Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles applied on a basis consistent with that of the September 30, 2022 audited consolidated financial statements for the System. The System presumes that the users of this interim financial information have read or have access to the System's audited consolidated financial statements and that the adequacy of additional disclosures needed for a fair presentation may be determined in that context. Information contained in the System's audited consolidated financial statements for the years ended September 30, 2022, and 2021 is incorporated herein. Footnotes and other disclosures that would substantially duplicate the disclosures contained in the System's most recent audited consolidated financial statements have been omitted. Accordingly, these financial statements do not include all the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all transactions considered necessary for a fair presentation have been included.

Patient volumes and net operating revenue and results are subject to seasonal variations caused by several factors. Monthly and periodic operating results are not necessarily representative of operations for a full year for various reasons, including levels of occupancy and other patient volumes, interest rates, unusual or infrequent items and other seasonal fluctuations. These same considerations apply to year-to-year comparisons.

Principles of Consolidation

The accompanying consolidated financial statements present the accounts and transactions of the System and its subsidiaries. All significant intercompany revenue and expenses and intercompany balance sheet accounts have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, including estimated uncollectible accounts receivable for services to patients, and liabilities, including estimated net settlements with third-party payors and professional liabilities, and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Estimates also affect the amounts of revenue and expenses reported during the reporting period. Actual results could differ from those estimates.

For the six-months ended March 31, 2023 and 2022 the System recorded changes in estimate including amounts related to third-party payor settlements.

Interest Rate Swap Agreements

The System utilizes interest rate swap agreements to reduce risks associated with changes in interest rates. Interest rate swap agreements are reported at fair value with changes in fair value during the year recorded as nonoperating gains (losses), net. The System is exposed to credit risk in the event of nonperformance by the counterparties to its interest rate swap agreements. The System is also exposed to the risk that the swap receipts may not offset its variable rate debt service. To the extent these variable rate receipts do not equal variable interest payments on the bonds, there will be a net loss or net benefit to the System.

3. Fair Value Measurements

In determining fair value, the System utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The System also considers nonperformance risk in the overall assessment of fair value.

ASC 820-10, Fair Value Measurements and Disclosures, establishes a valuation hierarchy for fair value disclosure purposes. This hierarchy is based on the transparency of the inputs utilized for the valuation. The levels are defined as follows:

- Level 1: Quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities. This established hierarchy assigns the highest priority to Level 1 assets.
- Level 2: Observable inputs that are based on data not quoted in active markets, but corroborated by market data.
- Level 3: Unobservable inputs that are used when little or no market data is available. The Level 3 inputs are assigned the lowest priority.

Financial assets carried at fair value as of March 31, 2023 are classified in the following table by level within the fair value hierarchy as described above (in thousands):
