -\% |
| HMO. | 12.0\% | 4.0\% |

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the Commonwealth and those non-Commonwealth governments that participate in the GIC) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs on a premium basis between the Commonwealth and those non-Commonwealth governments that participate in the GIC to that
point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

Discount rate. The discount rate used to measure the OPEB liability was $2.28 \%$. This rate was based on a blend of the Bond Buyer Index rate $(2.21 \%)$ as of the measurement date and the long-term expected rate of return. The plan's fiduciary net position was not projected to be available to make all projected future benefit payments for current plan members. The projected "depletion date" when projected benefits are not covered by projected assets is 2028. Therefore, the long-term expected rate of return on plan investments of $7.15 \%$ per annum was not applied to all periods of projected benefit payments to determine the total OPEB liability as of June 30, 2020.

Sensitivity of the net OPEB liability to changes in the discount rate. The following presents the OPEB plan's net OPEB liability calculated using the discount rate of $2.28 \%$, as well as what the net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (1.28\%) or 1-percentage-point higher (3.28\%) than the current rate (amounts in thousands):

Sensitivity of the net OPEB liability to changes in the healthcare cost trend rates. The following presents the OPEB plan's net OPEB liability, as well as what the net OPEB liability would be if it were calculated using a healthcare cost trend rate that is 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rate disclosed above (amounts in thousands):

|  | Current Healthcare |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1\% Decrease |  | Cost Trend Rate |  | 1\% Increase |  |
| Net OPEB liability | \$ | 16,806,045 | \$ | 20,691,199 | \$ | 25,852,967 |

## D. NET OPEB LIABILITY OF THE COMMONWEALTH REQUIRED BY GASB 75

The Commonwealth's net OPEB liability was measured as of June 30, 2019 and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of January 1, 2019 rolled forward to June 30, 2019.

The Commonwealth's reporting entity reported the following net OPEB liability (amounts in thousands):

|  |  | ( OPEB |
| :---: | :---: | :---: |
|  |  | iability |
| Primary government | \$ | 17,486,660 |
| Discretely presented component unit |  | 3,193,816 |
| Total net OPEB liability | \$ | 20,680,476 |

(A) - Of this amount $\$ 1,585$ (thousand) relates to business-type activities not participating in the Commonwealth's OPEB plan.
(B) - Of this amount $\$ 2,385,333$ (thousand) relates to discretely presented component units not participating in the Commonwealth's OPEB plan.

## OPEB Expense and Deferred Outflows and Inflows of Resources Related to OPEB

As of June 30, 2019, the measurement date, the Commonwealth (primary government) and the discretely presented component units recognized OPEB expense of approximately $\$ 891$ million and $\$ 145$ million, respectively. The following details the components of deferred outflows of resources and deferred inflows of resources related to

OPEB (amounts in thousands):

|  | Primary Government |  |  |  | Discretely Presented Component Unit |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deferred Outflows of Resources |  | Deferred <br> Inflows of <br> Resources |  | Deferred Outflows of Resources |  | Deferred <br> Inflows of <br> Resources |  |
| Changes in proportion | \$ | 336,081 | \$ | 288,892 | \$ | - | \$ | 46,846 |
| Differences between expected and actual experience |  | 701,424 |  | 22,616 |  | 35,398 |  | 323,798 |
| Change of assumptions |  | 13,539 |  | 2,636,325 |  | 228,677 |  | 211,014 |
| Net difference between projected and actual earnings on OPEB plan investments |  | 205 |  | 8,049 |  | 1,107 |  | 1,847 |
| Payments made after the measurement date |  | 526,494 |  | - |  | 70,766 |  | - |
| Totals. | \$ | 1,577,743 | \$ | 2,955,882 | \$ | 335,948 | \$ | 583,505 |

The $\$ 526$ million and $\$ 71$ million reported as deferred outflows of resources in the primary government and the discretely presented component units, respectively, are the contributions made subsequent to the measurement date and will be recognized as a reduction of the net OPEB liability in the next fiscal year. Other amounts reported above as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (amounts in thousands):

|  | Primary Government |  | Discretely Presented Component Unit |  |
| :---: | :---: | :---: | :---: | :---: |
| 2021. | \$ | $(564,912)$ | \$ | $(88,227)$ |
| 2022 |  | $(564,912)$ |  | $(88,226)$ |
| 2023. |  | $(472,551)$ |  | $(82,100)$ |
| 2024 |  | $(159,225)$ |  | $(47,129)$ |
| 2025. |  | $(139,862)$ |  | $(10,328)$ |
| Thereafter... |  | $(3,171)$ |  | $(2,313)$ |
| Total | \$ | $(1,904,633)$ | \$ | $(318,323)$ |

## Actuarial Assumptions

The total OPEB liability based on the actuarial valuation as of January 1, 2019 rolled forward to June 30,2019 used the following actuarial assumptions:

1. The following annual healthcare cost trend rates: (1) $7.5 \%$, decreasing by $0.5 \%$ each year to $5.5 \%$ in 2023 and 2024 and then decreasing $0.5 \%$ to an ultimate rate of $4.5 \%$ in 2026 for medical and (2) $4.5 \%$ for administration costs. Healthcare costs are offset by reimbursements for Employer Group Waiver Plans (EGWP), which are assumed to increase $5.0 \%$ per year until 2025, then decrease to $4.5 \%$ in 2026.
2. The mortality rate was in accordance with RP2014 Blue Collar Mortality Table projected with scale MP-2016 from the central year, with females set forward one year.
3. Participation rates:
a. $100 \%$ of all retirees who currently have health care coverage will continue with the same coverage, except that retirees under age 65 with POS/PPO coverage switch to Indemnity at age 65 and those over age 65 with POS/PPO coverage switch to HMO.
b. All current retirees, other than those indicated on the census data as not being eligible by Medicare, have Medicare coverage upon attainment of age 65, as do their spouses. All future retirees are assumed to have Medicare coverage upon attainment of age 65.
c. $85 \%$ of current and future contingent eligible participants will elect health care benefits at age 55 , or current age if later.
d. Actives, upon retirement, take coverage, and are assumed to have the following coverage:

|  | Retirement Age |  |
| :---: | :---: | :---: |
|  | Under 65 | Age 65+ |
| Indemnity. | 25.0 \% | 85.0 \% |
| POS/PPO... | 60.0 \% | - \% |
| HMO. | 15.0 \% | 15.0 \% |

## Discount Rate

The discount rate used to measure the OPEB liability as of June 30 , 2019 was $3.63 \%$. This rate was based on a blend of the Bond Buyer Index rate of $3.51 \%$ as of the measurement date and the long-term expected rate of return on plan investments of $7.25 \%$. The plan's fiduciary net position was not projected to be available to make all projected future benefit payments for current plan members. The projected "depletion date" when projected benefits are not covered by projected assets is 2029. Therefore, the long-term expected rate of return on plan investments was not applied to all periods of projected benefit payments to determine the total OPEB liability as of June 30, 2019.

## Investments

The long-term expected rate of return as of June 30,2019 was $7.25 \%$. Investment assets of the Plan are held by the Pension Reserves Investment Trust (PRIT) Fund. The long-term expected rate of return on OPEB Plan investments was determined using a building-block method in which best-estimate ranges of expected future rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future rates of return by the target asset allocation percentage. Best estimates of geometric rates of return for each major asset class included in the PRIT Fund's target asset allocation as of June 30, 2019 are summarized in the following table:

## Changes in Net OPEB liability

The following presents the changes in the net OPEB liability of entities participating in the Commonwealth's OPEB plan (including MassDOT, a discretely presented component unit) as of June 30, 2019 (amounts in thousands):

|  | Increase/(Decrease) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total OPEB Liability (a) |  | Plan Fiduciary Net Position (b) |  | Net OPEB Liability (a) - (b) |  |
| Balances at June 30, 2018 | \$ | 19,761,333 | \$ | 1,187,569 | \$ | 18,573,764 |
| Changes for the year: |  |  |  |  |  |  |
| Service cost |  | 806,023 |  | - |  | 806,023 |
| Interest |  | 796,880 |  | - |  | 796,880 |
| Differences between expected and actual experience |  | 715,192 |  | - |  | 715,192 |
| Changes of assumptions |  | $(1,935,139)$ |  | - |  | $(1,935,139)$ |
| Contributions-employer. |  | - |  | 594,916 |  | $(594,916)$ |
| Net investment income. |  | - |  | 68,229 |  | $(68,229)$ |
| Benefit payments. |  | $(482,183)$ |  | $(482,183)$ |  | - |
| Administrative expense. |  | - |  | (171) |  | 171 |
| Other additions. |  | - |  | 188 |  | (188) |
| Net changes |  | $(99,227)$ |  | 180,979 |  | $(280,206)$ |
| Balances at June 30, 2019. | \$ | 19,662,106 | \$ | 1,368,548 | \$ | 18,293,558 |

## Sensitivity Analysis of the net OPEB liability to changes in the discount rate

The following presents the net OPEB liability of entities participating in the Commonwealth's OPEB plan (excluding MassDOT) calculated using the discount rate, as well as what the net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate (amounts in thousands):

|  |  | $\begin{gathered} \text { 1\% Decrease } \\ 2.63 \% \end{gathered}$ |  | Current Rate $3.63 \%$ |  | $1 \%$ Increase $4.63 \%$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Net OPEB liability | \$ | 20,871,529 | \$ | 17,485,075 | \$ | 14,807,572 |

## Sensitivity Analysis of the net OPEB liability to changes in the healthcare cost trend rate

The following presents the net OPEB liability of entities participating in the Commonwealth's OPEB plan (excluding MassDOT), as well as what the net OPEB liability would be if it were calculated using a healthcare cost trend rate that is 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rate, as disclosed on pages 124-125 of this report (amounts in thousands):

|  | 1\% Decrease |  | Current Rate |  | 1\% Increase |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Net OPEB liability. | \$ | 14,409,911 | \$ | 17,485,075 | \$ | 21,542,425 |

## MSBA

The MSBA, a blended component unit, sponsors its own single-employer defined benefit OPEB plan. The disclosures related to the net OPEB asset of the MSBA are not included in these notes to the financial statements due to immateriality (approximately $\$ 2$ million).

## E. STATEMENT OF NET POSITION AND CHANGES IN NET POSITION

The following table displays the Statement of Net Position and Statement of Changes in Net Position for the State Retirees' Benefit Trust as of June 30, 2020 (amounts in thousands):

|  | OPEB Trust Fund |  |
| :---: | :---: | :---: |
|  | State Retiree Benefits |  |
| ASSETS |  |  |
| Cash and cash equivalents. | \$ | 23,773 |
| Net investment in PRIT at fair value |  | 1,390,552 |
| Total assets.... |  | 1,414,325 |

## LIABILITIES

| Net position available for other post-employment benefits at beginning of year...... |  | 1,368,548 |
| Net position available for other post-employment benefits at end of year........ | \$ | 1,414,312 |

## 11. LEASES

## Primary Government

In order to finance the acquisition of equipment, the Commonwealth has entered into various lease/purchase agreements, including tax-exempt lease purchase (TELP) agreements, which are accounted for as capital leases. Included in the capital assets of the Commonwealth are additions financed by capital leases. For FY20, these additions are approximately $\$ 574$ thousand. Lease agreements are for various terms and contain clauses indicating that their continuation is subject to appropriation by the Legislature.

The Commonwealth has numerous operating lease agreements for real property and equipment with varying terms.

These agreements contain provisions indicating that continuation is subject to appropriation by the Legislature.
The Institutions of Higher Education lease real property and equipment under numerous operating lease agreements for varying terms. The following schedule summarizes future minimum payments under non-cancelable leases for governmental activities and for the Institutions of Higher Education - reported as a business-type activity, for the fiscal year ended June 30, 2020 (amounts in thousands):

| Fiscal Year Ended June 30 | Governmental Activities |  |  |  |  |  |  | Business - Type Activities |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Capital Leases |  |  | Operating |  | MSBA <br> Operating <br> Leases |  | Governmental Activities Total |  | Capital Leases |  |  |  | Operating Leases |  | Business Type Activities Total |  |
|  | Principal | Interest |  |  |  | Principal | Interest |  |  |  |  |  |
| 2021. | \$ 3,180 | \$ | 486 | \$ | 228,493 |  |  | \$ | 1,141 | \$ | 233,300 | \$ | 2,670 | \$ | 296 | \$ | 36,191 | \$ | 39,157 |
| 2022 | 3,133 |  | 479 |  | 165,626 |  | 1,166 |  |  |  | 170,404 |  | 2,322 |  | 215 |  | 30,727 |  | 33,264 |

| Total... | \$ | 17,161 | \$ | 9,441 |

## 12. OTHER LONG-TERM LIABILITIES

## A. WORKERS' COMPENSATION AND GROUP INSURANCE LIABILITIES

Workers' Compensation is managed as part of the course of the Commonwealth's general operations. No separate fund for workers' compensation is provided for in Massachusetts General Laws (MGL). Claims for compensation are not separately insured and are funded by the Commonwealth only when incurred. Such losses, including estimates of amounts incurred, but not reported, are included as accrued liabilities in the accompanying financial
statements when the loss is incurred. The Commonwealth assumes the full risk of claims filed under a program managed by the Human Resources Division. For personal injury, MGL limits the risk assumed by the Commonwealth to $\$ 100,000$ per occurrence, in most circumstances.

Workers' compensation costs are recognized when claims are presented and paid. The Commonwealth's outstanding liability for such claims at June 30,2020 is estimated to be $\$ 265$ million of which approximately $\$ 42$ million is expected to be paid during FY20.

Changes in the Commonwealth's liability relating to workers' compensation claims in FY20 and FY19 were (amounts in thousands):

|  | FY20 |  | FY19 |  |
| :---: | :---: | :---: | :---: | :---: |
| Claims liability, beginning of year | \$ | 261,387 | \$ | 260,904 |
| Increase in liability estimate |  | 64,511 |  | 62,782 |
| Payments and decreases in liability estimate |  | $(61,028)$ |  | $(62,299)$ |
| Claims liability, end of year | \$ | 264,870 | \$ | 261,387 |

The Group Insurance Commission (GIC), a department of the Commonwealth, manages health insurance claims of the Commonwealth's active and retired employees. The Commonwealth is self-insured and various health insurance providers provide health care services to the employees. The accrued liability is estimated based on data provided to the GIC by the insurance companies who participate in the self-insured plans.

Changes in the Commonwealth's liability relating to group insurance claims in FY20 and FY19 were (amounts in thousands):

|  | FY20 |  | FY19 |  |
| :---: | :---: | :---: | :---: | :---: |
| Claims liability, beginning of year | \$ | 151,273 | \$ | 130,736 |
| Increase in liability estimate |  | 1,651,080 |  | 1,665,999 |
| Payments and decreases in liability estimate |  | $(1,661,726)$ |  | $(1,645,462)$ |
| Claims liability, end of year | \$ | 140,627 | \$ | 151,273 |

## B. OTHER CLAIMS \& JUDGMENTS

A number of lawsuits are pending or threatened against the Commonwealth, which arise from the ordinary course of operations. These include claims for property damage and personal injury, breaches of contract, condemnation proceedings and other alleged violations of law. The Commonwealth records a liability for those cases in which it is probable that a loss will be incurred and the amount of the potential judgment can be reasonably estimated or a settlement or judgment has been reached but not paid.

The following amounts were recognized for claims and judgments in FY20 and FY19 (amounts in thousands):

|  | FY20 |  | FY19 |  |
| :---: | :---: | :---: | :---: | :---: |
| Unpaid claims, beginning of year | \$ | 33,241 | \$ | 22,498 |
| Incurred claims. |  | 8,288 |  | 28,466 |
| Claim payments and reductions |  | $(7,412)$ |  | $(17,723)$ |
| Unpaid claims end of year | \$ | 34,117 | \$ | 33,241 |

## C. ENVIRONMENTAL REMEDIATION

Governmental Accounting Standards Board Statement No. 49, Accounting and Financial Reporting for Pollution Remediation Obligations (GASB 49) provides guidance in estimating and reporting the potential costs of pollution remediation. While GASB 49 does not require the Commonwealth to search for pollution, it does require the Commonwealth to reasonably estimate and report a remediation liability when any of the following obligating events has occurred:

- Pollution poses an imminent danger to the public and the Commonwealth is compelled to take action;
- The Commonwealth is found in violation of a pollution-related permit or license;
- The Commonwealth is named, or has evidence that it will be named, as a responsible party by a regulator;
- The Commonwealth is named, or has evidence that it will be named, in a lawsuit to enforce a cleanup;
- The Commonwealth commences or legally obligates itself to conduct remediation activities.

Site investigation, planning and design, cleanup and site monitoring are typical remediation activities underway across the Commonwealth. Several Commonwealth agencies have dedicated programs, rules and regulations that routinely deal with remediation related issues; others become aware of pollution conditions in the fulfillment of their missions. The Commonwealth has the knowledge and expertise to estimate the remediation obligations presented herein based upon prior experience in identifying and funding similar remediation activities.

The standard requires the Commonwealth to calculate pollution remediation liabilities using the expected cash flow technique, which measures the liability as the sum of probability-weighted amounts in a range of possible estimated amounts. Where the Commonwealth cannot reasonably estimate a pollution remediation obligation it does not report a liability. Several state departments perform continual monitoring of polluted sites. Since the monitoring for such sites is perpetual, undiscounted multi-year costs for such sites have not been estimated. Because of a lack of information about the type and extent of the remediation effort that could be required, no range of outlays for the overall remediation effort for such sites could be developed at this time.

The remediation obligation estimates that appear in this report are subject to change over time. Cost may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the Commonwealth's obligation. Capital assets may be created when pollution remediation outlays are made under specific circumstances.

During FY20, the Commonwealth had the following activity related to environmental remediation (amounts in thousands):

|  | Governmental Activities |  |
| :---: | :---: | :---: |
| Environmental remediation liability, beginning of year | \$ | 517,415 |
| Expected additional future outlays, changes in liability estimates |  | 48,604 |
| FY20 outlays for environmental remediation |  | $(5,639)$ |
| Environmental remediation liability, end of year. | \$ | 560,380 |

Massachusetts Military Reservation. The Commonwealth, through the Executive Office of Energy and Environmental Affairs, the Department of Environmental Protection and the Attorney General's office, were engaged in discussions with federal Natural Resource Trustees, including the United States Army and Air Force, the Department of the Interior and the National Oceanic and Atmospheric Administration and private contractors regarding natural resource damages at the Massachusetts Military Reservation on Cape Cod. Federal Trustees and private contractors claim that the Commonwealth and others are liable for natural resource damages due to widespread contamination primarily from past military activities at the Reservation and are responsible for response actions and related clean-up activities. The assessment process for natural resource damages is set out in federal regulations and has not been completed. While no recent comprehensive estimate of natural resource damages and response actions is available, it is expected that the damages and response actions may cost at least tens of millions
of dollars. In 2013, the state and federal trustees reopened preliminary discussions per a Trustee Council resolution on a potential settlement framework.

Closed State Facilities. The Commonwealth has 17 facilities that contain a total of 235 buildings, mainly in closed state hospitals that may have varying degrees of asbestos, polychlorinated biphenyl (PCB's) and other compounds that are currently in a dormant state. The Commonwealth typically sells these facilities at minimal cost to private developers who assume full responsibility for all cleanup activity. Cost estimates are only performed during the sale process. At this time, the Commonwealth has no estimate of any potential asset that would be developed from these activities that would ready these sites for sale.

## D. COST OF LIVING ADJUSTMENTS

The Commonwealth is financially responsible for the cost of living adjustment (COLA) granted to participants in various retirement systems of cities, towns and counties in fiscal years 1981 to 1997. Chapter 17 of the Acts of 1997 effective for fiscal year 1998 transferred the responsibility for funding COLAs for separate (non-teacher) retirement systems of cities and towns to their respective systems. Any future COLA granted by the Legislature to employees of these plans will be the responsibility of the individual system, assuming approval by the local board. The individual employer governments are also responsible for the basic pension benefits.

During fiscal year 2020, there was a decrease of approximately $\$ 13$ million in the liability for COLAs granted to participants in retirement systems of cities, towns and counties.

As of June 30, 2020, the Commonwealth's liability for COLA was approximately $\$ 117$ million.

## 13. CONTINGENCIES/COMMITMENTS

The Commonwealth receives significant financial assistance from the federal government. Entitlement to these resources is generally contingent upon compliance with terms and conditions of the grant or reimbursement agreements and with applicable federal regulations, including the expenditure of the resources for eligible purposes. Substantially all federal financial assistance is subject to financial and compliance audits.

Chapter 200A of the Massachusetts General Laws, the Commonwealth's Abandoned Property Law, requires deposit of certain unclaimed assets into a managed Fiduciary Fund. These unclaimed assets are to be remitted to the General Fund each June 30, where it is included as miscellaneous revenue. Amounts remitted during FY20 totaled approximately $\$ 101$ million. A portion of accumulated claims since the law's enactment represent a contingency, because claims for refunds can be made by the owners of the property.

Drug Testing Laboratory disputes. On August 28, 2012, a chemist formerly employed at the Department of Public Health's drug testing laboratory in Boston admitted to several types of misconduct involving her handling of laboratory samples, which were used in criminal cases. The Governor was informed and ordered the immediate closure of the laboratory. The Governor established a central office to identify individuals who may have been affected by the chemist's alleged malfeasance, which the office has estimated as possibly tens of thousands of criminal drug cases. The Governor also announced that the Inspector General is conducting an independent assessment of the laboratory's operations. In addition, the Attorney General's Office is conducting a criminal investigation. On December 17, 2012, the former chemist was indicted by a Statewide Grand Jury on 27 charges in connection with altering drug evidence during the testing process and obstructing justice. She was arraigned on December 20, 2012 in Suffolk Superior Court and pled guilty in 2013. There likely will be significant, but as yet undetermined, state costs required to investigate and respond to the chemist's alleged malfeasance. Supplemental appropriations totaling $\$ 30$ million were approved during fiscal 2013 to create a fund to reimburse agencies and cities for costs associated with investigating and responding to misconduct at the state drug testing laboratory. In addition, there may be substantial costs to defend civil complaints alleging state liability in both state and federal court and for potential judgments. As the number of specific cases affected by the chemist's misconduct has not been definitively determined, there is not sufficient information to fully estimate these additional state costs.

## A. PRIMARY GOVERNMENT

The Commonwealth continues to guarantee certain Massachusetts Bay Transportation Authority (MBTA) debt outstanding at June 30, 2020, totaling approximately $\$ 142$ million.

The MBTA's Forward Funding legislation of 1999 provides for the MBTA to issue general obligation, revenue or other debt secured by a pledge or conveyance of all or a portion of revenues, receipts or other assets or funds of the MBTA. Accordingly, all MBTA debt issued after this legislation is not backed by the full faith and credit of the Commonwealth.

Additional commitments of the Commonwealth remain for the University of Massachusetts Building Authority. As of June 30, 2020, the University of Massachusetts Building Authority has approximately $\$ 3.171$ billion, of outstanding debt, of which approximately $\$ 109$ million is guaranteed by the Commonwealth.

## B. TOBACCO SETTLEMENT

A Master Settlement Agreement (MSA) was executed in November of 1998 between five tobacco companies and 46 states, including the Commonwealth. Several additional tobacco companies have joined the MSA and are bound by its terms.

The MSA called for, among other things, annual payments to the states in perpetuity. These payments have been estimated to total more than $\$ 200$ billion over the first 25 years, subject to various offsets, reductions and adjustments.

In FY20, the Commonwealth received approximately $\$ 230$ million, or $63.2 \%$ of the estimated amounts shown in the MSA. Amounts received in FY20 continued to be less than had previously been projected as payments under the MSA, primarily because the payment amounts are related to national tobacco sales volumes, which have continued to decline since the settlement. The Commonwealth's allocable share of the base amounts payable under the MSA is approximately $4.04 \%$ or approximately $\$ 8.962$ billion through 2025 , which is subject to adjustments, reductions and offsets. However, in pending litigation, tobacco manufacturers are claiming that because of certain developments, they are entitled to reduce future payments under the MSA and, from FY06 to the present, certain manufacturers have withheld portions of the payments due to the states. The Commonwealth continues to pursue legal action to compel the payment of these additional funds and to obtain a legal determination that the Commonwealth is immune from any downward adjustment to its settlement payments.

In FY04, a Suffolk Superior Court jury rejected the claims of the Commonwealth's private tobacco attorneys that they should be paid a fee amounting to $25 \%$ of the Commonwealth's tobacco settlement money. The jury awarded the plaintiffs $10.5 \%$ of the amount the Commonwealth receives under the MSA through 2025, minus an offset for amounts received by the attorneys from the tobacco companies pursuant to an arbitration award. To date, however, the attorneys have received more than $10.5 \%$ of what the Commonwealth has received under the MSA. As of June 30, 2020, the Commonwealth owes nothing under the jury award. Whether the Commonwealth will in the future be required to pay any sum on private counsel's claim will depend on the actual payments received by the Commonwealth under the MSA through 2025, as well as on the amounts the attorneys receive through the arbitration payments.

## C. OTHER CONSTRUCTION COMMITMENTS

At June 30, 2020, the Commonwealth had commitments of approximately $\$ 505$ million related to ongoing construction projects.

## D. CONTRACTUAL ASSISTANCE TO AUTHORITIES

The Commonwealth is also authorized to pledge its credit in aid of and provide contractual support for certain independent authorities and political subdivisions within the Commonwealth. These Commonwealth liabilities are classified as: (a) general obligation contract assistance; (b) budgetary contractual assistance liabilities; or (c) contingent liabilities. In addition, the Commonwealth is authorized to pledge its credit in support of scheduled, periodic payments to be made by the Commonwealth under interest rate swaps and other hedging agreements related to bonds or notes of the Commonwealth.

General obligation contract assistance obligations arise from statutory requirements for payments by the Commonwealth to the Massachusetts Clean Water Trust, the Massachusetts Department of Transportation and the Massachusetts Development Finance Agency that are used by such entities to pay a portion of the debt service on certain of their outstanding bonds. Such assistance constitutes a pledge of the Commonwealth's credit for which a two-thirds vote of the Legislature is required.

Budgetary contract assistance liabilities do not constitute a pledge of the Commonwealth's credit. Contingent liabilities relate to debt obligations of independent authorities and agencies of the Commonwealth, or payment obligations of such entities on hedging transactions related to such debt, that are expected to be paid without Commonwealth assistance, but for which the Commonwealth has some kind of liability if expected payment sources do not materialize. These contingent liabilities consist of guarantees and similar obligations with respect to which the Commonwealth's credit has been or may be pledged. Under legislation approved by the Governor during FY09, the Commonwealth may pledge its credit to guarantee payment obligations of the Massachusetts Turnpike Authority (succeeded by MassDOT in FY10) with respect to certain hedging transactions or provide financial support subject to annual appropriation and without a pledge of the Commonwealth's credit. The same legislation authorizes the Commonwealth to provide credit support to the Turnpike Authority (succeeded by MassDOT) in connection with the issuance of certain refunding bonds, subject to annual appropriation and without a pledge of the Commonwealth's credit. In addition, the Commonwealth has certain statutorily contemplated payment obligations with respect to which the Commonwealth's credit has not been pledged, as in the case of the Commonwealth's obligation to replenish the capital reserve funds securing certain debt obligations of the Massachusetts Housing Finance Agency and the Commonwealth's obligation to fund debt service, solely from monies otherwise appropriated for the affected institution, owed by certain community colleges and state universities on bonds issued by the Massachusetts Health and Educational Facilities Authority and the Massachusetts State College Building Authority.

## E. MSBA

The MSBA has estimated the amount of outstanding New Program commitments at June 30, 2020 to be $\$ 1.6$ billion.

## F. SOCIAL IMPACT BONDS

In January 2014, the Commonwealth entered into a "pay for success contract" (Social Impact Bonds) with a nonprofit intermediary organization and a nonprofit social service agency to reduce the recidivism rate of young men in the juvenile justice system or on probation. The Commonwealth is obligated to make success payments totaling $\$ 28$ million through calendar year 2019 and the Commonwealth's obligation to make such payments is a general obligation for which the Commonwealth's full faith and credit are pledged. Payments are only made based upon successful achievement of specified outcomes based on defined performance targets contained in the contract. The Commonwealth entered into a second such contract in December 2014 to address chronic individual homelessness. The contract obligates the Commonwealth to make up to $\$ 6$ million in success payments, in the aggregate, through fiscal 2021. In June, 2016 the Commonwealth entered into a third contract to assist individuals in Adult Basic Education (ABE) or English for Speakers of Other Languages (ESOL) programs to transition to employment, higher wage jobs, and higher education. The contract obligates the Commonwealth to make up to $\$ 15$ million in success payments, in the aggregate, through fiscal 2023. The total amount of payments backed by the full faith and credit of the Commonwealth under such contracts may not exceed, in the aggregate, $\$ 50$ million. As the
amount required to be paid as of June 30, 2020 cannot be determined until performance targets have been achieved as determined by independent evaluators, no liability has been accrued in these financial statements for these contracts.

## G. PENSIONS

The Massachusetts State Employees' Retirement System (MSERS) and the Massachusetts Teachers' Retirement System (MTRS) (collectively referred to as the Retirement Systems), in conjunction with the Commonwealth, have evaluated whether certain of the statutes or practices governing the systems may have been in conflict with the exclusive benefit rule of Section 401(a)(2) of the Internal Revenue Code or other federal tax law requirements relating to the operation of tax-exempt pension plans.

The activities reviewed included (i) the statutorily directed funding of the budget for the Public Employees' Retirement Administration Commission (PERAC) solely from the investment income accounts of MSERS and MTRS, (ii) the statutorily directed contributions made from the MSERS account in the PRIT Fund to a separate optional retirement plan available to certain employees of the Commonwealth's higher education system, (iii) the statutorily mandated reimbursements paid by the MSERS to local retirement systems for local cost-of-living allowances for certain participants of those systems, (iv) the deposit of reimbursement revenues received from local retirement systems to the Commonwealth's General Fund rather than to the MTRS and MSERS accounts in the PRIT Fund, and (v) the deposit of federal grant fringe payments to the General Fund rather than to the MTRS and MSERS accounts in the PRIT Fund.

The Commonwealth, PERAC, MSERS and the MTRS each engaged outside tax counsel to review these activities.
On March 28, 2017, the Governor approved legislation to address prospectively certain aspects of the issues described above. Additional corrective legislation was approved as part of the Commonwealth's General Appropriations Act for Fiscal Year 2018, approved on July 17, 2017. The Executive Office for Administration and Finance submitted to the Internal Revenue Service, for its consideration, a request for a closing agreement which in the Commonwealth describes the activities listed above, explains the corrective actions already taken by legislation, and requests an affirmation that these activities do not adversely affect the tax qualification of the MSERS and MTRS in light of the corrections already made.

The Internal Revenue Service issued an initial request for additional information on April 28, 2020 and a further request for additional information on June 23, 2020. The Commonwealth, the MSERS and MTRS submitted responses to such requests on June 3, 2020 and July 31, 2020, respectively. After further discussions with the IRS, on August 20, 2020, the Commonwealth submitted to the IRS a proposal in connection with the withdrawal of its request for a closing agreement. The withdrawal was agreed to by the IRS, as the proposed corrective action would not be completed until 2021 or later. A response from the IRS on the related proposal is currently pending.

## 14. COMPONENT UNITS AND DETAILS OF DEPARTMENTS AND ENTITIES THAT ARE SEPARATELY AUDITED

The Commonwealth has also considered all potential component units for which it is financially accountable as well as other organizations for which the nature and significance of their relationship with the Commonwealth is such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. As required by GAAP, these financial statements present the Commonwealth of Massachusetts (the primary government) and its component units. The Commonwealth has included 40 entities as component units in the reporting entity because of the significance of their operational and/or financial relationships with the Commonwealth. Details of those entities' operations can be found in those entities' basic financial statements and notes to those entities' basic financial statements.

The following entities are presented in the basic financial statements (all having a June 30, 2020 fiscal year end) (entities marked with an * are not legally separate from the Commonwealth but have separately audited financial statements). Entities that are marked with a § also were not audited in accordance with Governmental Auditing Standards as promulgated by the Comptroller General of the United States.

## Entities Audited by KPMG LLP:

The Pension Reserves Investment Trust Fund (PRIT)
*The Massachusetts State Lottery Commission
The Massachusetts Department of Transportation (MassDOT)
The Massachusetts Clean Water Trust
Commonwealth Health Insurance Connector Authority

## 15. SUBSEQUENT EVENTS

## SUBSEQUENT BOND ISSUANCES

On July 1, 2020, the Massachusetts State College Building Authority (MSCBA) closed on approximately $\$ 396$ million of Refunding Revenue Bonds Series 2020A (Federally Taxable) for the purpose of providing budgetary relief to the nine State Universities in FY21 and FY22. These bonds were issued to refund/restructure approximately $\$ 338$ million of debt outstanding from multiple series of bonds. Since the transaction included advance refunding for series of bonds which must be issued on a taxable basis, no premium was generated. In addition to the advance refunded series, the May 1, 2021 principal and a portion of the May 1, 2022 principal from sixteen other series of bonds were included in the refunding escrow to provide budgetary relief. The reduction of the FY21 debt service assessment is approximately $\$ 53$ million. The reduction of the FY22 debt service assessment is approximately $\$ 28$ million. The overall impact through FY49 was an increase in gross debt service costs of approximately $\$ 933$ thousand. The refunding resulted in present value savings of approximately $\$ 27$ million or $7.9 \%$ of the par amount of the refunded bonds. The first principal payment is due on May 1,2024 , and the final term bond maturity is on May 1,2049 , which matches the final maturity of the Authority's outstanding debt prior to the 2020A. Interest is due semiannually each May 1st and November 1st. The bonds carry interest rates ranging from $1.044 \%$ in 2024 to $3.072 \%$ in 2049 . The refunding escrow is invested in Treasuries and State and Local Government Series ("SLGS") to the various call dates or maturity dates for non-callable maturities. On August 18, 2020, the Authority's board approved the release of approximately $\$ 16$ million currently held in the Debt Service Reserve Fund to pay the November 1, 2020 interest payment on behalf of the State Universities. This distribution combines with the 2020A refunding and other reductions in assessments as a multi-faceted plan to reduce expenses in response to the impact of COVID-19 on the nine State Universities. As a result of the 2020A refunding, on July 1, 2020, a forward delivery agreement termination payment from SunTrust for $\$ 4$ million was deposited to the debt service fund. As part of the agreement, the Authority also retained the security held in the debt service reserve fund, which matures in October 2020.

On July 9, 2020, the Commonwealth issued approximately $\$ 171$ million in GO Refunding Bonds 2020, Series B. The bonds were issued to refund, on a current basis, approximately $\$ 218$ million of various GO bonds and carries interest rates of $4.00 \%$ to $5.00 \%$ with final maturity on July 1, 2034. The refunding resulted in reduced debt service of approximately $\$ 39$ million and a present value savings of approximately $\$ 35$ million over the life of the bonds.

On July 9, 2020, the Commonwealth issued approximately $\$ 457$ million in federally taxable GO Refunding Bonds 2020 , Series C. The bonds were issued to advance refund approximately $\$ 428$ million of various GO bonds and carries interest rates of $0.386 \%$ to $2.514 \%$ with final maturity on July 1,2041 . The refunding resulted in reduced debt service of approximately $\$ 117$ million and a present value savings of approximately $\$ 112$ million over the life of the bonds.

On July 9, 2020, the Commonwealth issued $\$ 775$ million in GO Bonds, Consolidated Loan of 2020, Series D. These bonds carry an interest rate of $3.00 \%$ to $5.00 \%$. The first principal payment is due on June 30, 2027 with final maturity on July 1, 2048.

On July 15, 2020, the MSBA issued $\$ 350$ million of Senior Dedicated Sales Tax Bonds ( 2020 Series A Bonds) (Social Bonds) for the purpose of funding school construction and renovation projects. The market generated premiums of approximately $\$ 91$ million on the bond issuance. The Bonds mature at various dates through August 2050 and interest is due semi-annually each February 15th and August 15th. The bonds carry an interest rates ranging from $3.00 \%$ to $5.00 \%$.

On July 15, 2020, the MSBA advance refunded $\$ 302$ million of 2012 Series A Dedicated Sales Tax Refunding Bonds, $\$ 591$ million of 2012 Series B Dedicated Sales Tax Refunding Bonds, and $\$ 96$ million of 2013 Series A Dedicated Sales Tax Bonds by issuing \$1.1 billion of Senior Dedicated Sales Tax Refunding Bonds 2020 Series B Bonds (Federally taxable) (Social Bonds). The Bonds mature at various dates through August 15, 2035 and the interest is payable semi-annually February 15th and August 15th. The coupons on the bonds range from $0.349 \%$ to $2.103 \%$. The refunding resulted in reduced debt service of approximately $\$ 241$ million and a net present value savings of $\$ 198$ million over the life of the debt.

On September 25, 2020, the MSBA executed an escrow restructure of the assets held in trust for refunding escrows related to the 2013 A Bonds. The MSBA sold approximately $\$ 29$ million par value of open market securities and replaced them with $\$ 31$ million par value of SLGS. The net portfolio cost of the restructure was $\$ 146$ thousand. This transaction results in $\$ 29$ million of the 2013 Series A Bonds being considered defeased.

On October 8, 2020, the MSBA advance refunded $\$ 395$ million of 2013 Series A Dedicated Sales Tax Bonds by issuing $\$ 389$ million of Senior Dedicated Sales Tax Refunding Bonds 2020 Series C Bonds (Federally taxable). The Bonds mature at various dates through May 15, 2043 and the interest is payable semi-annually May 15th and November 15th. The coupons on the bonds range from $0.45 \%$ to $2.95 \%$. The refunding resulted in reduced debt service of $\$ 126$ million and a net present value savings of $\$ 81$ million over the life of the debt.

On October 28, 2020, the University of Massachusetts Building Authority issued federally taxable Revenue Refunding Bonds, Series 2020-4 for $\$ 330$ million to refund $\$ 234$ million of existing debt for Series 2013-1, 2014-1 2014-3 and 2015-1 and defer the November 2020 principal payment on outstanding debt. Principal and interest payments are due each May 1 and November 1, commencing May 2021, with interest rates varying between $0.43 \%$ and $3.01 \%$.

On November 10, 2020, the Commonwealth issued approximately $\$ 7$ million in GO Bonds, Consolidated Loan of 2020 Series A (College Opportunity Bonds). These bonds carry an interest rate of $0.50 \%$. The first principal payment is due on August 1, 2025 with final maturity on August 1, 2040.

On December 3, 2020, the Commonwealth issued approximately $\$ 405$ million in GO Refunding Bonds 2020, Series D. The bonds were issued to refund, on a current basis, approximately $\$ 469$ million of various GO bonds and carries interest rates of $3.00 \%$ to $4.00 \%$ with final maturity on November 1, 2042. The refunding resulted in reduced debt service of approximately $\$ 51$ million and a present value savings of approximately $\$ 60$ million over the life of the bonds.

On December 3, 2020, the Commonwealth issued $\$ 600$ million in GO Bonds, Consolidated Loan of 2020, Series E. These bonds carry a $5.00 \%$ interest rate. The first principal payment is due on November 1, 2022 with final maturity on November 1, 2050.

On December 3, 2020, the Commonwealth issued approximately $\$ 444$ million in federally taxable GO Refunding Bonds 2020, Series E. The bonds were issued to advance refund approximately $\$ 432$ million of various GO bonds and carries interest rates of $0.277 \%$ to $1.970 \%$ with final maturity on November 1,2034 . The refunding resulted in reduced debt service of approximately $\$ 107$ million and a present value savings of approximately $\$ 90$ million over the life of the bonds.

On December 16, 2020, the Commonwealth issued approximately $\$ 1.5$ billion in GO Revenue Anticipation Notes (RANS) in three separate series; 2020 Series A for $\$ 500$ million, 2020 Series B (Federally taxable) for $\$ 400$ million and 2020 Series C (Federally taxable) for $\$ 600$ million. The Series A notes carries an interest rate of $2.0 \%$ and matures on April 21, 2021, the Series B notes carries a $0.23 \%$ interest rate and matures on May 20, 2021 and the Series C notes carries a $0.25 \%$ interest rate and matures on June 17, 2021.

Between July 1, 2020 and March 12, 2021, the Department of Unemployment Insurance drew down an additional $\$ 2.052$ billion under Title XII of the Social Security Act.

All debt issues were sold as tax exempt, except as noted.

| Budgetary debt service are reclassified to transfers out to a debt service fund for GAAP purposes as the Commonwealth does not have a statutory debt service fund |  | 1,315,529 |
| Transfers to component units reported on a GAAP basis. |  | $(1,669)$ |
| Total other financing uses as reported on the Statement of Revenues, Expenditures and Changes in Fund Balances - Governmental Funds | \$ | 3,826,716 |
| * Includes the General Fund, the Commonwealth Stabilization Fund and the Intragovernmental Services Fund, which are presented separately in the Statutory Basis Financial Report (SBFR) |  |  |
| See Independent Auditors' Report and notes to required supplementary information. |  |  |

## Note to Required Supplementary Information - Budgetary Reporting

The Commonwealth passes a combined budget for all budgeted operations. State finance law requires that a balanced budget be approved by the Governor and the Legislature. The Governor presents an annual budget to the Legislature, which includes estimates of revenues and other financing sources and recommended expenditures and other financing uses. The Legislature, which has full authority to amend the budget, adopts an expenditure budget by appropriating monies at the individual appropriation account level in an annual appropriations act. Generally, expenditures may not exceed the level of spending authorized for an appropriation account.

Before signing the appropriations act, the Governor may veto or reduce any specific item, subject to legislative override. Further changes to the budget established in the annual appropriations act may be made via supplemental appropriation acts or other legislative acts. These must also be signed by the Governor and are subject to the line item veto.

In addition, Massachusetts General Laws authorize the Secretary of Administration and Finance, with the approval of the Governor, upon determination that available revenues will be insufficient to meet authorized expenditures, to withhold allotments of appropriated funds which effectively reduce the account's expenditure budget. The majority of the Commonwealth's appropriations are non-continuing accounts which lapse at the end of each fiscal year. Others are continuing accounts for which the Legislature has authorized that an unspent balance from the prior year be carried forward and made available for spending in the current fiscal year. In addition, the Legislature may direct that certain revenues be retained and made available for spending within an appropriation. Fringe benefits, pension costs, and certain other costs which are mandated by state finance law are not itemized in the appropriation process and are not separately budgeted.

Because revenue budgets are not updated subsequent to the original appropriation act, the comparison of the initial revenue budget to the subsequent, and often modified, expenditure budget can be misleading. Also, these financial statements portray fund accounting with gross inflows and outflows, thus creating a difference to separately published budget documents, which eliminate some interfund activity. In conducting the budget process, the Commonwealth excludes those interfund transactions that by their nature have no impact on the combined fund balance of the budgeted funds.

The FY04 General Appropriation Act (Chapter 26, Section 167 of the Acts of 2003), amended section 9C, directing the Governor to notify the Legislature in writing as to the reasons for and the effect of any reductions in spending. Alternatively, the Governor may propose specific additional revenues to fund the deficiency. The Governor may also propose to transfer funds from the Stabilization Fund to cure the deficiency. This proposal must be delivered to the Legislature 15 days before any reductions take effect.

The following table summarizes budgetary activity for FY20 (amounts in thousands):

|  | Revenues |  | Expenditures |  |
| :---: | :---: | :---: | :---: | :---: |
| General Appropriation Act, Chapter 41 of the Acts of 2019: |  |  |  |  |
| Direct appropriations | \$ | 44,339,800 | \$ | 42,894,259 |
| Estimated revenues, transfers, retained revenue appropriations, and appropriations carried forward from FY2019. |  | - |  | 1,811,582 |

|  | $\$ 35,425,414$ | $\$$ | $31,355,000$ |  |

## NOTES TO THE SERS SCHEDULE

## FY2020 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in the investment rate of return
SERS changed its discount rate to $7.15 \%$ from $7.25 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 442$ million.

## FY2019 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in the investment rate of return
SERS changed its discount rate to $7.25 \%$ from $7.35 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 434$ million.

## FY2018 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in the investment rate of return
SERS changed its discount rate to $7.35 \%$ from $7.50 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 613$ million.

Change in mortality
The following mortality assumption changes were made in the January 1, 2018 Actuarial Valuation:

- Disabled members - would reflect the same assumptions as for superannuation retirees, but with an age set forward of one year.

This change resulted in an increase to the total pension liability of approximately $\$ 9$ million.

## FY2017 Changes in Actuarial Assumptions

## Changes of Benefit Terms:

Chapter 79 of the Acts 2014 established an early retirement incentive (ERI) program for certain employees of the highway division of the Massachusetts Department of Transportation whose positions have been eliminated due to automation of toll collections. Most members retiring under the ERI program had a date retirement of October 28, 2016. 112 members took the ERI and retired during FY2017. As a result, the total pension liability of SERS increased by approximately $\$ 10$ million.

## Changes of Assumptions:

Change in mortality
The following mortality assumption changes were made in the January 1, 2017 Actuarial Valuation:

- Pre-retirement - was changed to RP-2014 Blue Collar Employees table projected generationally with Scale MP-2016 set forward 1 year for females from RP-2000 Employees table projected generationally with Scale BB and a base year of 2009 (gender distinct).
- Post-retirement - was changed to RP-2014 Blue Collar Healthy Annuitant table projected generationally with Scale MP-2016 set forward 1 year for females from RP-2000 Healthy Annuitant table projected generationally with Scale BB and a base year of 2009 (gender distinct).

## NOTES TO THE SERS SCHEDULE

- Disabled members - is assumed to be in accordance with the RP-2000 Healthy Annuitant Table projected generationally with Scale BB and a base year of 2015 (gender distinct), and is unchanged from the prior valuation.

These changes resulted in an increase to the total pension of approximately $\$ 304$ million.

## FY2016 Changes in Actuarial Assumptions

## Changes in Benefit Terms:

Chapter 176 of the Acts of 2011 created a one time election for eligible members of the Optional Retirement Plan (ORP) to transfer to the State Employee's Retirement System (SERS) and purchase service for the period while members of the ORP. As a result, the total pension liability of SERS has increased by approximately $\$ 400$ million.

## FY2015 Changes in Actuarial Assumptions

## Changes in Benefit Terms:

In May 2015, Chapter 19 of the Acts of 2015 created an Early Retirement Incentive (ERI) for certain members of SERS who upon election of the ERI retired effective June 30, 2015. As a result, the total pension liability has increased by approximately $\$ 230$ million.

## Changes of Assumptions:

## Change in the investment rate of return

The Commonwealth revised its discount rate to $7.50 \%$ from $7.75 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 933$ million.

Change in mortality
The following mortality assumption changes were made in the January 1, 2015 Actuarial Valuation:

- Pre-retirement - was changed to RP-2000 Employees table projected generationally with Scale BB and a base year of 2009 (gender distinct) from RP-2000 Employees table projected 22 years with Scale AA.
- Post-retirement - was changed to RP-2000 Healthy Annuitant table projected generationally with Scale BB and a base year of 2009 (gender distinct) from RP-2000 Healthy Annuitant table projected 17 years with Scale AA.
- Disabled members - was changed to be assumed to be in accordance with RP-2000 Healthy Annuitant table projected generationally with Scale BB and a base year of 2015 (gender distinct) from RP-2000 Healthy Annuitant table projected 7 years with Scale AA set forward 3 years for males.

These changes resulted in an increase to the total pension liability of approximately $\$ 1.397$ billion.

## FY2014 Changes in Actuarial Assumptions

## Changes of Assumptions:

## Change in Experience

An updated experience study was issued on February 27, 2014 and encompassed the period January 1, 2006 to December 31, 2011. The study reviewed salary increases and rates of retirement, disability, turnover, and mortality. This study adjusted the mortality assumption which resulted in an increase to the total pension liability of approximately $\$ 102$ million.

See Independent Auditors' Report

## NOTES TO THE MTRS SCHEDULE

## FY2020 Changes in Actuarial Assumptions

## Changes of assumptions:

## Change in the investment rate of return

The Commonwealth revised its discount rate to $7.15 \%$ from $7.25 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 559$ million.

Change in mortality

The following mortality assumption changes were made in the January 1, 2020 Actuarial Valuation:

- Pre-retirement - was changed to Pub-2010 Teachers Employees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct) from RP-2014 White Collar Employees table projected generationally with Scale MP-2016 (gender distinct).
- Post-retirement - was changed to Pub-2010 Teachers Retirees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct) from RP-2014 White Collar Healthy Annuitant table projected generationally with Scale MP-2016 (gender distinct).
- Disabled members - was changed to be in accordance with Pub-2010 Teachers Retirees mortality table (headcount weighted) projected generationally with Scale MP-2018 (gender distinct).

These changes resulted in an increase to the total pension liability of approximately $\$ 300$ million.

## FY2019 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in the investment rate of return
The Commonwealth revised its discount rate to $7.25 \%$ from $7.35 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 577$ million.

## FY2018 Changes in Actuarial Assumptions

## Changes of Assumptions:

## Change in the investment rate of return

The Commonwealth revised its discount rate to $7.35 \%$ from $7.50 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 845$ million.

## FY2017 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in mortality
The following mortality assumption changes were made in the January 1, 2017 Actuarial Valuation:

- Pre-retirement - was changed to RP-2014 White Collar Employees table projected generationally with Scale MP-2016 (gender distinct) from RP-2014 Employees table projected generationally with Scale BB).

## NOTES TO THE MTRS SCHEDULE

- Post-retirement - was changed to RP-2014 White Collar Healthy Annuitant table projected generationally with Scale MP-2016 (gender distinct) from RP-2014 Healthy Annuitant table projected generationally with Scale BB).
- Disabled members - is assumed to be in accordance with RP-2014 Healthy Annuitant table projected generationally with Scale BB and a base year of 2014 set forward 4 years and is unchanged from the prior valuation.

These changes resulted in an increase to the total pension liability of approximately $\$ 1.176$ billion.

## FY2015 Changes in Actuarial Assumptions

## Changes of assumptions:

## Change in the investment rate of return

The Commonwealth revised its discount rate to $7.50 \%$ from $7.75 \%$. This change resulted in an increase to the total pension liability of approximately $\$ 1.190$ billion.

Change in mortality
The following mortality assumption changes were made in the January 1, 2015 Actuarial Valuation:

- Pre-retirement - was changed to RP-2014 Employees table projected generationally with Scale BB and a base year of 2014 (gender distinct) from RP-2000 Employees table adjusted for "white-collar" employment projected 22 years with Scale AA.
- Post-retirement - was changed to RP-2014 Healthy Annuitant table projected generationally with Scale BB and a base year of 2014 (gender distinct) from RP-2000 Healthy Annuitant table adjusted for large annuity amounts and projected 17 years with Scale AA.
- Disabled members - was changed to be assumed to be in accordance with RP-2014 Healthy Annuitant table projected generationally with Scale BB and a base year of 2014 set forward 4 years from RP-2000 Healthy Annuitant table adjusted for large annuity amounts and projected 7 years with Scale AA set forward 3 years for males.

These changes resulted in an increase to the total pension liability of approximately $\$ 1.890$ billion.

## FY2014 Changes in Actuarial Assumptions

## Changes of Assumptions:

## Change in Experience

An updated experience study was issued on February 27, 2014 and encompassed the period January 1, 2006 to December 31, 2011. The study reviewed salary increases and rates of retirement, disability, turnover, and mortality. This study adjusted the mortality assumption which resulted in an increase to the total pension liability of approximately $\$ 108$ million.

See Independent Auditors' Report

## NOTES TO THE SRBT SCHEDULE

## FY2020 Changes in Actuarial Assumptions

## Change in discount rate

The discount rate was decreased to $2.28 \%$ (based on a blend of the Bond Buyer Index rate $2.21 \%$ ) as of the measurement date and the expected rate of return on assets of $7.15 \%$ ) as required by GASB Statement No. 74. This decrease in the discount rate resulted in an increase in the total OPEB liability of approximately $\$ 4.272$ billion.

## Change in excise tax

The excise tax was removed. This resulted in a decrease in the total OPEB liability of approximately $\$ 502$ million.

## Change in per capita claims costs

Per capita claims costs were updated based on changes in the underlying claims and benefit provisions. This change resulted in a decrease in the total OPEB liability of approximately $\$ 1.749$ billion.

## Change in medical trend rates

The medical trend rates were updated based on the SOA-Getzen trend rate model version 2020 b, the impact of the discontinuation of the ACA Health Insurer Fee and Excise Tax. The short-term assumptions were based on a review of the Commonwealth's historical trend rates during fiscal years 2019 and 2020, along with industry surveys, separately for nonMedicare and Medicare benefits. This change resulted in an increase in the total OPEB liability of approximately $\$ 706$ million.

Change in salary scale
The salary scale assumption was updated from a constant $4 \%$ assumption to rates that vary by years of service and group classification, consistent with SERS. This change resulted in a decrease in the total OPEB liability of approximately $\$ 441$ million.

Change in future retirees' plan participation rates
The proportion of future retirees cover a spouse was reduced from $80 \%$ to $60 \%$, This resulted in a decrease in the total OPEB liability of approximately $\$ 1.117$ billion.
$35 \%$ of employees currently opting out of active employee health coverage are assumed to enroll in retiree coverage. An $8 \%$ load was applied to the active liability to estimate the impact of its population. This resulted in an increase in the total OPEB liability of approximately $\$ 531$ million.

Change in medical plan election rates
Retirees and spouses (if covered) are assumed to be non-Medicare eligible prior to age 65 and Medicare eligible at age 65 , unless their spouse is over age 65 and non-Medicare eligible. This resulted in an increase in the total OPEB liability of approximately $\$ 350$ million.

## FY2019 Changes in Actuarial Assumptions

## Changes of Assumptions:

## Change in base OPEB rates for medical and prescriptions

Annually, a recalibration of the underlying healthcare costs is preformed using healthcare cost experience from the GIC and developing new per person annual costs under the different health plan options. The expectation is that the new rates will be equal to the prior year rates plus one year of healthcare trend (medical inflation).

This resulted in a decrease to the total OPEB liability of approximately $\$ 1.638$ billion.

## NOTES TO THE SRBT SCHEDULE

## Change in trend on future costs

The healthcare trend rate decreased from $8.0 \%$ in FY2018 to $7.5 \%$ in FY2019, which impacts the high cost excise tax. This resulted in a decrease to the total OPEB liability of approximately $\$ 1.067$ billion.

Change in medical plan election rates
The pre age 65 medical plan election percentages were updated to better reflect plan experience and resulted in a decrease to the total OPEB liability of approximately $\$ 90$ million.

Change in future retirees' plan participation rates
Plan participation rate for future retirees was changed from $80 \%$ to $85 \%$ to better reflect recent plan experience and increased the OPEB liability approximately $\$ 62$ million.

Change in discount rate
The discount rate was decreased to $3.69 \%$ (based on a blend of the Bond Buyer Index rate ( $3.51 \%$ ) as of the measurement date and the expected rate of return on assets) as required by GASB Statement No. 74. This decrease in the discount rate resulted in an increase in the total OPEB liability of approximately $\$ 798$ million.

## FY2018 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in base OPEB rates for medical and prescriptions
Annually, a recalibration of the underlying healthcare costs is preformed using healthcare cost experience from the GIC and developing new per person annual costs under the different health plan options. The expectation is that the new rates will be equal to the prior year rates plus one year of healthcare trend (medical inflation).

This resulted in an increase to the total OPEB liability of approximately $\$ 937$ million.
Change in trend on future costs
The healthcare trend rate decreased from $8.5 \%$ in FY2017 to $8.0 \%$ in FY2018, which impacts the high cost excise tax. This resulted in an increase to the total OPEB liability of approximately $\$ 88$ million.

## Change in mortality

The following mortality assumption changes were made in the January 1, 2018 Actuarial Valuation:

- Disabled members - would reflect the same assumptions as for superannuation retirees, but with an age set forward of one year.

This change resulted in a decrease to the total OPEB liability of approximately $\$ 2$ million.

## Change in discount rate

The discount rate was increased to $3.95 \%$ (based on a blend of the Bond Buyer Index rate $(3.87 \%$ ) as of the measurement date and the expected rate of return on assets) as required by GASB Statement No. 74. This increase in the discount rate resulted in a decrease to the total OPEB liability of approximately $\$ 1.001$ billion.

## NOTES TO THE SRBT SCHEDULE

## FY2017 Changes in Actuarial Assumptions

## Changes of Assumptions:

Change in discount rate
The discount rate was increased to $3.63 \%$ (based on a blend of the Bond Buyer Index rate ( $3.58 \%$ ) as of the measurement date and the expected rate of return on assets) as required by GASB Statement No. 74. The June 30, 2016 discount rate was calculated to be $2.80 \%$. This increase in the discount rate resulted in a decrease to the total OPEB liability of approximately $\$ 2.394$ billion.

## NOTES TO THE SCHEDULES OF PROPORTIONATE SHARE OF THE NET PENSION LIABILITY AND CONTRIBUTIONS

## SERS and MTRS:

In accordance with Chapter 32 of the Massachusetts General Laws (MGL), the Commonwealth's statutorily determined contributions to SERS and MTRS are based on a three-year funding schedule adopted by the legislature based upon the previous year's actuarial valuation. The most recent funding schedule was adopted in January 2017 (for fiscal years 2018 through 2020) based upon the January 1, 2016 actuarial valuation as prepared by the Public Employee Retirement Administration Commission (PERAC) using the following assumptions:

1. The annual required contribution for FY2020 was determined as part of the January 1, 2016 actuarial valuation using the entry age normal cost method.
2. The actuarial assumptions included (a) $7.50 \%$ investment rate of return, (b) $3.50 \%$ interest rate credited to the annuity savings fund and (c) $3.00 \%$ cost of living increase per year (on the first $\$ 13,000$ of an allowance).
3. Salary increases are based on analyses of past experience but range from $4.0 \%$ to $9.0 \%$ depending on group and length of service.
4. The assumptions do not include post-retirement benefit increases, which are taken into account when granted under amendments to General Laws.
5. The actuarial value of assets was determined using various techniques that smooth the effects of short-term volatility in the market value of investments, with a phased-in approach. Under this approach, $20 \%$ of the gains or losses occurring in the prior year are recognized, $40 \%$ of those occurring two years prior, etc., so that $100 \%$ of gains and losses occurring five years prior are recognized. The actuarial value of assets is adjusted if necessary in order to remain between $90 \%$ and $110 \%$ of market value.
6. Normal costs are amortized using level percentage of payroll, closed.
7. The remaining amortization period for the unfunded pension liability at January 1, 2016 was 20 years to FY36.

## BRS-Teachers:

The actuarially determined contributions were calculated as of December 31, 2018. The funding requirements are established for the employers' fiscal year ended June 30, 2019 and later years and are analyzed based on the preceding two years' experience. The following actuarial methods and assumptions were used to determine the required contribution rates:

Actuarial cost method
Amortization method
Remaining amortization period
Asset valuation method

Inflation
Salary increases
Investment rate of return

See Independent Auditors' Report

Entry age normal cost method
Prior year's contribution increased by $8.94 \%$ for Boston Teachers
17 years remaining as of January 1, 2019 for Boston Teachers
Sum of actuarial value at beginning of year, contributions and investment earnings based on the actuarial interest assumption less benefit payments and operating expenses plus $20 \%$ of market value at end of year in excess of that sum, plus additional adjustment toward market value as necessary so that final actuarial value is within $20 \%$ of market value.
3.25\%

Varies by length of service with ultimate rate of $4.00 \%$ for Boston Teachers
7.15\% for Boston Teachers

# Schedule of Employer Contributions - OPEB 

## Commonwealth of Massachusetts

Last 10 Years

# Statistical Section 

(Unaudited)

Schedule of Net Position by Component - Last Ten Fiscal Years
Changes in Net Position - Last Ten Fiscal Years
Fund Balances, Governmental Funds - Last Ten Fiscal Years
Ten-Year Schedule of Revenues and Other Financing Sources - All Governmental Fund Types
Ten-Year Schedule of Expenditures and Other Financing Uses by Secretariat - All Governmental Fund Types
Personal Income by Industry - Last Ten Calendar Years
Personal Income Tax Filers and Liability by Income Level Calendar (Tax) Years 2017 and 2008
Ten-Year Schedule of Per Capita General Long-Term Bonded Debt and Capital Leases
Ten-Year Schedule of Outstanding Direct Debt and Statutory Debt Limit
Ten-Year Schedule of Pledged Revenue Coverage
Ten-Year Schedule of Percentage of Annual Debt Service Expenditures for General Bonded Debt to Total Non-
Capital Expenditures - Fund Perspective - All Governmental Fund Types
Component Units Revenue Bond Coverage for the Last Ten Fiscal Years
Ten-Year Schedule of Massachusetts and United States Resident Population
Ten-Year Schedule of Massachusetts and United States Resident Per Capita Net Income
Ten-Year Schedule of Annual Average Civilian Labor Force, Unemployment and Unemployment Rates
Largest Private Sector Massachusetts Employers - 2019 and 2010
Full Time Equivalent Employees by Function / Program - Last Ten Years
Average Annual Medicaid Caseload and Medicaid Expenditure - Last Ten Fiscal Years
Massachusetts Road Inventory - Calendar Year End, Lane Miles by Type - Last Ten Calendar Years
Massachusetts Real Property Owned and Leased Annual Inventory, Acreage, Improvements and Square Footage

- Last Ten Years

Massachusetts Public Higher Education Enrollment and Degrees Conferred - Last Ten Academic Years
Calculation of Transfers - Stabilization Fund
Calculation of Transfer - Tax Reduction Fund
Massachusetts General Information

## Statistical Section Narrative and Table of Contents

This part of the Commonwealth of Massachusetts' Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Commonwealth's overall financial health.

## Contents

## Financial Trends

These schedules contain trend information to help the reader understand how the Commonwealth's financial performance and fiscal health has changed over time. The schedules are presented for the last ten fiscal years, except where noted. Schedules included are:

Entity Wide Perspective:
Schedule of Net Position by Component, last ten fiscal years ..... 202
Changes in Net Position, last ten fiscal years ..... 204
Fund Perspective:
Fund Balances, Governmental Funds, last ten fiscal years ..... 206
Ten-Year Schedule of Revenues and Other Financing Sources, All Governmental Fund Types - Fund Perspective ..... 208
Ten-Year Schedule of Expenditures And Other Financing Uses By Secretariat, All Governmental Fund Types - Fund Perspective ..... 210

## Revenue Capacity

These schedules contain information to help the reader assess the Commonwealth's most significant revenue source, income taxation. Schedules included are:

Personal Income by Industry, Last Ten Calendar Years -
(inclusive of the Commonwealth's highest income tax rate)212
Personal Income Tax Filers and Liability by Income Level, Tax Years 2018 and 2009 ..... 214

## Debt Capacity

These schedules present information to help the reader assess the affordability of the Commonwealth's current levels of outstanding debt and the Commonwealth's ability to issue additional debt in the future. Schedules included are:

Ten Year Schedule of Per Capita General Long-Term Bonded Debt and Capital Leases ................................. 215
Ten Year Schedule of Outstanding Direct Debt and Statutory Debt Limit..................................................... 216
Ten Year Schedule of Pledged Revenue Coverage ........................................................................................... 218
Ten Year Schedule of Percentage of Annual Debt Service Expenditures for General Bonded
Debt to Total Non - Capital Expenditures - Fund Perspective, All Governmental Fund Types............... 220
Component Unit Revenue Bond Coverage for the Last Ten Fiscal Years........................................................ 221

## Demographic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within the Commonwealth's financial activities take place. Schedules included are:
Ten Year Schedule of Massachusetts and United States Resident Population ..... 222
Ten Year Schedule of Massachusetts and United States Resident Per Capita Net Income ..... 223
Ten Year Schedule of Annual Average Civilian Labor Force,
Unemployment and Unemployment Rates For Massachusetts and The United States ..... 224
Largest Private Sector Employers, 2020 and 2011 ..... 225
Operating Information
These schedules offer operating data to help the reader understand how the information in the Commonwealth'sfinancial report relates to the services it provides and the activities it performs. Schedules included are:
Full Time Equivalent Commonwealth Employees by Function / Program, Last Ten Years ..... 226
Average Annual Medicaid Caseload and Expenditures - Fund Perspective, Last Ten Fiscal Years ..... 228
Massachusetts Road Inventory, Calendar Year End, Lane Miles by Type, Last Ten Calendar Years ..... 229
Commonwealth Owned Real Property by Executive Office, Last Ten Years ..... 230
Massachusetts Public Higher Education, Enrollment and Degrees Conferred, Last Ten Academic Years ..... 232
Other Information
Calculation of Transfers: Stabilization Fund ..... 234
Calculation of Transfers: Tax Reduction Fund ..... 235
Massachusetts General Information ..... 236

(1) Restricted fund balance decreased from FY20 mainly due to reclassification of governmental funds to fiduciary funds as a result of the implementation of GASB Statement No. 84.
(2) The increase in the committed fund balance from FY20 is due to an increase of approximately $\$ 77$ million in the ending balance of the Commonwealth's stabilization fund, an increase of approximately $\$ 142$ million in the other special revenue funds and an increase of approximately $\$ 67$ million due to reclassification of fiduciary funds to governmental funds as a result of the implementation of GASB Statement No. 84.
(3) Assigned fund balance increased from FY20 as a result of an increase in authorizations reappropriated from prior years of approximately $\$ 286$ million and an approximately $\$ 111$ million increase in the amounts held by the Massachusetts School Building Authority (MSBA) for grants and loans to other governmental entities.

(1) Excludes Massachusetts School Building Authority debt. Bonded debt for each fiscal year includes unamortized premiums or discounts.
(2) The Massachusetts School Building Authority (MSBA) is presented as a blended component unit in these financial statements.
(3) Business-type activities bond debt includes Federal Unemployment insurance borrowing under Title XII of the Social Security Act, notes payable of the Institutions of Higher Education and unamortized premiums or discounts.
(4) Population estimates have been restated to most current United States Census Bureau Data. Population data is reported as of July 1 of the previous year. Source: - HTTP://www.fedstats.gov (US Census Bureau.)

See Independent Auditors' Report

## Ten - Year Per Capita Debt and Capital Leases

## Ten Year Schedule of Outstanding Direct Debt and Statutory Debt Limit

(Amounts in thousands)

(1) Exclusive of the Massachusetts School Building Authority debt.
(2) Inclusive of crossover refunding amounts.
(3) For fiscal 2009 through 2012, debt outstanding was defined in state finance law as net proceeds of debt issued. State finance law was amended, effective January 1, 2013, to change the statutory definition of outstanding debt from net proceeds to principal. Therefore, fiscal years prior to 2013 are calculated using net proceeds; fiscal 2013 and thereafter are calculated using principal.
(4) Section 4 of Chapter 220 of the Acts of 2016 exempted bonds issued under the Rail Enhancement Program from the statutory debt limit.

* Section 60A of Chapter 165 of the Acts of 2012, as amended, reset the statutory defined debt limit, effective July 1, 2012, to $\$ 17.070$ billion

Ten Fiscal Year Schedule of Pledged Revenue Coverage
Special Obligation Highway Bonds (Motor Fuels Taxation and Motor Vehicle Fees), Convention Center Bonds (Tax Incremental Financing) and Grant Anticipation Notes (Federal Highway Grants)
(Statutory Basis, Amounts in Thousands, Except for Ratios)
Highway Bonds $\quad \frac{2020}{2019} \frac{2018}{2017} \frac{2016}{}$

For issues prior to December 2010, the bonds are secured by a pledge of $6.86 \phi$ of the $21 ¢$ per gallon state gasoline excise tax for FY2008 and before. For FY2009 and after, the pledge is up to $10 ¢$ of the tax. Bonds issued in December 2010, May 2012 and November 2013 (Commonwealth Transportation Fund, or "CTF bonds") are secured by a senior lien on 17.085 cents of the total 24 cent per gallon gasoline tax, the full 21 cents per gallon of special fuels taxes (comprised primarily of taxes on diesel fuel), the full $19.1 \%$ of the average price per gallon tax on liquefied natural gas and all Registry of Motor Vehicle fees deposited in the Commonwealth Transportation Fund. Federal Build America Bonds subsidies are also pledged to all CTF bonds. The bonds also have a subordinate lien on $6.86 ¢$ of the $24 \phi$ per gallon gasoline tax not included in the senior lien. Revenues pledged to the bonds are available prior to use for any other purposes. Thus, operating expenses paid from these revenue sources are not applicable for the purpose of calculating debt service coverage ratios and are not shown in this table. The 2010 bonds were issued as federally taxable Build America Bonds/ Recovery Zone Economic Development Bonds; the programs provide an interest subsidy of $35-45 \%$ directly to the Commonwealth. The interest subsidy is shown as pledged funds and debt service is gross of the subsidy.

## Convention Center Bonds

These bonds are secured by amounts payable to the Convention Center Fund, which include certain hotel tax receipts in Boston, Cambridge, Springfield, surcharges on car rentals, parking, sightseeing tours and cruises and sales tax receipts in those cities. Revenues pledged to the bonds are available prior to use for any other purposes. Thus, operating expenses paid from these revenue sources are not applicable for the purpose of calculating debt service coverage rations and are not shown in this table.

## Grant Anticipation Notes (GANS)

Notes issued prior to December 2010 ("Senior Federal Highway Notes") were secured by all federal highway reimbursements, which are deposited in the Grant Anticipation Note Trust fund. The outstanding pre-December 2010 notes were retired in June 2015 and Notes issued in December 2010 ("Federal Highway Grant Anticipation Notes") and after are secured by all federal highway reimbursements. Revenues pledged to the notes are available prior to use for any other purposes. Thus, operating expenses paid from these revenue sources are not applicable for the purpose of calculating debt service coverage rations and are not shown in this table. The 2010 bonds were issued as federally taxable Build America Bonds; the program provides an interest subsidy of $35 \%$ directly to the Commonwealth. The interest subsidy is shown as pledged funds and debt service is gross of the subsidy.

Post 2010 GANS (Includes Revenues in Excess of those Needed to Pay Debt Service on Pre- 2010 Highway Bonds)

*Uninsured rating, if available.

| 2011 |  | 1,444,813 |  | 1,170,149 | 1.23 |

(1) Net revenues represent revenue pledged and available for the repayment of revenue bonds. In most cases, revenue pledged for the bonds is available prior to use for any other purposes. Thus, operating expenses paid from these revenue sources are not applicable when calculating debt service coverage and are not subtracted from pledged revenues.
(2) Debt service requirements represent total debt service payments made less debt service paid on short-term borrowings of only those Authorities with revenue bonds outstanding.

Calculation of Transfers: Stabilization Fund*

# Calculation of Transfers: Tax Reduction Fund 

June 30, 2020
(Amounts in thousands)

This statement is prepared pursuant to Chapters 29 Sections 2H and 2I of the Massachusetts General Laws, as amended. It is prepared on the statutory basis of accounting and presents information contained in the official books and accounting records of the Commonwealth. Supporting information is presented in individual schedules, as indicated, and in the Financial Section of this report.

The computation is as follows:

Part 1: Comparison of Stabilization Fund, after current fiscal year transfers, to $15 \%$ of budgeted revenues and other financial resources:

Undesignated fund balance in the Stabilization Fund..........................................................................501,181

Stabilization Fund excess, if any, transferable to Tax Reduction Fund
\$

Part 2: Status of Stabilization Fund after transfers:
Stabilization Fund balance
Transfer to Tax Reduction Fund $\qquad$

Stabilization Fund balance after transfer to Tax Reduction Fund \$ 3,501,181

Part 3: Status of Tax Reduction Fund after transfers:

Transfers from Stabilization Fund $\qquad$

\$ $\qquad$

| Admitted to Union (6th State): | 1788 |
| :--- | :--- |
| Population: | $6,882,635$ |

The State Seal, adopted by Governor John Hancock and the Council on December 13, 1780 and made official by the General Court on June 4, 1885, is circular and bears a representation of the arms of the Commonwealth encircled with the words "Sigillum Reipublicae Massachusettensis" (Seal of the Republic of Massachusetts). The arms, according to legislative enactment, consists of "a shield having a blue field or surface with an Indian thereon, dressed in a shirt and moccasins, holding in his right hand a bow, and in his left hand an arrow, point downward, all of gold; and in the upper corner of the field, above his right arm, bent at the elbow, clothed and ruffled, with the hand grasping a broadsword."

## Capital: Boston <br> Nickname: Bay State

The State Flag is white, a representation of the coat of arms on both sides. It was adopted in its final form in 1971; before that, the obverse side depicted a pine tree.

The Mayflower

The Cod, a soft-finned fish, usually $10-20 \mathrm{bs}$. A sculpture of a cod hangs in the House of Representatives as a tribute to this useful aquatic creature.

The State Tree

The American Elm was adopted as the official tree March 21, 1941 to commemorate the fact that General George Washington took command of the Continental Army beneath one on Cambridge Common in 1775.

[^5]:    SOURCE: Office of the Comptroller
    (1) Fiscal 2016 change in benefit terms reflect costs related to Optional Retirement Plan members transferring to the State Employees' Retirement System pursuant to Chapter 176 of the Acts of 2011. Fiscal 2017 change in benefit terms reflect retirement incentive program for certain employees of the highway division of the Massachusetts Department of Transportation.
    (2) The changes in assumptions in fiscal 2017 were due to improved future mortality.
    (3) The changes in assumptions in fiscal 2018 were due to (i) a decrease in the discount rate to $7.35 \%$ from $7.50 \%$ in the January 1, 2018 actuarial valuation and (ii) a change in the mortality assumption for disabled members.
    (4) The changes in assumptions in fiscal 2019 were due to a decrease in the discount rate to $7.25 \%$ from $7.35 \%$.
    (5) The changes in assumptions in fiscal 2020 were due to a decrease in the discount rate to $7.15 \%$ from $7.25 \%$.
    (6) Reflects compensation in the January 1 actuarial valuation for each fiscal year.
    (7) The covered payroll for fiscal 2020 reflects the compensation in the January 1, 2019 actuarial valuation.

[^6]:    SOURCE: Executive Office for Administration and Finance and Public Employee Retirement Administration Commission.
    (1) Actuarial results reflect figures and assumption outlined in the January 1, 2019 Commonwealth Actuarial Valuation Report, with revisions to the investment return and mortality assumptions as noted above. Fiscal 2021 assets are as of December 31, 2020.
    (2) The Funded Ratio is equal to the Actuarial Value of Assets divided by the Actuarial Accrued Liability.
    (3) Fiscal 2022 and beyond are estimates.
    (4) Aggregate Commonwealth pension obligations include obligations with respect to MSERS, MTRS, Boston teachers, and local cost-ofliving adjustments.

    (1) Requirement to deposit 5\% of capital gains tax revenues was suspended by Legislature for fiscal 2015.
    (2) The fiscal 2016 budget also included a provision that any shortfall in the scheduled amount be paid from a transfer of fiscal 2016 tax revenues exceeding $\$ 100$ million generated by a tax amnesty program that was also authorized in the fiscal 2016 budget, prior to transferring tobacco settlement proceeds.
    (3) Capital gains tax revenues did not exceed statutory capital gains threshold in fiscal 2017, therefore no deposit was made.
    (4) In fiscal years 2016 and 2020, the Commonwealth temporarily suspended the requirement to transfer 5\% of capital gains tax collections above the threshold.
    (5) Unaudited.
